NAPROSYN

Powerful in arthritis

What is Naprosyn? Naproxen – a new non-hormonal anti-inflammatory agent with analgesic properties, indicated for the treatment of rheumatoid arthritis, osteo-arthritis and ankylosing spondylitis.

How powerful is it? Double-blind cross-over trials have shown 500 mg Naprosyn to be significantly superior to placebo and equivalent in clinical efficacy to 4 g aspirin and 150 mg indomethacin in rheumatoid arthritis; and to 100 mg indomethacin in osteo-arthritis. Open studies have shown that Naprosyn is highly effective in ankylosing spondylitis.

How does Naprosyn help the arthritic patient? The long half-life of 12–15 hours means that one 250 mg Naprosyn tablet in the morning and one in the evening is sufficient in most patients to provide sustained relief throughout the day and night. Morning stiffness and painful joints are relieved, and mobility and grip strength improved.

How is Naprosyn "kind to patients"? It is extremely well tolerated. Side-effects are less frequent on 500 mg Naprosyn than on 4 g aspirin and 100 mg and 150 mg indomethacin. Some studies have shown that the incidence of side-effects is not significantly different to that exhibited on placebo. Gastric disturbances, in particular, are rarely seen with Naprosyn. Objective tests such as gastroscopy have shown

259383

Kind to patients

that Naprosyn causes minimal irritation to the gastric mucosa. Not least, patients find the twice daily dosage regimen more convenient.

How safe is it? Doses of up to 3½ times the recommended dosage of Naprosyn (500 mg) have been administered to human subjects with no adverse reactions occurring.

Can Naprosyn be taken on an empty stomach? Yes. In a number of clinical trials Naprosyn was given on a fasting stomach without adverse effects being reported. Furthermore, absorption is not significantly affected by the presence of food or alkali.

At what stage should Naprosyn be used? Since Naprosyn is at least as effective as 4 g aspirin and 150 mg indomethacin, and has a remarkably low incidence of side-effects, it may be considered either as first line treatment or as an alternative for patients with chronic disease who are developing tolerance to, or are exhibiting side-effects on, other anti-arthritis drugs.

Are there any contra-indications? There are no known contra-indications although caution should be exercised during pregnancy.

Technical literature, symposia proceedings and full bibliography are available on request.

Prescribe Penbritin with Confidence for infections in children

Confidence is born of experience. And experience with Penbritin in the treatment of ear, nose and throat infections has established an outstanding record of safety and effectiveness.

Penbritin gives you broader cover than penicillin V—yet retains all the benefits of penicillin safety.

And Penbritin has none of the tooth-staining problems associated with the use of tetracyclines in young children.

In a few minutes his antacid will stop working. What then?

Antacids and stomach coatings work. Very well. But not always for long, and only against one of the major symptoms of the distress. That's why you need 'Stelabid'.

'Stelabid' provides protection against hypersecretion, hypermotility and painful spasm.

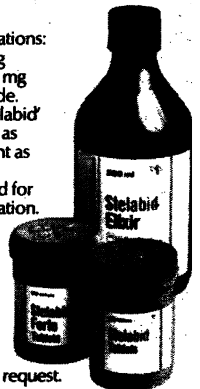

Its calming action alleviates the anxiety and stress so often associated

with gastro-intestinal disturbances.

'Stelabid' prescribed with antacids, provides a most persistent and effective symptomatic control of gastro-intestinal disorder throughout the whole spectrum from functional disorders to ulceration.

And a simple b.i.d. dosage protects the patient even throughout the night.

'Stelabid' is now available in three presentations: **'Stelabid' Tablets** Each tablet contains 5 mg isopropamide present as the iodide, and 1 mg trifluoperazine present as the hydrochloride. **NEW 'Stelabid' Elixir** Each 5 ml dose of 'Stelabid' Elixir contains 5 mg isopropamide present as the iodide, and 1 mg trifluoperazine present as the hydrochloride. 'Stelabid' Elixir is particularly recommended for those patients who prefer a liquid presentation. **NEW 'Stelabid' Forte Tablets** Each tablet contains 75 mg isopropamide present as the iodide, and 2 mg trifluoperazine present as the hydrochloride. 'Stelabid' Forte Tablets are especially useful in more severe cases when an extra measure of relief from spasm and hypersecretion is required. Full prescribing information is available on request.

A MULTI-PURPOSE DIURETIC

that helps to conserve the body's natural potassium

'Moduretic' owes its versatility to the complementary actions of its active constituents:

Hydrochlorothiazide—the well-established thiazide diuretic.

Amiloride hydrochloride—a potassium-conserving agent.

Besides moderating the kaliuretic effect of hydrochlorothiazide, amiloride has an additive diuretic effect; the results of some studies reflect a synergistic effect on sodium excretion.

When menstruation occurs do young girls want your help?

**Your requests
for 26,500
charts
indicate they do.**

Adolescence is nowhere near as frightening when young girls are prepared for it. And preparing them for menstruation is simplified when you use the illustrated charts and booklets provided free by Tampax Limited. The coloured charts, prepared by R. L. Dickinson, M.D., graphically help them to understand the changes taking place in their bodies. These charts are laminated in plastic for permanence and suitable for grease pencil marking and erasure. The booklets—one for beginning menstruants, the other for older girls—tell them what menstruation is—and how easily they can adjust to it normally and naturally.

In just five years, more than 26,500 charts and 350,000 booklets have been requested by doctors and nurses to prepare youngsters for menstruation—and to help dispel the fears that made them think of menstruation as the "curse".

The Tampax tampon embodies a number of distinctive features to provide the utmost in menstrual protection. Designed for intravaginal use, it is softly compressed for efficient absorption and maximum comfort. It's placed in correct position hygienically by means of a satin-smooth container-applicator, prelubricated to facilitate insertion. It expands in three dimensions for complete protection. Its removal cord is chain stitched, for safety, to the entire length of the tampon. Both tampon and applicator are readily disposable in the toilet.

Because Tampax tampons are worn internally, there's no irritation, no chafing, no embarrassing menstrual odour. And for sports-active girls, particularly swimmers, tampons are a must.

Tampax tampons are available in Regular and Super absorbencies, with explicit directions for insertion and use enclosed in each package.

Please order your charts and booklets by writing to the address below.

Excellent in chil

Amoxil is an excellent antibiotic for the commonly occurring bacterial infections in children. For a start, Amoxil is pleasant to take. The citrus-flavoured syrup or paediatric suspension pleases even the fussiest of patients.

Then Amoxil can get to work. Its broad spectrum of bactericidal activity and outstanding oral absorption¹ ensure the high serum levels necessary for a rapid response. In fact, just three daytime doses give 24 hour therapeutic effect.

Children's infections.

It is not surprising, therefore, that Amoxil's extensive clinical trials have proved it so reliable: a recent study², involving 150 children, demonstrated a success rate of 94%.

Add to this Amoxil's penicillin safety and low treatment cost and you really have an excellent antibiotic for children – and for grown-ups too.

Further information on Amoxil (regd) is available from Bencard, Freepost, Brentford, England.

Prescribing information

Dosage: Adults 250 mg three times a day.

Children – up to 10 years: 125 mg three times a day. In the case of severe infections the dosage should be doubled.

Presentation: Amoxil capsules 250 mg. Amoxil syrup 250 mg/5 ml, 100 ml bottle. Amoxil syrup 125 mg/5 ml, 100 ml bottle. Amoxil Paediatric Suspension 125 mg/1.25 ml, 20 ml bottle with pipette. Amoxil presentations contain amoxycillin as the trihydrate.

Contra-indication: Amoxil is a penicillin and should not be given to penicillin-hypersensitive patients.

Side effects: No serious side effects have been reported in extensive clinical trials. Those side effects which were encountered were mild and of a transitory nature.

another little victory for Prinalgin

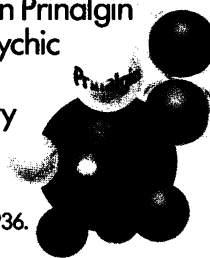

In rheumatoid arthritis, every small gain can increase the patient's pleasure in life. In this respect, the anti-rheumatic agent Prinalgin is showing it to be an outstanding therapy.

Significant improvement of major physical indices such as grip strength and joint size is a major feature of Prinalgin therapy.

Concomitantly, there appears to be an antidepressant factor involved in Prinalgin therapy that re-awakens the psychic momentum of the patient.¹

In a field where a little victory is really a big victory, shouldn't you be considering Prinalgin for your patients? 1. Lancet (1973), 1, 936.

You're looking at a loser

He's the athlete without a flaw, the hurdler who's unbeatable. In theory.

In practice he never wins. He can't beat the clock but not the field. A victim of his own anxiety/depressive neurosis, he is yet another casualty of modern-day stress.

Anxiety is easily recognisable. What we are only beginning to realise is how often it is linked with, or covers, a basic depression.

Obviously we must treat the depression too. That's why we need Limbitrol. Limbitrol combines an effective anxiolytic, Librium, with an antidepressant, amitriptyline. The patient feels the supportive benefit of the anxiolytic almost immediately. His confidence begins to lift within days.

The General Practitioner Research Group used both drugs over a period of two years. They have concluded, "None of the newer drugs that we have investigated has proved to be significantly better than the two standard drugs, namely chlordiazepoxide in anxiety, and amitriptyline in depression!"

Proc. roy. Soc. Med., 1974, 67, 1172.

COMMERCIAL APPOINTMENTS

Medical Management UK & Overseas from £6000+car

We seek two physicians with broad clinical experience and a strong sense of medical purpose—to take up a new challenge contributing directly to medical progress on an international scale.

The work will entail the medical management of a range of therapeutic products researched and developed by a well-known and respected ethical pharmaceutical company. The scope is far-ranging and varied, and includes:

- liaison with research scientists to plan the medical development of potential new therapeutic agents.
- organisation and critical assessment of medical trials conducted mainly in the UK, but also overseas (notably in Canada, South Africa, Australia, New Zealand and Scandinavia).
- careful evaluation of published papers and other reports on specific groups of medicines.
- supplying data to the department's information bank on these products, including details of any adverse reactions or side-effects.
- exercising medical judgement in relation to marketing and promotional activities.
- attendance at conferences and symposia to keep at the forefront of medical knowledge in the relevant product fields.
- lecturing to non-medical personnel on the medical aspects of the products.

Applicants should be within the age range 28–45 and possess a broad clinical and therapeutic knowledge, an alert mind, a positive attitude towards responsibility, challenge and hard work, and a successful career record to date. Knowledge of another European language, previous involvement in medical trials, or management experience in a group practice would be advantageous, but by no means essential.

The starting salary is likely to be around £6000 but could be substantially more for candidates of outstanding merit. Other major benefits include a car, free BUPA membership, free life, accident and disability insurances, contributory superannuation scheme, and generous financial assistance with relocation.

The successful candidates will work in pleasant offices at the Company's modern headquarters in outer London.

Please write in complete confidence for an application form, or phone if you would like to discuss the positions further:

whole-time or maximum part-time, to take charge of the Emergency Department in the North Teeside Group of Hospitals serving a population of approximately 182,000. The main phase of a new District General Hospital in Stockton-on-Tees, the North Tees General Hospital, due for completion in early 1974, will contain a comprehensive accident and emergency department which will replace the present department at Stockton and Thornaby Hospital.

The first duty of the consultant will be to offer primary care over a wide range of medical and surgical conditions and he will also be responsible for the organisation of the Emergency Department and for the training of junior staff. An interest in some particular aspect of emergency work will be encouraged and there will be an allocation of beds in connection with such an interest. Eight years' postgraduate experience, preferably in more than one specialty and including several years' experience at a highly responsible level in emergency services. A higher qualification is desirable but not essential in candidates with a fully appropriate range of experience.

Residence within 10 road miles of the North Tees General Hospital, Stockton-on-Tees. Further particulars from Senior Administrative Medical Officer, Regional Hospital Board, Benfield Road, Newcastle upon Tyne NE6 4PY, to whom applications should be addressed, naming three referees, by 27th October, 1973. INDUSTRIAL APPPOINTMENTS

ASSISTANT MEDICAL OFFICER

TBA INDUSTRIAL PRODUCTS LTD.

TBA Industrial Products Ltd., is a principal subsidiary of the Turner & Newall Ltd. Group, employs some 4,500 people and manufactures a wide range of products based on asbestos fibre, glass fibre, rubber and plastics in four factories in the United Kingdom.

We wish to appoint an Assistant Medical Officer. His primary responsibility will be the operation of the medical examination arrangements at the Company's two main factories in Rochdale and Hindley Green (Nr. Wigan) under the general guidance of the Chief Medical Officer. Opportunities exist for collaboration of various research projects now being undertaken.

The position, which is based at Rochdale, should appeal to a Doctor with a genuine interest in industrial medicine, some experience in chest diseases and interested in the interpretation of chest X-ray's and lung function tests. X-ray facilities and a pulmonary physiology laboratory are available on site. An opportunity to attain a Diploma in Industrial Health would be offered if necessary.

Salary will be commensurate with age and experience but will not be less than that recommended by the B.M.A. for Assistant Medical Officers in industry.

Please write in confidence giving details of age, qualifications and experience to:

**The Chief Medical Officer,
TBA Industrial Products Ltd.,
P.O. Box 40, Rochdale, Lancs.**

LIVERPOOL

REGIONAL HOSPITAL BOARD

North Merseyside and Southport
Groups of Hospitals

Applications are invited for the newly-created post of

CONSULTANT PHYSICIAN

IN REHABILITATION/RHEUMATOLOGY (Whole-time or maximum part-time)

in the North Merseyside and Southport Groups of Hospitals.

This is the first regional appointment of its kind in a service which the Regional Hospital Board is committed to develop throughout the Liverpool Region. This appointment has a major commitment to rehabilitation and a lesser one to rheumatology and is the first of twin-paired appointments; the subsequent Consultant appointment will have a major commitment to rheumatology and a lesser one to rehabilitation and is planned for the next financial year when each appointment will be expected to complement the other.

The holder of the post will be expected to be responsible for, and be expected to develop, the rehabilitation service in the North Merseyside Group of Hospitals, with duties mainly at Walton and Fazakerley Hospitals. A new District General Hospital is being opened next year at Fazakerley, which will provide ample scope for rehabilitation and will include in addition to the usual facilities, a hydrotherapy pool, gymnasium and workshop. A young Chronic Sick Unit containing 25 beds is at an advanced stage of planning and is expected to open in 1975. A purpose-built Geriatric Day Hospital was opened at Fazakerley Hospital last year and a rehabilitation ward with ancillary treatment rooms is being provided at Walton Hospital.

The Consultant Physician in Rehabilitation will be responsible for out-patient clinics as well as a quota of beds in the North Merseyside Group of Hospitals. It is expected that time will also allow for the supervision of the rehabilitation services of the Southport Group of Hospitals, where in addition to the usual acute and other services there is a Supra-Regional Paraplegic Unit (34 beds).

Suitable training, rehabilitation and a higher qualification are essential requirements for application. The successful candidate will be expected to live within 10 miles by road of Fazakerley Hospital.

PHYSICAL MEDICINE

LIVERPOOL
REGIONAL HOSPITAL BOARD
North Merseyside and Southport
Groups of Hospitals

Applications are invited for the newly created post of

CONSULTANT PHYSICIAN
IN REHABILITATION/
RHEUMATOLOGY
(Whole-time or maximum part-time)

In the North Merseyside and Southport Groups of Hospitals.

This is the first regional appointment of its kind in a service which the Regional Hospital Board is committed to develop throughout the Liverpool Region. This appointment has a major commitment to rehabilitation and a lesser one to rheumatology and is the first of twin-paired appointments; the subsequent Consultant appointment will have a major commitment to rheumatology and a lesser one to rehabilitation and is planned for the next financial year when each appointment will be expected to complement the other.

The holder of the post will be expected to be responsible for, and be expected to develop, the rehabilitation service in the North Merseyside Group of Hospitals, with duties mainly at Walton and Fazakerley Hospitals. A new District General Hospital is being opened next year at Fazakerley, which will provide ample scope for rehabilitation and will include in addition to the usual facilities, a hydrotherapy pool, gymnasium and workshop. A Young Chronic Sick Unit containing 25 beds is at an advanced stage of planning and is expected to open in 1975. A purpose-built Geriatric Day Hospital was opened at Fazakerley Hospital last year and a rehabilitation ward with ancillary treatment rooms is being provided at Walton Hospital.

The Consultant Physician in Rehabilitation will be responsible for out-patient clinics as well as a quota of beds in the North Merseyside Group of Hospitals. It is expected that time will also allow for the supervision of the rehabilitation services of the Southport Group of Hospitals, where in addition to the usual acute and other services there is a Supra-Regional Paraplegic Unit (34 beds).

Suitable training in rehabilitation and a higher qualification are essential requirements for application. The successful candidate will be expected to live within 10 miles by road of Fazakerley Hospital.

Canvassing will disqualify. Application forms and further information obtainable from the Senior Administrative Medical Officer, Liverpool Regional Hospital Board, Wilberforce House, The Strand, Liverpool L2 7RW. Closing date 24th October, 1973. (29083) 82-1

SERVICES

AS A NAVAL DOCTOR, YOU'D GET A WHOLE LOT MORE OUT OF LIFE.

(AND SO WOULD YOUR FAMILY)

Right from the start, you'd have a complete change of scene.

Serving either with the Navy at sea or among service personnel and their families at a naval establishment. Very likely in another part of the world.

Either way, you'd never find yourself short of assistance. (Every naval doctor is fully supported by medical staff).

Equally important, you'd never find yourself getting into a rut – for in two years or so you'd receive a new appointment.

In a new place. Doing a different job. Perhaps with the chance to learn something of the special problems of diving, aviation, or tropical medicine for example.

It's a stimulating life. Not only for yourself but for your family too.

For in most cases they'd accompany you. And wherever you go there are usually married quarters – fully furnished houses or flats, equipped with everything you need. And at very reasonable rents.

What's more, a generous education

allowance is made for your children if they are at boarding school. £363 p.a. for a first child, £432 p.a. for a second, £519 p.a. for a third. On top of this, removal and other allowances are also provided.

Add this to the salary and you'll see how well a naval doctor's pay compares with a civilian doctor's.

For instance, with five years' post registration experience you would join us as a Surgeon Lieutenant-Commander on £4,767 a year.

And any specialist qualifications/experience you have could increase your salary even more.

There are opportunities, too, to keep up with the latest developments in medicine. For the Navy fully recognises the need for such opportunities both in the interests of naval medicine and a doctor's professional advancement.

That's not all. You can join on a 3-year or 5-year commission (each carrying a tax-free terminal gratuity of £1,500 and £3,000 respectively) and you can transfer to a full 16-year pensionable commission if you wish.

To find out more, write to Surgeon Cdr. L. C. Banks, M.B., B.Ch., R.N (724 ABK), Dept. of the Medical Director-General (Navy), Empress State Building, London S.W.6.

RN
ROYAL NAVY

SERVICES

Are you in your Pre-Registration Year —or recently fully registered?

The RAF hospital at Akrotiri, Cyprus. It has 120 beds and can be adapted to accommodate up to 250. Here are a few figures for 1971: outpatients, 19,846; admissions, 4,984; X-Rays, 11,438; path lab tests, 62,432; anaesthetics, 2,193. The hospital has specialist departments of surgery, orthopaedic surgery, medicine, gynaecology and obstetrics, pathology, dentistry, neuropsychiatry, radiology, anaesthetics, otorhinolaryngology and ophthalmology; and, in the tamarisk trees by Dreamers' Bay, perhaps the most beautiful location of any hospital.

Before you commit yourself to your permanent pattern of life, consider what the RAF has to offer

The chance to practise total medical care, as a GP

Your first job would probably be a Junior Medical Officer on a large RAF Station. There would be at least one other doctor. Between you, you would have a 'list' of 2000 to 3000 people—servicemen and their families. You would meet all the usual clinical problems of a GP—and get plenty of experience in paediatrics. As well as this, you would be actively involved in the practice of aviation medicine and gain experience in the preventive, occupational and social fields.

Conditions of work are extremely good. You would have a consulting room in a specially built *Medical Centre*—like a small hospital with its own treatment room, theatre and resuscitation room, and wards for a dozen or so short-stay patients. There is a full secretarial and nursing staff. Your clinical freedom would be absolute.

The chance to specialise, too

Because General Practice is so highly developed in the RAF, this does not mean you have no chance to specialise. The contrary is true. 47% of all RAF doctors are now working in specialist departments. On a 'full career' contract you have every opportunity to reach consultant status in your late or middle thirties; perhaps earlier.

The chance to study for higher qualifications

Any RAF doctor, whether specialist or GP (as long as he is not on the very shortest of contracts) can apply for six months study leave on full salary. On a permanent commission, he may have up to two years' external study leave.

The chance to travel

The RAF operates in many different conditions and climates. Abroad, the RAF doctor looks after RAF personnel and their families and, very often, the local population as well. Your gain in clinical experience would be marked.

The chance of a good social and family life

The RAF is a young community, with a full and active social life. There are facilities for almost every kind of sport and, which is most important, the time to enjoy your family while you are still a young man. Living conditions are excellent. If you are single you live in the Officers' Mess, which has all the amenities of a good hotel. If you are married, you will nearly always have a furnished house that goes with the job; rent for this is very modest; and it can save a large financial outlay at the beginning of your career.

A realistic pay scale

Pay is based on the average earnings of a civilian GP. Immediately after full registration, the present basic salary is £3942; after 5 years it rises to £4767; after 13 years to £5898. There are various other allowances; for instance, with children at boarding school the figures are £363 (net) for one child, £795 (net) for two children, £1314 (net) for three children. There are tax-free gratuities of £1500 after 3 years, or £3000 after 5 years. After service of 16 years or more there is a pension, payable for life, and a generous terminal grant.

For full information please write, giving your age, nationality, and date of full registration, to Group Captain D. G. M. Hills, OBE, MB, BS, DPH, RAF, Ministry of Defence, 1-6 Tavistock Square (724 KJ4), London, WC1H 9NL. Or visit your nearest RAF Careers Information Office.

S.H.O. Appointments

£5400

Roan Consolidated Mines in Zambia offers attractive one-year SHO appointments to doctors who have completed at least their pre-registration year.

The appointments will provide excellent experience in well equipped hospitals, with good opportunities for training in general and tropical medicine, paediatrics, surgery or anaesthetics. Such experience will be gained in a professionally stimulating and congenial atmosphere with all the advantages of a superb climate and outdoor recreation.

The curative medical services which RCM provides for its employees and their dependants are based on modern hospitals at three main centres on the copperbelt of Zambia. The medical staff consists of 30 doctors, including those with higher qualifications working and teaching in their specialised fields.

Salary will depend on experience and

qualifications but total emoluments including bonus and gratuity will not be less than the equivalent of £5,400 p.a. — at current rates of exchange. Contracts exceeding one year are optional or initial contract may be extended by agreement. Benefits will include ■ return passages ■ baggage allowance ■ tax free settling-in allowance ■ low rental housing ■ use of company vehicle ■ paid leave which accrues at the rate of 55 days per annum and, where applicable ■ tax free children's education and travel allowances.

Immediate interviews are offered but because of documentation procedures it will be about four months before the men appointed will take up their duties in Zambia.

Please telephone 01-606 8800, ext. 303, or write in the first instance giving concise details of qualifications and experience and indicate field or fields of clinical interest, quoting reference AM.726, to:

UNIVERSITY OF ALBERTA

Department of Physical Medicine and Rehabilitation

The University of Alberta Hospital is seeking a Chairman for its Department of Physical Medicine and Rehabilitation. This individual will be responsible for an in-patient ward of 38 beds, and an approximate annual out-patient load of 24,200 visits. This department also encompasses Psychiatric Occupational Therapy, Speech Therapy, Audiology, and a Travelling Rehabilitation Team that visits rural hospitals. The department is approved for postgraduate training in Physiatry, and participate in the training of physiotherapists and occupational therapists in conjunction with the School of Rehabilitation Medicine. The successful applicant will receive academic appointment in the University of Alberta either in the Faculty of Medicine or the School of Rehabilitation Medicine, or both. In addition to this, he will receive an appointment with the Glenrose Provincial General Hospital. This latter institution involves rehabilitation, convalescent programmes, and schooling for multiple-handicapped children. The nature of appointments to these various institutions would be dependant upon the individual's interests and training, and the academic rank would be commensurate with his training and experience.

The facilities of these combined institutions offer an excellent opportunity to develop and expand city-wide services and education programmes in rehabilitation. Replies should be addressed to: Dr. J. G. Read, Medical Director's Office, University of Alberta Hospital, Edmonton, Alberta, Canada T6G 2B7. (H14308) 118

CONSULTANT SURGEON

having given almost 40 years to the service of the community and the profession, would welcome similar altruistic gesture from well-disposed Dean in securing a medical school place for his 20-year-old son in the October, 1973 entry.

Has the necessary 'A' levels (one B, two D's) but not at first attempt: and will not make an F.R.S. or even perhaps an F.R.C.S.: but will certainly make a reliable and conscientious doctor, at least the equal of the majority of his father's House Surgeons and Registrars over the last 25 years (almost exclusively graduates from London Teaching Hospitals).

Pleasant and friendly personality, but shy. Interests squash, skiing, theatre, opera, music.

Confidence of replies preserved.

MUCODYNE[®] IS MUCODYNAMIC

Electrophoretic pattern of mucus typical of chronic bronchitis—sialomucin content is low.

Same patient after 10 days' treatment with Mucodyne—proportion of sialomucins is greatly increased.

reverses pathological changes in mucus composition.

One of the reasons mucus becomes sticky is that under pathological conditions the relative proportions of such constituents as sialomucins are altered. One of the reasons MUCODYNE is so effective in clearing mucus congestion is that it can reverse these changes. By achieving this and also reducing inflammation in the respiratory mucosa, MUCODYNE is able to remove sticky mucus 4 days faster* than bromhexine. This mucodynamic approach to the problem of chest trouble thus brings your patient relief much earlier than would have otherwise been expected.

**reduces hyperplasia of the respiratory mucosa.
restores a bronchial secretion the cilia can cope with.**

MUCODYNE

Carboxymethylcysteine

**removes sticky mucus 4 days faster than
comparable treatment.**

MUCODYNE is a flavoured syrup containing 5% w/v of S-Carboxymethylcysteine.
It is available in bottles of 200ml.

Intal is well established as a highly effective treatment for allergic asthma in the young.

But what of the late-onset patient — the dad who suddenly starts wheezing, blowing up balloons, at the kids' party?

Can Intal help him? Clinical studies^{1,2} show that a surprisingly high proportion of

patients over 40 also benefit from Intal, even where there is no clearly defined allergic component.

And it does it all with a specific local action.

Stemetil

"...a tranquillizer of
distinct value..."

Prompt, positive restoration of calm without drowsiness or any dulling of mental powers. For the worried patient who must continue to cope with daily routine 'Stemetil'* brings significant benefits indeed.

As a highly efficient tranquillizer with well-known antinauseant properties too, 'Stemetil' rapidly breaks the stranglehold of anxiety, fear and tension and provides immediate control of associated physical symptoms.^{1,2}

As an anxiolytic that calms and relaxes with no adverse effects on alertness or thinking powers,³ 'Stemetil' successfully relieves an incapacitating condition without producing incapacitation of a different kind.

'Stemetil' is effective in low dosages, causes few, if any, problems of tolerance and carries no risk of habituation. It makes good economic sense too, treatment costing on average just 2p per day.

Beecham announce **BRIZIN**

a new treatment for Parkinsonism

Full details

in the post to you now

In the past, the appearance of unpleasant side-effects has prevented many Parkinson patients from receiving anticholinergics at the most effective dosage.

Now Brizin offers these patients a chance of greater benefit. Clinical trials have shown that Brizin's effectiveness in controlling rigidity, tremor and akinesia is comparable to that of benzhexol. However, with Brizin the incidence and severity of dry mouth and psychotoxic effects such as hallucinations and confusion are markedly reduced.

To help you to assess Brizin we are sending you the full facts and clinical trial results, together with a clinical sample offer. We are sure that you will appreciate the kinder relief which Brizin offers to your Parkinson patients.

Dosage The usual adult dosage is 1 tablet (50mg) three or four times daily.

Side-effects Peripheral anticholinergic side-effects such as constipation, blurred vision and gastro-intestinal upsets may occur in some patients.

Precautions Brizin is not recommended in the first trimester of pregnancy. Administer with caution to patients with glaucoma or prostate hypertrophy.

Further information is available on request.

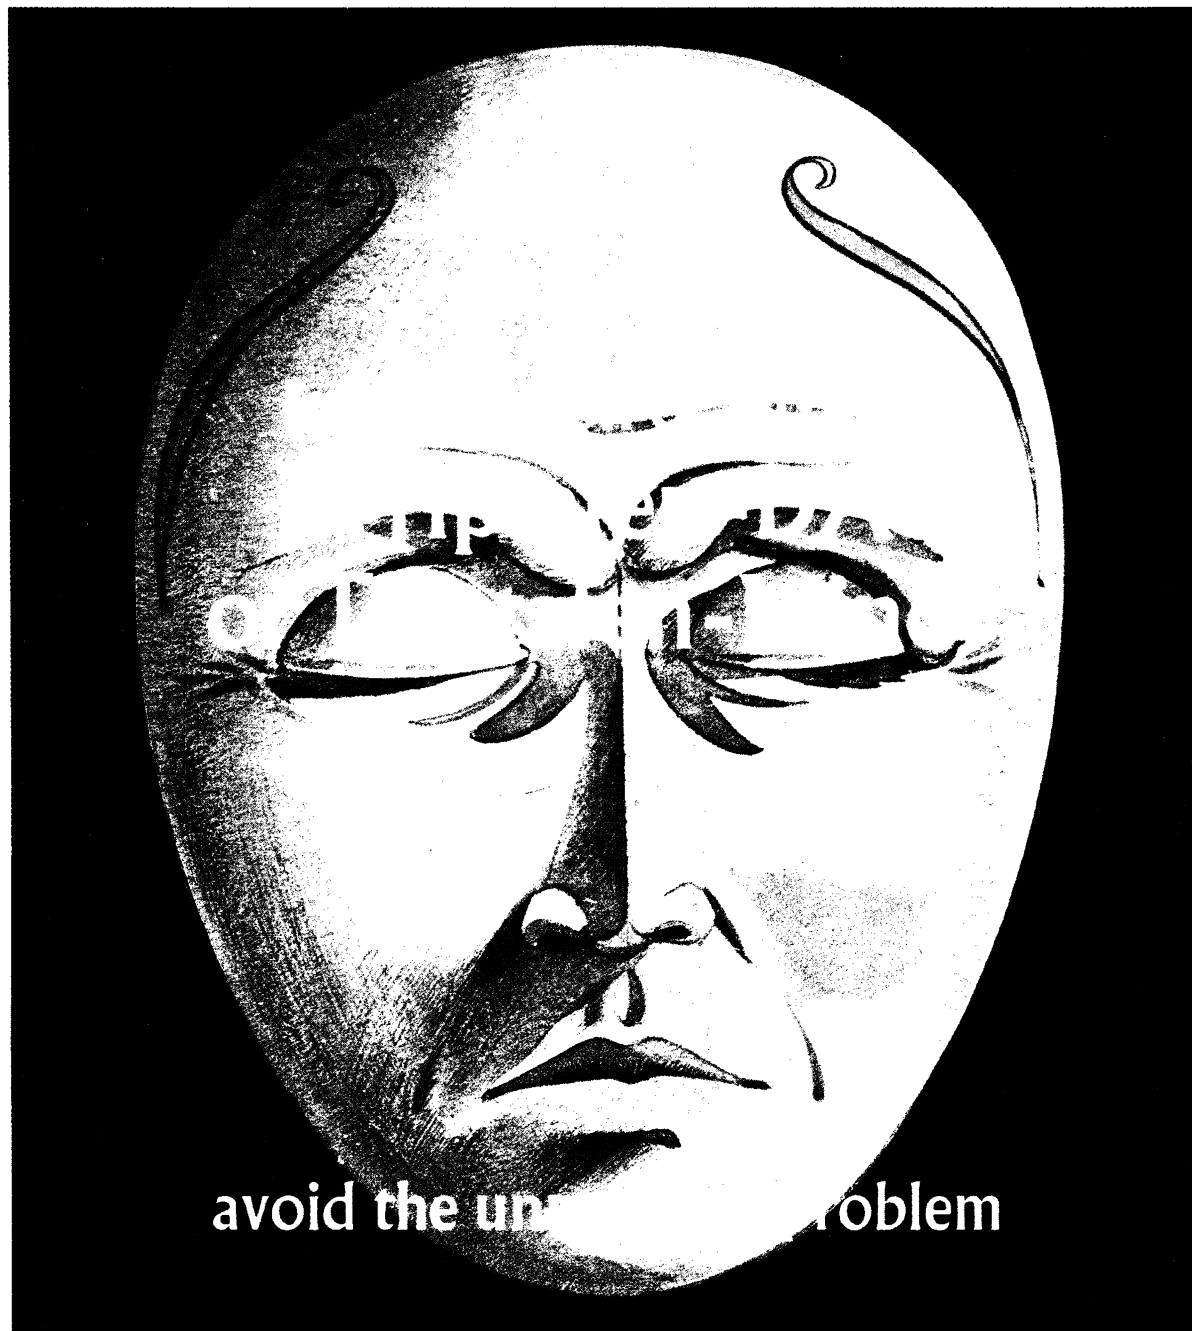

Brizin* (benapryzine hydrochloride) is a British product originated by

Beecham Research Laboratories, Brentford, England. A branch of Beecham Group Limited.
