The beauty of Calmurid HC in eczema:

The difficulty of treating the essentially inflammatory condition of dry eczema is that it occurs beneath a barrier of dry, scaly skin.

So the heavy artillery is wheeled in. The massively potent fluorinated steroids. The logic: *saturation* treatment. The result? Only too often such serious side effects as skin atrophy and wasting, systemic absorption and adrenal suppression.

Now reverse the logic. *Select*, rather than saturate. Take a medicament proven highly successful in the treatment of dry, scaly skin. Calmurid. Use its deeply penetrating action as a means of carrying the milder, natural steroid, hydrocortisone, right through to the eczematous area.

The result this time is a very evident clearance of inflammation. And the remarkably early disappearance of the dry, scaly skin.

Double blind trials have shown that Calmurid incorporating hydrocortisone at least equals the potent fluorinated steroids in efficacy. It is without their hazards. It lends itself especially to the treatment of infants and children and for use in all long-term therapy. A sample awaits your request.

it is skin deep

Indications

Atopic Eczema, Besnier's Prurigo, acute and chronic allergic eczema, neurodermatitis and other hyperkeratotic skin conditions with accompanying inflammation.

Unwanted effects

Being hypotensive and acidic, Calmurid HC may cause smacking following initial application to raw fissures or weeping surfaces.

Application to mucous membranes may cause burning for the same reason.

Contra-indications

Skin tuberculosis and infection, deep ulcers and dental infections. It helps to spread chicken pox viruses. Symptoms of severe cellulitis and pyodermitis (see dry cream) should be combated with antimicrobial treatment.

Application

Apply twice daily after washing the affected area. If a lotion is moist therapy should be given at drying areas before instituting Calmurid HC therapy.

Calmurid HC penetrates

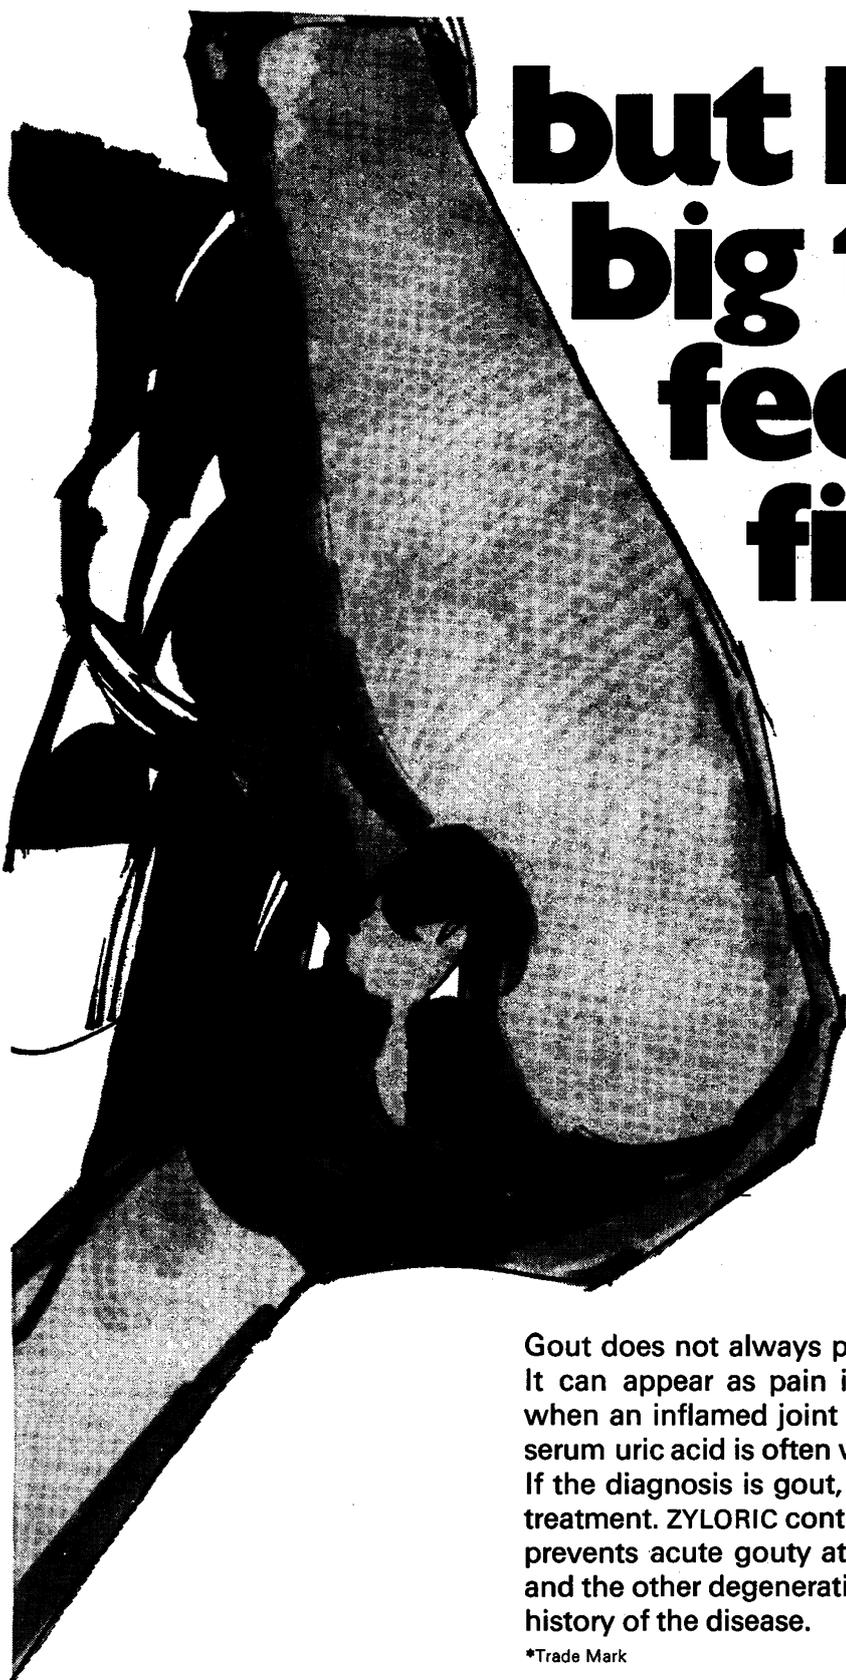

Contains Calmurid (urea) 10% 15% 10% and hydrocortisone 1% in a stabilising emulsion which does not contain wool, preservatives or other known sensitising agents. *Preparation of Calmurid HC is a special process. Calmurid HC is a registered trade mark.*

The nausea, vomiting and gastric side effects associated with nitrofurantoin are now effectively prevented by the addition of deglycyrrhizinated liquorice in CEDURAN tablets. In 82 patients¹ previously completely intolerant of nitrofurantoin, there was virtually a total absence of gastric side-effects when they were treated with CEDURAN. In a recent survey² of the sensitivities of urinary pathogens, nitrofurantoin was one of the only three preparations recommended as primary oral treatments. And in a further report,³ nitrofurantoin had the lowest number of resistant strains of the agents studied.

Actifed and Space age Medicine

The astronaut above is about to be subjected to G-forces in a massive centrifuge. In these situations it was thought that G-forces might restrict astronauts from performing vital tasks. To overcome this, an ingenious device which bounces light into the eye, can be made to actuate a switch or system, whenever the pupil crosses the path of the beam. This sight switch has already been adapted to help paraplegics to help themselves.

In the space programme, medical benefit has been a two-way exchange. Of the medicines taken on Apollo flights, ACTIFED* has been repeatedly chosen as the decongestant. ACTIFED TABLETS and SYRUP contain the decongestant pseudoephedrine and the established antihistamine triprolidine. ACTIFED COMPOUND LINCTUS contains, in addition, codeine. It provides effective and palatable cough control for all age groups.

The changing background of diuretic therapy

...in congestive
cardiac failure

● Diuretic therapy

The traditional approach to C.C.F. was rest, digitalis to improve cardiac function, and a diuretic to reduce oedema. The diuretic could be mild, moderate or potent, according to the doctor's judgement.

The problem of potassium loss

Under diuresis the reduction in plasma volume leads to a compensatory increase in the secretion of aldosterone. This causes reabsorption of sodium and water in exchange for potassium. The result is a feeling of general ill-health in the patient, and a growing risk of digitalis intoxication.

● Diuretic with potassium supplements

To moderate the effects of potassium loss doctors have tried supplemental potassium, in the hope that the extra potassium ingested might compensate for that being excreted.

Is the problem solved?

Unfortunately this has shortcomings. Extracellular potassium is easily replaced, but if the intracellular levels have been disturbed the problem of correction is extremely difficult. Without constant electrolyte checks potassium supplements are at best a hit or miss solution, and the long-term risk of bowel ulceration can never be ignored.

● The role of spironolactone . . .

to supplement and enhance the effectiveness of your chosen diuretic.

To obviate many of the hazards already mentioned more and more doctors are now adding Aldactone-A to the initial regimen of digitalis and a diuretic. By its unique action Aldactone-A effectively reduces potassium loss caused by conventional diuretics, and eliminates the need for potassium supplements.

Aldactone-A will combat the effects of diuretic-induced secondary aldosteronism. By its synergism with the more proximally acting diuretic Aldactone-A will provide a smooth, increased diuresis, with the later possibility of a reduction in diuretic dosage.

Used from the start of therapy, Aldactone-A will:—

- Reduce the long-term hazards of thiazide therapy e.g. drug-induced diabetes, gout.
- Not normally allow refractory states to develop.
- Eliminate the need for potassium supplements.
- Avoid the "washed out" feeling common to so many patients on long-term diuretic therapy.
- Improve the long-term prognosis.

Emotional distress.

The facade of vague symptoms presented by the depressed, anxious patient makes diagnosis and choice of therapy a particular challenge. For first line treatment, three factors are invaluable:

- Effectiveness against both anxiety and depression.
- Minimal side effects and no dietary restrictions.
- Patient acceptance.

Prothiaden has been shown¹ to be a real advance in combining all these features, in one substance, one strength capsule.

**UNIVERSITY OF EXETER
POSTGRADUATE MEDICAL INSTITUTE**

A full-time postgraduate course lasting 10 weeks will begin on 12th January, 1972. These courses are held 3 times a year starting in October, January and April. Each course includes instruction in general medicine, paediatrics, preventive medicine, pathology, psychiatry, orthopaedics and general surgery. The programme is planned so that students wishing to specialize in a particular clinical subject are given facilities to do so, while other students are taught in each of the main clinical departments. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training, but these are normally reserved for students sponsored by some official body. It is sometimes possible to accept general practitioners for 1 or 2 weeks of a course, and attendance for this period is recognized under Section 63 of the Health Services and Public Health Act 1968. These courses are also recognized under the special scheme for the re-training for general practice of doctors who have been out of the Health Service for at least 5 years. The fee for this course will be £40 (£83 for students from outside the United Kingdom).

Further particulars and application forms for these courses are obtainable from the Director, The Postgraduate Medical Institute, The University, Exeter, Devonshire. (14213) 2

UNIVERSITY LECTURESHIP IN HAEMATOLOGY AND TUTORSHIP IN PATHOLOGY

Applications are invited for the following university appointments within the teaching hospital (the United Oxford Hospitals): Lectureship in Haematology; Tutorship in Pathology. These appointments will be supported by a special grant, are related particularly to a newly designed introductory course for clinical students for which a new teaching laboratory has been built, and will be made for the period of the grant, viz three years; there is no assurance of present or continuation beyond this period, though efforts will be made to secure funds for that purpose.

The duties of the lectureship will be primarily to assist in teaching in the undergraduate school, under the Reader in Pathology, with particular emphasis on the new introductory course, and also to assist in postgraduate teaching; there will be an opportunity to engage in research and to take part in the service work of the appropriate department. Candidates should hold a higher degree and desirably have an interest in teaching; they should also have a broad training in the main branches of Pathology, and an interest in Haematology.

The duties of the tutorship will be similar except that they will include the co-ordination of the teaching of laboratory medicine in the undergraduate school. Candidates for this post should be similarly qualified except that a special interest in Morbid Anatomy and Histology would be preferable (but candidates with a special experience in one of these subjects would not be excluded), and teaching experience would be an advantage.

Successful candidates may receive an honorary appointment (below consultant level) with the hospital board, salaries on appropriate scale, according to qualifications and experience: Lecturers, Scale II (£2,451 to £3,543). Tutor, £2,829 to £3,882 with F.S.S.U. Appointments to be taken up at 1st January, 1972 or as soon as convenient thereafter.

Applications (five copies) with curriculum vitae and the names of two referees should be sent by 7th December 1971, to the Director of Pathology, Gibson Laboratories, Radcliffe Infirmary, Oxford OX2 6HE, from whom further particulars may be obtained. (25253) 14-1

COMMERCIAL APPOINTMENTS

Geigy Pharmaceuticals

Medical Adviser

Applications are invited from registered medical practitioners in the 30-40 year age group.

The duties will involve the initiation and follow-up of clinical trials of new and established products in close co-operation with Consultants, Research Units, General Practitioners and the Committee on Safety of Medicines, as well as studying adverse reactions to drugs and obtaining detailed case histories where this is indicated.

The Company has a wide range of products, especially for the treatment of psychiatric, neurological and rheumatic disorders, but the outcome of current research is opening up new areas of interest.

The work will involve travelling within the UK and occasionally abroad. Clinical work is encouraged. Appreciation of modern trends and ideas in medicine is important and this is aided by attendances at specialist society meetings and conferences both in the UK and abroad.

Previous experience in the Pharmaceutical Industry is not essential. The new member will join a team of doctors experienced in this field and initially will be given help and advice in this interesting and expanding branch of medicine which offers wide scope for an excellent career.

Further details of the type of work and duties involved will be sent to interested applicants, and will be discussed in depth with applicants selected for interview.

Geigy Pharmaceuticals is situated in North Cheshire within easy travelling distance of the more highly sought after residential areas to the south of Manchester. Salary will be negotiable in accordance with experience and qualifications. Good conditions of work include a first class contributory pension scheme. Generous financial assistance towards expenses associated with house removal and purchase is offered in appropriate cases.

Registered Medical Practitioners interested in this appointment are invited to write, quoting Ref. GM.25/FB, giving full particulars of age, qualifications and previous experience to:

SALARY SCALES OF HOSPITAL MEDICAL STAFF

Following the Twelfth Report of the Review Body, new salary scales have been approved. These came into force on April 1, 1970. The scales are set out below:

HOUSE OFFICER: Each post in this grade shall be tenable for six months. £1,626 per annum for the posts held during the first year; £1,755 per annum for posts held during the second year; £1,884 per annum for posts held during the third and subsequent years, subject to full registration.

Deductions of £177 per annum in respect of lodging only for voluntary residence.

SENIOR HOUSE OFFICER: £2,040 per annum in the first year; £2,184 per annum in the second year; £2,328 per annum in the third or subsequent years.

Deductions of £210 per annum in respect of lodging only for voluntary residence.

REGISTRAR: £2,328 per annum x £144(3) x £126(1) — £2,886. Deductions of £210 per annum for those with remuneration at the first incremental point on the scale, and £243 per annum for those on the second and subsequent points will be made in respect of lodging only for voluntary residence.

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £183 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

SENIOR REGISTRAR: £2,760 per annum x £126(1) x £174(1) x £177(1) x £174(1) x £177(1) — £3,588.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

MEDICAL ASSISTANT: £2,520 per annum x £144(1) x £156(3) x £144(10) — £4,572.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

CONSULTANT: £4,512 per annum x £201(8) x £210(1) — £6,330.

Deductions of £420 per annum in respect of lodging only for voluntary residence.

COMPULSORY RESIDENCE: The Terms and Conditions of Service of Hospital Medical and Dental Staff state:

173. A practitioner who is required as a condition of his appointment to reside in a hospital shall be provided with lodging without charge, except where the practitioner elects to occupy a house, flat or apartment for which a rental is appropriate.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

Further details concerning standards of residential accommodation, telephone charges, removal allowances, study leave and other matters may be obtained from the Hospital Secretary; or by B.M.A. members from the Secretary, British Medical Association. November 1970

SERVICES

Are you in your Pre-Registration Year —or recently fully registered?

Before you commit yourself to your permanent pattern of life, consider what the Royal Air Force has to offer.

The chance to practise total medical care, as a GP

Your first job would probably be a Junior Medical Officer on a large RAF Station. There would be at least one other doctor. Between you, you would have a 'list' of 2000 to 3000 people—servicemen and their families. You would meet all the usual clinical problems of a GP—and get plenty of experience in pediatrics. As well as this, you would be actively involved in the practice of aviation medicine and gain experience in the preventive, occupational and social fields.

Conditions of work are extremely good. You would have a consulting room in a specially built *Medical Centre*—like a small hospital with its own treatment room, theatre and resuscitation room, and wards for a dozen or so short-stay patients. There is a full secretarial and nursing staff. Your clinical freedom would be absolute.

The chance to specialise, too

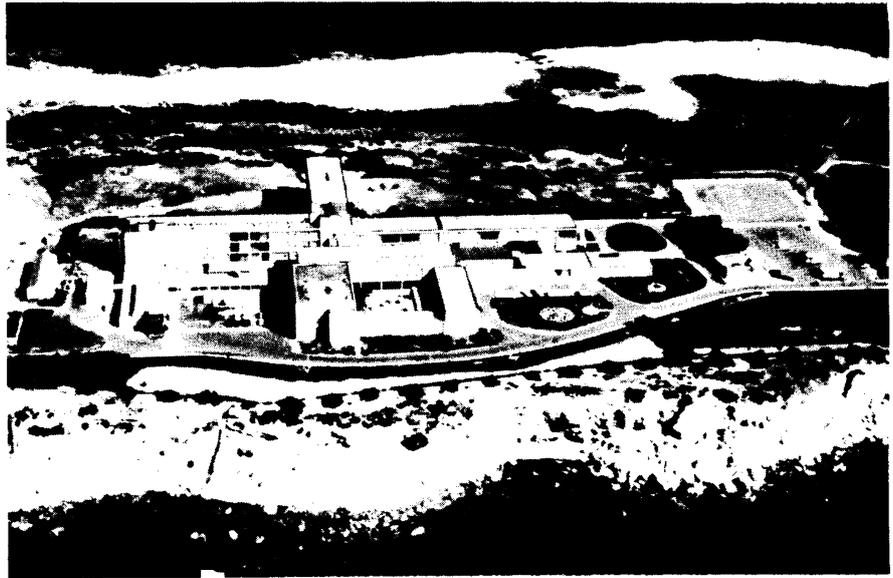

Because General Practice is so highly developed in the RAF, this does not mean you have no chance to specialise. The contrary is true. 47% of all RAF doctors are now working in specialist departments. On a 'full career' contract you have every opportunity to reach consultant status in your late or middle thirties—perhaps earlier.

The chance to study for higher qualifications

Any RAF doctor, whether specialist or GP (as long as he is not on the very shortest of contracts) can apply for six months study leave on full salary. On a permanent commission, he may have up to two years external study leave.

The chance to travel

The RAF operates in many different conditions and climates. Abroad, the RAF doctor looks after RAF personnel and their families and, very often, the

The RAF hospital at Akrotiri, Cyprus. It has 130 beds and can be adapted to accommodate up to 250. Here are a few figures for 1970: admissions, 4041, with an average length of stay of 11 days; X-Rays, 10,857; path lab tests, 53,703; anaesthetics, 2,035. Medical staff is 22 doctors, 31 nurses, 25 nursing auxiliaries. The hospital has specialist departments of surgery, orthopaedic surgery, medicine, gynaecology and obstetrics, pathology, dentistry, neuropsychiatry, radiology, anaesthetics, otorhinolaryngology and ophthalmology; and, in the tamarisk trees by Dreamers' Bay, perhaps the most beautiful location of any hospital.

local population as well. Your gain in clinical experience would be marked.

The chance of a good social and family life

The RAF is a young community, with a full and active social life. There are facilities for almost every kind of sport and, which is most important, the time to enjoy your family while you are still a young man. Living conditions are excellent. If you are single you live in the Officers' Mess, which has all the amenities of a good hotel. If you are married, you will nearly always have a furnished house that goes with the job; rent for this is very modest; and it can save a large financial outlay at the beginning of your career.

A realistic pay scale

Pay is based on the average earnings of a civilian GP. Immediately after full registration, the present basic salary is £3395; after 5 years it rises to £4106; after 13

years to £5110. There are various other allowances; for instance, with children at boarding school the figures are £330 (net) for one child, £723 (net) for two children, £1194 (net) for three children. There are tax-free gratuities of £1500 after 3 years, or £3000 after 5 years. After service of 16 years or more there is a pension, payable for life, and a generous terminal grant.

For full information please write, giving your age, nationality, and date of full registration, to Group Captain J. G. Donald, MB, ChB, DTM&H, RAF, Ministry of Defence, 1-6 Tavistock Square (724KC3), London, WC1H 9NL. Or visit your nearest RAF Careers Information Office.

Lentizol

a significant improvement in antidepressant therapy

Amitriptyline is one of the most widely-prescribed of all psychotropic agents. But like any drug, it works properly only when taken as prescribed. And published work¹ clearly shows that as many as 48% of outpatients default in taking tranquillisers and antidepressants. Even among inpatients, some 19% default in this way². A recent study reported in the Practitioner³, indicates that a once-daily dosage regimen is less likely to be abused.

Lentizol:

simplifying dosage to reduce patient default

Lentizol is a sustained-release form of amitriptyline designed to be taken once daily, at bedtime. Thus Lentizol offers a new simplicity of dosage to reduce patient default. Instead of having the trouble – and possible embarrassment – of taking three doses during each day, the patient simply takes one dose at bedtime.

Often lessens the incidence of daytime drowsiness

Lentizol has a sedative effect within a short time after the daily dose is taken. This can be very helpful to those depressed patients who have difficulty in getting off to sleep. Its sleep-enhancing effect is spread over the early

hours of the morning, too, so that Lentizol also benefits patients whose condition causes early-morning waking. By daytime, Lentizol will continue to provide symptom relief until the next daily dose is taken, with less risk of drowsiness.

No increase in treatment cost

One Lentizol 50 mg. capsule at bedtime will replace treatment by one 25 mg. amitriptyline tablet t.d.s. This means that the daily cost of Lentizol is equivalent to the daily cost of standard amitriptyline.

Clinical assessment in progress

Clinical appraisals of Lentizol are being carried out by a number of investigators throughout the United Kingdom. Early results⁴ indicate that Lentizol produces an improvement in patients who would be expected to respond to amitriptyline. Lentizol is widely preferred because of the simple, convenient dosage regimen. Also some workers have found it possible to discontinue night-time sedatives.

Lentizol is supplied as capsules of 50 mg. and 25 mg. amitriptyline in a sustained release formulation, each strength in packs of 50 and 250. Further information is available on request.
