Why forbid the patient coffee?

Thanks to H-A-G Decaffeinated Coffee
even in cases of Insomnia, Palpitations,
Disorders of the Heart and Circulation,
Excitability, Gastritis and Peptic Ulcer,
Gallstones, certain Diseases of the Liver
the patient need not forego his
favourite beverage.

* **THE H-A-G DECAFFEINATING PROCESS.**
Swelling the green beans by steam pressure enlarges
the pores and exposes the maximum surface to the
highly volatile caffeine solvent (not trichlorethylene)
which is flushed through the beans, carrying the
caffeine with it. The surplus solvent is removed by a
final steam flushing. The beans are then roasted in
the normal way.

H-A-G coffee is available in
3 forms, Beans, Ground
and Instant.

Liberal samples of Ground or Instant will be
sent free and post free to any Doctors applying to:

We do
as much as
you
can afford.

The irony of being a charity is that you depend on charity to survive. Barnardo's is Britain's largest child care charity. That means our 7000 children rely on the charity of people just like you. Out of every £1 donated, at least 82p is spent entirely on helping these children.

There are all kinds of Barnardo's children. Some are handicapped, some are deprived. A few are orphaned, many simply deserted. The one thing they all have in common when they come to us is a desperate need for somebody to do something for them.

Unfortunately, we find ourselves in much the same position. Without continuous charitable acts by you, and people like you, we cannot go on feeding, clothing and educating our children. We cannot go on running Dr. Barnardo's schools, homes and Day Care centres. Or finding foster homes. Or struggling to keep families together.

We desperately need a donation from you. Even better is a Deed of Covenant because we can recover tax already paid. Or maybe you'd prefer to join a local fund raising group?

Only if you help can we go on giving hope to our children. However much, or little, you can afford, surely 7000 young lives are worth something?

We can't give unless you do.

Ostermilk Complete Formula. The bottle feed for breast-fed contentment.

Ostermilk Complete Formula has been developed by doctors and nutritionists so that the protein and mineral levels are closer to those of breast milk than traditional milks. Clinical trials have proved that in comparison with traditional milks, babies fed on Ostermilk Complete Formula are more contented, are satisfied for longer periods between feeds, suffer less from regurgitation and severe wind and are less likely to have loose stools. Also there is a considerable decrease in napkin rash.

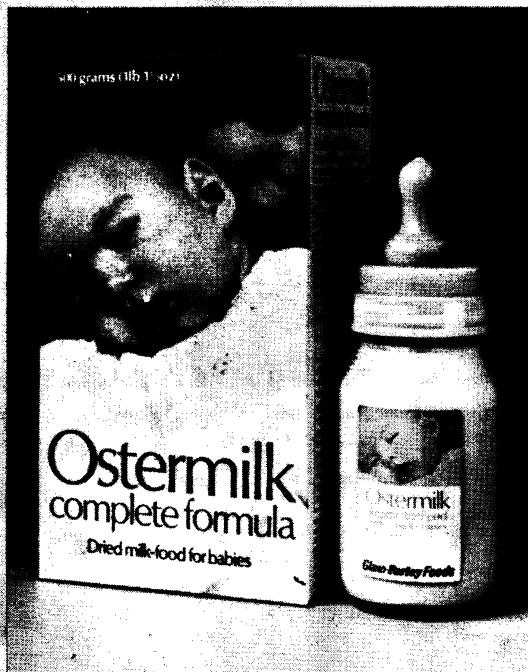

In addition, the lower phosphorus content virtually eliminates the risk of hypocalcaemia and possible neonatal tetany. The low solute content reduces the risk of hypernatraemic dehydration. And the presence of maltodextrin as the major carbohydrate helps to avoid the problems of transient, induced lactose intolerance.

For hospital use, Ostermilk Complete Formula is available as Ready-to-Feed milk-food for babies. This system provides individual sterilized feeds in disposable glass bottles. Consequently, nursing staff spend less time with preparation and are more free to care for mothers and babies.

Out of hospital, Ostermilk Complete Formula can be recommended right through until the end of weaning in a powder form which can be mixed easily and quickly in the bottle, without the need to add sugar.

Neurosurgical relief of pain: Recent developments

Robert H. Wilkins, M.D.,

TEXAS MEDICINE Volume 70, October, 1974

Department of Neurosurgery,
Scott and White Clinic, Temple, Texas 76501.

Stereotactic Rhizotomy of the Articular Nerve of Luschka.

"In 1971, Rees reported the performance of 1000 operations for the relief of back pain in which he cut the posterior ramus of a segmental nerve proximal to its entrance into the articular capsule of the intervertebral facet, repeating this procedure at several levels on each side. Shealy *et al.* subsequently developed a technique for performing such operations stereotactically, and in 1973 reported the results in 225 cases so treated at three separate medical centres. Those who fared the best were the patients with back pain due to osteoarthritis, osteoporosis, compression fractures, or intervertebral disc degeneration who had had no previous back operations. Of 81 such patients, 71 had good or excellent results. In contrast, only 21 of 61 patients with pain after lumbar fusion operations experienced the same degree of relief."

Personal View—An Anthology (1975)

Since the feature started in 1968 Personal View has been one of the most popular pages of the B.M.J. A hundred of these have now been gathered together in an anthology, to which an introduction has been written by a noted Personal View contributor, Dr Mahadeva of Ceylon, Sri Lanka. The subjects of the views contained in this anthology range from experience of practice all over the world to work as a schoolteacher, the role of music in medicine, learning to be a farmer's wife, and running a fringe event at the Edinburgh Festival.

Price £3.00 (U.S.A. \$9.00)

Surgery of Violence (1975)

Injuries caused by explosive weapons may suddenly present a doctor with urgent, unfamiliar problems in the treatment of the victims. The recent experience of surgeons and physicians at the Royal Victoria Hospital, Belfast, has been drawn upon to provide advice on some important aspects of the surgery of violence. First published as a series of articles in the *BMJ* during February and March this year, they are now collated into a book. Among the subjects the authors discuss are wounds of trunk and limbs, blast injuries of the ear, intensive care, and disaster planning. In addition the book includes a bibliography of 30 recent papers on traumatic surgery written by members of the staff of the Royal Victoria Hospital.

Price £1.00 (U.S.A. \$3.00)

Medicine in Old Age (1974)

The series of twenty two articles published in the *British Medical Journal* throughout the winter have been collected in book form as a convenient source of reference for general practitioners. The emphasis is on remedial mechanisms, and the use that can be made of psychogeriatric and social services in keeping the elderly healthy and relatively independent members of the community.

Price £2.00 (U.S.A. \$6.00)

Aspects of Sexual Medicine (1975)

TO BE PUBLISHED SHORTLY

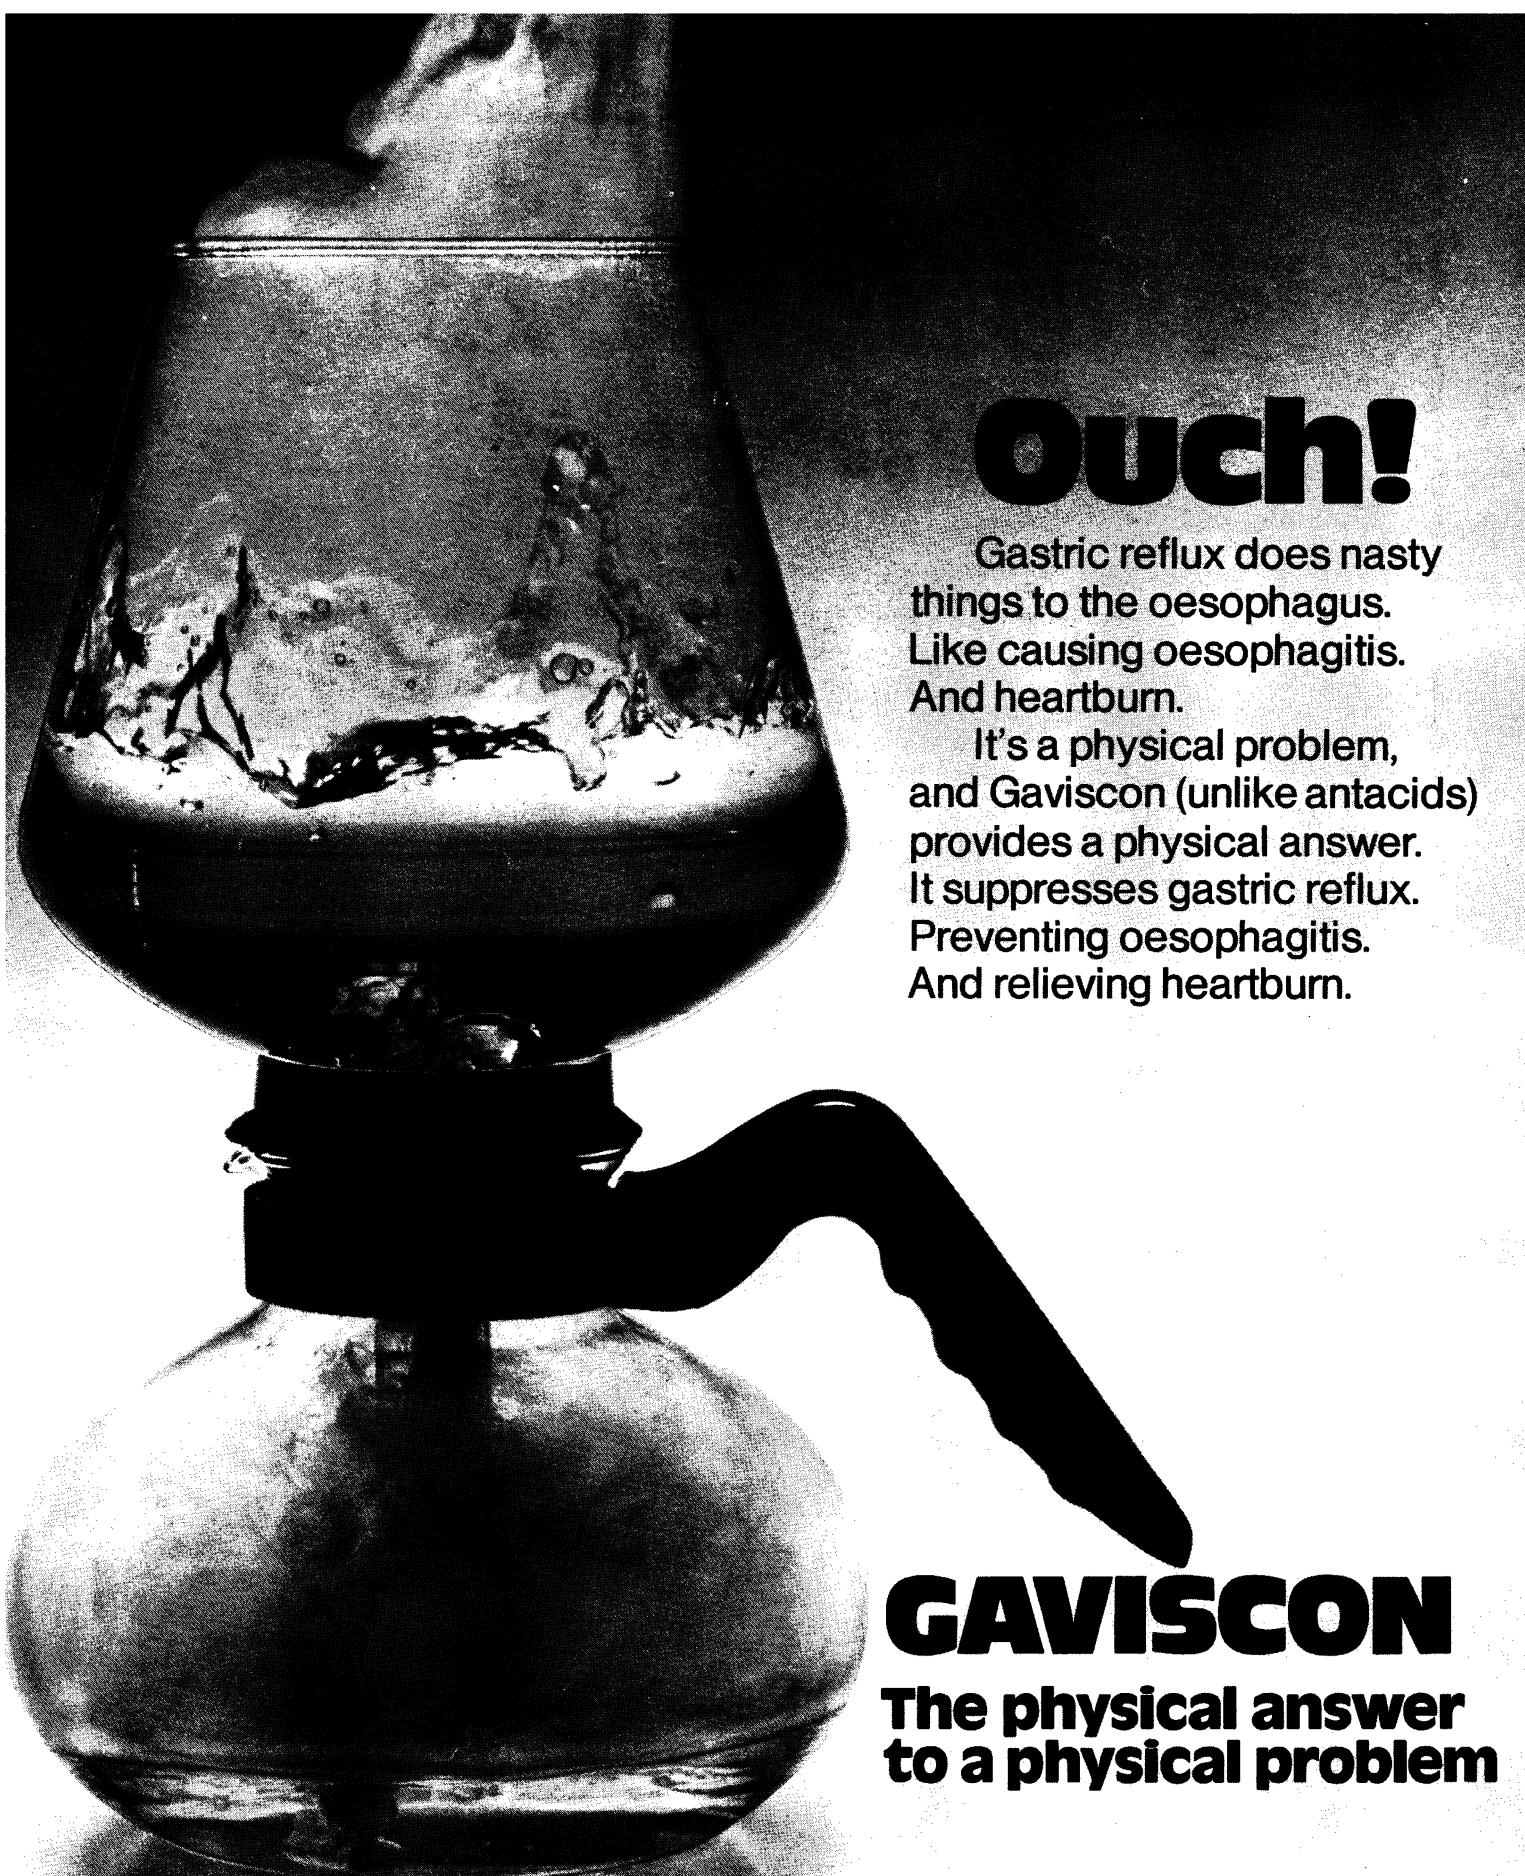

Freer discussion of sexual matters on television and in the popular press has led to many more patients approaching their doctors for advice on sexual problems. The articles collected together in this book give practical advice on common problems such as impotence and on the help and guidance that may be given to handicapped patients and others with special difficulties. Few doctors received adequate instruction on sexual medicine at their schools: *Aspects of Sexual Medicine* brings them up to date.

Inflation proof savings?

Guaranteeing your savings against inflation is an impossible task. However, the new Index Linked S.A.Y.E. Scheme does just that — it is backed by a Government guarantee.

Although designed to be paid by monthly instalments out of income, it is now possible to deposit a capital sum from which these monthly payments are made. The capital sum required is less than the total S.A.Y.E. payments, so that quite apart from the guaranteed basic benefits of the S.A.Y.E. Scheme, there is the further attraction of the discount on the capital.

An investment for all the family

This scheme is available to husbands, wives and children of 16 or over. The amount of your investment depends on your age of application, as follows:—

FIRST NATIONAL WORKSHOP FOR THE STUDY OF CORONARY CARE IN THE COMMUNITY

To be held as two parallel courses in the Postgraduate Teaching Centre,

North Tees General Hospital, Stockton-on-Tees, Cleveland
8-12 March 1976

The importance of early care after myocardial infarction is being increasingly recognised. The part to be played by general practitioners has not yet been clearly defined. This Workshop will bring together those who have made advances in community care and those who may be considering the provision of better care in their own community. A preliminary course will teach the principles of electrocardiography and there will be an exhibition of equipment suitable for use by general practitioner teams. After receiving evidence, working groups will try to establish standards of care which may be considered appropriate to different geographical areas.

PART I 8th-10th March 1976

A concentrated course in electrocardiography will aim at a degree of competence to enable general practitioners to use the electrocardiogram in their own practices.

PART II 10th-12th March 1976

Evidence will be received from doctors who have made advances in the provision of primary care after myocardial infarction. Working groups will attempt to formulate the role of the general practitioner in providing high quality primary care in different types of communities.

Principal Speakers

Dr. R. A. Acheson
Dr. D. A. Chamberlain
Dr. W. A. Colling
Dr. C. Cowley
Dr. A. W. Dellipiani
Dr. H. A. Dewar

Dr. D. Hill
Dr. B. Jones
Professor D. G. Julian
Dr. R. W. Mayes
Professor F. Pantridge
Dr. B. Sproule

The Workshop which, in the interests of more effective teaching, will be operated as two parallel courses, will also be divided into two consecutive parts. It is mainly directed towards the needs and interests of general practitioners. Places will be limited to 100 but some may be reserved for doctors working in hospitals. The Workshop has been approved under the terms and conditions of Section 63 of the Health Services and Public Health Act 1968, for general practitioners. Hospital doctors will be required to pay a fee of £25 for attendance at each part of the Course. A full programme and application form may be obtained from Dr A Colling, Regional Adviser in General Practice, Teaching Centre, North Tees General Hospital, Stockton-on-Tees, Cleveland. (21537)

APPOINTMENTS

Applicants for medical appointments are advised to check whether the post advertised is included in the Important Notice and to scrutinize carefully the remuneration and terms of service offered. Any member who is in doubt about these terms in relation to B.M.A. agreements should consult the Secretary of the Association.

Advertisers are reminded that the Race Relations Board insists that no descriptive term implying racial, national, or ethnic characteristics may be used in any advertisement. Further, readers are advised not to apply for any appointment which discriminates between applicants on grounds of creed or unreasonably on grounds of sex.

HOSPITAL APPOINTMENTS

Applicants should state names, address, age, nationality, and qualifications, and enclose (unless otherwise specified) one copy of each of three recent testimonials, with a short statement of experience and appointments held. Applications should be sent at once if no closing date is given: canvassing disqualifies (Statutory Instrument, 1974, No. 361).

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

Further details concerning standards of residential accommodation, telephone charges, removal allowances, study leave and other matters should be obtained from the Hospital Secretary; or by B.M.A. members from the Secretary, British Medical Association.

In particular, they will find full details of facilities provided in most hospitals in the United Kingdom in the current edition of the *Hospital Gazetteer*. If such details are not included members are advised to consult the Secretary of the B.M.A.

Applicants requiring hospital married accommodation are strongly advised to obtain, prior to interview, clarification in writing from the employing authority as to whether such accommodation will be available on appointment.

No advertisement may stipulate that a non-resident must live less than 10 miles from a hospital. Advertisements for post-registration house officers, senior house officers and registrars should state clearly whether the post is resident, i.e. compulsorily resident.

In all advertisements grade should be clearly indicated. Normally a consultant vacancy must be advertised as (a) part-time with the number of sessions clearly stated, or (b) whole-time with the option of maximum part-time.

In the view of the B.M.A., an advertiser should not insist on possession of English higher qualifications in preference to Scottish or Irish qualifications (or vice versa).

SALARY SCALES OF HOSPITAL MEDICAL STAFF

HOUSE OFFICER: Each post in this grade shall be tenable for six months. £2,859 per annum for the posts held during the first year; £3,075 per annum for posts held during the second year; £3,294 per annum for posts held during the third and subsequent years, subject to full registration.

BASINGSTOKE DISTRICT HOSPITAL

SENIOR HOUSE OFFICER
IN PSYCHIATRY

required 1st February, 1976. Many young doctors looking for a house job early in their careers would shy away from psychiatry, but it could be a good idea, particularly if you want to enter general practice.

Surveys of the workload in general practice have shown that up to 30% of patients consulting their practitioners have primary psychiatric problems and that in another 30% emotional difficulties are a prominent secondary factor.

So why not consider working for your D.P.M. or M.R.C. Psych. at a modern Psychiatric Hospital with a big new District General Hospital in its grounds. Besides general clinical psychiatry the hospital has a clinic of interesting special units. Alcoholics, Mother & Baby, Psychiatric Intensive Care plus a rapidly expanding Community Psychiatric Nursing Service. It shares an active Postgraduate Education Centre with the District General Hospital, runs regular weekly case conferences and grants generous study leave to doctors attending the Wessex School of Psychiatry for the courses in the D.P.M. & M.R.C. Psych. The hospital also has Category A approval from the Royal College of Psychiatrists. An active hospital social club exists and besides an excellent nine-hole golf course whilst Basingstoke itself has one of the best sports centres in the country.

The post is resident and single/married accommodation will be available.

Application forms can be obtained from Personnel Department, Aldermaston Road, Basingstoke, Hants. Tel: Basingstoke 29908. (21553) 84-8

This Christmas give a little more than handkerchiefs

Now is the season of goodwill. And a good time to start thinking about your hayfever patients. Then in the new year you can give them Pollinex -

the simplest hayfever immunisation course available. It's a nice thought.

After all, Pollinex is one Christmas gift that can last the whole year through.

Pollinex
Positive action in hayfever prevention
