The new generation

International symbols for the hospitals

The new system of 170 signs and symbols was developed to guide patients, staff members and visitors through hospitals in all countries. It is very easily adapted to all future requirements. Above all, however, signs and symbols of such outstanding quality also help create a friendly atmosphere in which the patient feels confident that he will get all the attention and help he needs.

MEET THE CALMURID BROTHERS

Urea is now known to possess antipruritic, keratolytic and antibacterial properties, and can produce a marked rise in the water content of treated dry skin. Until recently, the instability of urea solution prevented other than extemporaneous preparations being used. However, the Calmurid

formulation has overcome the problem. Calmurid Cream rehydrates and softens thickened and dry skin; Calmurid HC is indicated where hydrocortisone is needed additionally to deal with inflammation.

FOR DRY SKIN

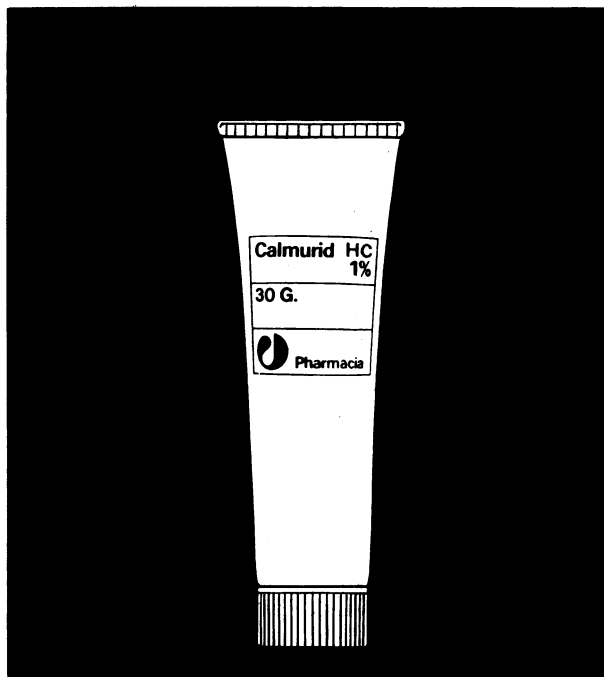

Whether the dry scaling skin in ichthyosis or the horny masses of tylosis of the hands or feet, Calmurid disperses the horny scales and raises the water content of the skin towards normal. In patients with severe ichthyosis Calmurid was the most effective of four preparations tested.¹ In other studies resistant cases showed remarkable clinical improvements in a few days² with parallel biochemical improvement³.

Calmurid was found most valuable in the treatment of hyperkeratotic feet⁴. Carbamide (urea) B.P. 1968 10% in a stabilising emulsified base; tubes of 50 and 100g.

There is a Sister Too.

Calmurid Solution (20% Urea) represents a step forward in the treatment of psoriasis of the scalp, seborrhoeic eczema and seborrhoea — no tar, no steroids. Data sheet available on request.

FOR ECZEMA

Eczema characteristically has inflammation and frequently a dry scaly covering. Calmurid HC, by its dispersive and rehydrating actions on the scale allows hydrocortisone to exert its full anti-inflammatory effect. So effective is this combination that Calmurid HC has been found to be as effective as the commonly used fluorinated steroids^{5,6} yet it achieves this without the risks of skin damage and systemic effects associated with them.

Hydrocortisone has negligible atrophic action on skin⁷. Carbamide (urea) B.P. 1968 10%, hydrocortisone 1% in a stabilising emulsified base; tubes of 30g.

Calmurid is a registered trademark.

MIGRAINE

-not
Mrs. Jackson

Mrs. Jackson's migraines, while frequent, do not follow an entirely predictable pattern. She dislikes the side-effects of ergotamine treatments: long-term prophylaxis would involve an unacceptable degree of over-medication. Is there an alternative?

2 PINK MIGRALEVE, taken at the first warning, will often completely abort impending Migraine attacks. Residual symptoms, if any occur, can be controlled with Yellow Migraleve. Like most patients, Mrs. Jackson will find such a regime preferable, because Migraleve offers:

- Less medication than with long-term prophylactic treatments
- Economic dosage, taken only as attacks occur
- Proven effectiveness in 79% of attacks¹
- Considerably less vomiting than with ergotamine¹
- Proven patient preference¹

Why forbid the patient coffee?

Thanks to H-A-G Decaffeinated Coffee even in cases of Insomnia, Palpitations, Disorders of the Heart and Circulation, Excitability, Gastritis and Peptic Ulcer, Gallstones, certain Diseases of the Liver the patient need not forego his favourite beverage.

** THE H-A-G DECAFFEINATING PROCESS.
Swelling the green beans by steam pressure enlarges the pores and exposes the maximum surface to the highly volatile caffeine solvent (not trichlorethylene) which is flushed through the beans, carrying the caffeine with it. The surplus solvent is removed by a final steam flushing. The beans are then roasted in the normal way.*

Relieve the pressure in the haemorrhoid patient

If the answer to haemorrhoids was just a matter of ointments and suppositories, patients wouldn't keep on coming back.

Certainly, they need topical treatment to relieve their symptoms. In many cases, however, an important aetiological factor is raised intra-abdominal pressure, due to straining to pass small hard stools which can result from a diet deficient in natural fibre.

In such cases, clearly, a new approach is needed—one which complements topical therapy with treatment of the underlying cause.

Fybogel

complements topical therapy in haemorrhoids

Fybogel is designed to do just this, by providing a controlled high fibre regimen.

In raising the level of natural fibre in the diet, Fybogel produces softer, well formed stools, thus reducing straining and preventing raised intra-abdominal pressures. In this way, Fybogel treats the common cause of the haemorrhoids, while your topical prescriptions relieve immediate discomfort.

Fybogel provides the necessary fibre in the form of a palatable drink—the granules disperse easily in water. Two sachets daily, taken after meals, is the dosage usually required to restore normal intra-abdominal pressure. And treat haemorrhoids.

Fybogel: single-dose sachets, containing 3.5g Isphagula Husk B.P.C.

SURGERY OF VIOLENCE

ISBN 0 7279 0004 8

Injuries caused by explosive weapons may suddenly present a doctor with urgent, unfamiliar problems in the treatment of the victims. The recent experience of surgeons and physicians at the Royal Victoria Hospital, Belfast, has been drawn upon to provide advice on some important aspects of the surgery of violence.

First published as a series of articles in the *British Medical Journal* during February and March this year, they are now collated into a book. Among the subjects the authors discuss are wounds of trunk and limbs, blast injuries of the ear, intensive care, and disaster planning. In addition the book includes a bibliography of 30 recent papers on traumatic surgery written by members of the staff of the Royal Victoria Hospital.

Q

**How much Caved-S can an
intractable duodenal
ulcer patient take?**

A

**For a full year without relapse,
12 tablets a day for up to 16 weeks***

The Practitioner

June 1973 Vol. **210** pp. 820-823

* This dosage regimen was established in a recent trial of Caved-S on patients all with intractable duodenal ulcer and a history of more than six relapses in the year prior to the trial. Of twenty patients receiving 12 Caved-S tablets a day for 16 weeks, 12 had no relapse in a full year's follow-up, and the other 8 had two or one relapse in the follow-up year. All these patients had actually been referred for surgery, but surgery was avoided in all cases. Another similar group of 20 patients received 8 Caved-S tablets a day for 8 weeks - the condition of patients selected was too serious for controls with a placebo. Of this second group 3 had no relapse, 7 up to two relapses, and 10 up to 4 relapses in a year's follow-up.

No significant side effects occurred. Only one patient discontinued treatment, and he later resumed treatment successfully.

The authors conclude:

"Caved-S . . . should be given in high dosage before surgery is attempted in patients with duodenal ulcer who fail to respond to a low dose or other treatments."

Inflation proof savings?

Guaranteeing your savings against inflation is an impossible task. However, the new Index Linked S.A.Y.E. Scheme does just that — it is backed by a Government guarantee.

Although designed to be paid by monthly instalments out of income, it is now possible to deposit a capital sum from which these monthly payments are made. The capital sum required is less than the total S.A.Y.E. payments, so that quite apart from the guaranteed basic benefits of the S.A.Y.E. Scheme, there is the further attraction of the discount on the capital.

An investment for all the family

This scheme is available to husbands, wives and children of 16 or over. The amount of your investment depends on your age of application, as follows:—

Constipation is a bind

Constipation may not be the most serious condition requiring treatment; but the distress and pain that it can lead to are often cause for concern to the patient, doctor and nurse alike.

That's why all concerned will appreciate new Laxoberal.

New Laxoberal is a liquid laxative containing just one active agent – sodium picosulphate – whose actions promote the gentle passing of a soft but formed stool, to avoid both pain and strain. While side-effects are kept to a minimum.

Moreover, new Laxoberal comes in a light, easy-flowing, pleasant-flavoured preparation that's easy to take and goes down well – with young and old alike.

That's why Laxoberal makes constipation less of a bind – for all concerned.

New! Laxoberal®
shows concern
for all concerned.

MEDICAL DIRECTOR

Occupational Health Service in the new city of **MILTON KEYNES**

We wish to appoint a youthful Medical Director who will create and run the New City's Occupational Health Service. □ The Director will be in charge of a constantly expanding service and will have the opportunity to establish himself in the occupational

health field. □ His first tasks will be to advise, plan and build up a service for a city which will grow to 250,000 people by the turn of the century. He will be in charge of an appropriately staffed and equipped service but he must be capable of initiating the scheme as well as administering it. □ The service is vital to industry and commerce in an area of rapid expansion. The Director will have a challenging and demanding post and his qualifications and experience must match the requirements. He will be of an age which will enable him to develop and execute a project which will grow in size and stature over a period of at least twenty years. □ The Director will also be required to act on a part-time basis as Advisor to the Oxford Regional Health Authority. With the right

qualifications he may also be able to undertake research and teaching in the Department of Social and Community Medicine in the University of Oxford. □ The salary will be commensurate with the relevant B.M.A. scale for Doctors within Industry. □

Applications will be treated in absolute confidence.
Closing date for applications 1st December 1975
They should be addressed to:—

The Secretary,
Milton Keynes Occupational Health Service,

OCCUPATIONAL HEALTH

MEDICAL OFFICERS

British Airways Medical Service provides a comprehensive occupational health service for the staff of British Airways, and vacancies exist for two medical officers, based at Heathrow Airport (London).

1. One post is for an Industrial Medical Officer in the Ground and Safety Services Branch. This Group is responsible for providing advice on health and safety of the ground staff of British Airways, employed in

the UK, particularly in respect of the Health and Safety at Work Act 1974. The Branch includes doctors, occupational health engineers and safety matters although the duties of this post will primarily be of a clinical nature. The candidates we are seeking will be in the 27-30 years age group with good clinical experience and intending to make a career in occupational medicine. Previous experience in this field is not essential but the possession of the D.I.H. or M.Sc. (Occupational Medicine) would be an advantage.

2. The other post is for a doctor in the Overseas Group. The duties are largely clinical in connection with expatriate staff, wives and families but a certain amount of administration is also involved. Experience or interest in tropical medicine would be an advantage.

Candidates must be fully registered in the United Kingdom. Starting salary, according to age and experience, within scale recommended by the British Medical Association. There is an excellent contributory pension scheme and facilities exist for overseas holiday air travel. Closing date 5th December, 1975.

Write quoting reference 527/BMJ/JT, giving details of age, qualifications and experience to Manager Selection Services, British Airways, P.O. Box 10, Heathrow Airport (London), Hounslow, Middlesex, TW6 2JA. (48710) 24

Senior Medical Officer

The Authority has just under 9,000 employees, the great majority in water supply or effluent treatment operations where health and hygiene are of vital importance, both for the employees themselves and the 7 million population for whom these services are provided.

One of the principal tasks of the Senior Medical Officer will be to establish and take charge of an occupational health service, both directly for employees within a convenient distance of the head office and through local doctors in other parts of the region.

The successful candidate will be expected also to contribute, with Authority Scientific staff, to the evaluation and control of health hazards, epidemiological studies, advice on public water supply standards, and general medical liaison with local authorities and area health authorities.

Relevant qualifications such as a D.P.H., D.I.H. and experience in industrial medicine will be an advantage. The appointment will be in the Directorate of Scientific Services. The Authority at present has a part-time medical consultant whose advice on the aspects other than industrial medicine will continue to be available for a limited period after this appointment is made.

Candidates from previous advertisements need not re-apply, as they will be re-considered.

Salary — about £11,500 p.a., depending on qualifications and experience.

Application forms available from:

The Chief Personnel Adviser, North West Water Authority, Dawson House, Great Sankey, Warrington WA5 3LW.

Closing Date: 28th November, 1975.

SCOTTISH HEALTH SERVICE

FELLOWSHIPS IN COMMUNITY MEDICINE

Up to six Fellowships in Community Medicine will be offered in 1976 to medically qualified candidates.

Fellowships are for three years, modified for candidates with relevant qualifications or experience. The usual pattern is one year's full-time academic study followed by an opportunity to gain practical experience in various fields of community medicine and to undertake study projects. Salary scale (senior registrar equivalent) £4,818 — £6,279. Applicants, whose clinical experience is less than might be considered desirable, would be offered a Fellowship starting on the registrar scale (£4,152 — £5,109). Approved university fees and certain travel and subsistence expenses are met.

Closing date for applications is 15th December, 1975.

FELLOWSHIP AWARDS

UNIVERSITY OF OXFORD RADCLIFFE TRAVELLING FELLOWSHIP IN MEDICAL SCIENCE

The Radcliffe Travelling Fellowship is held for two years of which the Fellow must spend at least one year abroad engaged in the study of medical science. While abroad he will be paid, for each year, £2,750, plus allowances of £750 for a wife, and £250 for each child; these payments will normally not be subject to tax. While in this country he will be entitled to the common meal at University College. Permission may be given to postpone taking up the Fellowship for a period not normally exceeding one year.

Candidates will be required to submit an essay of not more than six thousand words on some subject, chosen by themselves, connected with the science or practice of medicine, including pre-clinical subjects. With this essay they should submit a statement indicating the sort of work they would like to do during the tenure of the Fellowship. They may be orally examined.

Each intending candidate should send his name and address, qualifications, and curriculum vitae, together with the abovementioned essay and statement to the Regius Professor of Medicine, 13 Norham Gardens, Oxford, on or before 31st January, 1976. (H19051) 26

APPOINTMENTS

Applicants for medical appointments are advised to check whether the post advertised is included in the Important Notice and to scrutinize carefully the remuneration and terms of service offered. Any member who is in doubt about these terms in relation to B.M.A. agreements should consult the Secretary of the Association.

Advertisers are reminded that the Race Relations Board insists that no descriptive term implying racial, national, or ethnic characteristics may be used in any advertisement. Further, readers are advised not to apply for any appointment which discriminates between applicants on grounds of creed or unreasonably on grounds of sex.

HOSPITAL APPOINTMENTS

Applicants should state names, address, age, nationality, and qualifications, and enclose (unless otherwise specified) one copy of each of three recent testimonials, with a short statement of experience and appointments held. Applications should be sent at once if no closing date is given: Canvassing disqualifies (Statutory Instrument, 1974, No. 361).

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

Further details concerning standards of residential accommodation, telephone charges, removal allowances, study leave and other matters should be obtained from the Hospital Secretary; or by B.M.A. members from the Secretary, British Medical Association.

In particular, they will find full details of facilities provided in most hospitals in the United Kingdom in the current edition of the *Hospital Gazetteer*. If such details are not included members are advised to consult the Secretary of the B.M.A.

Applicants requiring hospital married accommodation are strongly advised to obtain, prior to interview, clarification in writing from the employing authority as to whether such accommodation will be available on appointment.

No advertisement may stipulate that a non-resident must live less than 10 miles from a hospital. Advertisements for post-registration house officers, senior house officers and registrars should state clearly whether the post is resident, i.e. compulsorily resident.

In all advertisements grade should be clearly indicated. Normally a consultant vacancy must be advertised as (a) part-time with the number of sessions clearly stated, or (b) whole-time with the option of maximum part time.

In the view of the BMA, an advertiser should not insist on possession of English higher qualifications in preference to Scottish or Irish qualifications (or vice versa).

SALARY SCALES OF HOSPITAL MEDICAL STAFF

Locum Medical Officer £922 per month

Société Minière de Tenke-Fungurume is a Company formed to develop a large new copper mine in the Republic of Zaire. Now at the beginning of the construction stage, the Company already has more than a hundred expatriate employees living at Fungurume with their wives and families, and when fully operational, will employ several hundred more, together with a large number of local employees.

The Company now has a vacancy for a Locum Medical Officer for a period of three to six months starting in early December 1975.

The successful candidate, who would be based at Fungurume, should have all round medical experience, and experience in anaesthetics and/or paediatrics and obstetrics. A working knowledge of French would be an advantage.

The salary will be at the all-inclusive rate of Z.1,106 (£922) per month. Accommodation is provided free of charge, and return passages are paid.

Fungurume, at 4,000 feet, enjoys a pleasant tropical climate, and a growing rate of facilities for sports and recreation.
