

NEW WORKS

PUBLISHED BY

MR. CHURCHILL, PRINCES STREET, SOHO.

FOR MEDICAL AND SURGICAL EXAMINATION.

DR STEGGALL'S MANUAL for APOTHECARIES' HALL. 9th Edition, 12mo. 8s. 6d. cloth.

DR. STEGGALL and Mr. HILLES'S MANUAL for the COLLEGE of SURGEONS. 12mo. 12s. 6d. cloth.

DR. STEGGALL'S TEXT-BOOK of MATERIA MEDICA. 12mo. 7s. cloth.

DR. STEGGALL'S ELEMENTS of BOTANY. 9 coloured Plates, 18mo. 6s. cloth.

DR. STEGGALL'S CELSUS DE MEDICINA, with the TEXT ORDO VERBORUM, and a TRANSLATION. 18mo. 8s. cloth.

DR. STEGGALL'S GREGORY'S CONSPECTUS MEDICINÆ THEORETICÆ, with the TEXT, ORDO VERBORUM, and TRANSLATION. 18mo. 10s. cloth.

DR. STEGGALL'S DECOMPOSITIONS of NEW LONDON PHARMACOPŒIA. 12mo. 3s. boards.

ON the NATURE and TREATMENT of STOMACH and URINARY DISEASES; being an Inquiry into the Connection of Diabetes, Calculus, and other Affections of the Kidney and Bladder, with Indigestion. By WILLIAM PROUT, M.D., F.R.S. Third Edition, with Six Engravings, 8vo. cloth, 20s.

"Those who have been benefitted by the labours and researches of Dr. Prout, will be delighted to see the announcement of the third edition, so much enlarged as to be almost a new work. . . . This table of contents will show the great extent of our author's inquiries, and we need hardly assure our readers that the subjects are treated with consummate ability."—*Dublin Journal of Medical Science*.

"Many of the doctrines contained in this work will certainly be embodied in the practice of English medical men during the next half-century. . . . We would gladly extend our analysis, did our limits permit, but that we believe we have enabled the reader to comprehend the philosophical plan on which the work is constructed, and the length to which we have already gone will show our sense of its value."—*Medical Gazette*.

PRACTICAL or OPERATIVE SURGERY, illustrated with 150 Engravings on Wood. By ROBERT LISTON, Esq., Surgeon to the North London Hospital. This Work contains ample information on Injuries and Diseases of Joints and Bones—On Tumours—On Affections of the Gullet and Windpipe—On Diseases of the Genito-Urinary Organs and Rectum, Stone, Stricture, Fistula, &c.—On Hernia, Congenital Deformities and Deficiencies, &c. Third Edition, 8vo., cloth, price 22s.

THE ANATOMIST'S VADE-MECUM; a System of Human Anatomy. By W. J. ERASMUS WILSON, Lecturer on Anatomy and Physiology at the Middlesex Hospital Medical School. With 150 Illustrations, price 12s. 6d.,

No expense has been spared in wood-cut illustrations to render this work the most beautiful and perfect volume that has ever been placed in the hands of the student. It has already received a very extensive sale, while its republication in America and Germany proves that its merits are widely appreciated.

A MANUAL OF PRACTICAL MIDWIFERY; containing a Description of Natural and Difficult Labours, with their Management. Intended chiefly as a Book of Reference for Students and Medical Practitioners. By JAMES REID, M.D., Lecturer on Midwifery, at the Webb-street Medical School. With Engravings on Wood, 24mo., cloth, 5s. 6d.

"The relative diameters of the pelvis and the foetal head, and the different presentations of the child, are all usefully represented by wood engravings among the letter-press, and the book is thus particularly well calculated to effect the objects of such a work."—*Lancet*.

A PRACTICAL WORK on the DISEASES of the EYE, and their TREATMENT, MEDICALLY, TOPICALLY, and by OPERATION. By FREDERICK TYRRELL, Senior Surgeon to the Royal London Ophthalmic Hospital, Surgeon to St. Thomas's Hospital, &c.; with Coloured Plates; 2 vols. 8vo. cloth, £1 16s.

"This work is written in a perspicuous style, and abounds in practical information; we add our earnest recommendation to our readers, to procure and read through the two volumes, assuring them that they will be richly repaid for their trouble. A series of plates, illustrative of the various diseases, are given."—*Dublin Journal of Medical Science*.

"We consider it a very valuable addition to the existing books on diseases of the eye, and we believe that it will prove eminently useful."—*Medico-Chirurgical Review*, October, 1840.

Just published, Second Edition, enlarged, with Plates, price, 1s. 6d.,

THE PRESENT STATE of AURAL SURGERY;

With Remarks on Otolgia, Otorrœa, Tinnitus Aurium, Nervous Deafness, &c., Also, the Modes of Treatment employed at the principal Hospitals of France, Germany, Austria, Prussia, &c., with an Account of the beneficial effects of the Arnica Montana, Impetoria Ostruthium, Anthracokali, Lapis Divinus, &c., in various Affections of the Ear, &c., By J. HARRISON CURTIS, Esq., Aurist to the late King, their Royal Highnesses the Duchess of Kent and the Duchess of Gloucester, and Surgeon to the Royal Dispensary for Diseases of the Ear.

"The book altogether will prove interesting to the profession, and to sufferers of the class of whose diseases it treats."—*Literary Gazette*.

"In treating upon the various and serious disorders which affect the ear, the author, who has devoted many years to this especial organ, both on the Continent and at home, appears well versed in its diseases."—*Lancet*.

"We are glad to find that Mr. Curtis denounces the quackeries which have lately been broached respecting catheterism of the Eustachian tube, and that most egregious of humbugs, the alleged cure of throat deafness by excision of the tonsils and uvula."—*Dublin Medical Press*.

London: JOHN CHURCHILL, Princes Street, Soho.

In the Press,

An ESSAY on the CEPHALOSCOPE, and its Uses in discriminating the normal and abnormal Sounds in the Organ of Hearing; together with an Account of the Diseases in which it is applicable. With Plates.

WILDENOW and KRANTZ, Pharmaceutical Chemists, in returning thanks for the great approval of their Preparations, as manifested by a constantly increasing demand, beg to call the attention of such Medical Gentlemen as may not yet have given them a trial, to the advantages they afford in the use of the valuable medicines they contain.

I.—BALSAM OF COPALIA, in Gelatine Capsules, each containing ten grains.

II.—A highly concentrated FLUID EXTRACT OF CUBEBS, each Capsule containing the active principle of eighty grains of the powder.

III.—DRAGEES BALSAMIQUE. Ten grains of each of the above medicines are put up in this form, encrusted with sugar.

In these preparations the purest ingredients are used, and care is taken to preserve uniformity of strength; and while the nauseous properties are completely disguised, the medical qualities are preserved unaffected; and in the ease with which they may be taken, the certainty of their operation, and their freedom from unpleasant effects, they will be found superior to any other mode of administration.

To be had wholesale at the office, 41, Bucklersbury, Cheapside; and of all wholesale druggists; and retail of all respectable chemists.

*** Patent Opaque and Transparent Gelatine supplied wholesale.

CHEMISTRY NO MYSTERY; OR, A LECTURER'S BEQUEST. By JOHN SCOFFERN. With numerous Illustrations. Foolscep 8vo. cloth lettered. Price 6s.

"A very agreeable account of some of the leading facts and principles of Chemistry, not only made plain to the meanest capacity, but attractive, we should imagine, to the most idle youth, and amusing to all."—*Spectator*.

London: Harvey and Darton, Gracechurch-street.

SHEFFIELD GENERAL INFIRMARY.

HOUSE SURGEON and APOTHECARY.—A VACANCY having occurred in the Office of Resident Surgeon and Apothecary to this Institution, by the death of Dr. Ernest, a SPECIAL GENERAL BOARD of GOVERNORS will be held on WEDNESDAY, DEC. 29th, at Twelve o'Clock, for the purpose of filling up such Vacancy.

The appointment will be for a term of Five Years, but the Officer appointed will, at the expiration of that period, be eligible for re-election.

Candidates must be Members of one of the recognised Colleges of Surgeons, and Licentiates of the Apothecaries' Company, London.

Salary, £100 per Annum, with Board, Lodging, Washing, Coals, and Candles.

Every information respecting the duties and requisite qualifications will be furnished, on application to the Secretary.

Testimonials and qualifications to be sent, post free, to the Chairman of the Weekly Board, on or before Dec. 15th, 1841. THOMAS NEWBOULD, Secretary.

Sheffield Infirmary, Nov. 19th, 1841.

Extract from the Rules.

Any Candidate for the Office of Apothecary who shall have been proved to have canvassed for the appointment, either in his own person, or through the instrumentality of others, shall not be eligible to the situation.

Just published, Second Edition, price One Shilling,

A LIST OF 2,000 MICROSCOPIC OBJECTS, with Remarks, &c. &c.

By ANDREW PRITCHARD.—Also, price 30s.,

A History of INFUSORIA, Living and Fossil; with 500 coloured Engravings of Animalcules.

Also, price 7s. 6d.

A List of all the PATENTS for Invention in the Arts, Manufactures, Agriculture, &c. &c.

Whittaker and Co., Ave Maria-lane; Pritchard, 162, Fleet-street.

CITRATE of IRON.—The most valuable and beautiful Preparation of Iron for medicinal use is the Citrate; it is superior to every other salt of that metal from possessing the following qualities:—1st, it is agreeable to the taste; 2nd, it never disagrees with the stomach; 3rd, it is perfectly and immediately soluble in water, making a clear ruby-red solution; 4th, it is equally, if not more efficacious in every case where Iron is prescribed than any other preparation; 5th, it is compatible with volatile and fixed alkalies and their carbonates, hydriodate of potash, and most other substances which decompose other salts of Iron. From these properties it is presumed that it must, as soon as it is known, entirely supersede the unscientific forms in which this metal is usually given, as Steel Wine, the old Carbonate of Iron, Griffiths's Mixture, and the general salts which are so prone to decomposition—dose, five grains.

Prepared only by Bullock, Operative Chemist, 22, Conduit-street, late of Laboratories of Liebig and Dumas, and of the School of Pharmacy of Paris.

As all other attempts to prepare this salt in this country has failed, to prevent disappointment, it is requested to ask for Bullock's Citrate of Iron.

MEDICAL, INVALID, AND GENERAL LIFE ASSURANCE, LOAN, ANNUITY, & REVERSIONARY INTEREST SOCIETY.

OFFICES, 25, PALL-MALL.

CAPITAL, Five Hundred Thousand Pounds, in Shares of Twenty-five Pounds each.
Deposit, Two Pounds per Share.

PRESIDENTS.

STANDING COUNSEL.—John Shapter, Esq., Lincoln's Inn.

SOLICITORS.—Messrs. Richardson, Smith, and Jones, 28, Golden Square.

DEPARTMENT OF MEDICAL STATISTICS.—William Farr, Esq., General Register Office, Somerset House.

ACTUARY.—F. G. P. Nelson, Esq.

SECRETARY.—Edward Power, Esq.

The experience of the best regulated Life Assurance Offices proves that these Societies can be conducted with advantage to the Public, and at the same time be made profitable to the Proprietors. The published Share-Lists, from which a few examples of Life Assurance Societies are subjoined,* show that there is no better investment for capital.

The Legal Profession has two flourishing Societies in existence. It is believed that the influence of the Medical Profession is equally great; and that their means of supporting a Society, and their knowledge of all the circumstances on which the mortality of Mankind depends, will enable them to afford the public advantages which could be offered by the members of no other Profession.

This Society proposes to undertake all the kind of business done by existing Societies; but, as will be seen by the Prospectus, it has also the means of insuring the lives of persons when they are actually attacked by sickness, and are thereby reminded of the necessity of providing for their families. In acute diseases the probability is generally 2, 3, 4, or 9 to 1 in favour of recovery, but the chances are also 1 to 2 or 9 against recovery; so that there would be as much propriety in recommending sick person, with a family, to assure his life to a moderate amount, as to make a will. He may be justly and kindly reminded by his friend or medical attendant, that the chances are greatly in favour of recovery; but that in health, life is uncertain, and that this, the Medical Assurance Society, affords facilities for commencing Assurance under an attack of sickness, when the urgency of the step is augmented tenfold.

This Society has the means of effecting Assurances on the Lives of Persons affected with various chronic diseases, at equitable premiums commensurate with the risk; and thus doing an extensive business without interfering with the existing Societies.

It is believed that the data collected by the Society, and its investigations will contribute essentially to the progress of Medical Science, and thus be beneficial in more ways than one to the Public.

The Directors and Shareholders consist partly, but not exclusively, of Medical Men; because it was thought that while the Public were not excluded, the peculiar objects of the Society, having reference to Sick Persons and Invalids, could be best accomplished through the instrumentality of the Medical Profession, on whom it relies in an especial manner for support. It has at its command all the elements of success; and there can be no valid reason whatever, why the members of the Medical Profession at large should not participate in the advantages derived by the members of other Professions from the Proprietorship of Life Offices.

The Terms for the Assurance of the Lives of Persons suffering from Disease may be known on application at the Society's Offices.

A liberal commission allowed to Solicitors and the Medical Profession on any Policies effected through their medium.

. Premiums for any Special Assurances, Proposals, and all further information, may be obtained at the Offices of the Society, and of the Agents in the Country, and where Agents are not appointed, persons desirous of the appointment may apply to

EDWARD POWER, Secretary.
