

# When waking hours stretch far into the night...

...The simple answer so often is **'Surmontil'**

Insomnia is a complex problem.

Partly because sleep itself is a complex process: to correct abnormalities requires special care.

And partly because sleep disorder is but a symptom: its cause must be identified and treated too.

'Surmontil' can often provide a simple answer.

First, by promoting sound, *natural* sleep. Research has shown that many hypnotics fall short of this requirement: they do, of course, provide sleep, but only by inducing new, artificial sleep patterns. These can cause unpleasant symptoms when treatment is withdrawn and so encourage dependence. With 'Surmontil' old, physiological patterns are restored, and the patient sleeps as she used to.

Second, because 'Surmontil' also has powerful mood-elevating and tranquillizing properties it provides more than partial relief when insomnia is traced to anxiety/depression. It acts not only

on the physical symptom but also on the emotional causes, thus ensuring full recovery. No hypnotic, tranquillizer or antidepressant alone can provide this comprehensive benefit – only 'Surmontil', with all three required effects, makes a complex problem less so.

**'Surmontil' restores sleep,  
lifts depression, allays anxiety**

# MYRA 23 A REAL BLUE WATER CRUISER!

## THE MYRA 23 GIVES YOU SUPERB COMFORT AND SEA SAFETY AT A REALISTIC PRICE!

Developed from Norwegian off-shore fishing boats, the Myra is renowned for her seaworthy qualities. Being almost a double-ender, with deep keel, mid ship's engine, good ballast and a beautiful flared bow, she was born to take the worst weather comfortably, and give you a margin of safety, not normally found in mass produced craft. Of basic GRP construction, the Myra is hand fitted by Norwegian craftsmen in the perfect combination of modern material and traditional timbers. Accommodation is superb with 5 comfortable berths, luxury cockpit and separate W.C. A heavy-duty canopy is standard. Complete with your choice of four Volvo Penta engines, giving from 7 to 18 knots. A special 2 berth luxury sports fishing version is also available.

THESE EXTRACTS FROM THE "MOTOR BOAT AND YACHTING" All About Boating, Part 2 of 8th June 1973 SUPPORTS THE SAFETY CASE FOR TRADITIONAL HULL DESIGNS OF THE MYRA TYPE.

"The boat with a narrow stern to match a narrow bow, right, will pitch and dig her nose in much less than the wide transom type, left. This means that the forces trying to make her broach will be lower."

"The lack of ballast and the large areas of glass common to most modern motor cruisers makes them particularly vulnerable in a big beam sea."

We at Starlight also believe that with inboard/outboard installations, square enders have a further disadvantage in a heavy following sea, being inclined to be stern heavy.

## MYRA '21' LUXURY 4 BERTH

# We're happy to let the professionals judge the Citroën DS.

## car

"Citroën's DS23 is a fast cruiser, too. In fact it is one of the quickest open road cars on the market, being happy to thunder along in fifth gear at 115 to 120 mph all day long..."

One comfortably runs to 100-plus in fourth before reaching for fifth and letting the Citroën get into the great loping stride that eats up countries like most cars eat up miles."

## Evening Standard

"The road is held magnificently. Steering is direct. A strong, strange and secret lady, this: clad in nylon for excellent comfort, thickly lined to damp all sound, well cosseted by the famous Hydropneumatic suspension, and with a bright and roving eye as the directional headlamps are switched on..."

Ian Morton

## Motor

"The car is still aerodynamically superior to nearly all its competitors, and with its new 2347cc engine and five-speed gearbox it has exceptional performance for its capacity and it offers a degree of comfort that is not always evident in cars costing considerably more."

Then there are the added refinements of load-sensitive brakes and the option of Citroën's unique self-levelling, swivelling headlight system which gives the DS probably the most effective lights fitted to any production car in the world."

## The Yorkshire Evening Press

"Hydropneumatic suspension has been a Citroën speciality for a decade and all the bugs have been ironed out of it. It gives a smoother ride over bumps and round corners than any car I've ever driven. The way the car hugs the road over rough surfaces without vibration has to be experienced to be believed."

The car maintains its stability and roadholding over potholes, grass verges, even shallow culverts." Jack Allwood

## Motoring News

THE FIRST MOTORING NEWSPAPER

"We gave very high marks to the steering, a precise rack and pinion system with power assistance. Feel, through the single-spoke padded steering wheel, is perfectly satisfactory..."

It is probably the best front-drive set-up on the roads bar none, and this is where Citroën's great experience pays off."

## THE SUNDAY TIMES magazine

"Few other designs still in production today have been proved over so long a life. Fluid-and-gas suspension, power brakes, aerodynamic styling, a range of safety features... The Citroën is still the most advanced car in mass production."

Bill Cater

## AUTO CAR

"With its long wheelbase, short tail overhang, front wheel drive and self-levelling suspension, the Citroën makes a splendid towing car... extremely sure straight-line running and no sway on fast corners."

Stuart Bladon

## The Northern Echo

"They call it the Rolls Royce of France, and after sampling the luxurious motoring the Citroën DS provides, I can understand why."

Here is a car with design features which make its rivals green with envy. Its unique Hydropneumatic suspension replaces the traditional metal springs with a cushion of gas and oil, and the ride is superb."

Bernard Gent

# In a few minutes his antacid will stop working. What then?

Antacids and stomach coatings work. Very well. But not always for long, and only against one of the major symptoms of the distress. That's why you need 'Stelabid'.

'Stelabid' provides protection against hypersecretion, hypermotility and painful spasm.

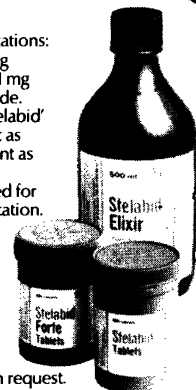

Its calming action alleviates the anxiety and stress so often associated

with gastro-intestinal disturbances.

'Stelabid' prescribed with antacids, provides a most persistent and effective symptomatic control of gastro-intestinal disorder throughout the whole spectrum from functional disorders to ulceration.

And a simple b.i.d. dosage protects the patient even throughout the night.

'Stelabid' is now available in three presentations: **'Stelabid' Tablets** Each tablet contains 5 mg isopropamide present as the iodide, and 1 mg trifluoperazine present as the hydrochloride. **NEW 'Stelabid' Elixir** Each 5 ml dose of 'Stelabid' Elixir contains 5 mg isopropamide present as the iodide, and 1 mg trifluoperazine present as the hydrochloride. 'Stelabid' Elixir is particularly recommended for those patients who prefer a liquid presentation. **NEW 'Stelabid' Forte Tablets** Each tablet contains 7.5 mg isopropamide present as the iodide, and 2 mg trifluoperazine present as the hydrochloride. 'Stelabid' Forte Tablets are especially useful in more severe cases when an extra measure of relief from spasm and hypersecretion is required. Full prescribing information is available on request.

## Bill's bananas are suffering from bronchitis.

Bill's bananas are only one casualty of his bronchitis.

When he's ill, everything comes to a standstill and some people's work just won't keep.

That's why he needs 'Eskacef,' fast.

'Eskacef' acts quickly, is strongly bactericidal, has high tissue penetration and extremely low toxicity. You can give as much as 4g a day and nephrotoxicity has not proved a problem, even in children. This means you can hit the infection hard in the beginning, giving your patient the best possible chance of recovery in the shortest possible time.

### 'Eskacef' Starter Packs

Because 'Eskacef' acts quickly, a 'Starter Pack' in the surgery will put your patient on the road to recovery fast.

# Are your bronchodilators getting through to the patient?

Intal is well established as a highly effective treatment for allergic asthma in the young.

But what about the late-onset patient with obstructive airways disease?

Once an asthmatic attack has started, an aerosol bronchodilator may not give adequate relief. It may only reach part of the lung, resulting in hyperventilation where it's least needed and little or no effect in the obstructed area.

Can Intal prevent this situation arising?

Clinical studies<sup>1,2</sup> show that a surprisingly high proportion of patients over 40 benefit from Intal, even where there is no clearly defined allergic component.

# Excellent in chil

Amoxil is an excellent antibiotic for the commonly occurring bacterial infections in children. For a start, Amoxil is pleasant to take. The citrus-flavoured syrup or paediatric suspension pleases even the fussiest of patients.

Then Amoxil can get to work. Its broad spectrum of bactericidal activity and outstanding oral absorption<sup>1</sup> ensure the high serum levels necessary for a rapid response. In fact, just

three daytime doses give  
24 hour therapeutic  
effect.

# Children's infections.

It is not surprising, therefore, that Amoxil's extensive clinical trials have proved it so reliable: a recent study<sup>2</sup>, involving 150 children, demonstrated a success rate of 94%.

Add to this Amoxil's penicillin safety and low treatment cost and you really have an excellent antibiotic for children – and for grown-ups too.

Further information on Amoxil (regd) is available from Bencard,  
Freepost, Brentford, England.

#### Prescribing information

Dosage: Adults 250 mg three times a day.

Children – up to 10 years: 125 mg three times a day. In the case of severe infections the dosage should be doubled.

Presentation: Amoxil capsules 250 mg. Amoxil syrup 250 mg/5 ml, 100 ml bottle. Amoxil syrup 125 mg/5 ml, 100 ml bottle. Amoxil Paediatric Suspension 125 mg/1.25 ml, 20 ml bottle with pipette. Amoxil presentations contain amoxycillin as the trihydrate.

Contra-indication: Amoxil is a penicillin and should not be given to penicillin-hypersensitive patients.

Side effects: No serious side effects have been reported in extensive clinical trials. Those side effects which were encountered were mild and of a transitory nature.

## "NHS REORGANISATION AND THE DOCTOR"

### SEMINARS FOR GENERAL MEDICAL PRACTITIONERS AND HOSPITAL CONSULTANTS

Several University and other Education Centres, as shown below, are providing at the request of the Department of Health and Social Security special 2-3 day seminars for general medical practitioners and hospital consultants designed to explain the reorganisation in a medical context. The seminars offer an opportunity to consider and discuss doctors' participation in the management decisions in the integrated Service, particularly the proposed new role and relationships for clinicians on the District Medical Committee and District Management Team and the role of the community physician.

A number of seminars have already been held and the members have found them very valuable. Others have been arranged for the period to the end of March 1974. There is no charge for fees or residence, and travelling expenses will be reimbursed in the usual way. For general medical practitioners attendance at these seminars counts for seniority payment purposes.

There will generally be at least one centre providing these seminars in each NHS Region. Consultants and general practitioners who wish to take advantage of this opportunity to learn more about the reorganisation as it will affect doctors should apply to the Secretary of the Regional Joint Liaison Committee at the Regional Hospital Board offices. Further details may be obtained from him or from the Clerk of the Executive Council or direct from the education centres.

# Buttered toast —the big question

**Animal fat is a killer, says doctor**

**Margarine to prevent coronaries?**

Finland has the highest incidence of coronary heart disease in the world—in an effort to reduce the death rate subjects with polyunsaturated fat diet.

**Egg 'n' bacon 'can kill'**

**Dramatic drop in coronaries following polyunsaturate diet**

ONE of the first really long-term studies to investigate the effects of cholesterol-lowering diets on mortality and morbidity from coronary heart disease has recently been carried out by the Department of Biochemistry, Institute of Experimental Health, Helsinki.

**Health risk in butter and eggs?**

of diet, also tested "butter". Better films, possibly, at the hospital of the survey. Professor J. J.

**Animal fats: a warning**

fresh light on the intimate way in which polyunsaturates may act biochemically. "Our studies lead us to believe that the actual thrombotic episode in coronary disease may be due to a relative deficiency of linoleic acid", he told MNT. "This acts in such a way as to inhibit the intrathrombotic production of prostaglandin E<sub>1</sub>". E<sub>1</sub> normally has a pronounced anticoagulant effect. But if the important polyunsaturated fat, linoleic acid, is deficient, no substitute will do. So it looks as though...

**The validity of diet as a means of lowering serum cholesterol was proved.**

In hospital N, for males on the experimental diet, coronary disease death rates were 5.77 compared with the ordinary diet figure of 15.07. For cerebrovascular and other circulatory diseases, the figures were 5.56 compared with 9.77. For males in hospital K, the figures were 7.99 compared with 15.18 and 4.28 compared with 4.09.

For females, in hospital N the respective figures were 3.96, 7.79 and 6.61, 4.58 and in hospital K, 6.46, 8.06 and 5.13, 4.25.

Mortality from other causes had to be considered. Turpinen and colleagues concluded that there was no important difference in mortalities according to whether the subject was on normal or experimental diet and the same assurance was given in respect of non-coronary deaths.

When the CHD death rate by about half, and the change from the cholesterol-lowering diet to the normal hospital diet (hospital N) more than doubled the death rate.

There was no support in the investigation for a previous report that a cholesterol-lowering diet increases the incidence of death from malignancy.

## It is safer to eat Flora

Few people now discount the relationship between saturated fats, high blood cholesterol levels and coronary heart disease.

Many authorities would argue that some substitution of polyunsaturated fats for saturated fats in normal diet

may reduce the risk of coronary heart disease. And, because of its cholesterol-reducing properties, Flora is particularly effective in the dietary treatment of some hyperlipidaemias.

Where the risk of heart disease is present — Flora margarine makes very good advice.

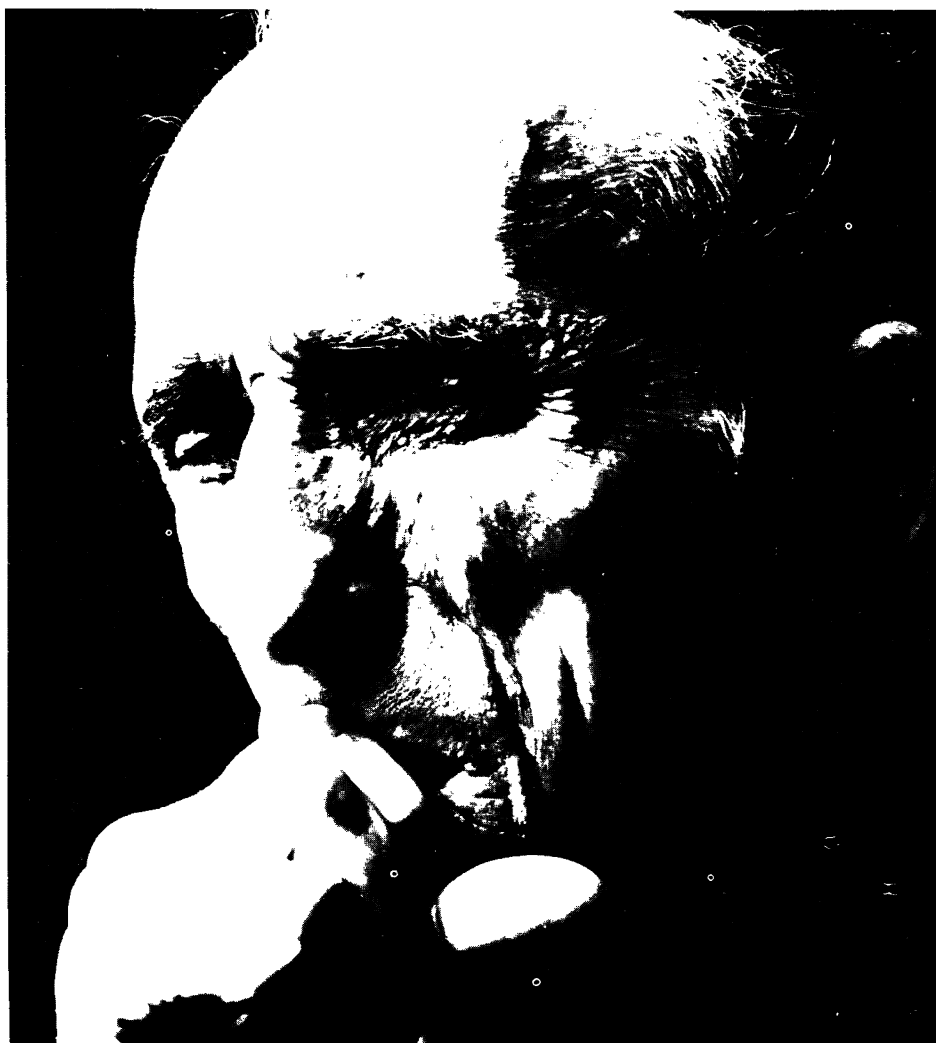

**Flora** Highest in polyunsaturated fats.

At least 50% of Flora's fat content is linoleic essential fatty acid. Flora has a fat content of not less than 80% of the total product and is sold in half pound tubs.

## A journal of clinical pharmacology

Although Clinical Pharmacology has for some time been recognised as a subject of major importance in all medical fields, it has lacked a truly specialist communication medium.

To fill this urgent need, a new journal, the British Journal of Clinical Pharmacology will be published from January 1974.

British Journal of Clinical Pharmacology will appear bi-monthly and contain complete papers as well as short communications and abstracts of communications and demonstrations from the clinical section of the Pharmacological Society.

If you would like to ensure that you are among the first to see the new journal, please complete and send us the coupon below.

COMMERCIAL APPOINTMENTS

SENIOR  
MEDICAL ADVISER

Throughout all the activities of our Medical Services Division, there runs a common and very heavy responsibility, that of establishing and maintaining a highly ethical medical standard. However good our pharmacists, however professional our marketing men and salesmen – their work must always be tempered by the advice of trained Medical Advisers.

Our immediate need is for a Senior Medical Adviser, who will be concerned with all aspects of organisation and follow-through of our work, from the administration of new drugs to volunteers and clinical trials, to supportive work for products already marketed. Your advice will be sought and heeded as the Medical Division provides full advisory services to the Ethical and O.T.C. selling companies as well as to General Practitioners and Hospitals.

There are therefore some obvious qualities required. You must be a registered Medical Practitioner, holding a British Medical degree with a minimum of 3 years' experience in the Pharmaceutical Industry. Natural

attributes must include a strong personality and the ability to communicate lucidly and persuasively with people of varying types at all levels. A strong commercial instinct will also prove invaluable.

On the academic side, we'll encourage you to take opportunities of keeping abreast with the progress in medical science, including your attending symposia and participating in a weekly clinical session.

No easy job, but one that's well rewarded with an attractive salary determined according to previous experience, a Company car, and a non-contributory Pension and Life Assurance scheme. Some of your work will mean travelling in this country and in Europe. As for the future, our personnel development policy will allow you a variety of opportunities in both scientific and commercial fields.

Please write giving details of qualifications and career to date to: K. S. Woodford, Personnel Manager, Aspro-Nicholas Ltd., 225 Bath Road, Slough, Bucks, SL1 4AU.

# UNIVERSITY OF OTAGO Faculty of Medicine Wellington Clinical School Wellington, New Zealand.

# LECTURER OR SENIOR LECTURER IN MEDICINE

The University of Otago has established at Wellington a Clinical School of the Faculty of Medicine and applications are invited for two positions of Lecturer or Senior Lecturer in Medicine. The Professor of Medicine (Professor T.V. O'Donnell) will take up his appointment later in 1973. The teaching and research experience of an applicant will be considered rather more than the field of his special research expertise although particular hospital vacancies are recognised in Endocrinology and Cardiology and an applicant in the field of Respiratory Medicine would be welcome. However, interested applicants working in other specialist fields are encouraged to apply. Salary Lecturer — a scale from \$N25,691 to \$N212,522 per annum with a bar at \$N210,311 per annum. Senior Lecturer — a scale from \$N212,890 to \$N214,880 per annum. A particularly well qualified candidate could be appointed with the status of Associate Professor with salary at a point within the range of \$N215,652 to \$N216,941 per annum. Performance for clinical duties may be available in the light of status and duties performed. Salary scales are subject to both triennial review and regular cost-of-living adjustments. Further particulars are available from the Secretary-General, Association of Commonwealth Universities (Apts), 36 Gordon Square, London WC1H 0PF, or from the Registrar of the University. Applications close in New Zealand and London on 30th November 1973. (29458) 25

BASINGSTOKE DISTRICT HOSPITAL  
Psychiatric Division Park Prewett

## PSYCHIATRIC REGISTRAR

The appointment will be to one of three Therapeutic teams and offers excellent experience in all forms of Psychiatric illness.

This is a modern progressive mental hospital with a new District General Hospital in its grounds. It is set in the heart of beautiful Hampshire countryside on the outskirts of Basingstoke New Town (2 miles) and is served by an excellent bus service and a frequent train service to Waterloo (45 minutes) and is only 50 miles from London on the new M3 motorway.

Apart from general clinical psychiatry (1,100 beds) the hospital has an Alcoholic Unit, a Mother and Baby Unit, an intensive psychiatric Care Unit and a rapidly expanding Community Psychiatric Nursing Service. It shares an active Postgraduate Education Centre with the District Hospital, runs a regular weekly Case Conference and grants generous study leave to doctors attending the Wessex School of Psychiatry for courses in the D.P.N. and M.R.C. Psych. The hospital is fully recognized as a training hospital by the Royal College of Psychiatry. Apart from its own Social Club and the usual variety of sporting activities the hospital boasts an excellent 9 hole Golf Course.

The post is resident and accommodation is available for both single and married applicants.

# Specialist (Resuscitation)

## Repatriation Department — New South Wales

Applications are invited from Medical Practitioners eligible for registration in Australia with a fellowship of the Faculty of anaesthetics or a postgraduate degree in Medicine or surgery for appointment as Specialist (Resuscitation) at RGH Concord. Experience and expertise in the field of resuscitation and intensive care are essential.

Concord Hospital is located in the Western Suburbs 9 miles from Sydney and is a teaching hospital of the University of Sydney. Average daily bed occupancy is over 900.

A staff of full-time and Visiting Specialists supervise care of the patients. Special Departments include an up-to-date Pathology Department with automated biochemical and haematological equipment, Radiology with coronary angiography, Nuclear Medicine and Pulmonary Physiology Laboratory. There are Special Units for Coronary Care, Intensive Surgical and Thoracic Care and Combined Neurology and Neurosurgery.

The appointee will be immediately responsible to the Senior Specialist-in-Charge (Anaesthetics) and will be required to supervise and direct the intensive care and recovery areas of the hospital. In consultation with referring Specialists, he will control the admission and discharge of patients to and from these areas as well as directing their treatment with special reference to respiratory, biochemical and metabolic problems. He will be required to be available for consultation with other Specialists in any part of the hospital regarding patients requiring intensive care.

The appointee will be required to provide advice concerning selection and maintenance of equipment in intensive care and recovery areas, as well as plan and conduct medical and nursing teaching programmes in intensive care at both undergraduate and postgraduate levels.

Opportunities will exist to engage in research activities associated with intensive care.

Commencing salary will be within the range \$13,581 — \$18,412 and will be determined having regard to qualifications and experience. The successful applicant will be offered permanent appointment and, subject to medical fitness, will be eligible to contribute to a generous superannuation scheme. First-class fares to Sydney for the successful appointee and his family may be paid by the Department, and in addition a reasonable settling-in allowance may be paid for a limited period. Some assistance will also be given towards the removal of personal effects.

Any further information may be obtained from Dr. T. H. Donnelly, Medical Superintendent, Repatriation General Hospital, Concord, N.S.W.

Applications in writing, including details of names, age, qualifications, experience and the names of professional referees should be forwarded to

## Repatriation Department New South Wales Specialist (Renal & Metabolic Diseases)

Applications are invited from registered medical practitioners with appropriate postgraduate qualifications and considerable postgraduate experience in Renal and Metabolic Diseases for the position of Specialist (Renal and Metabolic Diseases).

The position is located at Repatriation General Hospital, Concord which is situated nine miles from the centre of Sydney and is a teaching hospital of the University of Sydney. Average daily bed occupancy is 910.

The successful applicant will work in the Renal/Metabolic Unit at the Hospital. The Unit has a 20 bed ward, a five station centre dialysis area (currently treating 20 patients), a two patient home training area, a renal function laboratory and a research laboratory. There are out-patient and in-patient consultation clinics. The appointee will also be expected to participate in undergraduate and postgraduate teaching. The Unit's principal research is in calcium metabolism and metabolic bone disease, but this would not preclude the Specialist from developing his own research interest.

A staff of full-time and Visiting Specialists supervise care of the patients. Special Departments include an up-to-date Pathology Department with automated biochemical and haematological equipment, Radiology with coronary Angiography, Nuclear Medicine and Pulmonary Physiology Laboratory. There are Special Units for Coronary Care, Intensive Surgical and Thoracic Care and combined Neurology and Neurosurgery.

Commencing salary will be within the range \$13,581 — \$18,412 and will be determined having regard to qualifications and experience.

Subject to medical fitness, the successful applicant will be offered permanent appointment, and will be eligible to contribute to a generous superannuation scheme. First-class fares to Sydney for the appointee and his family may be paid, and in the case of a married appointee, a reasonable "settling in" allowance may be paid for a limited period. Some assistance will also be given towards the removal of personal effects.

Applications in writing, including details of name, age, qualifications, experience, publications and the names of professional referees should be forwarded to:

# MUCODYNE<sup>®</sup> IS MUCODYNAMIC

Fig. 1  
Rat exposed to SO<sub>2</sub>, showing hyperplasia of mucus-producing cells

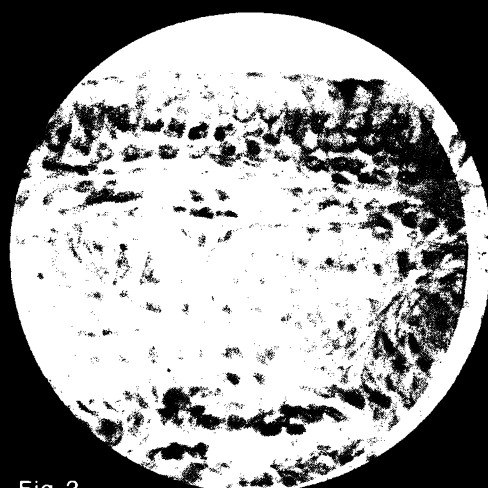

Fig. 2  
Rat exposed to SO<sub>2</sub>, but also treated with Mucodyne—the hyperplasia is greatly reduced

**reduces hyperplasia of the respiratory mucosa.**

MUCODYNE presents a completely different concept in the treatment of mucus congestion. Experimentally, it has been shown to reduce the pathological increase in mucus-producing cells. Clinically it reduces the volume of bronchial secretions and restores pathologically sticky mucus to a more normal consistency. A consistency that enables it to be removed more easily. And more quickly. Recent British evidence\* has shown that MUCODYNE shifts sticky mucus 4 days faster than bromhexine. For your next congested patient therefore this mucodynamic action of MUCODYNE will mean relief comes that 4 days earlier.

**restores a bronchial secretion the cilia can cope with.  
reverses pathological changes in mucus composition.**

## MUCODYNE

Carboxymethylcysteine.

**removes sticky mucus 4 days faster than  
comparable treatment.**

\*Current medical Research and Opinion, (1973), i, 219.  
MUCODYNE is a flavoured syrup containing 5% w/v of S-Carboxymethylcysteine.  
It is available in bottles of 200ml.

# Harmogen offers her 'the menopause' without tears

The dramatic decline in oestrogen production during the menopause has been held responsible for the many symptoms which cause a woman so much physical and mental distress—insomnia, nocturnal sweating, nervousness, headaches and ‘hot flushes’—all the symptoms that mean tears are never far away. Currently these conditions are treated independently but Harmogen is specifically formulated to re-establish oestrogen levels during the menopausal syndrome and alleviate not one but all conditions.

If declining oestrogen levels cause menopausal problems, oestrogen replacement therapy must surely be indicated.

# Stemetil

"... a tranquillizer of  
distinct value ..."<sup>1</sup>

Prompt, positive restoration of calm without drowsiness or any dulling of mental powers. For the worried patient who must continue to cope with daily routine 'Stemetil'\* brings significant benefits indeed.

As a highly efficient tranquillizer with well-known antinauseant properties too, 'Stemetil' rapidly breaks the stranglehold of anxiety, fear and tension and provides immediate control of associated physical symptoms.<sup>1,2</sup>

As an anxiolytic that calms and relaxes with no adverse effects on alertness or thinking powers,<sup>3</sup> 'Stemetil' successfully relieves an incapacitating condition without producing incapacitation of a different kind.

'Stemetil' is effective in low dosages, causes few, if any, problems of tolerance and carries no risk of habituation. It makes good economic sense too, treatment costing on average just 2p per day.

## The habitual offender. Flatulent dyspepsia.

His is a common enough case. He has been before you many times. And it's always the same old trouble. Flatulent dyspepsia. Antacids and a variety of other preparations have failed to provide the complete answer. His symptoms keep recurring.

Now, with Maxolon, you can break this unpleasant routine. Maxolon, in contrast to antacids, overcomes the motility defects which

are so often the cause of flatulent dyspepsia. So Maxolon can work where antacids would fail.

Prescribe Maxolon for your flatulent dyspepsia patients and judge the results for yourself.

## Another victim of Angina ...years before his time

The pain of angina continues long after angina has ceased to be a problem.

But, do people die from angina?

Strictly speaking no. Angina is a symptom but in most cases it is a symptom of the fatal condition ischaemic heart disease.

About 25% of angina patients are likely to have a coronary within 5 years of diagnosis and the prognosis beyond that is extremely poor.<sup>4</sup>

Pain killers alleviate the symptoms but do nothing to the underlying disease.

In three long-term studies<sup>1,2,3</sup> 'Atromid'-S (clofibrate) reduced the death-rate in angina patients

by 55%, 62% and 67% respectively as well as reducing the infarction rate by 39 and 44%<sup>1,2</sup>.

*"A good deal of attention is justifiably given to relieving symptoms and increasing exercise tolerance in angina patients.*

*However, even more important is secondary prevention aimed at reducing the high likelihood of a myocardial infarction and premature death."*<sup>4</sup>
