

# new twice daily NAPROSYN

## Powerful in arthritis

Courtesy of Westminster Hospital

**What is Naprosyn?** Naproxen – a new non-hormonal anti-inflammatory agent with analgesic properties, indicated for the treatment of rheumatoid arthritis, osteo-arthritis and ankylosing spondylitis.

**How powerful is it?** Double-blind cross-over trials have shown 500 mg Naprosyn to be significantly superior to placebo and equivalent in clinical efficacy to 4 g aspirin and 150 mg indomethacin in rheumatoid arthritis; and to 100 mg indomethacin in osteo-arthritis. Open studies have shown that Naprosyn is highly effective in ankylosing spondylitis.

**How does Naprosyn help the arthritic patient?** The long half-life of 12–15 hours means that one 250 mg Naprosyn tablet in the morning and one in the evening is sufficient in most patients to provide sustained relief throughout the day and night. Morning stiffness and painful joints are relieved, and mobility and grip strength improved.

**How is Naprosyn "kind to patients"?** It is extremely well tolerated. Side-effects are less frequent on 500 mg Naprosyn than on 4 g aspirin and 100 mg and 150 mg indomethacin. Some studies have shown that the incidence of side-effects is not significantly different to that exhibited on placebo. Gastric disturbances, in particular, are rarely seen with Naprosyn. Objective tests such as gastroscopy have shown

# kind to patients

that Naprosyn causes minimal irritation to the gastric mucosa. Not least, patients find the twice daily dosage regimen more convenient. **How safe is it?** Doses of up to 3½ times the recommended dosage of Naprosyn (500 mg) have been administered to human subjects with no adverse reactions occurring.

**Can Naprosyn be taken on an empty stomach?** Yes. In a number of clinical trials Naprosyn was given on a fasting stomach without adverse effects being reported. Furthermore, absorption is not significantly affected by the presence of food or alkali.

**At what stage should Naprosyn be used?** Since Naprosyn is at least as effective as 4 g aspirin and 150 mg indomethacin, and has a remarkably low incidence of side-effects, it may be considered either as first line treatment or as an alternative for patients with chronic disease who are developing tolerance to, or are exhibiting side-effects on, other anti-arthritis drugs.

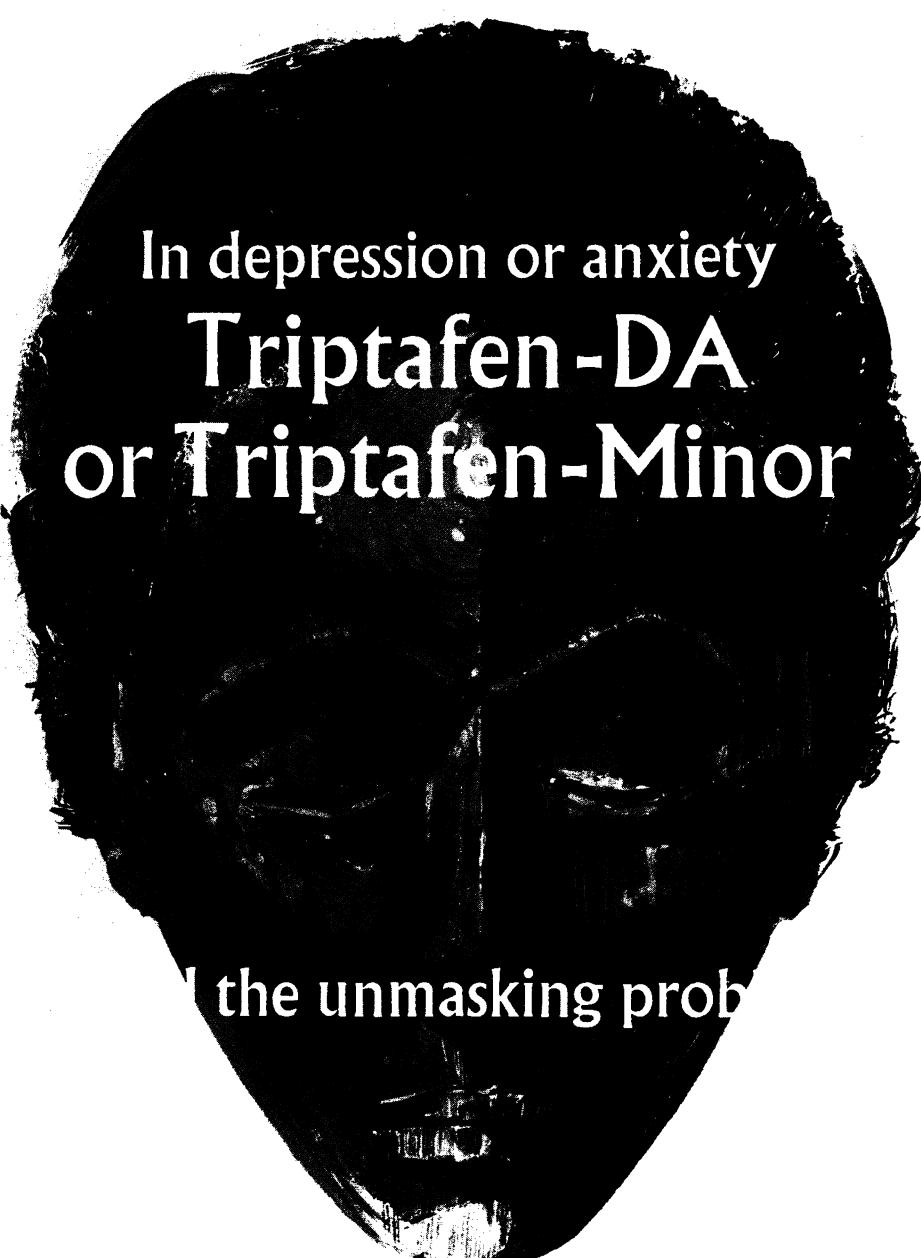

**Are there any contra-indications?** There are no known contra-indications although caution should be exercised during pregnancy.

Technical literature, symposia proceedings and full bibliography are available on request.

"Our results seem to indicate a real, if modest, gain by these elderly patients in their ability to cope with everyday life . . . In the virtual absence of side effects, this suggests that Cyclospasmol is a safe and effective therapy in cerebral arteriosclerosis."

# Bencard inject commonsense into the treatment of hay fever

New Pollinex is commonsense because it offers all the benefits of the immunological approach to the treatment of hay fever in a streamlined and simplified form.

Pollinex contains *modified* extracts of the twelve grass pollens which cause most hay fever in Britain – *modified*, by a unique process. The result is that unwanted side-effects are to a large extent eliminated, without affecting the stimulation of antibody production which protects the patient against hay fever.

The *modified* active material is adsorbed on to a natural base which is fully metabolised in the body. The result is simpler, safer, prevention of hay fever.

#### Only three injections

Only three injections are required, and pre-filled disposable syringes ensure trouble-free administration and accuracy of dosage.

#### Simplicity with safety

With simplicity goes safety.

The active material in Pollinex is released slowly but completely for maximum efficiency and minimum risk of side-effects.

#### Preventive therapy

With Pollinex the immunological approach to the treatment of hay fever becomes a really practical proposition, so many more patients experience the relief which comes from preventive therapy.

Pollinex is prescribable on form E.C.10 and is available from stock. An illustrated booklet with full information on Pollinex (regd.) is available from Bencard, Freepost, Brentford, Middlesex.

### Prescribing information

#### Indications

'Orudis' is a potent non-steroidal, anti-inflammatory analgesic agent. It is an inhibitor of prostaglandin synthesis.

'Orudis' is recommended in the management of the rheumatic diseases:

rheumatoid arthritis

osteoarthritis

ankylosing spondylitis

gout

other forms of non-infectious arthropathy

acute articular and periarticular disorders – bursitis, tendinitis, synovitis, tenosynovitis, capsulitis of the shoulder

painful musculo-skeletal conditions.

Skin rashes have been rare.

In common with other anti-inflammatory agents, 'Orudis' should be used with caution in patients with a history of peptic ulcer and in those with impaired hepatic function.

No embryopathic effects have been recorded but it is a sound medical principle to exercise caution in prescribing any medication during the first trimester of pregnancy.

#### Presentation

Capsules each containing 50 mg ketoprofen, in packs of 100 and 500. The capsules are bi-coloured (opaque green/opaque purple), each half printed ORUDIS 50 in white.

#### Administration and dosage

'Orudis' is administered orally and **should always be taken with food.**

**Dosage is usually one capsule (50 mg) three times daily. This dosage may be increased to one capsule four times daily or decreased to one capsule twice daily depending on the size and condition of the patient and on the severity of the disease.**

**Basic NHS cost (as at November 1973)**  
25 capsules of 50 mg £1.14  
(ex dispensing pack)

Further information is available on request

#### Side-effects and precautions

No serious side-effects have been reported. Symptoms of dyspepsia have occurred in a small percentage of patients and, in some such instances, a reduction of dosage has been helpful. 'Orudis' should always be prescribed "To be taken with food".

## The habitual offender. Flatulent dyspepsia.

His is a common enough case. He has been before you many times. And it's always the same old trouble. Flatulent dyspepsia. Antacids and a variety of other preparations have failed to provide the complete answer. His symptoms keep recurring.

Now, with Maxolon, you can break this unpleasant routine. Maxolon, in contrast to antacids, overcomes the motility defects which

are so often the cause of flatulent dyspepsia. So Maxolon can work where antacids would fail.

Prescribe Maxolon for your flatulent dyspepsia patients and judge the results for yourself.

# Excellent in chil

Amoxil is an excellent antibiotic for the commonly occurring bacterial infections in children. For a start, Amoxil is pleasant to take. The citrus-flavoured syrup or paediatric suspension pleases even the fussiest of patients.

Then Amoxil can get to work. Its broad spectrum of bactericidal activity and outstanding oral absorption<sup>1</sup> ensure the high serum levels necessary for a rapid response. In fact, just three daytime doses give 24 hour therapeutic effect.

# Children's infections.

It is not surprising, therefore, that Amoxil's extensive clinical trials have proved it so reliable: a recent study<sup>2</sup>, involving 150 children, demonstrated a success rate of 94%.

Add to this Amoxil's penicillin safety and low treatment cost and you really have an excellent antibiotic for children – and for grown-ups too.

Further information on Amoxil (regd) is available from Bencard, Freepost, Brentford, England.

**Prescribing information**

**Dosage:** Adults 250 mg three times a day.

Children – up to 10 years: 125 mg three times a day. In the case of severe infections the dosage should be doubled.

**Presentation:** Amoxil capsules 250 mg. Amoxil syrup 250 mg/5 ml, 100 ml bottle. Amoxil syrup 125 mg/5 ml, 100 ml bottle. Amoxil Paediatric Suspension 125 mg/1.25 ml, 20 ml bottle with pipette. Amoxil presentations contain amoxycillin as the trihydrate.

**Contra-indication:** Amoxil is a penicillin and should not be given to penicillin-hypersensitive patients.

**Side effects:** No serious side effects have been reported in extensive clinical trials. Those side effects which were encountered were mild and of a transitory nature.

## She has psoriasis

Have you ever stopped to think what it is really like to be a psoriatic? Psoriasis is more than a skin disease. It is a terrible mental affliction, particularly for young people and can literally ruin their lives. Most forms of treatment are equally depressing.

**Steroids under polythene?** True the lesions may resolve rapidly but in almost all cases the rebound factor will bring back the psoriasis even more quickly and more severely. And the patient will rebound into your surgery with a questioning look after doing unspeakable things to himself in a youth hostel – or trying to lead a normal love life in a plastic bag!

**Coal Tar?** Anointing oneself with smelly tar is even less appealing.

**Dithranol?** Certainly very effective treatment, but patients jib at the burning and particularly the staining which makes the lesions even more noticeable while under treatment.

**The Advantages of Exolan Treatment** Exolan attacks the psoriatic lesions with the striking effectiveness of dithranol but without its unpleasant side effects of burning and staining.

Exolan has been available for years as a paste and a cream – and now, in response to the suggestions of dermatologists – Exolan has been formulated as a Lotion, particularly for those patients with dry scaly lesions, lesions of the scalp, and of the flexures, where a soothing emollient effect is required.

Exolan Lotion could make your surgery a less depressing place for you and your patient.

Exolan (triacetoxyanthracene) is available as a Paste, as a Cream and as a Lotion.

## GENERAL PRACTICE TRAINING POSTS

# Vocational Training for General Practice Taunton Scheme

An exciting opportunity for far-seeing Young Doctors occurs in this scheme which has been carefully planned in every detail.

Places will become available each six months — and every doctor will gain experience in two progressive General Practices and be offered options rotating through active responsible posts in Paediatrics, Medicine, Obstetrics, Accident & Emergency, Geriatrics, Psychiatry and E.N.T. This is a three-year course, one year of which will be spent in General Practice. Half day Release Training will be given in Ophthalmology, Community Medicine, Laboratory Medicine, Chest Diseases, Family Planning and Organisation & Methods of Practice.

The starting date is February, 1974 and interviews will be held in December when posts beginning February and August, 1974 will be filled and applicants wishing to join at points on the rotation other than the beginning will be considered. It is planned that hospital houses will be available and that the practices involved will also have accommodation. The Organisation will be by the Somerset Postgraduate Centre. Applications before 4th December to the Hospital Secretary, Musgrove Park Hospital, Taunton. (Tel: 3444, Ext. 12). (58461) 22

# National Health Service Reorganisation in Wales

## Area Medical Officer

(Re-Advertisement)

Applications are invited for the post of Area Medical Officer to the CLWYD AREA HEALTH AUTHORITY from officers who are wholly or mainly employed on Health Service work in England and Wales and who are transferable to the re-organised health service under the provisions of the National Health Service Reorganisation Act 1973.

The Area Medical Officer will be an officer of the Area Health Authority and will be a member of the Area Team of Officers. He will advise the AHA both as a member of the Area Team of Officers and as the Authority's senior specialist in community medicine. As a member of the Area Team of Officers he will share responsibility for planning the use of available resources to achieve the objectives of health care. His functions will include assisting in and advising on the preparation of a research and development programme to improve the quality of planning and the establishment and maintenance of a comprehensive health information system. His main tasks in relation to the management of resources will be to maintain and evaluate the operation of all health services, including their working relationship with related services provided by central and local government and by voluntary bodies, and to promote improvements in the organisation and delivery of health services within available resources. He will be responsible for ensuring that medical advice is available to the relevant local authorities and will share responsibility in the joint planning of services with the local authority. The AMO will also have certain personnel responsibilities for consultants and senior registrars.

Applicants will be registered medical practitioners with broad experience of administrative medical work at a senior level employed in the provision of health services by local health and education authorities or in the Public Health Services of Local Authorities; or in the NHS Hospital Service.

Salary scales will be based on the published recommendations of the Review Body.

Requests for application forms and further particulars should be made in writing to the Secretary, NHS Staff Advisory Committee/Commission, Pearl Assurance House, Greyfriars Road, Cardiff CF1 3JL. Completed application forms should be returned to the Staff Advisory Committee/Commission not later than 21st December, 1973.

## SERVICES

# This is what we call practicing medicine.

A career in Naval medicine can be a rewarding experience. Opportunities to specialise abound. And perhaps above all else, there is an immense satisfaction to be gained from the wide variety of work you will be involved in.

At sea, for instance, you could be anywhere from the Mediterranean to the Pacific Ocean. Looking after the health and well being of the company of a modern warship.

And though you could spend as long as the first eighteen months of your five year Short Service Commission on board different ships, you need have no fear of losing contact with mainstream medicine. For no matter where you are, you will be kept informed of current medical opinion.

After this, the choice is yours. Post graduate medical training and a career in the clinical disciplines at one of our naval district general hospitals. Haslar or Plymouth, for instance, with their wide spectrum of clinical material drawn from naval personnel, their dependants and the local civilian population as well. There are also naval hospitals in Malta, Gibraltar and Mauritius, with opportunities for exchange appointments elsewhere.

Or you might prefer occupational medicine in our research orientated naval dockyards. Aviation medicine with its accent on rotary wing support of the Fleet. And for those with an administrative turn of mind, community medicine.

Royal Naval expertise in maritime medicine is recognised world wide and research into underwater medicine, nuclear medicine and the closed submarine environment is centred

at the Institute of Naval Medicine at Alverstoke.

Naval general practice in well staffed and equipped medical centres extend as far afield as Hong Kong and Singapore. And new training schemes are now under way in the United Kingdom.

Should you be moved or sent abroad at any time, all expenses will be paid by us. We will help you with accommodation (at very reasonable rents) and provide allowances for the education of your children, if you have a family.

If you enter the Royal Navy immediately after registration you will be given the rank of Surgeon Lieutenant and a salary of £4,099, rising to £4,249 after four years.

On the other hand, if you are older (up to the age of forty) and more experienced, we can offer you a number of opportunities in general practice and the specialities. And, depending on your post-registration experience, you could enter as a Surgeon Lieutenant Commander at a salary of £5,161, rising to £5,658.

Then, at the end of your five year Short Service Commission you could leave with a tax free gratuity of £3,000.

But if it is mutually agreeable, you could apply for a Full Career Commission or a 16 year pensionable commission. The choice is yours.

In the meantime if you would like further information, write giving details of your age and qualifications to Surgeon Commander L.C. Banks, R.N., (724BU1) Department of the Medical Director General (Naval), Empress State Building, Fulham, London SW6.

# The Future General Practitioner

## Learning and Teaching

General or family practice is a special subject. This book is written by six experienced teachers selected by the Council of the Royal College of General Practitioners. It is intended chiefly for teachers, but it will also be valuable to those who are learning and to all who are concerned about the place of family practice within a country's medical services.

A syllabus is developed in five main parts:

### Health and Diseases

### Human Development

### Human Behaviour

### Medicine and Society

### The Practice

Throughout the book the authors have tried to indicate ways in which the teacher may approach the task of passing on what he had learned by his own experience. The theme is the search for objectives which will satisfy the needs of learner and teacher. The belief is that this search will benefit the future family practitioner and through him the community of his patients.

BRITISH AIRCRAFT CORPORATION

# Physician

This appointment with Roan Consolidated Mines in Zambia is for an experienced medical practitioner with a higher qualification in medicine, ideally MRCP.

At Mufulira we provide a comprehensive medical service for our employees and their dependants, which includes approximately 55,000 local and 2500 expatriate personnel. Curative medical services are centred around two well-equipped hospitals totalling 460 beds. There are 13 medical officers including those with higher qualifications who are working predominantly in their specialised fields.

There will be a certain amount of direct in-patient and out-patient responsibility as well as consultancy involvement at both hospitals. In addition a limited amount of student nurse teaching will be undertaken in association with a registered nurse training school established in 1970. In common with the other medical specialists employed, duties will include a minimal amount of general medical work.

A competitive salary will be negotiated depending on experience and qualifications for a three-year contract.

Additional benefits include ■ furnished accommodation at low rental ■ tax free settling-in allowance ■ tax free children's education and travel allowance ■ generous leave conditions with return passages for employee and family paid every two years ■ free life assurance ■ car provided.

# Doctors in Zambia

Due to expansion there are many new 3 year contracts within the Ministry of Health. Posts in sunny Zambia are well paid and provide a challenging opportunity to widen professional experience. Furnished accommodation is available at 15% of basic salary. Fares for doctors and families plus generous baggage allowance paid both ways.

NOTE — For candidates designated as eligible for Overseas Terms and Conditions by the British Government, there are generous inducement allowances (normally tax free paid direct to U.K. bank) and additional benefits e.g. settlement grant, boarding school allowances, car loans, etc. Details of these benefits and eligibility for them, obtainable on request. The annual supplements are shown in brackets against each vacancy.

In many cases there is an additional allowance in lieu of private practice — which is not permitted — and these are for all doctors whether on Overseas Terms or Zambia Terms — they are indicated below as p.p.a.

Appointment formalities are kept to a minimum and with minimum delay. The salaries quoted are based upon today's value of the Kwacha, 63p — most posts also earn a 25% gratuity.

**Severe asthma in children  
presents particularly  
difficult problems  
to doctor, patient  
and parents.**

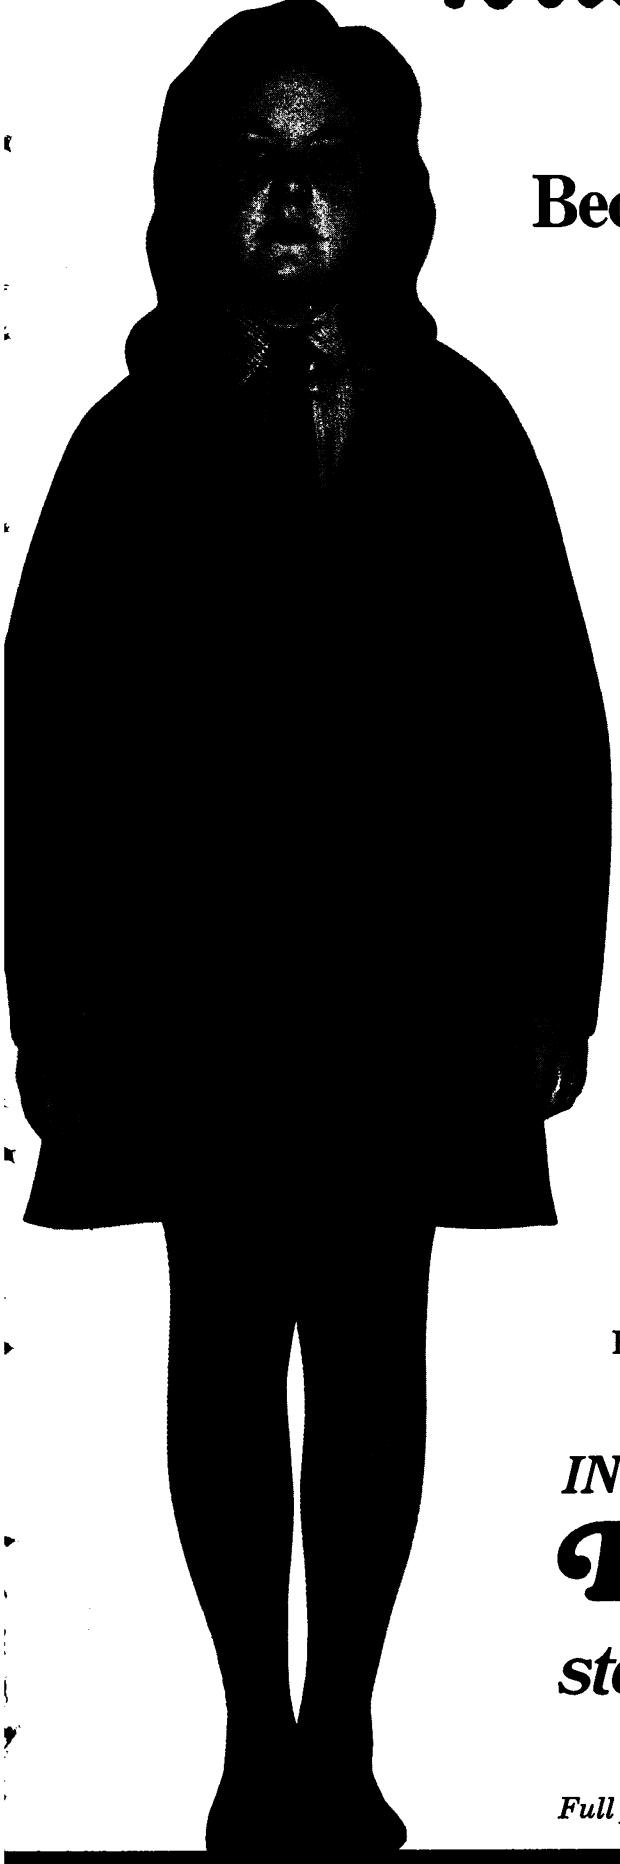

When initial treatment fails and the patient's condition continues to deteriorate, the doctor has had no choice but to give systemic steroid or ACTH therapy. Quite frequently the dosage of steroids required to control symptoms produces the classical side effects associated with this type of treatment including growth retardation, adrenal suppression, and disturbance of electrolyte balance.

**NOW THIS PROBLEM CAN BE AVOIDED**

The illustrations show a sixteen-year-old asthmatic patient as she appeared whilst receiving systemic steroid therapy and eight months after successful transference to Becotide Inhaler.

# This?

**Becotide Inhaler provides really effective therapy in asthma without the side effects of systemic steroids.**

Furthermore, patients dependent upon systemic steroids can now be safely and effectively transferred on to Becotide Inhaler. Side effects from systemic steroids are avoided and normal growth patterns are re-established<sup>1, 2, 3, 4</sup>

# When the problem is larger than reality

# Once-a-day Tranxene®

## restores reality

Tranxene\* is a new but distinctive benzodiazepine offering these major benefits to anxious patients.

### **Convenient once daily dosage**

The problems of forgotten doses are reduced with once daily Tranxene.

### **Fewer side-effect problems**

Sedation, lassitude and other side-effect problems associated with previous members of the benzodiazepine family occur significantly less frequently with Tranxene.<sup>1,2,3</sup>

### **Specific anxiolytic action**

Double-blind studies have demonstrated that the frequency and severity of anxiety symptoms are significantly reduced with once-a-day Tranxene.<sup>1</sup>

The results of these studies confirm the proven anxiolytic action of Tranxene.<sup>3,4</sup>

CHRONIC  
BRONCHITICS

# Bactrim Roche

In April 1973 an article<sup>1</sup> in *The Practitioner* showed that Bactrim Roche – already an established treatment for acute exacerbations of chronic bronchitis – superior to ampicillin,<sup>2</sup> the tetracyclines<sup>3,4</sup> and cephalexin<sup>5</sup> – can also play a valuable role in the long-term management of that condition.

# When waking hours stretch far into the night...

...The simple answer so often is '**Surmontil**'

Insomnia is a complex problem.

Partly because sleep itself is a complex process: to correct abnormalities requires special care.

And partly because sleep disorder is but a symptom: its cause must be identified and treated too.

'Surmontil' can often provide a simple answer.

First, by promoting sound, *natural* sleep.

Research has shown that many hypnotics fall short of this requirement: they do, of course, provide sleep, but only by inducing new, artificial sleep patterns. These can cause unpleasant symptoms when treatment is withdrawn and so encourage dependence. With 'Surmontil' old, physiological patterns are restored, and the patient sleeps as she used to.

Second, because 'Surmontil' also has powerful mood-elevating and tranquillizing properties it provides more than partial relief when insomnia is traced to anxiety/depression. It acts not only

on the physical symptom but also on the emotional causes, thus ensuring full recovery. No hypnotic, tranquillizer or antidepressant alone can provide this comprehensive benefit—only 'Surmontil', with all three required effects, makes a complex problem less so.

# Any similarity between Burinex and other diuretics is purely beneficial (and so are the differences.)

## Different in Chemistry

Burinex\* is a new chemical entity, being derived from metanilamide; it is quite distinct from any available diuretic. Despite careful search by such techniques as autoradiography, it has not been possible to detect any metabolite in the human.

## Different in Pharmacology

Burinex differs in pharmacological potency, with a dose about one-fortieth that of any other short-acting diuretic. After oral administration, diuresis normally begins at 30 minutes - "peaks" at 90 minutes and is largely complete within three hours.

## Beneficial in Effect

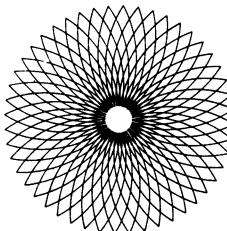

Burinex has been shown to be of value in clinical practice, not only for the seriously ill patient where a rapid diuresis is required but also for maintenance, where the predictable effect can be utilised to fit the patient's domestic circumstances and work routine. During long term treatment Burinex has proved to be very well tolerated.

## Beneficial in Price

The price of Burinex is significantly less than any comparable diuretic. The long term use of Burinex would therefore represent a considerable saving in cost.
