# In treating angina, what do you want: safety or effectiveness?

## or both?

### Which $\beta$ -blocker?

TRASICOR is outstandingly effective in preventing anginal attacks.<sup>1</sup>

Its advantages over propranolol include:

- less risk of heart failure<sup>2</sup>
- less risk of bronchospasm in asthmatics<sup>3</sup>

The safety advantages of TRASICOR over propranolol are shared by practolol but practolol's relative efficacy in angina does not appear to be comparable.<sup>4, 5, 6</sup>

Only TRASICOR combines maximum efficacy with safety advantages. Whenever angina is sufficiently severe to warrant the use of trinitrin the logical first choice is now TRASICOR.

# Diseases of the Joints

Arthritis and rheumatism are common complaints, even if patients are often vague about the exact meaning of the terms they use. In the last few years the diagnosis of joint disorders has become more exact, while the introduction of local and systemic steroid therapy and the powerful non-steroidal anti-inflammatory drugs has revolutionized treatment. In an attempt to bring doctors up to date in this field, the *B.M.J.* published in 1969 a series of short articles giving practical advice on the common disorders of the joints. The articles have now been revised by their authors and collected together to form this handbook on the management of arthritis.

## 1905 An important year for coffee lovers

It was the year Dr. Ludwig Roselius discovered how to remove caffeine from coffee without altering its flavour.

Since then, thanks to him and his Kaffee H.A.G., no one need say "No" to coffee! Today, in nearly every country in the world, the Medical Profession is recommending it increasingly in cases where caffeine is contra indicated.

Pain is but a symptom, best  
treated with the lowest effective  
dose of any medicament

## Low dosage, low cost in the control of pain

Clinical experience shows that, in fibrositis, dysmenorrhoea, sinusitis, and other commonly encountered conditions of persistent pain, just one tablet of Paramol-118 every four hours provides relief.

By fortifying 500 mg paracetamol with a low dose (10 mg) of dihydrocodeine it is possible to control pain with a minimum daily intake of both drugs: in such low dosage the possibility of side effects is remote.

Needless to say, if necessary, this dosage can be increased to two tablets every four hours—and, even at this higher dosage level, risk of any really undesirable side effect is insignificant.

Costs, too, are kept low: with one tablet every four hours the basic NHS cost of a day's therapy is only about 2p.

# Actifed and Space age Medicine

The astronaut above is about to be subjected to G-forces in a massive centrifuge. In these situations it was thought that G-forces might restrict astronauts from performing vital tasks. To overcome this, an ingenious device which bounces light into the eye, can be made to actuate a switch or system, whenever the pupil crosses the path of the beam. This sight switch has already been adapted to help paraplegics to help themselves.

In the space programme, medical benefit has been a two-way exchange. Of the medicines taken on Apollo flights, ACTIFED\* has been repeatedly chosen as the decongestant. ACTIFED TABLETS and SYRUP contain the decongestant pseudoephedrine and the established antihistamine triprolidine. ACTIFED COMPOUND LINCTUS contains, in addition, codeine. It provides effective and palatable cough control for all age groups.

In 82 patients<sup>1</sup> previously completely intolerant of nitrofurantoin, there was virtually a total absence of gastric side-effects when they were treated with CEDURAN. In a recent survey<sup>2</sup> of the sensitivities of urinary pathogens, nitrofurantoin was one of the only three preparations recommended as primary oral treatments. And in a further report,<sup>3</sup> nitrofurantoin had the lowest number of resistant strains of the agents studied.

# Let the blood flow through

In the treatment of ischaemia due to intermittent claudication, cerebral arteriosclerosis and vasospastic disorders, Bradilan® has achieved excellent results. Because Bradilan employs tetranicotinylfructose, the molecule of which is gradually hydrolysed in the intestine, release is smooth and even - with no peaks or troughs. Consequently, efficient and prolonged vasodilation is maintained, with less risk of over dilation in flush areas. For the same reason, headaches are a rare occurrence. Bradilan acts directly on vessel walls and is especially indicated when ischaemia is due to vasospasm. Ideally, treatment should be continued for at least 12 weeks so that progress can be realistically evaluated.

# Trends in Clinical Pathology

## Essays in Honour of Gordon Signy

This book is no pious collection of personal tributes but a survey of the old and the new disciplines in clinical pathology since the second world war — research in atherosclerosis and ischaemic heart disease, progress in medical virology, microbiology and cytology, the impact of antibiotics on medical bacteriology, chemical pathology and also molecular defence, haematology in mid-century, including haemostasis and blood transfusion. The place of fibrin in the story of hyalin is another modern study, so also is that on automation. The outlook on some members of the family Enterobacteriaceae is changing, and the 'old' forensic medicine is indeed new. And those pathologists working in the under-developed countries are not forgotten. The contributors are internationally renowned.

### ST. ANDREW'S HOSPITAL

Medical Director, James Harper, M.B., F.R.C.P. (Edin.), F.R.C.Psych.  
St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Wantage House, a reception unit in the grounds which is equipped for the investigation and treatment of all forms of psychiatric illness. In addition, there is accommodation mainly in private rooms, both in main hospital and in various villas for longer-stay patients and geriatric patients.

The hospital's amenities include Gloucester House, which comprises an Occupational Therapy Department, a swimming pool, a squash-court and library, while in the grounds there are tennis courts, a nine-hole golf course, etc.

Fees range from £31.50 per week, and subscribers to private medical insurance schemes such as British United Provident Association and Private Patients Plan, may claim benefit in respect of these charges.

Further particulars may be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel: Northampton 34354) who can be seen in consultation by appointment, either at the hospital or at 55 Harley Street, London, W.1. 99

# Fucidin H Ointment *First*

Whenever a topical antibiotic/steroid preparation is indicated.

Combines the proven antipruritic/anti-inflammatory action of hydrocortisone with the rapid, bactericidal action of Fucidin. In view of the mounting concern about the adverse effects of the more potent steroids "and the proven clinical effectiveness of Fucidin H Ointment in the treatment of a variety of common dermatoses, "... there would seem to be no case for the use of a more potent steroid until hydrocortisone has been first tried."

Available in packs of 10g and 25g.
