# NAPROSYN

**Powerful  
in arthritis**

**What is Naprosyn?** Naproxen – a new non-hormonal anti-inflammatory agent with analgesic properties, indicated for the treatment of rheumatoid arthritis, osteo-arthritis and ankylosing spondylitis.

**How powerful is it?** Double-blind cross-over trials have shown 500 mg Naprosyn to be significantly superior to placebo and equivalent in clinical efficacy to 4 g aspirin and 150 mg indomethacin in rheumatoid arthritis; and to 100 mg indomethacin in osteo-arthritis. Open studies have shown that Naprosyn is highly effective in ankylosing spondylitis.

**How does Naprosyn help the arthritic patient?** The long half-life of 12–15 hours means that one 250 mg Naprosyn tablet in the morning, and one in the evening is sufficient in most patients to provide sustained relief throughout the day and night. Morning stiffness and painful joints are relieved, and mobility and grip strength improved.

**How is Naprosyn "kind to patients"?** It is extremely well tolerated. Side-effects are less frequent on 500 mg Naprosyn than on 4 g aspirin and 100 mg and 150 mg indomethacin. Some studies have shown that the incidence of side-effects is not significantly different to that exhibited on placebo. Gastric disturbances, in particular, are rarely seen with Naprosyn. Objective tests such as gastroscopy have shown

# Kind to patients

that Naprosyn causes minimal irritation to the gastric mucosa. Not least, patients find the twice daily dosage regimen more convenient.

**How safe is it?** Doses of up to  $3\frac{1}{2}$  times the recommended dosage of Naprosyn (500 mg) have been administered to human subjects with no adverse reactions occurring.

**Can Naprosyn be taken on an empty stomach?** Yes. In a number of clinical trials Naprosyn was given on a fasting stomach without adverse effects being reported. Furthermore, absorption is not significantly affected by the presence of food or alkali.

**At what stage should Naprosyn be used?** Since Naprosyn is at least as effective as 4 g aspirin and 150 mg indomethacin, and has a remarkably low incidence of side-effects, it may be considered either as first line treatment or as an alternative for patients with chronic disease who are developing tolerance to, or are exhibiting side-effects on, other anti-arthritis drugs.

**Are there any contra-indications?** There are no known contra-indications although caution should be exercised during pregnancy.

Technical literature, symposia proceedings and full bibliography are available on request.

# Most doctors know that for many patients with asthma, treatment with Ventolin is all that is needed.

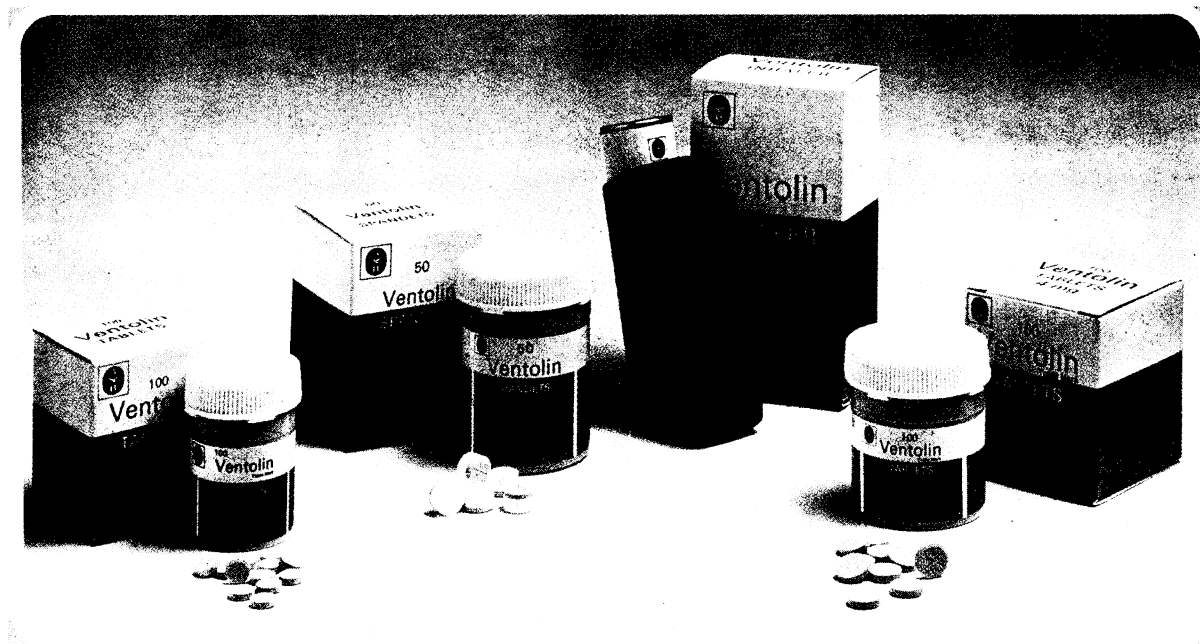

\* A bicycle ergometer was used to the extent necessary to induce an asthmatic attack in 9 asthmatic patients. All these patients had positive skin tests.

A dose of two inhalations of Ventolin Inhaler prior to the exercise prevented an asthmatic attack in 8 out of 9 of the patients. The one who failed, obtained full protection when the dose of Ventolin was doubled.

As a comparison sodium cromoglycate, in a dose of one capsule (20mg), was given to 6 of the same patients prior to exercise. Protection against asthma was obtained in 4 of the 6 patients.

Doubling the dose to two capsules still failed to protect the one patient who had required a double dose of Ventolin.

Ventolin Spandets – each contain salbutamol BP as sulphate – sustained-action tablets, particularly suitable where nocturnal bronchospasm is a problem.

## 'SLOW-K'

The diet of elderly patients is often grossly deficient in potassium. Surveys of potassium status in the elderly have shown the incidence of hypokalaemia to be up to 10%.<sup>1</sup> Even if patients can afford to buy foods such as fresh fruit and green vegetables, there is no guarantee that they will do so.

'Slow-K' is 600mg potassium chloride BP in a special slow-release wax core. Securitainers of 500.

'Slow-K' provides an economical and reliable means of administering potassium to such patients. Over 12 years' clinical usage has confirmed its excellent tolerability and complete absorption of potassium.

# Brenda is and today she

For the first birthday in her life, Brenda can blow out her own candles. Because she has been treated with a new product called Migen – a short immunisation course that is simple and very effective. A fundamental treatment that for the first time gives you, the family doctor, real control over asthma.

It won't help all asthmatics but it will help those whose asthma is caused by, or complicated by, allergy. And that's no small number.

Migen is effective. Allergy has always been recognised as one of the most common causes of asthma. Recently it has been established that the most important

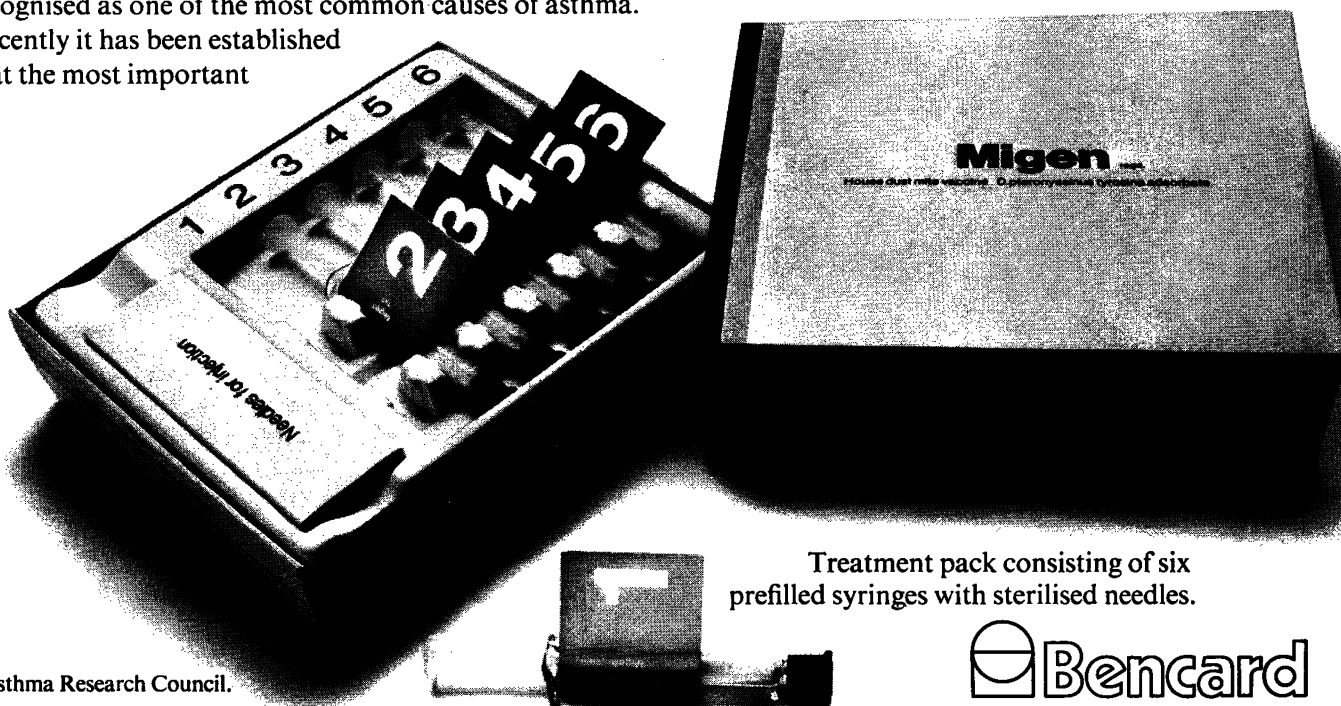

allergenic factor in house dust is the house dust mite: in fact, more than 90% of house dust sensitive patients are sensitive to house dust mite. And, "The rise in the mite content of dust from September to October has been shown to be directly related to an increase in asthma during this period."\*

Migen immunises against the house dust mite. Immunisation against this powerful allergen raises the patients' overall level of tolerance. If he is multi-sensitive, he may well find that he no longer reacts to contact with other allergens which have previously provoked attacks. And the stress caused by fear of attack is reduced.

Migen is simple. Migen is a short course vaccine which contains pure extract of *Dermatophagoides pteronyssinus*, the most common British house dust mite. Just six injections form a complete course of treatment for asthma and perennial rhinitis. And each syringe is pre-filled to ensure accurate dosage.

Migen – minimal side effects. Migen's active material is released slowly but completely for maximum efficiency and minimum risk of adverse effects. Migen is adsorbed onto tyrosine, a naturally occurring amino acid, fully metabolisable in the human body.

Migen is a Bencard product. Prepared by Bencard, leaders in allergy research, Migen is the first short course asthma treatment to give *you* control over your asthma patients. Migen may usually be prescribed

Treatment pack consisting of six pre-filled syringes with sterilised needles.

Migen. Many products have been advocated for use in the treatment of asthma. Most have drawbacks that you and your patients suffer for the sake of some relief. Now Migen offers an opportunity to treat asthma

simply and effectively.

Allergy has always had a strong hold on the asthmatic. From today a powerful and very common allergen can be controlled from your surgery, with Migen. It's asthma immunisation made easy.

# Bread should have a place on every table

	Quantity per oz. of bread	Contribution of bread to average daily diet *
Protein	2.2 g	16.8%
Iron	0.51 mg	17.9%
Calcium	26.0 mg	14.3%
Niacin	0.48 mg	15.1%
Thiamine	0.05 mg	23.3%
Energy value	69 kcal	14.3%

\* Figures from 1971 National Food Survey

Our daily bread is often underestimated as an essential source of goodness and nourishment.

In the average national diet (according to the 1971 National Food Survey), bread plays a key part, providing over one-sixth of a person's daily protein and iron intake; over one-fifth the

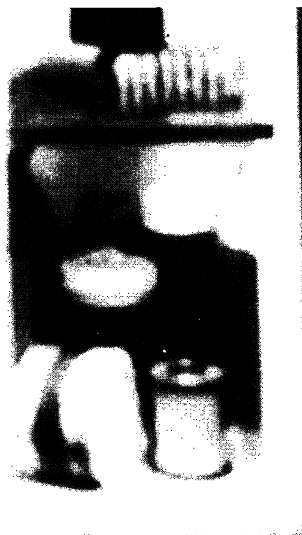

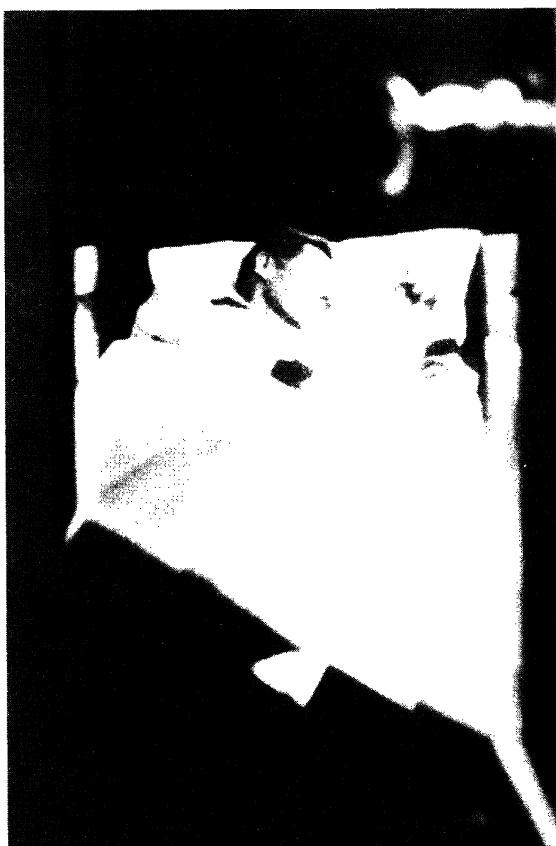

daily thiamine; and nearly one-sixth the daily calcium, niacin and energy value.

This means, of course, that the importance of including bread in one's diet should never be underestimated. To cut out bread, even when slimming, may produce an unsatisfactory diet. For health's

sake, it's worth recommending bread in *every* diet.

Penny for penny, bread provides nearly twice as much protein as cheese, and nearly three times that of white fish or beef. Which makes our daily bread one of the best food bargains in the world.

# Vertigo is an anxious business. Hence Vertigon.

The psychological aspects of vertigo can be critical. Anxiety can trigger the attacks.<sup>1</sup> And the attacks intensify anxiety.<sup>2</sup>

That's why therapy must be aimed at both. That's why we've produced 'Vertigon'.

'Vertigon' is a powerful vestibular sedative with both anxiolytic<sup>3,4,5</sup> and antemetic properties.<sup>6,7,8</sup>

It is effective during attack and can provide protection, too.

Taken early or in stressful situations it should usually avert the active phase.

'Vertigon' is available as sustained-release 'Spansule' Capsules. It gives smooth, continuous, day-long control so there is steady drug release, less chance of break-through symptoms and fewer side effects.

'Vertigon' can be taken for long periods of time.<sup>9,10</sup> Further information available on request.

## restores reality

Tranxene\* is a new but distinctive benzodiazepine offering these major benefits to anxious patients.

### **Convenient once daily dosage**

The problems of forgotten doses are reduced with once daily Tranxene.

### **Fewer side-effect problems**

Sedation, lassitude and other side-effect problems associated with previous members of the benzodiazepine family occur significantly less frequently with Tranxene.<sup>1,2,3</sup>

### **Specific anxiolytic action**

Double-blind studies have demonstrated that the frequency and severity of anxiety symptoms are significantly reduced with once-a-day Tranxene.<sup>1</sup>

The results of these studies confirm the proven anxiolytic action of Tranxene.<sup>3,4</sup>

ANOTHER  
BRUFEN  
BENEFIT

Brufen has the powerful analgesic and anti-inflammatory properties needed to relieve the pain, stiffness and swelling of arthritis. There is now little doubt that Brufen is the best tolerated of the available antirheumatic drugs.

Experience has shown that at least 7 out of every 10 arthritic patients on Brufen improve as judged by both subjective and objective criteria. It has been well demonstrated that patients prefer Brufen to other drugs. Given at the recommended dosage, Brufen can do much for those who suffer with arthritis.

Brufen is ibuprofen, available as tablets containing 200 mg and as a Suspension containing 100 mg in each 5 ml. Full information from The Boots Company Ltd., Nottingham.

## Auntie remembers— taking her Lucidril.

Forgetfulness presents itself in many ways in old age—for example, a patient often forgets when and how much to take of any prescribed medication.

Lucidril can help a patient's memory by an action that does not depend on improving the blood supply to the brain.

Lucidril starts the old brain working again—along different lines. Firstly, it stimulates the metabolism of

the brain, probably through different pathways. Secondly, it removes the lipofuscin pigments which are a concomitant of old age and which may impair cellular metabolism.

Lucidril thus improves mental function, as a recent clinical paper has pointed out:

"These preliminary results [with Lucidril] are encouraging, because they indicate that the intellectual impairment exhibited by such patients

may be reversible, even when the underlying causes are presumably of an organic nature, such as cerebral arteriosclerosis."

Lucidril 300 contains 300 mg. meclofenoxate hydrochloride. Product Licence Number 0098/5002. Lucidril is a trade mark.

# In pituitary dwarfism

# **CRESCORMON<sup>®</sup>**

## human growth hormone

Crescormon is a highly purified preparation of human pituitary growth hormone thoroughly tested for homogeneity and potency.

Substitution therapy with Crescormon in patients suffering from GH deficiency leads to an acceleration of growth. The therapy is safe and no resistance to treatment has been reported.

Crescormon is standardized both by radio-immunological determination and by biological assay. Each vial contains 4 IU determined against IRP Growth Hormone (WHO).

### **Indications**

Dwarfism due to decreased or failed incretion of pituitary growth hormone. The diagnosis should be verified before the preparation is administered by an investigation of the pituitary function.

### **Contraindication**

Diabetes mellitus.

### **Precautions**

In spite of rigorous requirements for the collection and careful control of the pituitary glands used in the preparation of Crescormon, the risk of transmitting hepatitis cannot be excluded. The risk may be considered extremely small, however, and no cases have as yet been reported.

### **Side Effects**

In clinical trials Crescormon has elicited the formation of antibodies in low titre in a few patients, which, however, has not affected the growth rate. Otherwise no adverse reactions have been observed.

### **Dosage**

The dosage is individual, but in general a dose of at least 0.5 IU per kg body weight per week, divided into two to three intramuscular injections, is recommended.

### **Administration**

Crescormon should be injected intramuscularly. The solution for injection is prepared by adding 2 ml Sodium Chloride Injection to the lyophilized substance in the vial. A made-up solution should be used immediately after preparation.

### **Storage**

Refrigerator (+5° C).

### **Pack**

Crescormon combined package of lyophilized sterile HGH 4 IU (about 2 mg) and Sodium Chloride Injection in an ampoule of 2 ml.

A recent trial\* shows Prinalgin to be superior to high dose aspirin by all the normal criteria of improvement in rheumatoid arthritis.

In particular, one feature of the trial really stands out: After 91 days (13 weeks) the superiority of Prinalgin becomes increasingly significant.

The conclusion is obvious: long lasting improvement in rheumatoid arthritis is better achieved with Prinalgin than high dose aspirin.

### NATIONAL CENTRE FOR TRAINING AND EDUCATION IN PROSTHETICS

#### SHORT TERM COURSE "LOWER EXTREMITY PROSTHETICS FOR PHYSICIANS AND SURGEONS"

This course is designed to give physicians and surgeons a view of basic concepts and practise in lower-extremity prosthetics. It lasts six days from Monday through to Saturday lunch time.

The course will include normal locomotion, biomechanics, fitting, alignment, suspension and fabrication of above-knee prostheses. Consideration is given to amputation techniques, prescription principles and check-out procedures.

Major emphasis is on the patellar-tendon-bearing prosthesis and its variants for the below-knee amputee, and on the quadrilateral socket for the above-knee amputee although the other types of above-knee socket are considered.

Prostheses for hip and knee disarticulation, Syme's and partial-foot amputations are also briefly considered.

Instruction and laboratory practice with amputee subjects are provided in gait analysis, prescription, and evaluation of prostheses. An optional evening laboratory is offered to those desiring practise in wrap-casting techniques.

The course will be offered on the weeks commencing 12th November, 1973, 14th January, 1974 and 18th March, 1974. The course fee is £18. Further details may be obtained from John Hughes, Director, National Centre for Training and Education in Prosthetics, University of Strathclyde, Glasgow C1. (29169) 4

## CONSULTANT EMERGENCY PHYSICIAN in the General Infirmary at Leeds

This is a new post which is being created to give an improved service for the increasing number of medical emergencies which are seen in the Infirmary's Accident & Emergency Department and to extend this department's undergraduate teaching and postgraduate training. The new Accident & Emergency Department, which will open in 1974, will give greatly improved conditions for clinical work as well as for teaching and research.

Candidates must have had wide experience, a higher qualification and some experience of teaching. A successful candidate will share the running of the department with the Consultant Surgeon already in post.

Further information may be obtained from Mr. J. A. Tunstall, Secretary to the Advisory Appointments Committee, The General Infirmary, Leeds LS1 3EX, and to whom applications with details of qualifications, previous appointments, date of birth, and the names of three referees should be sent by 20th October, 1973. International Medicine  
Job satisfaction and £10,000 at age 30?

We specialise in the recruitment of physicians for the pharmaceutical industry. We act on behalf of many of the leading ethical pharmaceutical companies in the world, and we are currently recruiting for a number of interesting positions in the USA.

If you are a young, British-qualified physician with a good background in medicine rather than surgery, and if you are currently seeking a new challenge with wider horizons and an opportunity to contribute directly to medical progress, we may well be able to introduce you to a fascinating new career.

The work involves: the design, initiation, co-ordination and evaluation of clinical trials on new and established therapeutic products, liaison with health and drug registration authorities, and participation in the many other and varied medical activities of the Company. (29117)

Salaries are of the order of \$30,000 — \$32,000, and the other benefits often include an attractive bonus or equity option scheme.

We are in a unique position to provide you with advice about the pros and cons of a career in the pharmaceutical industry, and the opportunities currently available. Our service is entirely confidential and without charge to applicants.

If you're interested, please write or 'phone: Dr. A. E. F. Chandler (Reference BCB) Talentmark Limited, King House, 5-11 Westbourne Grove, London W2 4UA. Tel: 01-229 2266.

# TARANAKI HOSPITAL BOARD

New Zealand

**ORTHOPAEDIC SURGEON**  
Applications are invited for the specialist position of Orthopaedic Surgeon based on Taranaki Base Hospital in New Plymouth, New Zealand. The position is a full-time one but applications will be considered from those interested in a substantially whole-time appointment, initially or after a period of whole-time duty.

Conditions of employment will be in accordance with the New Zealand Hospital Service Determination for Medical Officers. Salary will be within a ten step scale — NZ \$11,050 — NZ \$14,880 p.a. with automatic annual increments to the maximum. The commencing salary within the scale will be determined by the Medical Officers' Salaries Grading Committee.

The Taranaki Hospital Board serves an area with a population of 100,000. New Plymouth is a coastal city of 35,000 and educational, cultural and sporting (from surfing and skiing) facilities appropriate to such a community are readily and economically available. There is an equitable climate and a minimum of social ills such as may be found in more densely populated countries.

Considerable assistance towards fares and removal expenses can be given to whole-time appointees or substantially whole-time appointees, subject to a contract of minimum service.

Conditions of Appointment and Application Form are available, on airmailed application, from The Secretary, Taranaki Hospital Board, Private Bag, New Plymouth, New Zealand, with whom applications close on 28th November, 1973. (29202) 118

Psoriasis

After 8 days' treatment with clobetasol propionate

When the next patient presents with a psoriasis or eczema requiring a more effective steroid than has so far been available, take the opportunity to assess the merits of Dermovate yourself.

Dermovate contains clobetasol propionate, a new Glaxo steroid that has been the subject of clinical trials in over 1,100 referred patients with these conditions.

In psoriasis, a notably stringent test of topical steroid efficacy, thorough comparison with the modern steroids suggested Dermovate superior.

Dermovate also proved second to none in various other stubborn, inflammatory dermatoses.

So next time psoriasis or a recalcitrant eczema looks like becoming a clinical problem, why not put Dermovate to the test?

A sample and detailed information are available on request from:  
Medical Department, Glaxo Laboratories Ltd, Greenford, Middlesex

# FALSE ALARM!

A person often experiences anxiety when it can serve no useful purpose. A signal originates in the amygdala (orange spot) and is transmitted into the body via the hypothalamus (red spot) and autonomic nervous system. In such cases, anxiety becomes a problem causing many difficult and unpleasant symptoms.

Nobrium relieves anxiety by a precise action on the amygdala—the source of anxiety. It also acts specifically on the hypothalamus to damp the transmission of anxiety into the body. The precise action is highly effective—relieving over 80% of patients—and causes few side-effects<sup>2</sup> as other parts of the brain are virtually unaffected.

# Stemetil

"...a tranquillizer of  
distinct value ..."<sup>1</sup>

Prompt, positive restoration of calm without drowsiness or any dulling of mental powers. For the worried patient who must continue to cope with daily routine 'Stemetil'\* brings significant benefits indeed.

As a highly efficient tranquillizer with well-known antinauseant properties too, 'Stemetil' rapidly breaks the stranglehold of anxiety, fear and tension and provides immediate control of associated physical symptoms.<sup>1,2</sup>

As an anxiolytic that calms and relaxes with no adverse effects on alertness or thinking powers,<sup>3</sup> 'Stemetil' successfully relieves an incapacitating condition without producing incapacitation of a different kind.

'Stemetil' is effective in low dosages, causes few, if any, problems of tolerance and carries no risk of habituation. It makes good economic sense too, treatment costing on average just 2p per day.

# Transvasin at the summit

The summit of Annapurna 8090 metres high, was reached on 20th May 1970, by Owens and Day of the British Nepalese Army Expedition. During the 3-hour climb from Camp 5 at 7400 metres, oxygen breathing apparatus was used. The only previous ascent, by Herzog and Lachenal in 1950, took 8 hours. They had no oxygen and suffered severe frostbite, losing all their toes and Herzog his hands. The temperature at the summit for Owens and Day was  $-30^{\circ}\text{F}$ .

**ON ANNAPURNA** the members of the British Nepalese Army Expedition chose Transvasin to relieve muscular pain. Three British climbers used it:

"One suffered badly strained back and chest muscles following involvement in an avalanche. The second developed severe intercostal fibrositis, and the third had badly bruised himself after falling 30 feet and jamming in a crevasse. Transvasin gave considerable relief to all three climbers."

*Personal communication, 3rd September 1970.*

Transvasin was also used with great success by many other members of the party who complained of various other aches and pains.

**IN GENERAL PRACTICE** too, Transvasin provides effective relief from muscular and rheumatic pains. It contains esters of nicotinic and salicylic acids which ensure a rapid hyperaemic and analgesic effect.

Available in 30 g tubes.

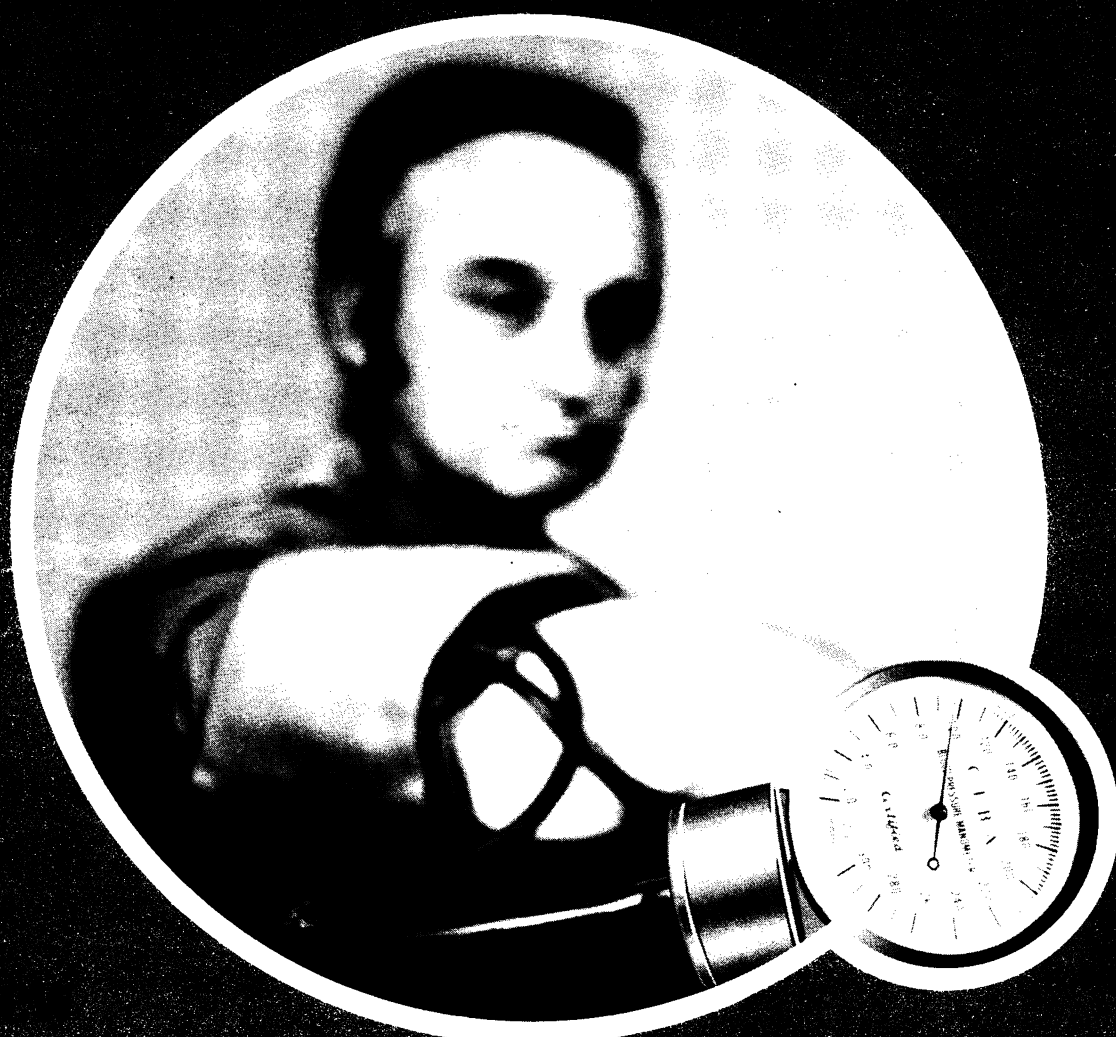

Basic NHS price 13p.

Full information is available on request.

Surgical hosiery provides venous support, but PAROVEN is a kind of 'physiological elastic stocking' for the capillaries.

"The most obvious effect of treatment with HR (Paroven) is the very constant relief of night cramps, with an improvement exceeding 90 per cent."

*Brit J Clin Pract* (1970) 23, 161

"The degree of relief in chronic aching pain in the legs was not so marked (compared with 90% improvement in night cramps and 70% improvement in heaviness of the legs), but still amounted to 54 per cent."

*Brit J Clin Pract* (1970) 23, 161

"Symptoms of heavy legs are improved in 70 per cent, and it was generally agreed that not only did legs feel lighter but the patients were more agile."

*Brit J Clin Pract* (1970) 23, 161

*"The improved venous blood oxygenation and the reduced tissue oxygen extraction indicated better tissue perfusion with less blood oxygen having been taken from the increased capillary blood flow."*

## Relief of symptoms in varicose disorders

*Varicose veins, post-phlebitic syndrome, superficial thrombophlebitis, varicose ulcers, varicose eczema, ankle oedema, restless legs, paraesthesia, haemorrhoids.*

**Dosage** Initial treatment: 4 capsules a day, preferably with meals. In most cases, at least four weeks treatment with PAROVEN is required before significant benefit is felt. At the point where the patient experiences benefit, the dosage may be adjusted to a maintenance level. Maintenance treatment: 1-2 capsules a day.

**Side effects and Precautions** In a few patients, slight gastro-intestinal disorders, flushes and headaches have been reported. These are usually overcome by taking the capsules with meals or by slight adjustment of dosage. There are no known contra-indications to PAROVEN; it is virtually non-toxic and has no teratogenic effects. In keeping with current teaching and practice its use during the first trimester should, however, be avoided.

**Availability** Capsules, each containing 250 mg of O-( $\beta$ -hydroxyethyl)-rutosides (not less than 45% troxerutin) in bottles of 20 and 100 capsules.
