## RETREAT near LEEDS, for the RECEPTION and RECOVERY of PERSONS AFFLICTED with DISORDERS of the MIND.

MR. HARE begs to announce to the Profession and the Public, that the above Establishment is under his particular superintendence, and that the most strict attention is paid to the medical, as well as moral treatment of individuals committed to his care.

The retreat is delightfully situated on rising ground, at the opening of Aire-Da-c, little more than a mile from the town of Leeds. The situation is healthy, cheerful, and also sufficiently retired; the gardens and plantations are extensive; the premises combine proper accommodation for the exercise and amusement of the patients, and the apartments are spacious, lofty, well ventilated, and fitted up in the most commodious manner.

The Establishment is to be considered more in the light of a temporary residence in the country, where the patient is placed while he undergoes such a plan of treatment as may be necessary to restore the functions of the brain, than as an asylum, in the common acceptance of the term; hence it is well suited for persons of weak mind, or who may be subject to fits of temporary insanity—for whom confinement is necessary. In recent cases a perfect and speedy recovery may generally be expected.

Applications, either personal or by letter, postage free, addressed, 25, East Parade, Leeds, will meet with immediate attention, and have the most satisfactory references, if required, to patients already discharged, or their friends; also to Physicians resident in London, Dublin, Loughborough, Leeds, Sheffield, Scarborough, Wakefield, Bradford, &c. who have had occasion to visit patients at the Retreat.

Mr. H. also receives patients under his care, attended by experienced persons, in lodgings or private houses, according to the provisions of the 2d and 3d of Will. IV. cap. 109, sec. 47.

**MEDICAL AGENCY OFFICE,**

NO. 13, JOHN STREET, ADELPHI, LONDON.

**A** Respectable PROFESSIONAL MEDIUM for transacting Medical Business, requiring a Confidential Agent, and for negotiating the transfer of Practices, &c. had long been a desideratum, when Mr. LANE, in 1828, established the above, trusting that his general knowledge of Medical Concerns, (having been Twenty Years in General Practice), aided by a determination to act only on candid statements, and honourable principles, would ensure the approbation and recommendation of those who might employ him as their Agent.

Mr. LANE takes leave to advance what he considers claims to Professional preference, viz. the long and extensive Experience he has had in Medical Agency, and that being himself a Medical Man, he must be better qualified to appreciate justly the various value of Practices, &c. also to assist by his advice Medical Applicants of every description, than an unprofessional Agent.

Physicians, Surgeons, Practitioners in general, or in any particular department of Medical or Surgical Science, desirous of purchasing or disposing of Practices or Partnerships, will have their interests and views sedulously and honourably attended to, by applying at the above Office between the hours of Twelve and Four; or addressing letters, post-paid, with full particulars, to Mr. Lane, who will attend to any other special appointment, at his Chambers, from Nine till Six, receiving two days' previous notice.

The utmost caution will be observed to prevent undue publicity: and the locality of Practices or Partnerships will not be communicated without personal knowledge, or satisfactory assurances of the respectability and the means of Applicants.

Mr. Lane's Practices for disposal are too numerous for an advertisement, but range from 100l. to 3500l.

Practitioners in the Country requiring superior Assistants, or any of inferior grade, may be gratuitously supplied, by addressing a letter, post-free, to Mr. Lane, specifying terms, and the qualifications required, to which due regard will be paid.

**PROFESSOR LIEBIG'S NEW WORK,**

This Day is Published, in One Volume, 8vo. Price 12s.

**ORGANIC CHEMISTRY, IN ITS APPLICATIONS TO AGRICULTURE AND PHYSIOLOGY.** By JUSTUS LIEBIG, M.D., PH. D., Professor of Chemistry in the University of Giessen. Edited from the Manuscript of the Author, by LYON PLAYFAIR, PH. D.

"Every thing was simply and clearly explained. . . it was the first attempt to apply the newly-created science of Organic Chemistry to Agriculture; in his opinion, from this day might be dated a new era in that art, from the principles established with such profound sagacity by Professor Liebig. He was also of opinion, that the British Association had just reason to be proud of such a work, as originating in their recommendation."—*Dr. Gregory, British Association, Glasgow.*

Printed for Taylor and Walton, Booksellers and Publishers to University College, Upper Gower Street.

### A TREATISE ON INFLAMMATION.

By JAMES MACARTNEY, M.D., F.R.S. With Two Plates, 4to. 15s.

"It is unnecessary to point out the great practical results which must flow, and have already flowed, from the correction of errors so closely bearing on the treatment of wounds and injuries."—*Dublin Journal of Medical Science*, September, 1838.

"In conclusion, we do not hesitate to pronounce the 'Treatise' of Dr. Macartney, to be the most original medical work which has appeared since the days of John Hunter."—*Lancet*, November 10th, 1838.

"Our readers must perceive that our limits do not permit us to go to the length this highly-interesting volume deserves. It is impossible to do justice to it in a brief notice. It must be read throughout to enable the practitioner to appreciate its value."—*Dublin Medical Press*, March 6th, 1839.

"In so far, therefore, as he has been instrumental in thus alleviating human suffering, he well deserves the gratitude not only of the profession, in whose science he has made an important advance, but of mankind at large."—*British and Foreign Medical Review*, April, 1839.

"In the views which he has presented on this and other subjects of which he treats, and in the practice founded upon them, he has given an important impulse to Modern Surgery, and in particular to the doctrines of Hunter, which he has followed out in a lucid and satisfactory manner."—*Edinburgh Medical and Surgical Journal*, April, 1839.

"But Dr. Macartney's reputation will secure that notice which might otherwise be denied, and command a full audience and respectful attention whenever he addresses the profession. We may be satisfied that we shall meet with ingenuity and originality; and whether we are convinced or not, we are certain of pleasure and instruction."—*Medico-Chirurgical Review*, January, 1839.

"Indeed, the great merit of this valuable Treatise is, that it is so eminently practical. It abounds in original observations of facts, and the whole subject is arranged in most lucid order, and treated in a style remarkable for simplicity and clearness."—*Retrospective Address by Dr. Menden at the meeting of the Provincial Medical and Surgical Association of England*, July 18th, 1838.
