

She needed something to help her sleep

SURMONTIL relieves insomnia while treating its cause

But what?

A hypnotic will certainly give her a good nights' sleep, but if she is one of those patients – and there are many of them – whose insomnia originates from anxiety/depression, sleep is all she'll get. The root cause of the condition will always remain untreated with the patient becoming more and more dependent on the medication. Moreover, the degree of this dependence is further heightened by the fact that, because they distort normal sleep patterns, all major hypnotics (and many antidepressants as well) can give rise to unpleasant symptoms upon withdrawal. Patients, therefore, feel most disinclined to discontinue a treatment which, although giving symptomatic relief, is not removing the cause of their condition. These people, in fact, need more than just "something" to help them sleep – they need 'Surmontil'.

- immediately restores sound natural sleep
- relieves daytime anxiety/depression
- avoids long-term hypnotic therapy by treating the underlying condition
- removes the risk of withdrawal problems due to REM suppression/rebound, and possible dependence encountered with both hypnotics and other major tricyclic antidepressants
- unlike a number of other antidepressants does not increase intra-sleep restlessness, thus its sleep-restoring properties are enhanced

Intal doesn't relieve asthmatic attacks

BRITISH MEDICAL JOURNAL, 7 OCTOBER 1972

It prevents them

Steroids, bronchodilators and antihistamines, whether in aerosol or tablet form, are only symptomatic treatments. Whereas INTAL actually *protects* the patient from asthmatic attacks—day in, day out.

By preventing the release of spasmogens INTAL affords daily prophylaxis for as long as any challenge exists. More than 150 clinical trials have proved its effectiveness, safety and ease of administration.

But only an asthmatic can really appreciate the difference it makes.

In the Nobrium general practice survey 228 British GPs studied 691 patients with anxiety, most of whom kept a subjective record of their progress. Both the GPs and the patients recorded a substantial remission of symptoms with Nobrium (a total pretherapy symptom score of 9167 was reduced to 3888). A detailed analysis of these results is now being circulated to all general practitioners under the title of the Nobrium general practice survey: Results in 691 patients

When a child has a chest infection Ceporex Syrup reduces the risks and improves the results

Chest infections treated with ampicillin can result in rashes or diarrhoea – risks that are particularly to be avoided when the patient is a child. Penicillin-hypersensitivity and resistant staphylococci are other problems which can complicate treatment.

Ceporex (cephalexin) is ideally suited for the treatment of chest infections. It is as effective as the penicillins against the pathogens responsible for the majority of common respiratory conditions, but produces a low incidence of side effects. In

addition, Ceporex is effective against penicillin-resistant staphylococci and can normally be used safely in patients hypersensitive to the penicillins.

It is well tolerated by children of all ages, including neonates. And Ceporex achieves a rapid result since it produces high blood levels within an hour of administration, penetrates the tissues quickly and is not metabolised in the body so it remains fully active to fight infection.

Ceporex Syrup has a pleasant blackcurrant flavour which encourages children to finish the course.

Children get on well with Ceporex Syrup

Ceporex safety

"Considering its efficacy and the relative freedom from side effects, we conclude that it is as good a drug as penicillin G and certainly is a valuable addition to the therapeutic armamentarium of beta-haemolytic streptococcal infections in children."¹
(89 children with beta-haemolytic streptococcal infections.)

"The response to therapy was uniformly good, and no significant toxic effects were encountered."²

"Cephalexin appears to be a highly effective drug in the treatment of bacterial pneumonias of older infants and children who are able to take oral medication. The drug has the added advantage of low toxicity."²
(55 children with bacterial pneumonia.)

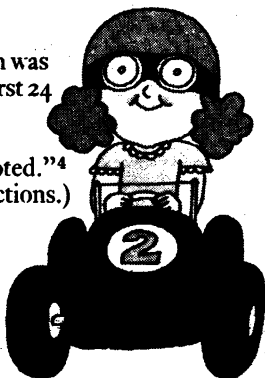

Ceporex speed

"The clinical response to cephalixin was prompt. Fever subsided within the first 24 hours after initiating therapy."³
(30 children with pneumonia.)

"A rapid therapeutic response was noted."⁴
(185 children with streptococcal infections.)

"... due to its reliability and its exceptionally good absorption in infants - which may be delayed to a certain degree in neonates -

cephalexin may be recommended as the oral medication of choice against sensitive organisms in newborns."⁵

**Less side effects with Ceporex**

"No side effects from cephalixin were noted.

"The medication was accepted without difficulty. There was no nausea, vomiting or diarrhoea, and no rashes were observed."²
(100 children with bacterial pneumonia.)

"We have not encountered any side effects due to cephalixin."⁶
(21 patients with cystic fibrosis.)

"Tolerance of the drug was satisfactory with absence of nausea, vomiting or diarrhoea."³
(30 children with pneumonia.)

1905 An important year for coffee lovers

It was the year Dr. Ludwig Roselius discovered how to remove caffeine from coffee without altering its flavour.

Since then, thanks to him and his Kaffee H.A.G., no one need say "No" to coffee! Today, in nearly every country in the world, the Medical Profession is recommending it increasingly in cases where caffeine is contra indicated.

The clinical evidence for Horlicks.

Br.med.J. (1972).

In two clinical trials recently published in the British Medical Journal^{1,2} Horlicks was shown to have a statistically significant effect on the quality of sleep in 22 individuals studied.

Electrophysiological recordings demonstrated that "sleep after Horlicks was of longer total duration and was less broken by periods of wakefulness."² This effect increased with repeated administration.

"In an era of heavy prescribing of hypnotic drugs this is a welcome finding"³

The Future General Practitioner

Learning and Teaching

General or family practice is a special subject. This book is written by six experienced teachers selected by the Council of the Royal College of General Practitioners. It is intended chiefly for teachers, but it will also be valuable to those who are learning and to all who are concerned about the place of family practice within a country's medical services.

A syllabus is developed in five main parts:

Health and Diseases

Human Development

Human Behaviour

Medicine and Society

The Practice

Throughout the book the authors have tried to indicate ways in which the teacher may approach the task of passing on what he had learned by his own experience. The theme is the search for objectives which will satisfy the needs of learner and teacher. The belief is that this search will benefit the future family practitioner and through him the community of his patients.

Interest rates offered to big investors and small savers alike are many and varied, but each investment has its own particular set of terms and conditions.

Some investments tie up your savings for a fixed period of years, whilst others offer prompt withdrawal facilities.

Some are designed to provide regular income; others offer capital growth. Either may or may not be taxable.

Both may incorporate life assurance and the income tax relief then obtainable can further improve the attractiveness of the investment.

It's all very confusing unless you are a financial expert. How else can you choose a plan to suit your own particular needs and be safe in the knowledge that the Company to which you are to entrust your savings is absolutely secure?

Whether you are interested in saving a monthly sum out of salary, or making a single investment, you would be wise to consult the experts at the M.I.A. They are there to help you, as they have helped thousands of your colleagues—their advice is free and entirely without obligation.

**For people who appreciate an estate
in the country, a limousine in town and a first-class
carriage on long journeys.**

Peugeot's estate versions of the 504 are quite unlike most estate cars.

Instead of just sticking a big boxy back on our saloon, we started from scratch. First, we lengthened the chassis. And then we fitted a special live rear axle, which takes heavy loads without giving you a rough ride. Once these basics had been attended to we turned our attention to the bodywork—pure, simple Pininfarina. Without spoiling the line, we raised the roof. Very slightly. To give you even more space.

Our end result—two exceptionally accommodating 2-litre estates. The Estate

carries five people in comfort. Plus nearly half a ton of luggage. The Family Estate seats eight. And takes all their luggage.

For ultimate comfort you need reclining seats, seat belts, fresh air ventilation and heated rear window. They're not on our list of optional extras. They're standard.

Add all that to the impeccable finish, and you have an estate car built to luxury saloon standards.

Even so, a Peugeot has to be driven to be appreciated.

When you start up, listen carefully for the engine (it's so quiet). On the road, you'll find the handling is remarkable.

In fact, Car magazine remarked that the 504 Estate "goes round corners astonishingly fast in the wet or the dry". And they summed up with: "Most of the world's makers would be delighted if they could make their very best saloons ride, handle and perform as well as the Peugeot Estate".

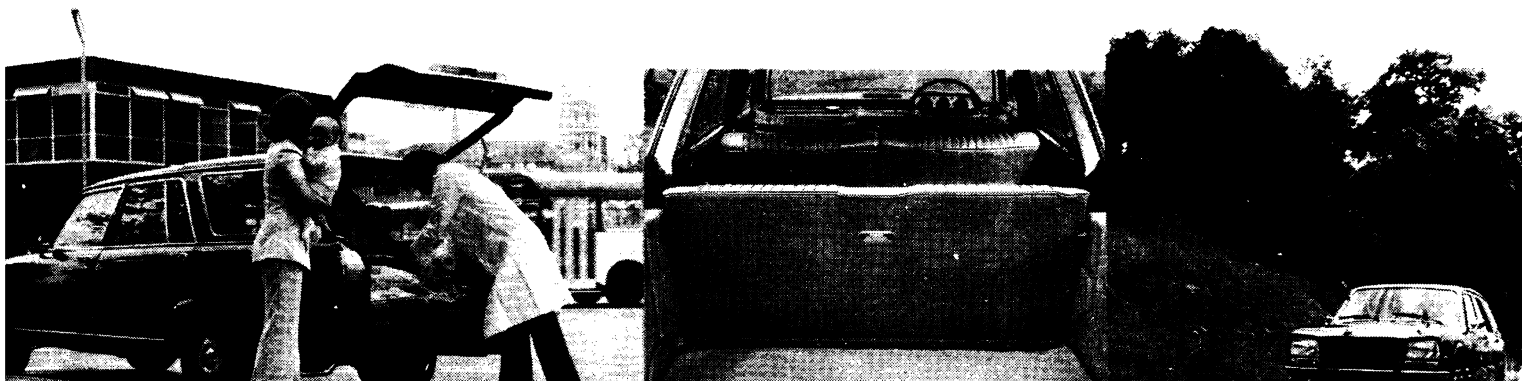

Even if you don't drive a la Brands Hatch, it's good to be protected by such wide safety margins. With unfussed 90 mph cruising and the option of automatic transmission, you'll make light work of long journeys.

In short, a Peugeot estate gives you incredibly good value for your money.

Do teen-agers want the facts on menstruation from you?

Your requests for 300,000 booklets indicate they do.

Ignorance isn't bliss for many young girls when the changes of puberty occur. They want facts – and they're very likely to ask you for them.

To help you give them the facts about menstruation, we provide free booklets and charts. The booklets – one for beginning menstruants and one for older girls – also answer their social questions on menstruation.

The coloured charts, prepared by R. L. Dickinson, M.D., depict the physiology of menstruation. Laminated in plastic for permanence, they are suitable for grease pencil marking and erasure.

Do they help? Your response indicates they do. In five years, we've received over 25,000 requests for the charts – and we've sent you more than 300,000 booklets. Many of these are reorders – a good indication that you and your young patients appreciate them.

Users appreciate the distinctive features of the Tampax tampon, too. Designed for intravaginal use, it is softly compressed for efficient absorption and maximum comfort. It's placed in correct position hygienically by means of a satin-smooth container-applicator, prelubricated to facilitate insertion. It expands in three dimensions for complete protection. Its removal cord is chain stitched, for safety, to the entire length of the tampon. Both tampon and applicator are readily disposable in the toilet.

Because Tampax tampons are worn internally, there's no irritation, no chafing, no embarrassing menstrual odour. And for sports-active girls, particularly swimmers, tampons are a must.

Tampax tampons are available in Regular and Super absorbencies, with explicit directions for insertion and use enclosed in each package.

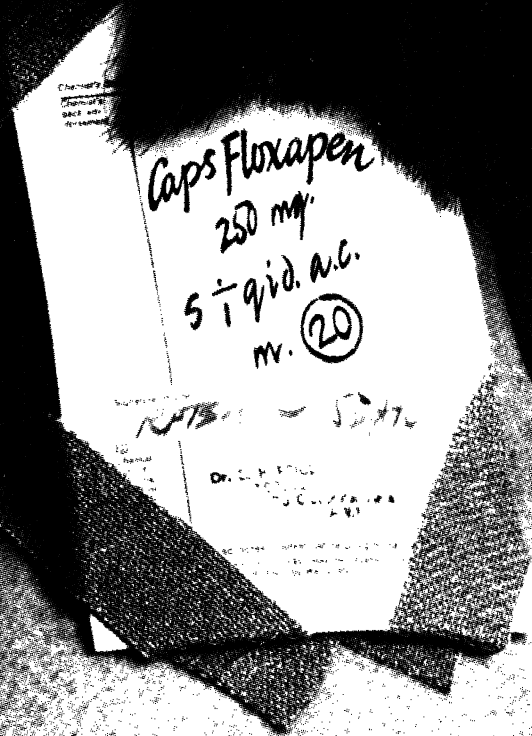

Please order your charts and booklets by writing to the address below.

A new acquaintance a good

 Bencard

can soon become friend.

Amoxil can soon become a good friend because of its reliability in the routine treatment of a wide range of infections.

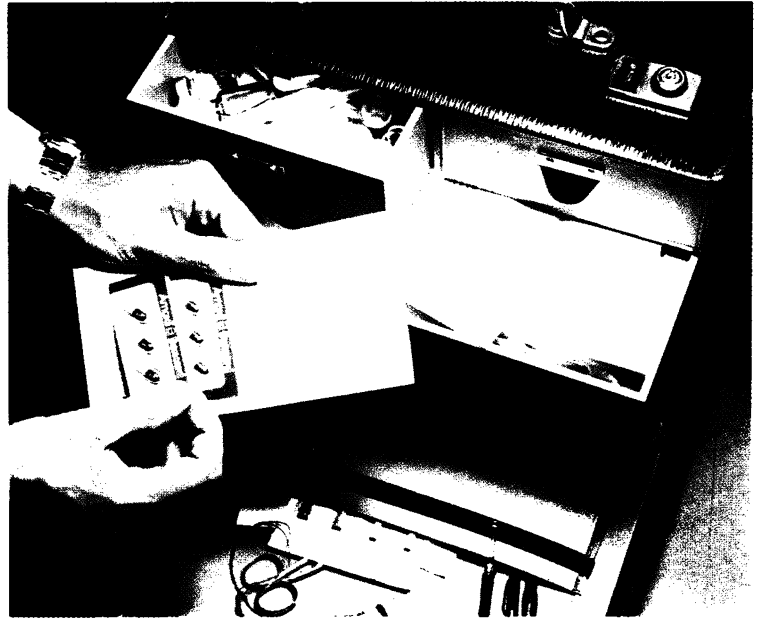

Outstanding oral absorption, not greatly affected by the presence of food, broad spectrum of activity and bactericidal action are among the more notable qualities of Amoxil.

Rapid decisive action coupled with the degree of safety associated with penicillin therapy inspires a high level of confidence in everyday use.

A convenient t.d.s. dosage, independent of meal times, a range of highly acceptable presentations, treatment costing as little as 16p per day – further good reasons why Amoxil represents practical antibiotic therapy at its best.

Extensive clinical trials have demonstrated that in Upper and Lower respiratory infection, Urinary tract and Skin and Soft tissue infections, Amoxil is dependable and trustworthy – as all good friends should be.

Further information on Amoxil (amoxycillin) is available from:
Bencard, Freepost, Great West Road, Brentford, Middlesex.

To help you further in your practice, Amoxil starter packs are available from your Bencard representative or from the Company.

Prescribing information

Dosage: Adults 250 mg three times a day. Children – up to 10 years: 125 mg three times a day. In the case of severe infections the dosage should be doubled.

Contra-indication: Amoxil is a penicillin and should not be given to penicillin hypersensitive patients.

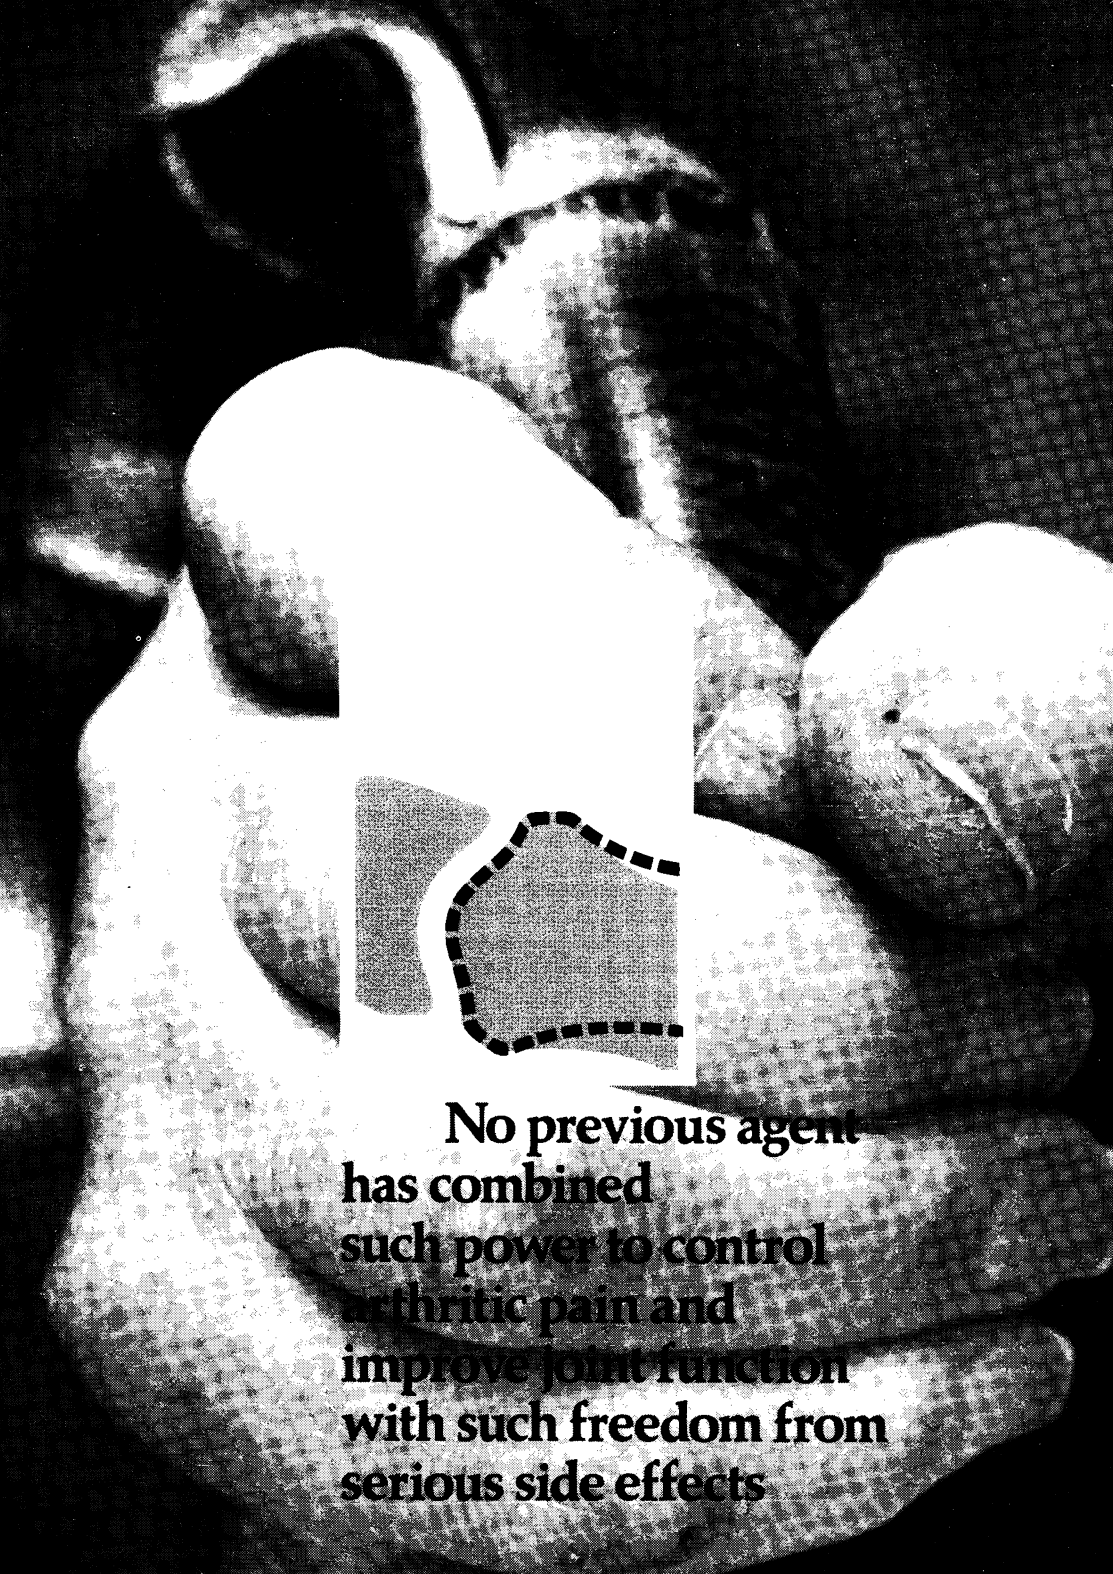

Side effects: In clinical trials involving more than 1,500 patients no serious side effects were reported. Those side effects which were encountered were of a mild transitory nature.

Flatulent dyspepsia. A repeated problem.

He is a frequent visitor to your surgery and you've tried him on a whole variety of antacids and other medications. But still the dyspepsia persists.

Maxolon offers a real break in the all-too-familiar routine of persistent flatulent dyspepsia. Maxolon prevents symptoms in 4 out of 5 patients. In a month, normal motility may be re-established.

In your practice, there are patients who would benefit from a month's course of Maxolon.

Prove Maxolon for yourself. Use Maxolon on your regular flatulent dyspepsia patients. For a 7 day starter pack write to Beecham Research, Freeport, Brentford, Middlesex – post-free in the United Kingdom. *Full information is available on request.*

"Seventy-five per cent of patients spontaneously complained of various degrees of tiredness on methyl dopa, as against 10 per cent on bethanidine (ESBATAL) and 17 per cent on guanethidine."⁽¹⁾

"Side-effects are fewer and milder...."⁽²⁾

"The lower incidence of side-effects, and the more rapid response to change in

dosage makes bethanidine (ESBATAL) a more satisfactory drug."⁽³⁾

"Thus bethanidine (ESBATAL) not only on grounds of cost but also because of its therapeutic effectiveness has a strong claim to be considered as today's first choice of drug treatment of severe hypertension."⁽⁴⁾

The Mental Health Service After Unification

This report from a Tripartite Committee of the Royal
College of Psychiatrists, the British Medical Association
and the Society of Medical Officers of Health discusses the
organization of the Mental Health Service in the context of
the forthcoming reorganization of the National Health
Service.

The Committee has taken the mental health needs of a
population unit of $\frac{1}{4}$ million on which to base a realistic
appraisal of the Government's present policy and the role
of doctors, nurses, social workers, voluntary workers, and
others in this field.

Constructive proposals are made for an essential framework
of requirements in hospital and in the community, and
guidelines are laid down for all those concerned with
mental health and related social work and community
services.

**Copies of the report (95 pages) are available price
50p plus 6p postage from the British Medical Journal
Publishing Department, BMA House, Tavistock
Square, London, WC1H 9JP.**

**he suffers from
dysmenorrhoea**

He suffers because she's miserable, irritable, unable to cope

Duphaston defeats dysmenorrhoea and brings the woman back into his life again. Its progestational activity is unique in that it is orally active and non-contraceptive. Duphaston has been shown in 3 double blind trials to be successful in treating dysmenorrhoea. Endometriosis, a cause of secondary dysmenorrhoea and sometimes infertility, responds remarkably well to Duphaston. Because Duphaston does not inhibit ovulation, pregnancy, the best treatment, is not prevented. Each Duphaston tablet contains 10 mg dydrogesterone. Further information on request.

“...chronic psoriasis is indeed a grave social and medical problem...”

In this review* of advances in the treatment of disease of the skin, the author pointed out that many dermatologists are becoming alarmed at the increasing amount of permanent cutaneous damage following the long-term use of topical steroids. After discussing the merits of coal tar preparations, the author concluded: “It is clear that such . . . therapy is extremely effective in the control of psoriasis, . . .”

Alphosyl cream and lotion contain 5% extract of coal tar and allantoin 2% for removal of cutaneous debris. **Alphosyl Application P.C.** is a combination of coal tar extract (5%) and hexachlorophane (1%) in a special foaming detergent base (shampoo). *The Practitioner (1970) 205, 452-458.

EXECUTIVE COUNCIL FOR THE CITY OF SHEFFIELD MOSBOROUGH DEVELOPMENT

TYPED

INITIAL PRACTICE ALLOWANCE
A vacancy exists for a suitably qualified general medical practitioner to start a new group of doctors to provide general medical services in the first phase of the Mosborough Development.

The Mosborough Development is planned to take place in the south east part of the City on land which was transferred from Derbyshire County Council in April 1967. The Development will provide housing for about an additional 50,000 people within a number of independent townships. Each township will have dwellings for about 5,000 people grouped around a primary school and a local centre containing shops, public houses and other facilities. The first phase of the Development, comprising the townships of Halfway, Westfield and Waterthorpe is expected to be completed in 1978.

It is planned to provide the Health Services for the first phase of the Development from a Health Centre to be sited at Westfield. Until the Health Centre is ready, (probably late 1973) Sheffield Corporation will make available a house in Westfield for use as temporary practice accommodation. It is intended there will be full attachment of health visitors and nursing staff and close co-operation with Social Services Department of the Local Authority. There is open access to laboratory and X-ray facilities in the Sheffield Hospitals.

The vacancy attracts a special Type D initial practice allowance, which guarantees that the doctor's net annual professional income for the first three years, or earlier if a partnership develops, will not be less than his previous net professional income up to a maximum of £5,820. The experience expected will normally be about ten years as a qualified doctor, of which two have been in hospital appointments and five in a busy general practice in this country. In due course the appointed doctor will be expected to take partners and to become the leader of the medical team in the Development area. He should have enthusiasm for administering a new project and the ability to attract and work with other practitioners. He should be used to maternity work and acceptable for the obstetric list. The successful applicant will be expected to commence practising on 1st April, 1973.

There is a possibility that at a future date this practice could be associated with the new Department of Community Care and General Practice in the University of Sheffield.

There will be two interviews for this vacancy, one in Sheffield and the other in London. The first selection will be made by the Medical Practices Committee, London.

Application forms and further information may be obtained from the Clerk of the Council, Executive Council for the City of Sheffield, Brincliffe House, Osborne Road, Sheffield S11 9BD. Closing date for receipt of completed application forms is 23rd October, 1972. (H8256) 5

COMMERCIAL APPOINTMENTS

Director of Clinical Research

Merck Sharp & Dohme Limited U.K.

There exists a vacancy in the Medical Department for an experienced physician to assume responsibility as Director of Clinical Research since the present incumbent has been promoted within our Organization.

The Director of Clinical Research is responsible for the execution of major research programmes on new and established human ethical products and works in very close collaboration with professional colleagues in the International Division of the Merck Sharp & Dohme Research Laboratories, U.S.A.

Clinical research in the U.K. is a function of the Medical Department which is the largest in the Company's International Division and is staffed by physicians and pharmacists, headed by the Medical Director, who is also a Member of the Board, and to whom the incumbent reports. The Director of Clinical Research has his own professional staff reporting to him.

For a physician already working in the Pharmaceutical Industry, this position must be attractive, offering as it does, not only an immediate senior appointment, appropriately remunerated, but also opportunities for advancement within one of the largest research-based pharmaceutical organizations in the world.

The applicant should be well-qualified medically and have experience within the Pharmaceutical Industry in the organization and control of clinical trials, but any applicant will be considered on his merits.

Our offices are situated in a pleasant part of Hertfordshire. An appropriate starting salary will be negotiated and will carry additional benefits, including a car, superannuation and free life assurance. This position is ready to be filled immediately and each applicant is requested to send full particulars of his career.

Applications, by letter only, should be addressed endorsed "private and personal" to:—
Dr. J. J. F. Merry,
Medical Director,
Merck Sharp & Dohme Limited,
Hoddesdon, Herts, England.

All applications will be treated in the strictest confidence and no approach to present employers or referees will be made without consent.

High-dose aspirin as well tolerated as ibuprofen **Safapryn***

in musculo-skeletal pain

Superior to ibuprofen in analgesic and anti-inflammatory activity.¹

In 40 patients with arthritic or rheumatoid conditions, Safapryn proved markedly superior to ibuprofen in relieving pain and improving the range of joint movement.¹

In another study, aspirin (the major component of Safapryn) produced significant reductions in joint size, whereas ibuprofen produced no greater reduction than did a placebo.²

Better tolerated than standard aspirin^{3,4}

"...the really important result of the trial [with Safapryn] was its freedom from clinical evidence of gastric irritation and from overt or occult bleeding."³

Pack of 250 tablets.

(Each sugar-coated tablet contains 300 mg. acetylsalicylic acid as an enteric-coated core, and 250 mg. paracetamol.)

PROBLEMS OF THE NEWBORN

from the British Medical Journal

Many doctors outside the neonatal and paediatric field may be unaware of the rapid advances made in the care of the newborn in the last decade. Last year the *B.M.J.* published a series of articles discussing the diagnosis and management of common conditions affecting newborn babies. The articles have been revised by their authors and collected together as a booklet, forming a useful guide to both serious problems and more everyday topics which confront doctors in their practice.

LASIX
diuresis

You and your patient both know that Lasix has a conveniently short duration of action which can be timed to suit the patient's routine. Additionally, you can be confident that you can adjust the dose of Lasix to remove just the amount of oedema required because Lasix has a precise dose/response relationship. And you know that Lasix gives fewer problems in long term therapy.

Lasix tablets contain 40 mg frusemide B.P.
