

WHEN IT COMES TO BLOWING TRUMPETS . . .

There's more to Ventolin than any other bronchodilator

For aerosol therapy in asthma and chronic bronchitis

Ventolin Inhaler provides the drug of choice.

"It seems clear, therefore, that because of its effectiveness in producing bronchodilatation, its long duration of action, its lack of cardiovascular stimulant action, and its lack of tendency to produce falls in PaO_2 , salbutamol (Ventolin) is the most effective drug at present available by aerosol inhalation for the relief of asthmatic airway obstruction."

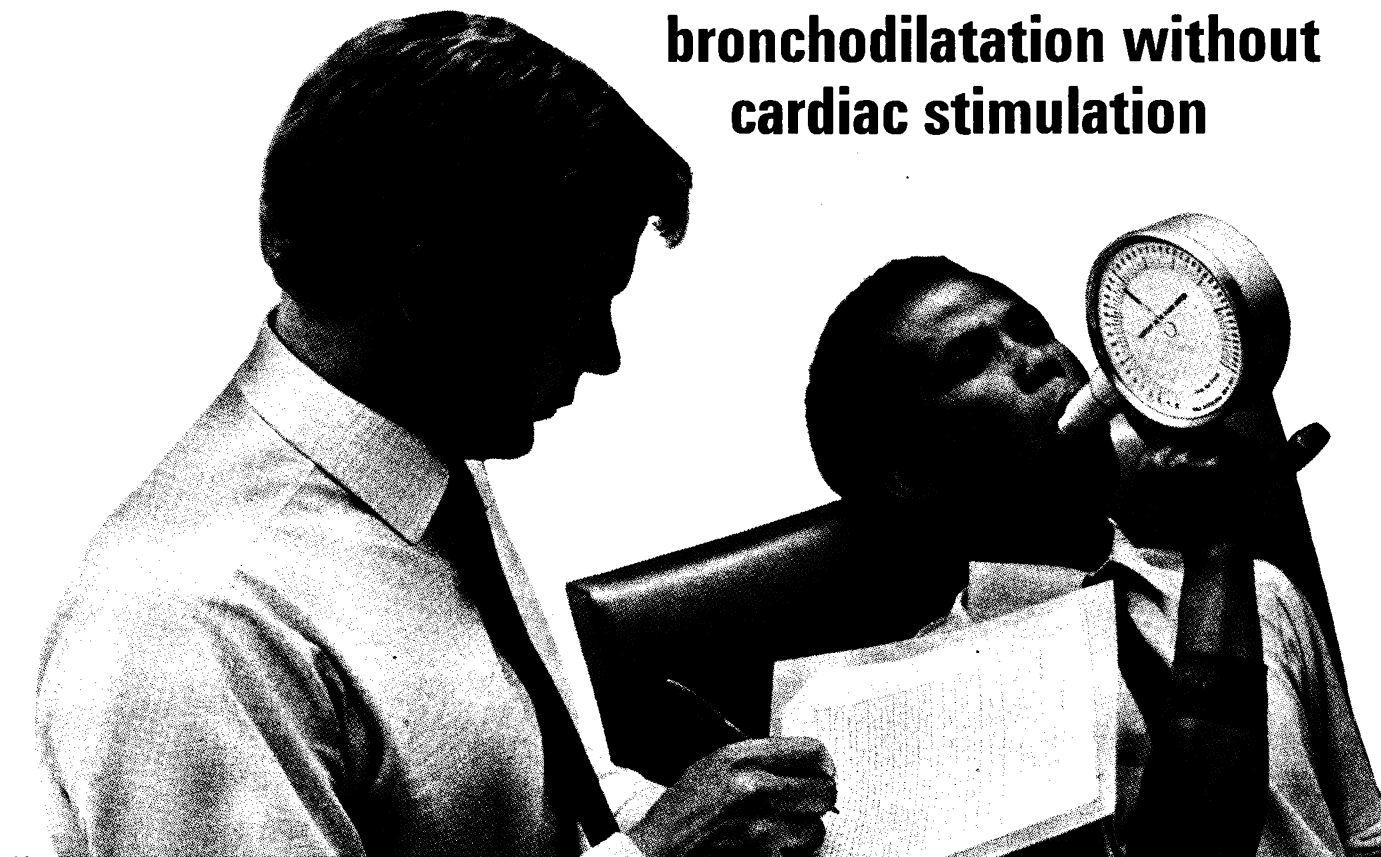

(Brit. med. J., 1970, 2, 23)

"It is suggested that salbutamol (Ventolin) is the aerosol of choice."

(Brit. J. Dis. Chest, 1970, 64, 37)

Ventolin Inhaler is a metered aerosol, delivering 100mcg of salbutamol per inhalation, with a specially designed actuator. Each canister provides 200 inhalations.

**VENTOLIN for effective
bronchodilatation without
cardiac stimulation**

And for oral therapy in asthma and chronic bronchitis...

Ventolin Tablets and Ventolin Syrup provide the drug of choice

Of the available oral bronchodilators with β -adrenergic stimulant activity, Ventolin "is the drug of choice at the present time".

(Postgrad. med. J., 1971, 47, 181)

"Oral salbutamol (Ventolin) appeared to be as effective a bronchodilator as the aerosol."

(Brit. med. J., 1970, 1, 65)

Ventolin Tablets each contain salbutamol 2mg as sulphate and are supplied in packs of 100 and 500.

Ventolin Syrup contains salbutamol 2mg as sulphate per 5ml dose and is supplied in bottles of 150ml.

three faces of Valium* Roche

1 Valium Roche in simple anxiety

Anxiety may be a physical, as well as an emotional state. Often, it presents as a rather bizarre pattern of largely physical symptoms, things like headache, 'dyspepsia', insomnia, muscular pains and disturbances of appetite.

Hundreds of clinical trials, involving tens of thousands of patients in almost every country in the world have shown that Valium Roche affords remarkable symptomatic relief in such cases, 'curing' a long list of apparently intractable physical symptoms.

2 Valium Roche in psychosomatic illness

Sometimes, anxiety disturbs physiological or bio-chemical function to the point of producing functional or structural disorders. Such conditions take on a life of their own and demand – in addition to the relief of anxiety – active, specific treatment.

In such cases Valium Roche curbs anxiety and – coupled with specific treatment – helps to ease or eradicate a long list of conditions involving the skin, gastro-intestinal tract, the heart and circulation, the muscles and the organs of reproduction and excretion.

3 Valium Roche in organic disease

Even patients whose clinical condition is clearly organic can become excessively anxious. When they do, the anxiety and its physical effects may hinder recovery or – in conditions like myocardial infarction – amount to a major complication.

Valium Roche has been used in many such cases. Invariably, it produces a sharp improvement in the patient's emotional outlook and attitude. Where anxiety has produced an increase in sensations of pain or discomfort Valium Roche can afford dramatic relief from organic symptoms.

TESTS show that 2-Diethylaminoethyl- α -phenylbutyrate Citrate has a more pronounced bronchodilatory effect than ephedrine. Three parts of 2-Diethylaminoethyl- α -phenylbutyrate Citrate producing the same effect as 5 parts of ephedrine. It acts more rapidly than ephedrine, reaches maximum effect somewhat later and falls away at a slightly lower rate. With a mixture of the substances the curve of bronchial dilation showed that the effect produced was considerably greater than when double the quantity of each substance was administered separately.

4 mg. OF THE MIXED SUBSTANCES
(CONTAINING 2 mg. OF EPHEDRINE)
HAS THE BRONCHODILATORY EFFECT
OF 8 mg. EPHEDRINE

Whilst a full bronchodilatory effect is produced with this mixture, side-effects, such as nausea, restlessness, sweating, etc., due to over-dosage or idiosyncrasy to ephedrine are avoided.

Emotional distress.

The facade of vague symptoms presented by the depressed, anxious patient makes diagnosis and choice of therapy a particular challenge. For first line treatment, three factors are invaluable:

- Effectiveness against both anxiety and depression.
- Minimal side effects and no dietary restrictions.
- Patient acceptance.

Prothiaden has been shown¹ to be a real advance in combining all these features, in one substance, one strength capsule.

Day-to-day decisions confronting the G.P.

"What is hypertension and when should I treat it? Is further investigation necessary or desirable in this patient and if so, what investigations should I as a clinician do? Which of the many drugs now available should I use to treat my hypertensive patients? Should I use drugs alone or in combination and if so, for how long?"

Dr. R. L. Parsons, Lecturer in Clinical Pharmacology at a London Teaching Hospital answers these important and fundamental questions in a 15-minute recorded lecture, which is the first in the CIBA Postgraduate Medical Educational Series.

This recording will be sent to all general practitioners in the United Kingdom during December. Watch out for your copy.

The case for treating chronic urinary tract infection with new Hiprex

Hiprex can eliminate urinary infection in eight out of ten patients

Hiprex is effective against the organisms which most commonly cause urinary tract infection. Success rates of more than 80 per cent have been reported in clinical trials.

Hiprex can end the frustration of treatment failure

Unlike other agents, notably antibiotics, sulphonamides and nalidixic acid, *Hiprex* is unlikely to produce bacterial resistance – a major cause of treatment failure. *Hiprex* has proved effective even when other treatment has failed.

Hiprex is especially suitable when long-term treatment is indicated

Hiprex does not lose its effect during prolonged use and for this reason is of particular value in persistent and recurrent urinary infections. Minor side-effects have been reported in fewer than four per cent of patients, and no serious adverse reactions have been reported. Treatment costs are kept low – as little as 4p a day.

Hiprex improves the prospects of co-operation in long-term use

Published reports stress that *Hiprex* can overcome the major difficulty of ensuring uninterrupted therapy. All but refractory cases respond to a simple twice-daily dosage, normally without need for special measures to acidify the urine.

Composition Each tablet contains hexamine hippurate 1 g. **Indications** The treatment of urinary tract infections, such as pyelitis, cystitis and urethritis, but excluding acute pyelonephritis. The treatment of chronic pyelonephritis, and as maintenance therapy after successful antibiotic treatment of acute pyelonephritis. The treatment of asymptomatic bacteriuria, including that occurring during pregnancy. Prophylaxis before and after urological surgery. **Dosage** Adults: 1 tablet twice daily. Children: 6-12 years: $\frac{1}{2}$ tablet twice daily. In refractory cases, the dosage may be increased to: 1 tablet three or four times daily in adults, $\frac{1}{2}$ tablet three or four times daily in children aged 6-12 years. Doses in excess of those recommended may cause severe bladder irritation, haematuria, albuminuria or painful micturition. **Alkalinuria** Some patients may have an alkaline urine as a result of a predominantly vegetarian diet or occasionally due to *Proteus* or *Pseudomonas* infection. In these cases, additional acidification may be necessary to lower the urinary pH to the level required to degrade the hexamine moiety. Administration of ascorbic acid 1 g. four times daily is recommended in these cases. **Side-effects** Occasionally, rashes, gastric irritation, or irritation of the bladder may occur. With prolonged administration at high dosage, the latter may lead to haematuria. All side-effects are reversible on withdrawal of the drug. **Treatment of side-effects** Patients experiencing painful micturition or bladder irritation should be instructed to discontinue the medication. Prompt relief of these symptoms can be obtained by the consumption of copious quantities of water and 2-3 teaspoonfuls of bicarbonate of soda. **Contraindications** Renal insufficiency, hepatic insufficiency or severe dehydration. *Hiprex* is also contra-indicated as the principal therapeutic agent in acute parenchymal infections of the kidney. **Basic N.H.S. prices** 100 tablets £2.00 plus Purchase Tax. *Hiprex*: registered trade mark. Day after day of freedom from asthmatic attack

The unique mode of action of disodium cromoglycate offers the asthmatic patient outstanding benefits. A prophylactic treatment, it prevents the onset of asthmatic episodes - thus minimising long-term damage to lung tissue. Freedom from asthma attacks permits a happier, more normal life for the asthmatic patient.

Published clinical reports confirm that with INTAL COMPOUND, the incidence and severity of acute attacks is considerably reduced - even in patients on conventional therapy such as bronchodilators, antihistamines and corticosteroids. Less time is lost from work or school, exercise tolerance is improved and a consistent clinical comment on disodium cromoglycate has been the total absence of serious side effects.

INTAL COMPOUND - supplied in SPINCAPS (each containing 20 mg disodium cromoglycate, and 0.1 mg Isoprenaline Sulphate BP in powder form, together with an inert carrier). For use in a special insufflator - SPINHALER.

For children such as Johnny who, every year, seem to be more often in the surgery than out of it, Keflex has a lot to offer.

Rapidly absorbed and reaching high serum levels, Keflex has a broad spectrum of antibacterial activity that even includes penicillinase-producing pathogens, and so increases the chances of first-time success in treating infective episodes.

All these properties, plus an extremely low incidence of rash and gastro-intestinal disturbance, make the pleasant-tasting Keflex suspensions a treatment which ensures that most patients like Johnny can overcome infection quickly and with the minimum of complications.

Is hypertension *really* so 'benign'?

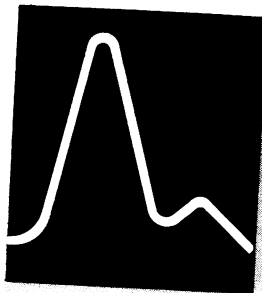

The charts on the opposite page are based on information gathered in the United States, on the accumulated experience of 26 insurance companies, covering nearly 4,000,000 people who were accepted for life insurance. The statistics reveal that even modest elevations of blood pressure are associated with definite decreases in life expectancy.

For example, a male of 45 years with a blood pressure of ~~150/100~~ mm Hg has his average life expectancy reduced from 32 to $20\frac{1}{2}$ years—a loss of $11\frac{1}{2}$ years.

Fortunately, evidence is accumulating to show that effective treatment with antihypertensive agents can considerably improve the depressing prognosis indicated by the insurance companies' statistics.

Reductions in expectation of life associated with elevated blood pressure are **not** proportionate to the degree of excess mortality. This holds even for very high blood pressures.

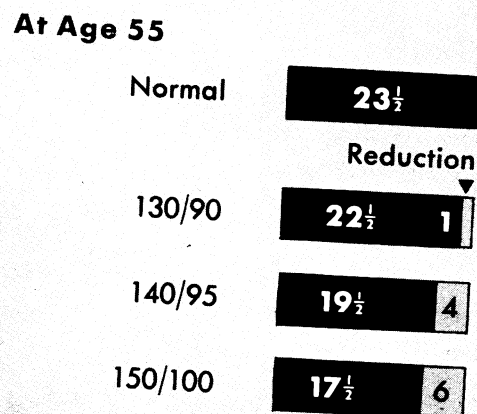

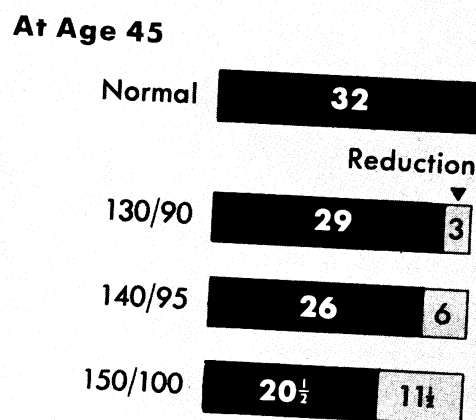

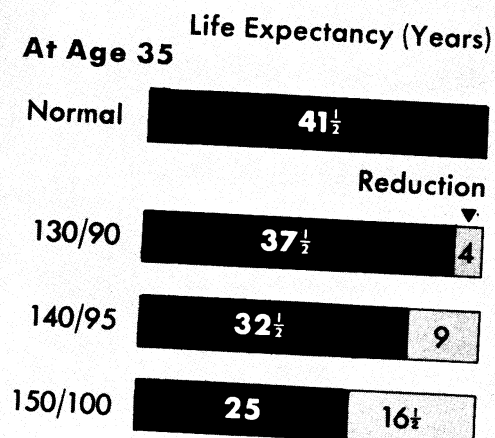

The magnitude of the reduction in life expectancy increases with elevation in blood pressure, but decreases with age.

**UNIVERSITY OF EXETER
POSTGRADUATE MEDICAL INSTITUTE**

A full-time postgraduate course lasting 10 weeks will begin on 12th January, 1972. These courses are held 3 times a year starting in October, January and April. Each course includes instruction in general medicine, paediatrics, preventive medicine, pathology, psychiatry, orthopaedics and general surgery. The programme is planned so that students wishing to specialize in a particular clinical subject are given facilities to do so, while other students are taught in each of the main clinical departments. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training, but these are normally reserved for students sponsored by some official body.

It is sometimes possible to accept general practitioners for 1 or 2 weeks of a course, and attendance for this period is recognized under Section 63 of the Health Services and Public Health Act 1968. These courses are also recognized under the special scheme for the re-training for general practice of doctors who have been out of the Health Service for at least 5 years. The fee for this course will be £40 (£83 for students from outside the United Kingdom).

Further particulars and application forms for these courses are obtainable from the Director of the Postgraduate Medical Institute, The University, Exeter, Devonshire. (14213) 2

PHARMACEUTICALS DIVISION

Clinical Research and Development

Increasing success in the laboratories makes it necessary for the Pharmaceuticals Division of ICI to recruit two more doctors for Clinical Research.

The doctors appointed will be concerned with the organization and co-ordination of clinical investigation of newly discovered compounds, particularly in the field of heart disease and hypertension. The work will involve close liaison with our own research workers and with clinicians carrying out trials at home and sometimes abroad.

Applicants should have a good general medical background and have been qualified for at least three years. A higher qualification would be an advantage but is not essential. Previous training in clinical pharmacology is not necessary; this can be acquired in the job.

The Clinical Research Department is located in our main research building situated in rural Cheshire with excellent housing and education facilities. A good salary will be negotiable, on the basis of qualifications and experience.

Boehringer Ingelheim

A FRUITFUL AND IMPORTANT MEDICAL CAREER

Have you as a doctor seriously considered what an interesting and worthwhile career can be had in the scientifically and medically stimulating atmosphere of a medical team in the pharmaceutical industry?

This is an opportunity to join such a team working with compounds of unique pharmacological and medical interest in different fields of medicine, but particularly in the cardiovascular and respiratory fields of therapeutics.

By being positively involved in the pre-clinical aspects and personally co-ordinating the early and subsequent clinical studies the doctor gets the opportunity of intellectual satisfaction and is deeply involved in the new and exciting subject of clinical therapeutics.

The company will move to new administrative offices in Bracknell, Berkshire, in the summer of 1972 which provide a pleasant environment in which to work and live within easy reach of London.

A doctor in the medical team can expect an attractive salary, a very generous non-contributory pension scheme and life assurance and assistance with moving house. A car is provided. If you would like to consider making a career in the pharmaceutical industry, please write in confidence to:

Following the Twelfth Report of the Review Body, new salary scales have been approved. These came into force on April 1, 1970. The scales are set out below:

HOUSE OFFICER: Each post in this grade shall be tenable for six months. £1,626 per annum for the posts held during the first year; £1,755 per annum for posts held during the second year; £1,884 per annum for posts held during the third and subsequent years, subject to full registration.

Deductions of £177 per annum in respect of lodging only for voluntary residence.

SENIOR HOUSE OFFICER: £2,040 per annum in the first year; £2,184 per annum in the second year; £2,328 per annum in the third or subsequent years.

Deductions of £210 per annum in respect of lodging only for voluntary residence.

REGISTRAR: £2,328 per annum x £144(3) x £126(1) — £2,886. Deductions of £210 per annum for those with remuneration at the first incremental point on the scale, and £243 per annum for those on the second and subsequent points will be made in respect of lodging only for voluntary residence.

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £183 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

SENIOR REGISTRAR: £2,760 per annum x £126(1) x £174(1) x £177(1) x £174(1) x £177(1) — £3,588.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

MEDICAL ASSISTANT: £2,520 per annum x £144(1) x £156(3) x £144(10) — £4,572.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

CONSULTANT: £4,512 per annum x £201(8) x £210(1) — £6,330. Deductions of £420 per annum in respect of lodging only for voluntary residence.

COMPULSORY RESIDENCE: The Terms and Conditions of Service of Hospital Medical and Dental Staff state:

173. A practitioner who is required as a condition of his appointment to reside in a hospital shall be provided with lodging without charge, except where the practitioner elects to occupy a house, flat or apartment for which a rental is appropriate.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

MEMORIAL UNIVERSITY OF NEWFOUNDLAND

St. John's, Nfld., Canada

Applications are invited for academic appointments in

PSYCHIATRY

Vacancies are available at professorial and non-professorial rank in this newly established medical school which will offer attractions for those interested in modern aspects of medical education and in research. Clinical work and teaching of undergraduate and postgraduate students is conducted in a number of general teaching hospitals with psychiatric units of up to 40 patients in hospitals are formally affiliated with the University. Applicants with interests in all areas of clinical psychiatry, including forensic psychiatry and mental retardation, are welcomed. Remuneration is in line with North American medical salaries. For details write to the Professor of Psychiatry, Medical Faculty, Memorial University, St. John's, Newfoundland, Canada. (H8363) 61-1

MULTI SPECIALTY unopposed group practice located in rapidly expanding town in Central Manitoba requires more doctors to cope with an increasing work load. The group presently consisting of twelve doctors expects to engage three more in the immediate future. A large addition to the existing hospital includes new intensive care unit, operating rooms, Obstetrical unit and new laboratory and X-ray facilities. The existing group are all U.K. trained. We are particularly looking for young married doctors who have had some postgraduate experience in one or more of the following fields — Obstetrics, Anaesthesia, Paediatrics, Psychiatry and general practice, but have decided to opt for the combined hospital-general practice available here rather than continue with any form of specialization. Doctors coming to this group are offered a salary of \$18,000 in the first year with 4 weeks paid vacation and subsidized accommodation; thereafter they may elect to enter partnership or accept a second year salary of approximately \$27,000 per annum. This is an offer of a good future to the right doctor. Reply by Airmail, enclosing telephone number and photo, to: Medical Director, Box 930, The Pas, Manitoba, Canada. 61-1

PATHOLOGY RESIDENCY: 4 year approved in P.A. and C.P.; opening for July, 1972; 4 Board certified pathologists; 2 M.D. haematologists, Ph.D. biochemist and up bacteriologist on Staff. ROTATING INTERNSHIP — Fully accredited one-year rotating internships in growing New York City community hospital available. Full-time directors in all services, accredited residency programs in all specialty fields available upon completion of internship. Stipend: \$9,000.00 per year plus maintenance and living out allowance. Write: Dr. Jacob Cohen, Director of Medical Education, Jewish Memorial Hospital, 196th Street and Broadway, New York, N.Y. 10040. 61-1

WANGANUI HOSPITAL BOARD

PART-TIME PSYCHIATRIST — Registered Medical Practitioners with qualifications and experience in Psychiatry, for the Specialist post of Visiting Psychiatrist at the Wanganui General Hospital. This is a newly established position to serve the hospital needs of the Wanganui district and the average number of hours per week for the initial appointment will be fourteen (4/10ths). There is considerable scope for private psychiatric practice in the district. The present salary will be four-tenths of the basic salary scale for specialists (\$8,936-13,284), the commencing rate depending upon the length of experience in psychiatric medicine.

Further particulars are available from The Classified Advertising Manager, British Medical Journal, London, and applications close with the undersigned, Private Bag, Wanganui, New Zealand. K. Harris, Secretary. (H8175) 61-1

APPLICANTS ARE ADVISED NOT To send original testimonials when replying to advertisements. Copies will serve the purpose quite as well, and in the event of their being lost or mislaid no inconvenience will ensue.

Merck

— reliability and purity
— research

Since 1668, when F.J. Merck started his pharmacy, our products have been the standard for reliability and purity.

Research is the cornerstone of our success – both past and present – and over 1500 of our employees are currently engaged in research and development.

We'll be introducing a few of our products in 1972. You'll be able to see for yourself – just as your forefather did – that the products of Merck are among the most outstanding in the service of medicine.

If you're interested in our history, we can send you a book which illustrates the first 300 years of our existence
