more recent evidence: more confidence

in the lack of stimulation and addiction:

"Some subjects experienced a low degree of amphetamine-like effects from AN 448, whereas no such effect was found with fenfluramine. With regard to the factor "C.S. effect, (central-stimulating)" AN 448 and fenfluramine did not differ from placebo."

"The results indicate that fenfluramine significantly improved glucose tolerance and that this was not the result of increased insulin production. Small but significant reduction in fasting cholesterol and lipoprotein levels also occurred in most of the patients."

**Pain is but a symptom, best
treated with the lowest effective
dose of any medicament**

Low dosage, low cost in the control of pain

Clinical experience shows that, in fibrositis, dysmenorrhoea, sinusitis, and other commonly encountered conditions of persistent pain, just one tablet of Paramol-118 every four hours provides relief.

By fortifying 500 mg paracetamol with a low dose (10 mg) of dihydrocodeine it is possible to control pain with a minimum daily intake of both drugs: in such low dosage the possibility of side effects is remote.

Needless to say, if necessary, this dosage can be increased to two tablets every four hours—and, even at this higher dosage level, risk of any really undesirable side effect is insignificant.

Costs, too, are kept low: with one tablet every four hours the basic NHS cost of a day's therapy is only about 2p.

Formula Each tablet contains:
Paracetamol BP 500 mg
Dihydrocodeine tartrate BP 10 mg

When pain presents itself

SURMONTIL relieves insomnia while treating its cause

But what?

A hypnotic will certainly give her a good nights' sleep, but if she is one of those patients – and there are many of them – whose insomnia originates from anxiety/depression, sleep is all she'll get. The root cause of the condition will always remain untreated with the patient becoming more and more dependent on the medication. Moreover, the degree of this dependence is further heightened by the fact that, because they distort normal sleep patterns, all major hypnotics (and many antidepressants as well) can give rise to unpleasant symptoms upon withdrawal. Patients, therefore, feel most disinclined to discontinue a treatment which, although giving symptomatic relief, is not removing the cause of their condition. These people, in fact, need more than just "something" to help them sleep – they need 'Surmontil'.

- immediately restores sound natural sleep
- relieves daytime anxiety/depression
- avoids long-term hypnotic therapy by treating the underlying condition
- removes the risk of withdrawal problems due to REM suppression/rebound, and possible dependence encountered with both hypnotics and other major tricyclic antidepressants
- unlike a number of other antidepressants does not increase intra-sleep restlessness, thus its sleep-restoring properties are enhanced

In the Nobrium general practice survey 228 British GPs studied 691 patients with anxiety, most of whom kept a subjective record of their progress. Both the GPs and the patients recorded a substantial remission of symptoms with Nobrium (a total pretherapy symptom score of 9167 was reduced to 3888). A detailed analysis of these results is now being circulated to all general practitioners under the title of the Nobrium general practice survey: Results in 691 patients

PROBLEMS OF THE NEWBORN

from the British Medical Journal

Many doctors outside the neonatal and paediatric field may be unaware of the rapid advances made in the care of the newborn in the last decade. Last year the *B.M.J.* published a series of articles discussing the diagnosis and management of common conditions affecting newborn babies. The articles have been revised by their authors and collected together as a booklet, forming a useful guide to both serious problems and more everyday topics which confront doctors in their practice.

The Mental Health Service After Unification

This report from a Tripartite Committee of the Royal College of Psychiatrists, the British Medical Association and the Society of Medical Officers of Health discusses the organization of the Mental Health Service in the context of the forthcoming reorganization of the National Health Service.

The Committee has taken the mental health needs of a population unit of $\frac{1}{4}$ million on which to base a realistic appraisal of the Government's present policy and the role of doctors, nurses, social workers, voluntary workers, and others in this field.

Constructive proposals are made for an essential framework of requirements in hospital and in the community, and guidelines are laid down for all those concerned with mental health and related social work and community services.

Copies of the report (95 pages) are available price 50p plus 6p postage from the British Medical Journal Publishing Department, BMA House, Tavistock Square, London, WC1H 9JP.

Flatulent dyspepsia. And not for the first time.

Or even the second or third. For this patient it is a recurring problem, and one which a wide variety of antacids and other medications have so far failed to control.

Maxolon offers a real break in this all too familiar routine. It treats the disturbed motility which is often the underlying cause of flatulent dyspepsia. Maxolon prevents symptoms arising in four out of five patients. In a month, normal motility may be re-established.

Prescribe a month's course of Maxolon for your next regular patient. She'll get *effective* relief, probably for the first time.

Prove Maxolon for yourself. Use Maxolon on your regular flatulent dyspepsia patients. For a 7 day starter pack write to Beecham Research, Freepost, Brentford, Middlesex—post-free in the United Kingdom. *Full information is available on request.*

New Deteclo Syrup

For patients you can't keep tabs on

There are some patients who need the triple tetracycline of Deteclo, but who find their medicine hard to swallow. Maybe it's because they're young. Or old. Or simply hate taking tablets. New Deteclo Syrup solves their problems in a raspberry-flavoured syrup. It tastes so nice, you won't have any trouble persuading them to take the treatment they need. And it's so effective, because the combination of tetracycline with demethylchlortetracycline and chlortetracycline produces such wide antibacterial activity. So when you can't be sure if they'll take the tablets or not, they can still get the good value of Deteclo and like it.

when the "hot" infection

Hiprex

helps keep the patient from coming back

Hiprex meets the need for acceptable, effective follow-up treatment aimed at maintaining antibacterial activity in the urinary tract, eliminating infection completely, and so preventing recurrence.

Antibiotics, sulphonamides and other agents can all give prompt relief of acute symptoms. But all too often the infection is left smouldering, only to flare up again perhaps months later.

And however successful the initial treatment, the patient remains at risk from re-infection. Yet this risk diminishes with time. The longer the patient remains free from infection, the less chance there is of recurrence.

Long-term therapy with *Hiprex* — after the "hot" infection has cooled down — can help to buy this valuable time.

Composition Each tablet contains hexamine hippurate 1g. **Indications** The treatment of urinary tract infections, such as pyelitis, cystitis and urethritis, but excluding acute pyelonephritis. The treatment of chronic pyelonephritis, and as maintenance therapy after successful antibiotic treatment of acute pyelonephritis. The treatment of asymptomatic bacteriuria, including that occurring during pregnancy. Prophylaxis before and after urological surgery. **Dosage** Adults: 1 tablet twice daily. Children: 6-12 years: $\frac{1}{2}$ tablet twice daily. In refractory cases, the dosage may be increased to: 1 tablet three or four times daily in adults; $\frac{1}{2}$ tablet three or four times daily in children aged 6-12 years. Tablets may be halved but should not be crushed. **Alkalinuria** Some patients may have an alkaline urine as a result of a predominantly vegetarian diet or occasionally due to *Proteus* or *Pseudomonas* infection. In these cases, additional acidification may be necessary to lower the urinary pH to the level required to degrade the hexamine moiety. Administration of ascorbic acid 2g. daily in divided doses (either as powder or as tablets) is recommended in these cases. **Side-effects** Occasionally, rashes, gastric irritation, or irritation of the bladder may occur. With prolonged administration at high dosage, the latter may lead to haematuria. All side-effects are reversible on withdrawal of the drug. **Treatment of side-effects** If the symptoms of infection such as painful micturition or bladder irritation do not subside within seven days of starting treatment, or if such symptoms develop on prolonged treatment at high dosage, this probably indicates drug-induced bladder irritation. Prompt relief can be obtained by the consumption of copious quantities of water and 2-3 teaspoonfuls of bicarbonate of soda. **Contra-indications** Hepatic insufficiency, severe dehydration, severe renal failure (serum creatinine level > 5 mg. %) or metabolic acidosis. *Hiprex* may be used where mild to moderate renal insufficiency is present. *Hiprex* is also contra-indicated as the principal therapeutic agent in acute parenchymal infections of the kidney. *Hiprex* should not be administered concurrently with sulphonamides owing to the danger of crystalluria, or with alkalinising agents such as mixtures of potassium citrate.

A new acquaintance a good

can soon become friend.

Amoxil can soon become a good friend because of its reliability in the routine treatment of a wide range of infections.

Outstanding oral absorption, not greatly affected by the presence of food, broad spectrum of activity and bactericidal action are among the more notable qualities of Amoxil.

Rapid decisive action coupled with the degree of safety associated with penicillin therapy inspires a high level of confidence in everyday use.

A convenient t.d.s. dosage, independent of meal times, a range of highly acceptable presentations, treatment costing as little as 16p per day – further good reasons why Amoxil represents practical antibiotic therapy at its best.

Extensive clinical trials have demonstrated that in Upper and Lower respiratory infection, Urinary tract and Skin and Soft tissue infections, Amoxil is dependable and trustworthy – as all good friends should be.

Further information on Amoxil (amoxycillin) is available from:
Bencard, Freepost, Great West Road, Brentford, Middlesex.

To help you further in your practice, Amoxil starter packs are available from your Bencard representative or from the Company.

Prescribing information

Dosage: Adults 250 mg three times a day. Children – up to 10 years: 125 mg three times a day. In the case of severe infections the dosage should be doubled.

Contra-indication: Amoxil is a penicillin and should not be given to penicillin hypersensitive patients.

Side effects: In clinical trials involving more than 1,500 patients no serious side effects were reported. Those side effects which were encountered were of a mild transitory nature.

Do you have MARTINDALE at your elbow?

Martindale, says *The Practitioner*, "puts every other textbook of treatment in the English language in the shade, so far as the practising clinician is concerned." And it goes on to say: "The general practitioner who does not have a copy of this 'opus magnum' permanently at his elbow is not only depriving himself of a 'must', he is asking for unnecessary trouble."

Martindale is the world's most comprehensive guide to drugs and medicines. The 26th edition, published recently, is a book of 2,346 pages containing about two million words. Martindale now includes over 2,800 drug monographs with information (where appropriate) about pharmacological action; toxic effects and their treatment; precautions to be observed on administration; interactions with other drugs; absorption, metabolism,

and fate in the body; actions, uses and dosage; proprietary drug preparations. Both proprietary and non-proprietary names are included in the 34,000-entry main index. The information is supported by abstracts and references selected from more than 30,000 specially prepared for this edition. The formulas are given of over 1,700 medicines that can be bought by the public without prescription, information often essential in compiling a clinical history. For rational prescribing, Martindale is an essential tool. Ask your pharmacist to show you his copy—but don't expect him to let you borrow it! Interest rates offered to big investors and small savers alike are many and varied, but each investment has its own particular set of terms and conditions.

Some investments tie up your savings for a fixed period of years, whilst others offer prompt withdrawal facilities.

Some are designed to provide regular income; others offer capital growth. Either may or may not be taxable.

Both may incorporate life assurance and the income tax relief then obtainable can further improve the attractiveness of the investment.

It's all very confusing unless you are a financial expert. How else can you choose a plan to suit your own particular needs and be safe in the knowledge that the Company to which you are to entrust your savings is absolutely secure?

Whether you are interested in saving a monthly sum out of salary, or making a single investment, you would be wise to consult the experts at the M.I.A. They are there to help you, as they have helped thousands of your colleagues—their advice is free and entirely without obligation.

UNIVERSITY OF EXETER Postgraduate Medical Institute

A full-time postgraduate course lasting 10 weeks will begin on 10th January, 1973. These courses are held 3 times a year starting in October, January and April. Each course includes instruction in general medicine, paediatrics, preventative medicine, pathology, psychiatry, orthopaedics and general surgery. The programme is planned so that students wishing to specialize in a particular clinical subject are given facilities to do so, while other students are taught in each of the main clinical departments. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training, but these are normally reserved for students sponsored by some official body.

It is sometimes possible to accept general practitioners for 1 or 2 weeks of a course, and attendance for this period is recognized under Section 63 of the Health Services and Public Health Act 1968. These courses are also recognized under the special scheme for the re-training for general practice of doctors who have been out of the Health Service for at least 5 years.

The fee for this course will be £40 (£83 for students from outside the United Kingdom).

Further particulars and application forms for these courses are obtainable from the Director, The Postgraduate Medical Institute, The University, Exeter, Devonshire. (16967) 4

COMMERCIAL APPOINTMENTS

Clinical Pharmacologist

Salary up to £4,500

Increasing research in the Clinical Pharma-
cology of potential new therapeutic agents has
created a vacancy for a **CLINICAL PHARMA-
COLOGIST** in the research organisation of a
leading U.K.-based pharmaceutical company.

The successful applicant will lead a newly
created department of Clinical Pharmacology
and will be responsible for supervising and
organising studies with Company products in
academic units of clinical pharmacology. In
addition he will be expected to spend an
average of one day per week carrying out
personal clinical pharmacological work in one
of the London Hospitals with which the
Company already has good contact.

He should be in his thirties and in addition to
appropriate medical qualifications have rele-
vant experience and preferably a Ph.D. degree.
He will be expected to work in close collabora-
tion with pre-clinical pharmacologists and
medical colleagues supervising therapeutic
trials. He will be encouraged to initiate new
ideas at both the laboratory and clinical level.
This is an important and challenging appoint-
ment with considerable potential for the right
man.

The Company's research laboratories and
offices are within easy reach both of Central
London and of pleasant residential areas.

Applications, with curriculum vitae, should be
sent to Box No. 2888 BMJ

CLINICAL INVESTIGATOR

The Medical Department of this international ethical pharmaceutical Company requires a doctor to join its energetic and expanding clinical investigation team. The applicant, between 28 and 45 years of age, must possess a registrable medical qualification. The ability to initiate and organise clinical investigations is essential.

The appointed doctor will, in addition to normal clinical trial responsibilities, specialise in:

Cardiovascular diseases

Consequently, an interest in cardiology and/or circulatory physiology would be an advantage, although it is not essential. The successful applicant would be encouraged to maintain a permanent clinical attachment.

Career prospects in the pharmaceutical industry are attractive. Initial salary will depend mainly on qualifications and experience and the Company operates a non-contributory pension fund and life assurance scheme. A company car is provided. Conditions of employment are good and will include assistance with removal expenses.

Please apply to:

**Personnel Manager,
John Wyeth & Brother Limited,
Huntercombe Lane South, Taplow,
Maidenhead, Berks. SL6 0PH.**

Roussel Laboratories Limited

Medical Advisers

Roussel Laboratories Limited wishes to appoint two Medical Advisers to join the existing team in the Medical Department in Northwest London.

The Company is part of a large international group researching, developing, manufacturing and marketing throughout the world a wide range of pharmaceutical and allied compounds.

The Doctors appointed will assist in planning and progressing clinical evaluations of compounds originating from the group research facilities and will share in the servicing of existing compounds. The work is varied and interesting and provides opportunities for travelling to meet and to work with doctors at all levels of seniority at home and overseas. The successful candidates will report directly to the Director of Medical Services.

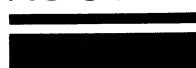

Applicants should hold a British medical degree and be registered with the G.M.C. Whilst experience of working in the industry would be helpful, its lack should not deter otherwise suitably qualified doctors from applying. For one of these appointments, knowledge of psychiatry or psychotropic drugs would be advantageous. The other appointment could well be of interest to recently qualified doctors.

The salary to be paid will reflect the importance of these appointments. The Company has a contributory superannuation scheme and the Medical Advisers will be entitled to free life insurance, accident insurance and BUPA insurance. A company car will be provided and financial assistance will be given if home removal is necessary.

Applications marked 'Private and Confidential' should be sent to:

St. Mary's Hospital has a total of 1,000 beds and the University Department of Chemical Pathology provides a diagnostic chemical service as well as undertaking postgraduate and undergraduate teaching and research. The diagnostic laboratories are currently being re-housed and equipped and there are good research facilities and equipment available, including GC-MS. The person appointed will be given the opportunity to participate fully in the activities of the department.

The Division of Clinical Chemistry at Northwick Park is staffed by approximately 50 M.R.C. and N.H.S. personnel and has sub-divisions for research and service. When the hospital is fully operational in 1974, service will be required for 630 district beds, 185 national M.R.C. beds, with interesting work, and other investigations required by the Clinical Research Centre. Capital equipment in the division includes a Vickers M-300 GC-MS and two computers. There will be opportunities for clinical liaison and for pursuing research in basic science, clinical applications and automation and for developing the new organisation required fully to exploit the latest analytical equipment. Other divisions in the C.R.C. offer considerable back-up expertise in a wide range of biomedical disciplines.

Applicants should possess at least the primary M.R.C. Path. in chemical pathology or an equivalent qualification.

For further details please contact Mr. J. Tyrrell, Northwick Park Hospital, Watford Road, Harrow, Middlesex HA1 3UJ. Tel: 01-864 5311, Ext. 2403.
Closing date 1st December. (17827) 56-5

SERVICES

AS A NAVAL DOCTOR, YOU'D GET A WHOLE LOT MORE OUT OF LIFE.

(AND SO WOULD YOUR FAMILY)

Right from the start, you'd have a complete change of scene.

Serving either with the Navy at sea or among service personnel and their families at a naval establishment. Very likely in another part of the world.

Either way, you'd never find yourself short of assistance. (Every naval doctor is fully supported by medical staff).

Equally important, you'd never find yourself getting into a rut – for in two years or so you'd receive a new appointment.

In a new place. Doing a different job. Perhaps with the chance to learn something of the special problems of diving, aviation, or tropical medicine for example.

It's a stimulating life. Not only for yourself but for your family too.

For in most cases they'd accompany you. And wherever you go there are usually married quarters – fully furnished houses or flats, equipped with everything you need. And at very reasonable rents.

What's more, a generous education

allowance is made for your children if they are at boarding school. £363 p.a. for a first child, £432 p.a. for a second, £519 p.a. for a third. On top of this, removal and other allowances are also provided.

Add this to the salary and you'll see how well a naval doctor's pay compares with a civilian doctor's.

For instance, with five years' post registration experience you would join us as a Surgeon Lieutenant-Commander on £4,767 a year.

And any specialist qualifications/experience you have could increase your salary even more.

There are opportunities, too, to keep up with the latest developments in medicine. For the Navy fully recognises the need for such opportunities both in the interests of naval medicine and a doctor's professional advancement.

That's not all. You can join on a 3-year or 5-year commission (each carrying a tax-free terminal gratuity of £1,500 and £3,000 respectively) and you can transfer to a full 16-year pensionable commission if you wish.

Applicants should be of British nationality and parentage. To find out more, write to Surgeon Cdr. F. M. Kinsman, O.B.E., R.N. (724AB8), Dept. of the Medical Director-General (Navy), Empress State Building, London S.W.6.

General Practitioner

In Zambia, Roan Consolidated Mines provides a comprehensive medical service for its employees. Curative medical services are centred on two well equipped hospitals totalling 440 beds. There are a total of eleven medical officers including a general surgeon and gynaecologist. The services are provided for about 50,000 local and 2,000 expatriate personnel.

Based at Luanshya the Doctor appointed will undertake the duties of a general practitioner amongst the contributory employees' families, including domiciliary and clinic visits and hospital outpatients sessions which are similar in content to the surgeries of general practice. An interest in the diseases of children would be of benefit and a knowledge of simple anaesthesia is desirable. The person appointed will also have to share in looking after medical female in-patients in the non-contributory hospital. (For those interested we can show a half hour film about our medical facilities in Zambia).

Employment will be on a renewable contract basis — FOR TWO OR THREE YEAR PERIODS. A competitive salary will be negotiated, depending on experience and qualifications.

Additional benefits include ■ paid return passages and leave passages (after 2 years' service) for applicants and families ■ baggage allowance ■ furnished accommodation at low rental ■ free life assurance ■ children's education allowances ■ paid leave which accrues at the rate of 55 days p.a. ■ car provided. Excellent facilities exist for practically all sport and leisure activities on the Copperbelt which enjoys a healthy temperate climate with sunshine all year round.

Immediate interviews are offered but because of documentation procedures it will be about three months before the man appointed will take up his duties in Zambia.

Paediatrics, Anaesthesiology,
Clinical Pharmacology, or Public Health**

Commitment to a long-term research programme is the key requirement for this vacancy. Prior research experience, industrial or academic, helpful, but not essential. Superior training in one of the fields indicated above an important asset, but other specializations considered.

Schering, a major international pharmaceutical company, carries on a vigorous search on a large and increasing scale for new and improved drugs and health products. In addition to programmes of high interest and excellent facilities and resources, this position carries the stimulation of working with leading members of the medical profession. Advancement prospects are favourable. Your contributions and professional growth recognized.

Generous salary, with outstanding company benefits in addition. Relocation assistance. The location is our Corporate Research and Development Centre, situated in an attractive suburban area about 15 miles from New York City. A wide choice of housing and community, cultural/educational advantages, and, most important, the time to enjoy your family.

Physicians fully qualified are invited to send curriculum vitae, with full educational particulars, to the Director of Research Employment,

Medical Officers

Zambia £5,125+ p.a.

You are offered the prospect of a tour of duty — for as little as one year — in Zambia, one which will give you both a wide range of professional experience and early responsibility (all in addition to a wide extension of your personal horizons). It is with the nation's major mining organisation, Nchanga Consolidated Copper Mines Ltd., with an international staff of technical specialists.

The company is responsible for providing full medical care to its employees — over 30,000 — and their families; the total of persons to be looked after is about 150,000.

There is a senior doctor staff of over 40, including a full complement of specialists and 150 fully qualified nurses. The modern facilities include 5 well-equipped hospitals (814 beds), 16 clinics and 8 main first aid dressing stations.

General Duty Medical Officers will be involved in preventive and curative medicine, surgery, anaesthetics, gynaecology/obstetrics, public health and nutrition; and although the mines have a strict safety code an amount of accident work can be expected.

Contracts may be negotiated for periods of one to three years. Locums can also often be arranged.

Salaries will depend on experience, but the minimum is K9060 (£5,126) gross per annum. In addition there is a cash settling-in allowance; company private primary schools; a detached, furnished house with garden is provided for £1.50 per week; and children receiving secondary education overseas are granted up to £500 per child per year towards school fees and two free return passages to visit their parents during holidays; interest free car loan available.

Study leave on full pay — up to 6 months — is available. Currency regulations allow up to 33½% of gross income to be sent home per month with an additional end of contract allowance.

High-dose aspirin as well tolerated as ibuprofen **Safapryn***

in musculo-skeletal pain

Superior to ibuprofen in analgesic and anti-inflammatory activity.¹

In 40 patients with arthritic or rheumatoid conditions, Safapryn proved markedly superior to ibuprofen in relieving pain and improving the range of joint movement.¹

In another study, aspirin (the major component of Safapryn) produced significant reductions in joint size, whereas ibuprofen produced no greater reduction than did a placebo.²

Better tolerated than standard aspirin^{3,4}

"...the really important result of the trial [with Safapryn] was its freedom from clinical evidence of gastric irritation and from overt or occult bleeding."³

Pack of 250 tablets.

(Each sugar-coated tablet contains 300 mg. acetylsalicylic acid as an enteric-coated core, and 250 mg. paracetamol.)

How will your
arthritic patients benefit
from the...

proven

analgesic and anti-inflammatory activity of Brufen?

Less pain, greater mobility – these are true measures of effectiveness in the treatment of arthritis. In a recent study* of nearly 1000 arthritic patients treated with Brufen, 70% of the patients showed consistent improvement in terms of relief of pain and increased activity. Highly effective, Brufen is also well tolerated – almost certainly better tolerated than any other anti-arthritic drug. **Practitioner*, 1971, 207, 343

As the weather worsens, demands on your time increase. This winter you can relieve some of the pressure by prescribing Magnapen for the more serious chest infections which you see. For acute-on-chronic bronchitis. For pneumonia. For infections following flu.

Magnapen gives you a greater chance of first time success in these serious cases because it is active against virtually all bacteria encountered in General Practice. So you can rely on Magnapen even when there are no laboratory reports to guide you.

Magnapen's greater certainty means that the patient is more likely to respond quickly. More likely to be up and about again sooner. And Magnapen can save you the time which you might otherwise have to spend on repeat visits, second consultations or night calls to patients who may fail to respond to other antibiotics.

Full information is available on request.
