

When bronchitis causes concern

In acute-on-chronic bronchitis and other severe chest infections, you can be more certain of first-time success when you prescribe Magnapen.

Magnapen's greater certainty means that the patient is more likely to respond quickly, minimising the damage to lung tissue. And Magnapen can save you the time which you might otherwise have to spend on repeat visits, second consultations or night calls to patients who may fail to respond to other antibiotics.

Magnapen destroys virtually all the bacteria met in general practice. So you can rely on Magnapen even when there are no laboratory reports to guide you.

Full information on Magnapen is available on request.

Orudis

high activity
with good tolerance

Prescribing information

Indications

'Orudis' is a potent non-steroidal, anti-inflammatory analgesic agent. It is an inhibitor of prostaglandin synthesis.

'Orudis' is recommended in the management of the rheumatic diseases:

rheumatoid arthritis
osteoarthrosis
ankylosing spondylitis
gout

other forms of non-infectious arthropathy
acute articular and periarticular disorders – bursitis, tendinitis, synovitis, tenosynovitis, capsulitis of the shoulder
painful musculo-skeletal conditions.

Skin rashes have been rare.

In common with other anti-inflammatory agents, 'Orudis' should be used with caution in patients with a history of peptic ulcer and in those with impaired hepatic function.

No embryopathic effects have been recorded but it is a sound medical principle to exercise caution in prescribing any medication during the first trimester of pregnancy.

Presentation

Capsules each containing 50 mg ketoprofen, in packs of 100 and 500. The capsules are bi-coloured (opaque green/opaque purple), each half printed ORUDIS 50 in white.

Administration and dosage

'Orudis' is administered orally and *should always be taken with food.*

Dosage is usually one capsule (50 mg) three times daily. This dosage may be increased to one capsule four times daily or decreased to one capsule twice daily depending on the size and condition of the patient and on the severity of the disease.

Basic NHS cost (as at November 1973)
25 capsules of 50 mg £1.14
(ex dispensing pack)

Further information is available on request

Side-effects and precautions

No serious side-effects have been reported. Symptoms of dyspepsia have occurred in a small percentage of patients and, in some such instances, a reduction of dosage has been helpful. 'Orudis' should always be prescribed "To be taken with food".

The habitual offender. Flatulent dyspepsia.

His is a common enough case. He has been before you many times. And it's always the same old trouble. Flatulent dyspepsia. Antacids and a variety of other preparations have failed to provide the complete answer. His symptoms keep recurring.

Now, with Maxolon, you can break this unpleasant routine. Maxolon, in contrast to antacids, overcomes the motility defects which

are so often the cause of flatulent dyspepsia. So Maxolon can work where antacids would fail.

Prescribe Maxolon for your flatulent dyspepsia patients and judge the results for yourself.

Surgical hosiery provides venous support, but PAROVEN is a kind of 'physiological elastic stocking' for the capillaries.

"The most obvious effect of treatment with HR (Paroven) is the very constant relief of night cramps, with an improvement exceeding 90 per cent."

Brit J Clin Pract (1970) 23, 161

"The degree of relief in chronic aching pain in the legs was not so marked (compared with 90% improvement in night cramps and 70% improvement in heaviness of the legs), but still amounted to 54 per cent."

Brit J Clin Pract (1970) 23, 161

"Symptoms of heavy legs are improved in 70 per cent, and it was generally agreed that not only did legs feel lighter but the patients were more agile."

Brit J Clin Pract (1970) 23, 161

"The improved venous blood oxygenation and the reduced tissue oxygen extraction indicated better tissue perfusion with less blood oxygen having been taken from the increased capillary blood flow."

Brit med J (1971) 2, 138

PAROVEN[®]

Relief of symptoms in varicose disorders

Varicose veins, post-phlebitic syndrome, superficial thrombophlebitis, varicose ulcers, varicose eczema, ankle oedema, restless legs, paraesthesia, haemorrhoids.

Dosage Initial treatment: 4 capsules a day, preferably with meals. In most cases, at least four weeks treatment with PAROVEN is required before significant benefit is felt. At the point where the patient experiences benefit, the dosage may be adjusted to a maintenance level. Maintenance treatment: 1-2 capsules a day.

Side effects and Precautions In a few patients, slight gastro-intestinal disorders, flushes and headaches have been reported. These are usually overcome by taking the capsules with meals or by slight adjustment of dosage. There are no known contra-indications to PAROVEN; it is virtually non-toxic and has no teratogenic effects. In keeping with current teaching and practice its use during the first trimester should, however, be avoided.

Availability Capsules, each containing 250 mg of O-(β -hydroxyethyl)-rutosides (not less than 45% troxerutin) in bottles of 20 and 100 capsules.

RELIEVES
THE
PAIN**

Brufen has the powerful analgesic and anti-inflammatory properties needed to relieve the pain, stiffness and swelling of arthritis. There is now little doubt that Brufen is the best tolerated of the available antirheumatic drugs. Experience has shown that at least 7 out of every 10 arthritic patients on Brufen improve as judged by both subjective and objective criteria. It has been well demonstrated that patients prefer Brufen to other drugs. Given at the recommended dosage, Brufen can do much for those who suffer with arthritis.

Brufen is ibuprofen, available as tablets containing 200 mg and as a Suspension containing 100 mg in each 5 ml. Full information from  The Boots Company Ltd., Nottingham.

Auntie remembers— taking her Lucidril.

Forgetfulness presents itself in many ways in old age—for example, a patient often forgets when and how much to take of any prescribed medication.

Lucidril can help a patient's memory by an action that does not depend on improving the blood supply to the brain.

Lucidril starts the old brain working again—along different lines. Firstly, it stimulates the metabolism of

the brain, probably through different pathways. Secondly, it removes the lipofuscin pigments which are a concomitant of old age and which may impair cellular metabolism.

Lucidril thus improves mental function; as a recent clinical paper has pointed out:

"These preliminary results [with Lucidril] are encouraging, because they indicate that the intellectual impairment exhibited by such patients

may be reversible, even when the underlying causes are presumably of an organic nature, such as cerebral arteriosclerosis."

Lucidril 300 contains 300 mg. meclofenoxate hydrochloride. Product Licence Number 0098/5002. Lucidril is a trade mark.

*Copies of the paper, Age and Ageing, (1972) 1, 74, and any further information are available on request.

Chief Medical Adviser

Beecham Pharmaceuticals

The Medical Department of Beecham Pharmaceuticals is organised into four specialist product groups, each headed by a Chief Medical Adviser who reports to the Medical Director. The Chief Medical Adviser is the Company's senior medical authority on products within his speciality and he is involved in their development and marketing support from the earliest stage. In addition to these interests each group has overall responsibility for clinical trials in all the Company's therapeutic areas in a number of specified overseas territories. In some of these countries they operate directly with the medical profession whilst in others their contact is through the Medical Adviser of the local company. The man appointed will have had some years experience in the Pharmaceutical Industry and preferably be fluent in at least one other European language. Knowledge of immunology, psychiatry or endocrinology would complement the expertise of the existing Chief Medical Advisers and would be an advantage.

This is a senior appointment and an attractive starting salary (which will not be less than BMA recommended rates) will be offered together with a company car and membership of one of the best non-contributory pension and life assurance schemes available.

Please write briefly stating your qualifications and experience to: The Personnel Director, Beecham Pharmaceuticals, Beecham House, Great West Road, Brentford, Middlesex TW8 9BD.

The Future General Practitioner

Learning and Teaching

General or family practice is a special subject. This book is written by six experienced teachers selected by the Council of the Royal College of General Practitioners. It is intended chiefly for teachers, but it will also be valuable to those who are learning and to all who are concerned about the place of family practice within a country's medical services.

A syllabus is developed in five main parts:

Health and Diseases
Human Development
Human Behaviour
Medicine and Society
The Practice

Throughout the book the authors have tried to indicate ways in which the teacher may approach the task of passing on what he had learned by his own experience. The theme is the search for objectives which will satisfy the needs of learner and teacher. The belief is that this search will benefit the future family practitioner and through him the community of his patients.

BENORAL OFFERS YOU LESS THAN ANY OTHER POWERFUL ANTI-INFLAMMATORY

**less gastric irritation, fewer side-effects
and only a twice-daily dosage**

... and less trouble for your arthritic patients, too. Less trouble with swelling and pain, less discomfort at night, less early morning stiffness. Less surgery visits for them, less home calls for you ... even the list is almost end-less. Could any other anti-inflammatory offer you more - or less?
