EASE AND COMFORT FOR TENDER FEET.

**HALL and CO.**, Wellington-street, Strand, London, Sole Patentees of the PANNUS CORIUM, or LEATHER CLOTH BOOTS and SHOES for Ladies and Gentlemen. These articles have borne the test and received the approbation of all who have worn them. Such as are troubled with corns, bunions, gout, chilblains, or tenderness of feet from any other cause, will find them the softest and most comfortable ever invented; they never draw the feet or get hard, qualities which strongly recommend them to Merchants and Shippers for warm climates, where they are found easier and more durable than any other kind of shoes; they resemble the finest leather, and are cleaned with common blacking. Also, the much-improved Patent India-Rubber Goloshes are light, durable, and perfectly waterproof; they protect the feet from damp and cold.

**HALL and Co.'s Portable Waterproof Dresses** claim the attention of all who are exposed to the wet. Ladies' Cardinal Cloaks with Hoods from 18s. Gentlemen's Dresses, comprising Cape, Overalls, and Hood, 21s.; the whole can be carried with convenience in the pocket.

**N. B.**—The Shoes or Goloshes can be fitted by sending a shoe, and the Waterproof Dresses by the height of the Figure.—**BOOT and SHOE MAKERS** can be supplied with any quantity of the Pannus Corium, or Leather Cloth, from one yard and upwards.

**THE BRITISH AND FOREIGN  
MEDICAL REVIEW.**

10. Dendy on the Philosophy of Mystery.
11. Brigham's Diseases and Functions of the Brain.
12. Mackenzie on the Cure of Strabismus.
13. Bazin on the Nervous Systems of Animal and Vegetative Life.
14. Wormald and M'Whinnie's Anatomical Sketches and Diagrams.
15. Clark's New Process for Purifying Water.
16. Allnutt on Tic Douloureux.

Part Third—*Selections from the British, American, Colonial, and Foreign Journals.*

Anatomy and Physiology, 20 Articles; Pathology, Practical Medicine, and Therapeutics, 11 Articles; Surgery, 27 Articles; Midwifery, 6 Articles; Medical Jurisprudence and Toxicology, 3 Articles; Animal Chemistry, 1 Article; Statistics, 1 Article.

Part Fourth—*Medical Intelligence.*

1. New Bills of Mortality for London.
2. Royal College of Surgeons in London.
3. Metropolitan Convalescent Institution.
4. Books received for Review.

Communications, Journals, and Books for Review, to be forwarded (carriage paid) to the care of Mr. CHURCHILL, Princes-street, Soho; or direct to the Editor, 12, Old Burlington-street, London.

In one Volume, 8vo. price 12s. cloth.

**TREATISE ON PULMONARY CONSUMPTION,** comprehending an Inquiry into the Nature, Causes, Prevention, and Treatment of TUBERCULOUS and SCROFULOUS DISEASES in general. By Sir JAMES CLARK, M.D. F.R.S. Physician to the Queen.

“Dr. Clark's treatise on Consumption is the best that has yet been published in this country, or on the continent.”—*Lancet.*

“We have seldom seen a medical work more deserving of general circulation, or one that we would more zealously recommend to the younger members of the profession.”—*Medical Quarterly Review.*

In one closely printed volume, price 9s. cloth.

**DICTIONARY of TERMS used in MEDICINE and the COLLATERAL SCIENCES;** a MANUAL for the USE of STUDENTS and the SCIENTIFIC READER: containing the ETYMOLOGY and MEANING, NOMENCLATURES, CLASSIFICATION of NOSOLOGY, MATERIA MEDICA, POISONS and their ANTIODES, Analyses of MINERAL WATERS, an Account of CLIMATES, &c.; Tabular Sketches of CHEMISTRY, MEDICAL BOTANY, and ZOOLOGY. By RICHARD D. HOBLYN, A.M., late of Balliol College, Oxford.

“A work much wanted, and very ably executed.”—*London Medical Journal.*

“It must not be supposed that the volume is a mere word-book; it is, on the contrary, an extremely interesting manual, beautifully printed, containing much excellent matter in a little space, and is deserving of our strong recommendation.”—*Medical Gazette.*

“Concise and ingenious.”—*Johnson's Medico-Chir. Journal.*

“It is a very learned, pains-taking, complete, and useful work,—a Dictionary absolutely necessary in a medical library.”—*Spectator.*

A New Edition, being the Eighth, very considerably improved, and closely printed in ONE VOLUME OCTAVO, price £1 4s.; or, with the Supplement, £1 6s. 6d.

**DR. PARIS'S PHARMACOLOGY;** or, HISTORY of MEDICAL SUBSTANCES; with a view to establishing the Art of Prescribing, and of Composing Extemporaneous Formulæ, upon Fixed and Scientific Principles.

Printed for SHERWOOD, GILBERT, and PIPER, Paternoster-row, London.

This day, in 8vo., price 16s. bds.

**THE PRINCIPLES OF MIDWIFERY;** including the Diseases of Women and Children. By JOHN BURNS, M.D., Regius Professor of Surgery, Glasgow.

The emendations in this (the Ninth) edition are numerous, and the additions extend to nearly 50 pages.

London: LONGMAN, BROWN, and Co.

Now completed, Vol. I., price £2, of the

# CYCLOPÆDIA OF PRACTICAL SURGERY;

EMBRACING A COMPLETE VIEW OF

ALL THE DEPARTMENTS IN OPERATIVE MEDICINE.

EDITED BY W. B. COSTELLO, M.D.

MEMBER OF SEVERAL LEARNED SOCIETIES, ENGLISH AND FOREIGN.

*Assisted by numerous distinguished Writers in various departments of Medical and Surgical Science.*

The "Cyclopædia of Practical Surgery" has been undertaken for the purpose of collecting into one copious and comprehensive digest the Doctrines of Surgery, and the valuable Views of Practice, which either rest on individual experience, or are inculcated in too isolated a manner for the general benefit. In order to stamp upon this important undertaking—hitherto a desideratum in Medical Literature—that character of authority to which it aspires, care has been taken, in the distribution of the various subjects, to confide the execution of them to persons of acknowledged ability and experience in the several departments; and thus the most distinguished writers in Great Britain and the Continent of Europe have been associated for the production of a work which, when complete, may fairly claim to be considered the most valuable publication of its kind extant in any language.

The Cyclopædia of Surgery is issued in Parts, at 5s. each, and printed in double columns, with a new type, cast expressly for the purpose, on superfine paper of the largest royal 8vo. size. The articles are illustrated with Wood-cuts and other Engravings, wherever they may be required.

"It must suffice, in our space, to mention the general plan on which the articles are prepared. First, the exact meaning or value of each term under which the subjects are displayed, is defined, according either to its general acceptation, or the writer's notion of its purport. Then, general observations on the subject to be treated are made. Next, its subdivisions are discussed, its progress as a branch of science is historically traced, and the reader is then, in the body of the article, instructed by argument, exposition, and references, in the characters, the pathology, the consequences, and the treatment, or such other points as belong to the topic under explanation. The differences of opinion entertained upon the facts amongst men of authority are stated and weighed with such judgment and absence of prejudice as the writers can command—a better plan to adopt in works of instruction, than making those interminable citations, which might more appropriately be termed *contradictions*. For the emergencies of practice generally demand that the routine should be at once dictated, and not left, like evils, to a choice.

"The Cyclopædia of Surgery embraces, of course, in its plan, Obstetric Surgery, and description of operations, instruments, a copious bibliography, and a dictionary of terms, constituting a very satisfactory addendum to the essays. In this lesser department of the lexicon, the definitions are given with clearness and acumen, restricting to their proper use, or bringing back to their original meaning, many terms which had become vague or inapt, from rarity, misuse, or neglect. Engravings and woodcuts are freely employed to illustrate the text, and especially to adorn the subjects of Amputation, Aneurism, Bandage, Cancer, Cataract, Club-foot, and Cornea."

"Dr. Costello (editor of the Cyclopædia of Practical Surgery) early evinced his competency to supervise this branch of literature, by an article in his work, which required considerable ability in the selection and arrangement of its materials, and bears a high character among the essays with which it is associated. The names of his coadjutors need not be repeated here, as they have already obtained in advertisements ample notoriety; but we may specially observe, that in this Cyclopædia are to be found, for the first time, the writings, in *English*, of Dieffenbach and Velpeau. \* \* \* Upon the whole, the articles are distinguished by clearness and simplicity of arrangement and style, and fairly perfect the subjects which it was the task of the writers to discuss. To students, as well as to active practitioners, the work promises to become a first-rate text-book, levelling a host of obstructions to a clear view of surgery, which a dozen or so years since perplexed their attempts to inspect the ground."—*Lancet*, Aug. 28, 1841.

"The work itself has not disappointed the expectations of the profession. It is not made up of a series of dissertations, with here and there one by an able hand, shedding its brilliancy and light over a dull blank of monotonous mediocrity—an oasis in the waste. There is, uniformity, a substance, a power and tone throughout, creditable not alone to the individual writers, but to the time and country in which we live. The Cyclopædia of Practical Surgery may not only challenge, but will advantageously sustain comparison with any other similar work of other countries; and if we infer the extent and superiority of the education of the surgeons of this country as a body, from the high character of the work before us, considering it as a book of reference prepared for them expressly, we cannot but rejoice at the changes that have been brought about within the last quarter of a century. \* \* \* The Cyclopædia of Practical Surgery, conducted to its conclusion in the spirit and style of the present volume, cannot fail of the object which it seems to aim at above all others, and which is, to form a work of reference, in which the present state of surgery shall be fully and clearly expounded."—*Med. Chir. Rev.* July, 1841.

The whole work will be completed in 21 Parts.

Part X. is Just Published.

London : SHERWOOD, GILBERT, and PIPER, 23, Paternoster Row.

## REFORM YOUR TAILOR'S BILLS!!!

GENTLEMEN'S	
Superfine Dress Coat	£2 7 6

(THE OLD SUITS TO BE RETURNED.)

**COUNTRY GENTLEMEN** preferring their Clothes Fashionably made at a FIRST-RATE LONDON HOUSE, are respectfully informed, that by a post-paid Application, they will receive a Prospectus explanatory of the System of business, Directions for Measurement, and a Statement of Prices. Or if Three or Four Gentlemen unite, one of the Travellers will be despatched immediately to wait on them.

**DOUDNEY & SON, 49, Lombard Street.—Established 1784.**

### LIFE ASSURANCE.—TO THE FACULTY.

**THE LONDON, EDINBURGH, AND DUBLIN LIFE ASSURANCE COMPANY** having obtained much valuable assistance from Medical Gentlemen, not only by their reports upon cases submitted to them, but by their recommending persons in health to procure Life Policies as the only *certain* method of making provision for their families, beg to state that Proposites, forms of proposal for Assurance, and all other information may be had, free of expense, by application to the Managing Director.

It is an invariable rule of this Company to remunerate Medical Gentlemen by the usual *Honorarium*, whether the proposal be accepted or rejected; and in cases where proposals for Assurance are forwarded direct to the Company by the Medical Adviser, an Agency fee is added, corresponding to the amount of the sum assured.

### DIRECTORS.

K. Kingsford, Esq., Savage Gardens, <i>Chairman.</i>	Vice-Admiral Honyman, Victoria-square.
B. Ifill, Esq., Welbeck-street, <i>Deputy Chairman.</i>	James Hartley, Esq., Mecklenburgh-square.

James Bidden, Esq., Spread Eagle-court.	J. M. Rosseter, Esq., Kennington-terrace.
Captain Brandreth, Scots Fusilier Guards.	

*Medical Adviser*—MARSHALL HALL, M.D., F.R.S. L. & E.

*Managing Director*—ALEX. ROBERTSON, Esq., 3, Charlotte-row, Mansion House, London.

TO MEDICAL STUDENTS.

**D R. ARTHUR MITCHELL,** Lecturer on Botany and Natural History in the Richmond Hospital School of Medicine and Surgery, will, in future, meet his Classes (for the convenience of Students) at the Medical Literary Institution of Messrs. FANNIN and Co., Grafton-street, where—or at his Residence, 30, Harcourt-street—Students can apply for information relative to his Lectures.

A report having got into circulation, that Dr. M. had gone to live in Peter-street, he begs to contradict it.

Dr. M. begs Students will observe, his Christian name is ARTHUR, his Residence, 33, Harcourt-street, and his Class Rooms are at Messrs. FANNIN and Co.'s, 41, Grafton-street—entrance by the Shop—and that he has no connexion with any person of the same name in this city.

N.B. The Doctor has been engaged, as a private Teacher, for thirteen years; and Students are prepared by him for the following examinations, viz.—

M. B. Trinity College, Dublin, or University of London, (for which examinations there are separate Classes,) Apothecaries' Halls, Dublin and London—and for the Pharmacy examination, Royal College of Surgeons, Ireland.

*Dublin, Sept. 1841.*

**MATERIA MEDICA, &c.—DR. BARNES** will commence his Winter Course of Lectures on the MATERIA MEDICA, PHARMACY, and THERAPEUTICS, including Daily Private Tuition (not Grinding), both Oral and Written, to prepare gentlemen for the University, the Hall, and other Examinations, on Monday, October 4, 1841, at Three o'clock P.M., and to be continued Daily, at his Residence, 32, Tavistock-place, Tavistock-square, where Prospectuses may be had.

These Lectures are recognised by the College, Hall, &c.

**THEATRE of ANATOMY and MEDICINE,** Webb Street, Maze Pond, Borough.

The WINTER SESSION will COMMENCE on FRIDAY, October 1, 1841.

Perpetual Fee to all the Lectures, qualifying for every Medical Board of Examination, £40.

**PHYSIOLOGY and STRUCTURAL ANATOMY—**Mr. Grainger, and Mr. W. V. Pettigrew.

**DESCRIPTIVE and PRACTICAL ANATOMY—**Mr. E. Barron, and Mr. Evan B. Jones.

**SURGERY—**Mr. Pilcher.

**MEDICINE—**Dr. J. R. Bennett.

**CHEMISTRY—**Mr. H. H. Lewis, M.A.

**MATERIA MEDICA—**Dr. Wilks.

**MIDWIFERY—**Dr. J. Reid and Dr. Andrews.

**BOTANY—**Mr. D. Cooper.

**MEDICAL JURISPRUDENCE—**Dr. T. Williams.

**NATURAL and EXPERIMENTAL PHILOSOPHY—**Mr. Lewis.

**OPERATIVE SURGERY—**Mr. Pilcher and Mr. Barron.

For prospectuses and particulars apply at the Theatre, and to the Lecturers.

**CHARING CROSS HOSPITAL MEDICAL COLLEGE, LONDON.**

WINTER SESSION, 1841.—October 1st to end of April.

INTRODUCTORY ADDRESS (1st October), Mr. Hancock. Hours.

CHEMISTRY—Mr. Fownes (alternate days) . . . . . 9 to 10

MATERIA MEDICA—Dr. Steggall, do. 9—10

DESCRIPTIVE and SURGICAL ANATOMY—Mr. Hird . . . . . 10—11

DEMONSTRATIONS, &c.—Mr. Hird and Mr. E. Canton. . . . .

HOSPITAL PRACTICE\* . . . . . 12—2

MIDWIFERY, &c.—Dr. Chowne . . . . . 2—3

ANATOMY and PHYSIOLOGY—T. W. Jones, F.R.S. . . . . 3—4

MEDICINE—Dr. Shearman and Dr. J. R. Bennett . . . . . 4—5

SURGERY—Mr. Hancock . . . . . 5—6

PATHOLOGICAL ANATOMY—Mr. Hancock . . . . .

NATURAL PHILOSOPHY—H. Watts, B.A. Open to non-medical Persons . . . . . 8—9

SUMMER SESSION, 1842.—May 1st to end of July.

BOTANY—Dr. Willshire . . . . . 9—10

MIDWIFERY, &c.—Dr. Chowne . . . . . 2—3

MED. JURISPRUDENCE—Dr. Chowne and Dr. Bennett . . . . . 3—4

General Fee for all the Lectures required by the College of Surgeons and Society of Apothecaries, Forty Guineas.

\* Physicians.

Dr. Shearman—Dr. Golding—Dr. Chowne.

Surgeons.

Mr. Hancock—Mr. Avery.

Medical Practice.

Six Months, 10l. 10s. Full Period, 15l. 15s.

Surgical Practice.

Six Months, 10l. 10s. Full Period, 15l. 15s.

Full Period, to both Medical and Surgical Practice,

Twenty-five Guineas.

Clinical Lectures by the Physicians and Surgeons.

Certificates of attendance at this Hospital and College qualify for Examination on the respective Subjects, at the University of London, Royal College of Surgeons, and Society of Apothecaries.

JOHN ROBERTSON, Hon. Sec.

**MATERIA MEDICA, PHARMACY, and THERAPEUTICS.**—Dr. WILKS will commence a COURSE of LECTURES, at the Hunterian School of Medicine, 20, Charlotte-street, Bloomsbury, on Saturday, October 2nd, at Ten A.M., and at the Theatre of Anatomy and Medicine, Webb-street, Maze-pond, Borough, at Four P.M. Plan of the Course:—Part I. General Therapeutics. Part II. Mineral Materia Medica. Part III. Vegetable and Animal Materia Medica. These Lectures will be illustrated by Pharmaceutical Experiments, Coloured Plates and Diagrams, and by a very complete Collection of all the Officinal Drugs. Fee—Course, Six Months, £3 3s.; Perpetual, £4 4s.

Tickets and Syllabuses to be had of Dr. Wilks, 19, Hart-street, Bloomsbury; or at either of the above Schools.

## PROVINCIAL MEDICAL AND SURGICAL JOURNAL.

**H**UNTERIAN SCHOOL OF MEDICINE, (late NORTH LONDON,) 20, Charlotte Street, Bloomsbury.

### WINTER SESSION, 1841-2.

The Medical Classes will open on October 1, 1841:—

Anatomy and Physiology—Dr. Valentine Flood.

Practical and Surgical Anatomy—Mr. E. J. Chance and Mr. P. Bennett Lucas.

Principles and Practice of Medicine—Dr. R. Boyd and Dr. Klein Grant.

Materia Medica and Pharmacy—Dr. G. A. F. Wilks.

Chemistry—Dr. Venables.

Midwifery and Diseases of Women and Children—Dr. Heming, at his class-room in the immediate vicinity of the school.

Diseases of Children—Dr. Hennis Green.

Principles and Practice of Surgery—Mr. P. Bennett Lucas.

### SUMMER SESSION.

Botany—Dr. Wilkes.

Medical Jurisprudence—Dr. Venables.

Practical Chemistry—Dr. Venables.

The Certificates from this School are recognised by the London University, the Royal College of Surgeons, the Worshipful Company of Apothecaries, and the Army, Navy, and East India Medical Boards.

Perpetual Fee to all the Lectures required by the above Institution, £35.

### DR. COLLIER'S NEW EDITION OF THE LONDON PHARMACOPEIA.

**T**HE PHARMACOPEIA of the ROYAL COLLEGE of PHYSICIANS of LONDON (English Edition); with Notes and Criticisms. Upwards of 500 New Formulae have been added, together with all the Chemical Decompositions, a Digest of Pharmaceutical Chemistry, and Practical Remarks suited to the Laboratory, Dispensary, and Bedside. By G. F. COLLIER, M.D., &c. &c.

"It has been stated in THE LANCET, that many persons in the drug-trade are realising fortunes by having availed themselves of the original hints and formulæ contained in the above work."

Also, in royal 12mo. price 9s. each Text,

THE LAST EDITION of DR. COLLIER'S CELSUS, LATIN and ENGLISH; containing the entire work.

\*\* Dr. Collier's Prepared Colloquies, for public examinations, are to be procured only at his own Residence, 32, Spring-gardens, where he is always accessible to his old Pupils, or to their introductions, (to afford the best advice in all matters relating to the education of the Physician and General Practitioner,) and to Chemists on pharmaceutical inquiries, as usual.

LONGMAN and Co.; SIMPKIN and Co.

N.B.—Dr. C. will accommodate one House Pupil on liberal terms, who will be provided, on finishing his education, with a lucrative appointment.

**C**HLARLOTTE-STREET SCHOOL of MEDICINE, No. 15, Charlotte-street, Bloomsbury.

LECTURES will commence on Monday, October 4th:—

Anatomy, Physiology, Demonstrations, and Dissections, daily; by Mr. DERMOTT.

Theory and Practice of Medicine; Dr. ARNOLD. Midwifery and Diseases of Women and Children; Dr. T. S. HARRISON.

Materia Medica; Mr. W. R. BAXTER.

Chemistry; Mr. J. SCOFFERN.

Theory and Practice of Surgery; Mr. DERMOTT.

Botany; Dr. BROWN.

Medical Jurisprudence; Mr. SCOFFERN.

For all the Lectures required by the Royal College of Surgeons, Apothecaries' Hall, Army and Navy Medical Boards, &c. &c., Thirty Guineas.

Mr. Dermott's Private Catechetical Instruction, with the aid of recent Dissections, continued as usual throughout the Year. Terms, Five Guineas, for an indefinite time, till qualified for passing the College. Pupils, whilst receiving the above Private Instruction, are allowed to attend Mr. D.'s Public Lectures, as well as the Demonstrations and Dissections, and may receive Certificates accordingly, without extra Fee.

Mr. Dermott and Mr. Scoffern, in conjunction, prepare Gentlemen for passing their Examinations at the London University.

House Pupils received by Mr. D., who have extra Private Instruction and the privilege of unlimited Dissection.

For further particulars, apply to Mr. Dermott, 15, Charlotte-street, Bloomsbury; or to Dr. Harrison, 14, Gower-street, Bedford-square.

**M**ARQUIS OF ANGLESEY'S IMPROVED ARTIFICIAL LEG, Manufactured only by WILLIAM GRAY, Artificial Leg and Arm Maker, and

### ANATOMICAL MACHINIST,

10, Charles-street, Grosvenor-square. Of whom may be had, the most Modern and Approved Instruments for the Correction of Weakness or Deformity of the Human Frame; including Trusses, Crutches, Inclined Planes, and Hand Swings, for Curved Spine; Elastic Lacing Stockings and Knee-caps, Bandages, Belts, and Braces, of every description.

Directions for measuring, &c., will be forwarded to persons directing as above (if by letter); or Mr. GRAY can be consulted any day, Sunday excepted, between 11 and 4 o'clock.

### DEGREE OF M. D.

**G**ENTLEMEN seeking the Degree of M. D. from the Scottish or Continental Universities, or the License of the Royal College of Physicians, London, may receive assistance which will materially facilitate their views, and render any absence from practice unnecessary, except for the required examinations.

Apply to M. D., 14, Euston Place, Euston Square.

## PROVINCIAL MEDICAL AND SURGICAL ADVERTISER.

**DR. VALENTINE FLOOD'S SURGICAL ANATOMY** of the ARTERIES may be had, either with the Physiology, price 7s., or without it, for the use of Students, price 3s. 6d.

HIGHLEY, Fleet Street; SHERWOOD and Co. Paternoster Row.

"The high character of the author as an anatomist ought, we feel, to be no slight guarantee as to the correctness of the descriptive portion of the work before us, but on looking over the pages he has now offered to us, we know not which to commend more—the correctness of the descriptions laid down, or the very great industry displayed by our author in collecting those facts that are truly useful."—*Dub. Med. Press.* No. 35.

"We could readily multiply quotations from Dr. Flood's treatise in support of the opinion which we have delivered on its merits, but this were a superfluous task. We feel confident that it will obtain the full share of patronage which it merits."—*Lancet*, Sept. 28, 1839.

"Every page of this work is pregnant with information."—*Medical Miscellany*, Sept. 28, 1839.

"The present work, although consisting of but one volume, and that not a very thick one, is characterised by being more comprehensive in its reach than any of its predecessors on the same subject. \* \* \* \* \* \* \* \* \* The more momentous operations on these vessels (the arteries) are illustrated by a selection of the most remarkable cases; the opinions of able operators have been carefully consulted and judiciously commented on. The production is altogether very creditable to its author."—*British and Foreign Med. Review*, Oct. 1839.

The Folio Plates of Hernia, (coloured,) with Letter Press Descriptions, by the same author, may be had of SHERWOOD and Co., as above.

N.B. Dr. Flood prepares Students for the Royal College of Surgeons, at his residence, 27, Margaret-street, Cavendish-square, and has a vacancy for a House Pupil. Dr. Flood's Lectures at the Hunterian School of Medicine commence on Monday, the 4th of October, 1841, at Three o'clock P.M.

### NEW WORK ON THE ARTERIES.

Just published,

**THE ANATOMY and OPERATIVE SURGERY** of the ARTERIES, in Lithographic Drawings, the size of and drawn from Nature, with Practical Commentaries. By RICHARD QUAIN, Professor of Anatomy in University College, and Surgeon to University College Hospital.

Parts I. to VII., forming Volume I. (if the Work be bound in two volumes) may now be had, in cloth, with the Plates folded into half their full size, price 5s. 5s.

Parts I. to IX., each containing Five Plates and Letter-press, are published, price 12s. each Part.

The work will be comprised in about Fourteen Monthly Parts, Imperial folio, and an octavo volume of Letter-press.

"This work of Mr. Quain's is by far the most valuable contribution to the science of medicine that has been presented to the profession for some years."—*Lancet*.

Printed for TAYLOR and WALTON, 28, Upper Gower-street.

### SERIES OF TEXT BOOKS.

**ELLIS'S DEMONSTRATIONS OF ANATOMY**, Crown 8vo. 12s.

QUAIN'S ANATOMY. Fourth Edition, 140 Wood-cuts, and 4 Plates, 8vo. 1l. 2s.

MULLER'S PHYSIOLOGY. By Dr. BAILY. 2 vols. 8vo. Vol. I. 1l.

Vol. II. will be published in October.

TURNER'S CHEMISTRY. Seventh Edition. By Professors LIEBIG and GREGORY. 8vo. 1l. 5s.

\* \* \* A Second Supplement, completing the Work, is expected very shortly.

DAVIS'S OBSTETRIC MEDICINE. Second Edition, 8vo. with Wood-cuts, 1l. 1s.

LINDLEY'S ELEMENTS of BOTANY. 8vo. with Wood-cuts, 10s. 6d.

MORTON on the PERINEUM. Royal 8vo. 4 Plates, 3 Wood-cuts, 7s. 6d. coloured; 6s. plain.

MORTON on the GROIN. 8 Plates, 11 Wood-cuts; 13s. coloured; 9s. plain.

MORTON on HERNIAE and the TESTIS. 5 Plates, 11 Wood-cuts, 12s. coloured; 9s. plain.

Printed for TAYLOR and WALTON, Booksellers and Publishers to University College, Upper Gower-street.

**PHARMACEUTICAL TRANSACTIONS.** No. IV. October 1, containing the following subjects:—

Pharmacy in France.

Vesicating Applications—Mr. Redwood.

Experiments on Diabetic Urine—Mr. Smith.

Mr. Liston's Isinglass Plaster—Mr. Bell.

The Purification of Water.

Review of Dr. Liebig's Organic Chemistry, continued.

Solutions of Morphia.

Apothecaries' Company v. Greenough.

Dr. Marshall Hall on Medical Reform.

Extracts from Foreign Journals, &c. &c.

London: Published by JOHN CHURCHILL, Prince's-street, Leicester-square; SHERWOOD and Co., Paternoster-row; and S. HIGHLEY, Fleet-street.

Now ready, price 2s. 6d.; per Post, 3s. 6d.

**A TREATISE on the MEDICINAL LEECH**; with Practical Observations on the Natural History, Management, and Diseases of Leeches; with copious Remarks, for the information of Venders and such as use them. Illustrated with Engravings. By JOHN HUDSON and SON, Importers of Leeches, Hull, and Falcon-square, London; who take this opportunity to inform the Trade in general, that they continue to vend the true Speckled and Green Leeches, as received from their Reservoirs daily, at the Wholesale Prices.

Parcels of 300 and under will be forwarded per Post, on receipt of a Post-office Order for the Amount, or a reference.

TO PROFESSIONAL GENTLEMEN, INVALIDS, AND OTHERS.

**THE RESPIRATOR ; OR, SAFEGUARD FOR THE LUNGS. JOHN**

**TALBOT TYLER** having undertaken the entire management of the sale of the **RESPIRATOR**, in the United Kingdom, the Continent, and America, respectfully requests the attention of professional gentlemen, and others, to the following observations in connexion with that important instrument.

In the first place, he is desirous to state that the transfer of the commercial business entirely to himself, has arisen solely from the profession and habits of the inventor indisposing him for vending occupations.

J. T. TYLER desires next to inform the profession, that the power of all three grades of the **RESPIRATOR** has been reduced ; experience, which alone could be the guide, having established the fact, that each grade, of high, medium, and low power, was more warming than its purposes required. For the word "power" that of "temperature" has been substituted. The **RESPIRATORS** of high, medium, and low temperature, are calculated to correspond respectively with the climates of the south of France, Madeira, and the West Indies ; that is, they will be found to raise the average winter air of England to the average winter air of those climates.

He begs next particularly to request attention to the proper adaptation of the instrument to the mouth. It is so designed in its construction that the lips shall not touch the metal work. The breath has then room to spread itself, and command the whole area of the instrument for its free egress and entrance : whereas many patients, by allowing the restraining tucks to be loose, apply the lips to the metal itself ; thus they respire through a surface equal only to the area of the mouth half open, or not one-sixth of the whole. Some persons commit an absurd mistake, while wearing the **ORAL RESPIRATOR**, that of continuing to breathe through the nostrils, and not through the mouth ; which must of course defeat its action. As the mouth does not dry with the **RESPIRATOR** on, and as it becomes the channel of comfort, the habit of respiring through it entirely is easily acquired by a little practice ; while the **orinasal RESPIRATOR** is an efficient resource for those who desire to respire through both channels. It is particularly adapted for use in bed, and it must be considered a far preferable means of allaying night-cough, than the common habit of taking into the stomach deleterious compounds prepared by unauthorized empirics.

As a commercial man, he can assure the profession of the indispensable necessity, in the case of an article entirely novel, of repeatedly directing the attention of the public to all particulars regarding it. The announcement of it has been far too limited hitherto, arising from the feelings and retired habits of the inventor. A business so little set forward commercially, could only have grown to its present magnitude through the merits of the article itself.

Though, as a matter of business only, it might not be of importance what justifiable means were employed, J. T. TYLER is very desirous of falling in with Mr. Jeffrey's wish, that the progressive use of the **RESPIRATOR** should, as far as possible, take place through the profession. He is, therefore, anxious, by removing all ground of prejudice, to prevent a not unfrequent occurrence, that of patients being for a time dissuaded, through some apprehension on the part of their medical advisers, from using the **RESPIRATOR** ; which they have taken to at length, upon their own judgment, with the greatest possible benefit. He would earnestly recommend such members of the profession to view the **RESPIRATOR** in the threefold aspect of its connexion with Physics, Mechanics, and Therapeutics. With respect to the first, it has been pronounced by men of great ability in science a singularly choice application of a physical principle, while it is the invention of a mind long devoted to the cultivation of science. In its mechanical aspect, it is the reduction of the physical principle to practice by several curious machines and processes, each a distinct invention in itself. An attentive examination of the whole work led to a spontaneous expression of admiration from the first authority in mechanics, written in high terms of commendation. With respect to its chief aspect, that of an adjuvant in medicine, many learned and liberal members of the profession have, in various works, expressed themselves in language abundantly favourable.

In the case of a great number, the relief afforded has surpassed all expectation. By removing a constant cause of irritation ; by its peculiar fomenting effect, keeping the parts moist, as well as warm : by diffusing over the whole system warmth which would have been lost from the lungs ; and by enabling the invalid to enjoy air and exercise out of doors, its effects have been not palliative only, but in a remarkable manner restorative. In many cases of bronchial affection, by an unremitting use of it, in conjunction, it may be presumed, with skilful treatment, a gradual subsidence of all irritation has taken place, *which without it could not be removed*, and the tone of the organ has become so well restored, that the parties have been enabled to lay aside the **RESPIRATOR**, even in the winter. While some unreflecting persons have supposed that the use of the **RESPIRATOR** would increase their delicacy, these and many other instances prove the contrary to be the case, especially when the **RESPIRATOR** is properly selected. Every reflecting physician must perceive, that by giving the lungs time to recover their vigour, and by the beneficial effects to the whole system, of fresh air and exercise, a susceptibility to cold, instead of being increased, must be greatly diminished. And, in fact, that the **RESPIRATOR** can render a person no more delicate than respiring the air of a properly warmed room.

The **RESPIRATOR** is procurable of numerous respectable Agents in London, and most country towns, also in America, and on the Continent ; likewise at the **GENERAL DEPOT**, 148, **REGENT STREET**, which will be opened by the 15th October, for the purpose of affording information on all points, and receiving communications, especially from professional gentlemen ; and where the utmost attention will be afforded to all parties. Persons in indigent circumstances applying at the Depôt, will be supplied with **RESPIRATORS** at the lowest possible price.

## EXPRESSED JUICES.

**M** R. BENTLEY, Operative Chemist to His Royal Highness the Duke of Cambridge, begs to invite the attention of the Profession to the expressed Juices of Vegetable Substances, used as remedial agents, preserved according to his method. They may be procured of Mr. Bentley, 41, Moorgate-street, Bank, or of any of the following agents :

Mr. Wilkinson, 248, Strand ; Mr. Edwards, 63, Great Russell-street, Bloomsbury ; Mr. Brown, Chelsea ; Mr. Hallows, Clark's-place, Islington : Mr. Lamplough, Islington-green ; Mr. Fardon, Reading ; Mr. Sarel, St. James-street, Brighton ; Mr. Moore, Preston-street, Brighton ; Mr. Noakes, North-street, Brighton ; Messrs. Glaisyer, North-street, Brighton ; Mr. Paine, St. James-street, Brighton ; Mr. Gwatkin, Grand-parade, Brighton ; Mr. Mason, Hastings ; Mr. Lea, High-street, Hastings ; Mr. A. Moore, Castle-street, Hastings ; Mr. Boden, Chester ; Mr. Lofthouse, Hull ; Mr. Dalton, Bury St. Edmunds ; Messrs. Cornish and Lewin, Whimpole-street, Plymouth ; Messrs. Lea, Perrin, and Smith, Worcester ; Messrs. Baiss, Lower Thames-street ; Messrs. Herring, Aldersgate-street ; Messrs. Hearon, Bishopsgate-street ; Messrs. Hodgkinson, Snow-hill.

Country Hospitals and Dispensaries may be supplied through their respective Druggists.

## DOMESTIC COMFORTS, AND FOR THE RELIEF OF HUMAN SUFFERINGS.

**J.** READ begs to inform the Medical Profession and the Public, that during 21 years from the time he invented the Stomach and Enema Pumps, he has made such improvements in his Hydraulic Machines, for which he has obtained patents for the United Kingdoms. The most important of these improvements consists of a double action AIR OR STOMACH PUMP, for the purpose of creating artificial respiration in all cases of asphyxia, particularly that of drowning ; it is so constructed, that the double action may be continued with the same hand, at the rate of 15 respirations per minute, (each barrel containing 40 cubic inches,) for any length of time. The operation will be more fully explained in a small pamphlet now in the Press, and will be shortly published.

**J.** READ is also preparing a Model of the above, (or the above in miniature,) well calculated for the withdrawal of Poisons from wounds occasioned by the bite of venomous serpents or rabid animals. Likewise, appendages to the above, for the following purposes, *viz.*—Transfusion of Blood ; removing small calculi from the bladder without the operation of breaking ; and for cleansing the urinary passages, by passing a constant stream of fluid. Also, improvements in his ENEMA MACHINES, by which Females and Invalids may use them without the assistance or presence of a second person. The flow of water is so regular, that any quantity may be safely passed in a constant stream, without the possibility of admitting air, which may be seen and proved at the Patentee's, 35, Regent Circus, Piccadilly.

**H**ÆMORRHAGE, internal and external, often baffles the Skill of Medical Men. Sir B. C. Brodie, Dr. Chambers, Dr. J. Johnson, Professor Mayo, Mr. Guthrie, and other high authorities, have for years strongly recommended, and exhibited, with the greatest success, the CHEVALIER RUSPINI'S STYPTIC. Speaking of Hæmoptysis, Dr. Chambers says, " Give 3*l.* of Ruspini's Styptic every three hours ;" Sir B. C. Brodie also, " Apply Ruspini's Styptic ;" Mr. Guthrie, " If the Bleeding be obstinate, you may suppress it by Ruspini's Styptic ;" Dr. Johnson, " This Styptic possesses extraordinary powers in arresting Hæmorrhage ;" Professor Mayo, " Of all the Styptics with which I am acquainted, Ruspini's is the most efficacious :" together with numerous other eminent recommendations. It is Prepared and Sold, Wholesale and Retail, at the Dépôt, J. COLLINS, 54, Piccadilly ; to be had also at the Wholesale Houses, and Retail at all the Druggists in the Kingdom.

**PHRENOLOGICAL OPINIONS AND ADVICE.** Mr. DONOVAN, Principal of the London Phrenological Institution, 8, KING WILLIAM-STREET, WEST STRAND, thoroughly convinced that much valuable assistance in forming an estimate of the degree of mental capacity bestowed on the young, may be derived from a skilful and honest application of Phrenological Science, tenders his services to those interested in the all-important subject of education. Mr. Donovan devotes his entire attention to this study, and may be consulted daily.

**A** GENTLEMAN, who has recently established himself in Practice in a respectable village in Northamptonshire, is desirous of disposing of his Furniture, Surgery, Medicines, &c. with an introduction to the Patients. This will be found an eligible offer, the sum required being merely a consideration for the purchase of the Property.

Apply to Mr. Underwood, (who has also for disposal, in a Market Town in Dorsetshire, a most respectable Practice in the Parochial Appointments ; Receipts £400 per annum,) No. 1, James-street, Adelphi.

Mr. U. has several applications for Assistants.

**D** R. A. G. HULL'S SUPPORTER.—THE UTERO-ABDOMINAL SUPPORTER, invented by Dr. A. G. HULL, of New York, for the radical Cure of Prolapsus Uteri by external application, (superseding the use of the Pessary,) has received the entire approval of the most eminent of the Faculty ; and its complete success is fully certified by every Medical Man who has practically seen its application. It is equally serviceable in all cases of Abdominal Weakness ; and its complete efficiency having been so fully tested, it is recommended to the attention of all those who have not yet witnessed its utility.

Agents in London, from whom Pamphlets can be obtained : R. H. HIGHAM, 48, Jermyn-street ; WEISS and SON, 62, Strand ; S. MAW, 11, Aldersgate-street. Mrs. HIGHAM attends personally on Ladies, at 48, Jermyn-street, St. James's. —Entrance in Duke-street.

# NEW MEDICAL WORKS

JUST PUBLISHED.

I.

## JOHNSON ON TROPICAL CLIMATES—1841.

The Influence of Tropical Climates on European Constitutions. By JAMES JOHNSON, M.D., and JAMES R. MARTIN, late Presidency-Surgeon, and Surgeon to the Native Hospital, Calcutta. Sixth Edition, revised and greatly improved, 8vo. price 18s.

II.

## BENNETT ON THE COD-LIVER OIL.

A Treatise on the Oleum Jecoris Aselli, (Cod-Liver Oil,) with Cases illustrative of its beneficial effects in certain forms of Gout, Rheumatism, and Scrofula. By JOHN HUGHES BENNETT, M.D., Ex-President of the Parisian Medical Society; and of the Royal Medical and Royal Physical Society of Edinburgh, &c. &c. 8vo.

III.

## REES ON DISEASES OF CHILDREN.

The Diseases of Children, their Symptoms and Treatment; a Treatise intended for the Use of the Student and Junior Practitioner. By GEORGE AUGUSTUS REES, Surgeon to the General Dispensary for Children; late Demonstrator of Anatomy at the Aldersgate-street School of Medicine, &c. 12mo. price 5s.

IV.

## PILCHER ON THE EAR.

A Treatise on the Structure, Economy, and Diseases of the Ear. By GEORGE PILCHER, Lecturer on Anatomy and Surgery at the Webb-street School of Medicine.

A NEW AND IMPROVED EDITION.

In which an entirely New Set of Plates is given, with additional Illustrations.

V.

## GUY'S HOSPITAL REPORTS.

No. XIII. for October, containing Papers by Mr. B. Cooper, Dr. Babington, Dr. Barlow, Dr. Hughes, Dr. Rees, Dr. Chevers, Mr. A. Taylor, Mr. T. W. King, Mr. Hingeston, and Mr. Lane. Price 6s., with plates.

Also Vol. VI., being the complete Volume for 1841, price 13s., with numerous plates.

VI.

## THE DENTAL ART.

A Practical Treatise on Dental Surgery. By C. A. HARRIS, M.D., one of the Editors of "The American Journal of Dental Science." 8vo. Plates, price 18s. bound. *Baltimore.*

Just received, Volume I., 1840-41, of "The American Journal of Dental Science." 8vo. price 15s.

VII.

## A NEW SYNOPSIS, OR THE

## NATURAL ORDER OF DISEASES;

Containing their Definition, Principles, and Treatment, with a New Pathology of Fever and Inflammation. By ROBERT STEVENS. 8vo. price 7s. 6d.

VIII.

## THE PHILOSOPHY OF DEATH.

A General Medical and Statistical Treatise on the Nature and Causes of Human Mortality. By JOHN REID. 12mo. price 6s. 6d.

IX.

## ASHWELL ON DISEASES OF WOMEN.

A Practical Treatise on the Diseases peculiar to Women, comprising their Functional and Organic Affections, illustrated by Cases derived from Hospital and Private Practice. By SAMUEL ASHWELL, M.D., Obstetric Physician and Lecturer to Guy's Hospital.

PART I. containing the Functional Diseases. 8vo. price 7s.

PART II. (completing the work,) containing the Organic Diseases, will be published during the present month.

London: Published by S. HIGHLEY, 32, Fleet Street. —

\* \* \* HIGHLEY'S GENERAL MEDICAL CATALOGUE of Modern Books, with their dates and prices corrected up to October, 1841, price 1s.
