ALLERGIC RHINITIS

A completely fresh approach

The unique way in which sodium cromoglycate prevents asthmatic reactions has been the subject of over 150 clinical trials. Prompted by this success, more recent investigators have shown that, in the form of RYNACROM, sodium cromoglycate has a similar protective effect on the nasal mucosa and can provide year-round prophylaxis in allergic rhinitis²

RYNACROM is not a decongestant, anticholinergic, antihistamine or steroid. Its action is unlike any other form of treatment.

In the face of challenge – pollen, house dust, feathers, pets, etc. – RYNACROM (sodium cromoglycate) prevents the degranulation of those cells which would normally rupture and release histamine and inflammatory agents. Thus regular insufflation of RYNACROM provides continuous prophylaxis from a condition which, hitherto, has been difficult to control symptomatically and even more difficult to prevent. A number of patients who have failed

to respond to other forms of treatment have greatly benefited from RYNACROM!

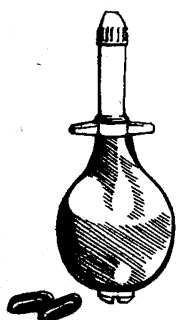

RYNACROM does not produce inconvenient side effects associated with conventional therapy.

Ear, Nose and Throat Infections

Prescribe Penbritin with Confidence for infections in children

Confidence is born of experience. And experience with Penbritin in the treatment of ear, nose and throat infections has established an outstanding record of safety and effectiveness.

Penbritin gives you broader cover than penicillin V—yet retains all the benefits of penicillin safety.

And Penbritin has none of the tooth-staining problems associated with the use of tetracyclines in young children.

Intal doesn't relieve asthmatic attacks

It prevents them

Steroids, bronchodilators and antihistamines, whether in aerosol or tablet form, are only symptomatic treatments. Whereas INTAL actually *protects* the patient from asthmatic attacks—day in, day out.

By preventing the release of spasmogens INTAL affords daily prophylaxis for as long as any challenge exists. More than 150 clinical trials have proved its effectiveness, safety and ease of administration.

But only an asthmatic can really appreciate the difference it makes.

She needed something to help her sleep

SURMONTIL relieves insomnia while treating its cause

But what?

A hypnotic will certainly give her a good nights' sleep, but if she is one of those patients – and there are many of them – whose insomnia originates from anxiety/depression, sleep is all she'll get. The root cause of the condition will always remain untreated with the patient becoming more and more dependent on the medication. Moreover, the degree of this dependence is further heightened by the fact that, because they distort normal sleep patterns, all major hypnotics (and many antidepressants as well) can give rise to unpleasant symptoms upon withdrawal. Patients, therefore, feel most disinclined to discontinue a treatment which, although giving symptomatic relief, is not removing the cause of their condition. These people, in fact, need more than just "something" to help them sleep – they need 'Surmontil'.

- immediately restores sound natural sleep
- relieves daytime anxiety/depression
- avoids long-term hypnotic therapy by treating the underlying condition
- removes the risk of withdrawal problems due to REM suppression/rebound, and possible dependence encountered with both hypnotics and other major tricyclic antidepressants
- unlike a number of other antidepressants does not increase intra-sleep restlessness, thus its sleep-restoring properties are enhanced

MA 9127 POSED PHOTOGRAPH

'They laughed when I said I was joining the Army.'

Doctor, 25

When a good doctor decides to join the Royal Army Medical Corps, the reaction among his friends may be one of surprise or amusement.

"Won't the military aspect get in the way of your medical career?" is often the attitude.

In fact, your medical career gets first priority in the RAMC. With a fuller, more varied way of life thrown in.

To begin at the beginning. Every doctor we accept automatically assumes the rank of Captain.

So at 24, you could be earning around £3,942 a year, with generous allowances. (A doctor of some years' experience stands a good chance of entering as a Major.)

You'll look after soldiers, and their families, in fully equipped, up to date surgeries.

You'll spend some time working abroad, getting to see something of the world.

You may study for higher qualifications, and some are able to specialise.

On top of that, you reap the

rewards of Army life. Responsibility and challenge. A wide social circle. Sports and recreation facilities. And 6 weeks holiday each year on full pay.

If you take a Short Service Commission, you're free to leave after 3 or 5 years. By that time you'll have gained some invaluable experience and a tax-free gratuity to give you a good start in civilian practice.

Or you can always apply for a Regular Commission.

If you're interested, let us know, and we'll send you all the details. Or you may call in and see us. We can also arrange for you to visit one of our medical establishments.

Then we think you'll agree that there's nothing funny about a good doctor ending up in the Army.

GYNAECOLOGY IN GENERAL PRACTICE

from the British Medical Journal

As in other branches of medicine, the pattern of gynaecological problems likely to be encountered by the general practitioner will probably change in the future. Moreover, many doctors now in practice were taught little about some of the topics which are important today and are likely to become even more so.

In 1971 the *B.M.J.* published a series of articles in the "Medical Practice" section discussing the management of various gynaecological disorders in a domiciliary setting. These have now been collected together as a booklet entitled *Gynaecology in General Practice* and provides a useful and up-to-date account of gynaecology in general practice.

Primperan in action

Disorders of gastroduodenal motility such as stasis, reflux and pylorospasm are rapidly relieved by the physiological "push" that PRIMPERAN provides.

PRIMPERAN goes further than ant-acids or antispasmodics – it assists stomach emptying, powerfully, as shown strikingly in the X-ray picture below.

By augmenting the depth and frequency of antral contractions, opening the pylorus and co-ordinating the movement of stomach and duodenum, PRIMPERAN restores a normal pattern of peristalsis.

Available as tablets and syrup.

is offered by the VOLUNTARY EUTHANASIA SOCIETY for an essay of 2,000 to 5,000 words by a Medical Practitioner registered after 1964 on a theme related to Doctors and The Dying.

Competitors are neither required to commit themselves nor to refrain from committing themselves for or against the principles that animate the Society: essays should be based on personal experience in helping dying patients. They should not evade discussion of some, at least, of the many sensitive and controversial topics that arise, such as, the ethics of treatments intended to prolong life when there is no hope of permanent improvement in the patient's condition; freedom of communication between doctor and patient and the desirability or otherwise of making him aware that his illness is believed to be terminal; the possibilities of the use of recent technological advances to the point where they may cause unnecessary distress, etc.

The judges will not be members of or have any connection with the Society which will have the right to publish the winning essay. Unsuccessful essays will remain the property of their authors and be returned.

EXECUTIVE COUNCIL FOR THE CITY OF SHEFFIELD MOSBOROUGH DEVELOPMENT

TYPE D INITIAL PRACTICE ALLOWANCE

A vacancy exists for a suitably qualified general medical practitioner to start a new up of doctors to provide general medical services in the first phase of the Mosborough Development.

The Mosborough Development is planned to take place in the south east part of the City on land which was transferred from Derbyshire County Council in April 1967. The Development will provide housing for about an additional 50,000 people within a number of independent townships. Each township will have dwellings for about 5,000 people grouped around a primary school and a local centre containing shops, public houses and other facilities. The first phase of the Development, comprising the townships of Halfway, Westfield and Waterthorpe is expected to be completed in 1978.

It is planned to provide the Health Services for the first phase of the Development from a Health Centre to be sited at Westfield. Until the Health Centre is ready, (probably late 1973) Sheffield Corporation will make available a house in Westfield for use as temporary practice accommodation. It is intended there will be full attachment of health visitors and nursing staff and close co-operation with Social Services Department of the Local Authority. There is open access to laboratory and X-ray facilities in the Sheffield Hospitals.

The vacancy attracts a special Type D initial practice allowance, which guarantees that the doctor's net annual professional income for the first three years, or earlier if a partnership develops, will not be less than his previous net professional income up to a maximum of £5,820. The experience expected will normally be about ten years as a qualified doctor, of which two have been in hospital appointments and five in a busy general practice in this country. In due course the appointed doctor will be expected to take partners and to become the leader of the medical team in the Development area. He should have enthusiasm for administering a new project and the ability to attract and work with other practitioners. He should be used to maternity work and acceptable for the obstetric list. The successful applicant will be expected to commence practising on 1st April, 1973.

There is a possibility that at a future date this practice could be associated with the new Department of Community Care and General Practice in the University of Sheffield.

There will be two interviews for this vacancy, one in Sheffield and the other in London. The final selection will be made by the Medical Practices Committee, London.

Application forms and further information may be obtained from the Clerk of the Council, Executive Council for the City of Sheffield, Brincliffe House, Osborne Road, Sheffield S11 9BD. Closing date for receipt of completed application forms is 18th November, 1972. (H8716) 5

and Associated Hospitals
University of Aberdeen

VOCATIONAL TRAINING FOR GENERAL PRACTICE

Applications for 12 places in this approved 3 Year Scheme are invited from medical graduates who wish to train for a career in general practice and who are fully registered on 1st August, 1973.

Trainees will spend the first two years in Hospital Service Posts at Senior House Officer grade. These posts include experience in Casualty, Dermatology, E.N.T., Ophthalmology, Paediatrics, Obstetrics and Gynaecology. In the second year an elective period of three months is available for each trainee to spend in a hospital department of his or her own choice.

The third year will be spent mainly as an assistant in a local training practice from which two half days per week release will be arranged for courses in psychological medicine and practice organization, and for visits to other practices and to the social services relevant to the work of the family doctor.

Those wishing to be considered for the intake on 1st August, 1973 should complete and return by 30th November, 1972, an application form obtainable from: The Secretary (AF229/BMJ), Foresterhill and Associated Hospitals, Foresterhill House, Ashgrove Road West, Aberdeen AB9 8AQ.

Details of the training schedule will be sent out with the application form, but any additional enquiries about the scheme may be addressed to Professor I. M. Richardson, Department of General Practice, University Medical Buildings, Foresterhill, Aberdeen AB9 2ZD. (17426) 22

MEDICAL RESEARCH COUNCIL

and

DEPARTMENT OF HEALTH AND SOCIAL SECURITY

Epidemiology and Medical Care Unit, Northwick Park Hospital, Harrow, Middlesex

The Epidemiology and Medical Care Unit is jointly supported by the Medical Research Council and the Department of Health and Social Security to work on the aetiology, extent and medical care aspects of disease by population-based study methods. The Unit is well placed to obtain the collaboration of a wide range of clinical specialists and medical scientists, being closely associated with Northwick Park Hospital and the Medical Research Council's Clinical Research Centre.

Collaborative studies are shortly to start between the Unit and Dr. Julian Tudor Hart, Glyncoirwg, S. Wales, on aspects of epidemiology in general practice. These studies are (i) to investigate the use of general practice as a method of obtaining epidemiological information that cannot be obtained by documentary means and (ii) to extend Dr. Hart's research on factors related to the high ischaemic heart disease mortality in the S. Wales valleys, the logistic problems of detecting and treating hypertension, the inverse relationship between family size and blood pressure, and on operational aspects of general practice. The doctor appointed would divide his or her time about equally between service commitments in the practice of 2,000 patients and the research activities described.

The appointment would be to the Unit's scientific staff, for three years. Salary according to age, qualifications and experience on the Council's scales, with superannuation provision.

Further details may be obtained from either Dr. T. W. Meade, Director, Epidemiology and Medical Care Unit, Northwick Park Hospital, Watford Road, Harrow HA1 3UJ (Tel: 01-864 5311, Ext. 2527) or from Dr. Julian Tudor Hart, Glyncoirwg Health Centre, near Port Talbot, Glamorgan SA13 3BL (Tel: 063975 487). Applications to Dr. Meade by 1st December. (H8844) 25

COMMERCIAL APPOINTMENTS

Roussel Laboratories Limited

Medical Advisers

Roussel Laboratories Limited wishes to appoint two Medical Advisers to join the existing team in the Medical Department in Northwest London.

The Company is part of a large international group researching, developing, manufacturing and marketing throughout the world a wide range of pharmaceutical and allied compounds.

The Doctors appointed will assist in planning and progressing clinical evaluations of compounds originating from the group research facilities and will share in the servicing of existing compounds. The work is varied and interesting and provides opportunities for travelling to meet and to work with doctors at all levels of seniority at home and overseas. The successful candidates will report directly to the Director of Medical Services.

Applicants should hold a British medical degree and be registered with the G.M.C. Whilst experience of working in the industry would be helpful, its lack should not deter otherwise suitably qualified doctors from applying. For one of these appointments, knowledge of psychiatry or psychotropic drugs would be advantageous. The other appointment could well be of interest to recently qualified doctors.

The salary to be paid will reflect the importance of these appointments. The Company has a contributory superannuation scheme and the Medical Advisers will be entitled to free life insurance, accident insurance and BUPA insurance. A Company car will be provided and financial assistance will be given if home removal is necessary.

Applications marked 'Private and Confidential' should be sent to:

The Director of Medical Services,
Roussel Laboratories Ltd., Roussel House,
Wembley Park, Middlesex HA9 0NF.

Comprehensive Training Post
in General Surgery**

Applications are invited for the appointment of

REGISTRAR IN GENERAL SURGERY with duties to commence on 1st January, 1973, subject to annual review.

On satisfactory completion of the first period experience will be offered at Registrar and Senior Registrar grade. The post will be held at Guy's Hospital. The Hospital for Sick Children, Great Ormond Street, and in the Bromley, Greenwich, Lewisham or Fenchurch Groups. It is part of an integrated rotational training programme offering security and flexibility and aimed at providing a complete training in general surgery. The scheme is co-ordinated by Professor McColl and the appointment will be made jointly by the bodies concerned. In order to avoid training too many registrars for consultant general surgical appointments in this country a proportion of the posts in this training scheme are being given to candidates who wish eventually to enter other specialties such as orthopaedic, genito-urinary, or who wish to return to their own country. Candidates must have passed a primary fellowship examination and either have sat, or be eligible shortly to sit, the final examination.

Application forms are obtainable from and should be returned to, the Superintendent, Guy's Hospital, London SE1 9RT not later than 24th November, 1972. (17642) 91-6

Division of Clinical Chemistry

The Division of Clinical Chemistry performs all the routine and special investigations for the Royal Adelaide Hospital, for peripheral hospitals and for a proportion of the private practitioners in South Australia. Special procedures already established include automated analytical systems, lipid and lipoprotein analyses, thyroid function tests, steroid analyses (in particular adrenal cortical hormones), radioimmunoassays and data processing. The Division is also responsible for data processing throughout the Institute of Medical and Veterinary Science, which has CDC computers for this purpose.

The medical staff of the Division provide a consultant service for the Royal Adelaide Hospital, certain other hospitals and private practitioners. In addition the Division will have responsibilities associated with the organization and running of the Metabolic Ward within the Royal Adelaide Hospital. Applicants with a particular interest in this latter field, who have or are studying for the membership of the R.A.C.P. are preferred. The department is engaged in a range of different research projects and is in receipt of grants for these purposes. All senior staff are expected to spend part of their time on research and development. Current areas of interest include carbohydrate metabolism, plasma protein fractionation and quantitation, radioimmunoassay, quality control programmes and the analyses of the clinical value of multiple laboratory screening of patients admitted to hospital. The Institute is an approved training laboratory for the Royal College of Pathologists of Australia.

Salary will be in the above ranges commensurate with experience. First class fares and a reasonable baggage allowance will be paid for the appointee and his family.

Applications, stating full name, place, date and year of birth, nationality, marital status, past and present employment, qualifications and experience, together with the names of three referees, should be addressed to the Director, Box 14, Rundle Street Post Office, Adelaide, South Australia. 5000. OPPORTUNITIES FOR PSYCHIATRISTS IN CANADA

with

**Division of Medical Services
Canadian Penitentiary Service
Department of the Solicitor General
THE COMPETITION IS OPEN
TO BOTH MEN AND WOMEN**

One result of a current reorganization of the Division of Medical Services is the upgrading of hospital facilities for psychiatric care and an increase in the number of professional staff required. There is a present need for clinical psychiatrists who, in addition to normal clinical responsibilities will act as consultants to institutional directors in all matters relating to the mental health of inmates and participate with senior psychiatrists in the further development of treatment programme for the mentally ill and for special groups of offenders. These progressive changes will be carried out in consultation with academic institutions.

These positions represent an opportunity to participate in the continuing development of a new approach to psychiatric services in the Canadian Penitentiary Service. Subsequent opportunities for promotion to senior positions are very good.

Positions are available in Quebec, Ontario, British Columbia and Saskatchewan with assistance in relocation being provided.

Salaries range up to \$30,400 (under negotiation) and there are many attractive fringe benefits.

Minimum qualifications for all positions would include a licence to practice medicine in a province of Canada with certification in psychiatry recognized in Canada by a statutory licencing body or possession of qualifications judged to be equivalent. For some positions, candidates must be qualified in the knowledge of both the English and French languages.

Detailed résumé of education and experience should be forwarded as soon as possible to:

**OFFICER-IN-CHARGE
CANADIAN GOVERNMENT IMMIGRATION
OFFICE
38 GROSVENOR STREET
LONDON W1X 0AA**

To ensure consideration all applications must be received by 6th December, 1972 as interviews will be held in London the week of 11th December, 1972.

Please quote reference number 72-168004-K in all correspondence.

High-dose aspirin as well tolerated as ibuprofen **Safapryn**^{*} in musculo-skeletal pain

Superior to ibuprofen in analgesic and anti-inflammatory activity.¹

In 40 patients with arthritic or rheumatoid conditions, Safapryn proved markedly superior to ibuprofen in relieving pain and improving the range of joint movement.¹

In another study, aspirin (the major component of Safapryn) produced significant reductions in joint size, whereas ibuprofen produced no greater reduction than did a placebo.²

Better tolerated than standard aspirin^{3,4}

"...the really important result of the trial [with Safapryn] was its freedom from clinical evidence of gastric irritation and from overt or occult bleeding."³

Pack of 250 tablets.

(Each sugar-coated tablet contains 300 mg. acetylsalicylic acid as an enteric-coated core, and 250 mg. paracetamol.)

As the weather worsens, demands on your time increase. This winter you can relieve some of the pressure by prescribing Magnapen for the more serious chest infections which you see. For acute-on-chronic bronchitis. For pneumonia. For infections following flu.

Magnapen gives you a greater chance of first time success in these serious cases because it is active against virtually all bacteria encountered in General Practice. So you can rely on Magnapen even when there are no laboratory reports to guide you.

Magnapen's greater certainty means that the patient is more likely to respond quickly. More likely to be up and about again sooner. And Magnapen can save you the time which you might otherwise have to spend on repeat visits, second consultations or night calls

to patients who may fail to respond to other antibiotics.

Full information is available on request.
