

She needed something to help her sleep

SURMONTIL relieves insomnia while treating its cause

But what?

A hypnotic will certainly give her a good nights' sleep, but if she is one of those patients – and there are many of them – whose insomnia originates from anxiety/depression, sleep is all she'll get. The root cause of the condition will always remain untreated with the patient becoming more and more dependent on the medication. Moreover, the degree of this dependence is further heightened by the fact that, because they distort normal sleep patterns, all major hypnotics (and many antidepressants as well) can give rise to unpleasant symptoms upon withdrawal. Patients, therefore, feel most disinclined to discontinue a treatment which, although giving symptomatic relief, is not removing the cause of their condition. These people, in fact, need more than just "something" to help them sleep – they need 'Surmontil'.

- immediately restores sound natural sleep
- relieves daytime anxiety/depression
- avoids long-term hypnotic therapy by treating the underlying condition
- removes the risk of withdrawal problems due to REM suppression/rebound, and possible dependence encountered with both hypnotics and other major tricyclic antidepressants
- unlike a number of other antidepressants does not increase intra-sleep restlessness, thus its sleep-restoring properties are enhanced

Infected eczema is the eczema you worry about.

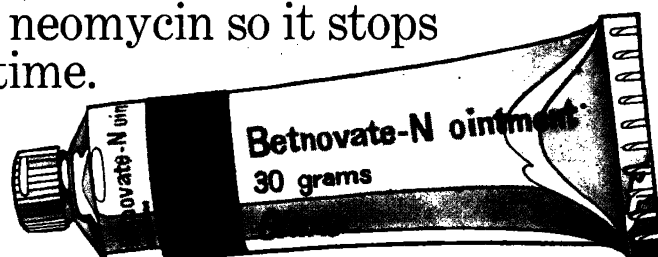

Betnovate-N

stops the scratching that starts the infection that results in infected eczema.

And does it quicker than other preparations designed to combat infected eczema, because it contains betamethasone as 17-valerate, a more effective steroid.

Betnovate-N also contains neomycin so it stops most infections at the same time.

And at a price others can't match.

in the lack of stimulation and addiction:

"Some subjects experienced a low degree of amphetamine-like effects from AN 448, whereas no such effect was found with fenfluramine. With regard to the factor "C.S. effect, [central-stimulating]" AN 448 and fenfluramine did not differ from placebo."

"Anti-Obesity Action of Fenfluramine," The Practitioner, (1972), 208, 660

"The results indicate that fenfluramine significantly improved glucose tolerance and that this was not the result of increased insulin production. Small but significant reduction in fasting cholesterol and lipoprotein levels also occurred in most of the patients."

in recommendation:

"If it is thought necessary to give a drug to help the patient in the beginning, fenfluramine (Ponderax) appears to have the least undesirable side-effects. In therapeutic doses it does not stimulate the central nervous system and has a mild sedative action."

THE STRONG BOX

Analgesic strength - Codis provides double analgesic action with codeine and soluble aspirin. In a recent hospital trial,* Codis proved superior to pentazocine in the relief of pain.

Anti-inflammatory strength - Aspirin's proven anti-inflammatory effect (not found with paracetamol) provides a valuable source of relief in conditions such as

rheumatoid and osteo-arthritis where inflammation and pain occur together.

Strength in solubility - The aspirin and codeine in Codis are completely soluble, resulting in rapid absorption, fast action and relative freedom from gastric irritation.

Each Codis tablet contains Aspirin BP 500 mg, Codeine Phosphate

BP 8 mg, Calcium Carbonate BP 150 mg, Anhydrous Citric Acid BP 50 mg, Saccharin BP 6 mg.

when the "hot" infection cools down...

Hiprex

helps keep the patient from coming back

Hiprex meets the need for acceptable, effective follow-up treatment aimed at maintaining antibacterial activity in the urinary tract, eliminating infection completely, and so preventing recurrence.

Antibiotics, sulphonamides and other agents can all give prompt relief of acute symptoms. But all too often the infection is left smouldering, only to flare up again perhaps months later.

And however successful the initial treatment, the patient remains at risk from re-infection. Yet this risk diminishes with time. The longer the patient remains free from infection, the less chance there is of recurrence.

Long-term therapy with *Hiprex* — after the "hot" infection has cooled down — can help to buy this valuable time.

Composition Each tablet contains hexamine hippurate 1g. **Indications** The treatment of urinary tract infections, such as pyelitis, cystitis and urethritis, but excluding acute pyelonephritis. The treatment of chronic pyelonephritis, and as maintenance therapy after successful antibiotic treatment of acute pyelonephritis. The treatment of asymptomatic bacteriuria, including that occurring during pregnancy. **Prophylaxis** before and after urological surgery. **Dosage** Adults: 1 tablet twice daily. Children: 6-12 years: $\frac{1}{2}$ tablet twice daily. In refractory cases, the dosage may be increased to: 1 tablet three or four times daily in adults; $\frac{1}{2}$ tablet three or four times daily in children aged 6-12 years. Tablets may be halved but should not be crushed. **Alkalinuria** Some patients may have an alkaline urine as a result of a predominantly vegetarian diet or occasionally due to *Proteus* or *Pseudomonas* infection. In these cases, additional acidification may be necessary to lower the urinary pH to the level required to degrade the hexamine moiety. **Administration** of ascorbic acid 2g. daily in divided doses (either as powder or as tablets) is recommended in these cases. **Side-effects** Occasionally, rashes, gastric irritation, or irritation of the bladder may occur. With prolonged administration at high dosage, the latter may lead to haematuria. All side-effects are reversible on withdrawal of the drug. **Treatment of side-effects** If the symptoms of infection such as painful micturition or bladder irritation do not subside within seven days of starting treatment, or if such symptoms develop on prolonged treatment at high dosage, this probably indicates drug-induced bladder irritation. Prompt relief can be obtained by the consumption of copious quantities of water and 2-3 teaspoonfuls of bicarbonate of soda. **Contra-indications** Hepatic insufficiency, severe dehydration, severe renal failure (serum creatinine level > 5 mg.%) or metabolic acidosis. *Hiprex* may be used where mild to moderate renal insufficiency is present. *Hiprex* is also contra-indicated as the principal therapeutic agent in acute parenchymal infections of the kidney. *Hiprex* should not be administered concurrently with sulphonamides owing to the danger of crystalluria, or with alkalinising agents such as mixtures of potassium citrate.

Intal doesn't relieve asthmatic attacks

It prevents them

Steroids, bronchodilators and antihistamines, whether in aerosol or tablet form, are only symptomatic treatments. Whereas INTAL actually *protects* the patient from asthmatic attacks—day in, day out.

By preventing the release of spasmogens INTAL affords daily prophylaxis for as long as any challenge exists. More than 150 clinical trials have proved its effectiveness, safety and ease of administration.

Amoxil can soon become a good friend because of its reliability in the routine treatment of a wide range of infections.

Outstanding oral absorption, not greatly affected by the presence of food, broad spectrum of activity and bactericidal action are among the more notable qualities of Amoxil.

Rapid decisive action coupled with the degree of safety associated with penicillin therapy inspires a high level of confidence in everyday use.

A convenient t.d.s. dosage, independent of meal times, a range of highly acceptable presentations, treatment costing as little as 16p per day – further good reasons why Amoxil represents practical antibiotic therapy at its best.

Extensive clinical trials have demonstrated that in Upper and Lower respiratory infection, Urinary tract and Skin and Soft tissue infections, Amoxil is dependable and trustworthy – as all good friends should be.

Further information on Amoxil (amoxycillin) is available from: Bencard, Freepost, Great West Road, Brentford, Middlesex.

To help you further in your practice, Amoxil starter packs are available from your Bencard representative or from the Company.

Prescribing information

Dosage: Adults 250 mg three times a day. Children – up to 10 years: 125 mg three times a day. In the case of severe infections the dosage should be doubled.

Contra-indication: Amoxil is a penicillin and should not be given to penicillin hypersensitive patients.

Side effects: In clinical trials involving more than 1,500 patients no serious side effects were reported. Those side effects which were encountered were of a mild transitory nature.

Do you have MARTINDALE at your elbow?

Martindale, says *The Practitioner*, "puts every other textbook of treatment in the English language in the shade, so far as the practising clinician is concerned."

And it goes on to say: "The general practitioner who does not have a copy of this 'opus magnum' permanently at his elbow is not only depriving himself of a 'must', he is asking for unnecessary trouble."

Martindale is the world's most comprehensive guide to drugs and medicines. The 26th edition, published recently, is a book of 2,346 pages containing about two million words. Martindale now includes over 2,800 drug monographs with information (where appropriate) about pharmacological action; toxic effects and their treatment; precautions to be observed on administration; interactions with other drugs; absorption, metabolism,

and fate in the body; actions, uses and dosage; proprietary drug preparations. Both proprietary and non-proprietary names are included in the 34,000-entry main index. The information is supported by abstracts and references selected from more than 30,000 specially prepared for this edition. The formulas are given of over 1,700 medicines that can be bought by the public without prescription, information often essential in compiling a clinical history. For rational prescribing, Martindale is an essential tool. Ask your pharmacist to show you his copy—but don't expect him to let you borrow it! MEDICINE IN A TROPICAL ENVIRONMENT

Edited by A.G. Shaper, J.W. Kibukamusoke, M.S.R. Hutt.

Medicine in a Tropical Environment is intended for medical students and doctors working in tropical and developing countries. The essays bring together specific problems of the tropical environment which have been the subject of recent investigation, and the authors write on them from personal experience. Little of the material on which the essays are based was available more than five years ago. To doctors in temperate climates preparing themselves for medical work in developing parts of the world *Medicine in a Tropical Environment* is essential reading.

There are further vacancies in the Employment Medical Advisory Service, a division of the Department of Employment. The appointments, which are full-time, are in areas based in or near Birmingham, Bolton, Huddersfield, Liverpool, Central London (Holborn), London (Perivale and Waddon), Letchworth, Runcorn, Southampton, Stoke and Wolverhampton.

An Adviser's duties will include investigations and formal surveys, advice about working conditions, and medical supervision of young people who are not fully fit for employment and of people undergoing training or rehabilitation. This is very wide-ranging work of growing importance. It will take an Adviser into many different work-places, particularly factories, and will require him to give advice on occupational medicine to workers (and their representatives) and employers, as well as maintaining liaison with medical practitioners and hospitals on the medical aspects of their patients' work.

So far as is geographically possible Advisers will work in groups and nurses may be appointed to some groups. Clerical and supporting staff will be provided. Laboratory facilities either through the NHS or the EMAS Central Reference Laboratory will be available. Statistical assistance is also available.

Applicants (men or women) must be fully registered medical practitioners in the United Kingdom. Experience in industrial medicine or in allied subjects such as toxicology, pulmonary physiology or psychiatry is desirable and the possession of higher qualifications will be an advantage. A current driving licence is essential.

The salary scale is £4,313 to £6,045 (higher in London). In some circumstances the starting salary can be up to the maximum. There are good prospects of promotion as the Service develops with salaries up to £7,690. The pension is non-contributory and previous public service superannuation rights will normally be transferable.

For full details of these posts and an application form (to be returned by 16 November), write to the Civil Service Commission, Alencon Link, Basingstoke, Hants RG21 1JB, or telephone BASINGSTOKE 29222 ext. 500 or London 01-839 1992 (24 hour 'Ansafone' service) quoting S/7946/6.

Medical Officers

Zambia £5,125+ p.a.

You are offered the prospect of a tour of duty - for as little as one year - in Zambia, one which will give you both a wide range of professional experience and early responsibility (all in addition to a wide extension of your personal horizons). It is with the nation's major mining organisation, Nchanga Consolidated Copper Mines Ltd., with an international staff of technical specialists.

The company is responsible for providing full medical care to its employees - over 30,000 - and their families; the total of persons to be looked after is about 150,000.

There is a senior doctor staff of over 40, including a full complement of specialists and 150 fully qualified nurses. The modern facilities include 5 well-equipped hospitals (814 beds), 16 clinics and 8 main first aid dressing stations.

General Duty Medical Officers will be involved in preventive and curative medicine, surgery, anaesthetics, gynaecology/obstetrics, public health and nutrition; and although the mines have a strict safety code an amount of accident work can be expected.

Contracts may be negotiated for periods of one to three years. Locums can also often be arranged.

Salaries will depend on experience, but the minimum is K9060 (£5,126) gross per annum. In addition there is a cash settling-in allowance; company private primary schools; a detached, furnished house with garden is provided for £1.50 per week; and children receiving secondary education overseas are granted up to £500 per child per year towards school fees and two free return passages to visit their parents during holidays; interest free car loan available.

Study leave on full pay - up to 6 months - is available. Currency regulations allow up to 33% of gross income to be sent home per month with an additional end of contract allowance.

PRINCESS MARGARET HOSPITAL FOR CHILDREN

Perth, Western Australia

Applications are invited for two posts of REGISTRAR IN PAEDIATRIC PATHOLOGY to commence January, 1973.

The duties of the applicants will depend on their interests and experience but would normally include necropsy work, responsibilities in relation to other branches of pathology and teaching.

Applicants with appropriate experience will be appointed as Registrars of the hospital and, subject to their qualifications and agreement on a suitable teaching programme, may be appointed as part-time Lecturers in Pathology, Clinical Biochemistry or Microbiology in the University of Western Australia. The latter duties will involve limited teaching duties for the University department concerned, assistance from the department in training and supervision of research projects, and the use of facilities in the department where appropriate.

There are two consultant pathologists, one of whom is in charge of the whole of the laboratories and is responsible for the departments of Microbiology (including a small Virology Unit) and Biochemistry (including a unit for screening for metabolic disorders); the other pathologist is responsible for the departments of Haematology and Morbid Anatomy, and takes part in the work of the Leukaemia Clinic and Combined Therapy Clinic for the treatment of malignant tumours.

The Princess Margaret Hospital is the only paediatric hospital in Western Australia, with 300 beds and a busy out-patient department. There are well developed postgraduate teaching programmes in paediatrics at the hospital and in pathology at the nearby Royal Perth Hospital.

A Children's Medical Research Foundation has been established and a co-ordinated paediatric research programme is in progress.

Salary range: £7,619-9,039, according to previous experience.

Travelling allowances available in return for guaranteed service.

Board and lodging available for single person at \$704 per annum.

Enquiries and applications, stating age, qualifications and experience, together with the names and addresses of two referees, close with the undersigned on 8th November, 1972. J. D. Clarkson, Administrator. (H8506) 118

ROYAL NEWCASTLE HOSPITAL Newcastle, N.S.W. 2300 Australia

REGISTRARS

The Royal Newcastle Hospital is a complex totalling 850 beds with 20,000 admissions annually and a large outpatient department. There is a regular teaching programme throughout the week, with a visiting lecturer each week.

Applications are invited for the following appointments:

Medical Registrars
Appointments are for one year, with opportunity for further appointments. These posts provide experience in general medicine, Coronary Care Unit, Acute Respiratory Unit, Renal Unit and in the medical specialties.

Applications should have had at least two years' experience since graduation.

Geriatric Registrar
Appointments are for one year, with opportunity for further appointments. The appointment is offered as a training post in internal medicine with a special orientation towards the specialty of Geriatrics. Applicants should have completed at least two years since graduation and are expected to work towards a higher degree. Experience in general practice would be favourably viewed.

Registrar in Thoracic Medicine
The successful applicant will at first work at Rankin Park Chest Hospital and at the Chest Clinic, Royal Newcastle Hospital. Rankin Park Chest Hospital has 112 beds and has its own Blood Gas Laboratory and X-ray department and utilizes the pathology services at Royal Newcastle Hospital.

The registrar will change duties with the other registrar in Thoracic Medicine and work only at Royal Newcastle Hospital. Here he will be involved in the care of patients in the Acute Respiratory Unit and in the general wards. He is expected to become more familiar with more advanced techniques of assessing pulmonary function in a well equipped laboratory.

Applicants should have completed at least two years since graduation and are expected to work towards a higher degree. Experience in general practice would be favourably viewed. Consideration would also be given to the appointment of a registrar who already has his M.R.A.C.P. but who wishes to spend a longer term consolidating his knowledge of chest diseases.

Renal Registrar

The appointment is initially for one year with opportunity for further appointment. Possession of the M.R.A.C.P. or an equivalent degree will be an advantage.

The Renal Unit is a newly established modern unit with an active dialysis and participation in the Sydney transplantation programme. There are 12 beds for general nephrology. The unit will provide experience in all aspects of renal medicine including acute renal failure, hypertension, renal pathology and immunology. A close relationship exists with the Paediatric Department and a joint paediatric nephrology clinic will afford wide experience in renal disease in childhood as well. Participation in research activities of the unit will be encouraged. A renal laboratory is attached to the unit and laboratory technical help is available.

Paediatric Registrar

The paediatric services of the hospital consist of a 50 bed children's ward; a midwifery department delivering 1,400 cases per year where the registrar is involved in the supervision of the normal infants and in a Special Care Nursery; and a busy Outpatient Department. Applicants should have had previous paediatric experience. An active postgraduate educational programme is available in the hospital.

Salary in accordance with Hospitals Commission Determination.

Applications giving details of experience with the names of three referees should be addressed to the undersigned. Applications close 27th October, 1972. E. G. Currow, General Superintendent and Chief Executive Officer. (H8505) 118

High-dose aspirin as well tolerated as ibuprofen **Safapryn***

in musculo-skeletal pain

Superior to ibuprofen in analgesic and anti-inflammatory activity.¹

In 40 patients with arthritic or rheumatoid conditions, Safapryn proved markedly superior to ibuprofen in relieving pain and improving the range of joint movement.¹

In another study, aspirin (the major component of Safapryn) produced significant reductions in joint size, whereas ibuprofen produced no greater reduction than did a placebo.²

Better tolerated than standard aspirin^{3,4}

"...the really important result of the trial [with Safapryn] was its freedom from clinical evidence of gastric irritation and from overt or occult bleeding."³

Pack of 250 tablets.

(Each sugar-coated tablet contains 300 mg. acetylsalicylic acid as an enteric-coated core, and 250 mg. paracetamol.)

IS IT TRUE...

they
don't
make
aspirin
any
longer

If aspirin is the choice for chronic rheumatic patients, then longer action is the true criterion of aspirin. And no-one makes it any longer—in effectiveness—than Levius.

Longer sojourn—in the form of aspirin—for relief of day-time pain, with continuing comfort through the night. Sustained high level of total salicylate for anti-inflammatory effect, reducing stiffness and aching joints the following morning.

The Levius tablet rapidly disintegrates into 35,000 separately-encased microgranules, which release the aspirin at a controlled rate. With full dosage, high concentrations are avoided—greatly lowering the incidence of gastro-intestinal irritation, nausea and anorexia.

In the long term treatment of rheumatic diseases, few drugs have gained the wide acceptance of aspirin. And Levius is the logical extension of aspirin.
