

NEW WORKS

PUBLISHED BY

MR. CHURCHILL, PRINCES STREET, SOHO.

THE ANATOMIST'S VADE-MECUM; a System of Human Anatomy. By W. J. ERASMUS WILSON, Lecturer on Anatomy and Physiology at the Middlesex Hospital Medical School. With 150 Illustrations, price 12s. 6d.,

No expense has been spared in wood-cut illustrations to render this work the most beautiful and perfect volume that has ever been placed in the hands of the student. It has already received a very extensive sale, while its republication in America and Germany proves that its merits are widely appreciated.

"This is probably the prettiest medical book ever published, and we believe its intrinsic merits are in keeping with its exterior advantages, having examined it sufficiently to satisfy us that it may be recommended to the student as no less distinguished by its accuracy and clearness of description than by its typographical elegance. The wood-cuts are exquisite."—*British and Foreign Medical Review*.

"Without exception the most beautiful specimen of book making we have ever seen; it is got up in the very best style. Mr. Wilson has executed his share of the work in a very creditable manner; as a proof of this, we need only refer the reader to the admirable description of the nervous and lymphatic systems, &c."—*Dublin Medical Journal*.

THE CAUSE and TREATMENT of CURVATURE of the SPINE, and DISEASES of the VERTEBRAL COLUMN, with Cases. By E. W. TUSON, F.R.S., F.L.S., Surgeon to the Middlesex Hospital. 8vo. cloth, with 26 plates, price 10s. 6d.

"Mr. Tuson's treatment is sound and judicious, and there is much solid and useful information to be obtained from a perusal of his pages. We recommend the volume as deserving of the attention of our readers."—*Lancet*.

"The present work being a 'Practical Treatise on the Affections of the Spine' may be recommended to the attentive perusal of those entrusted with the care of young persons. We have reason to know that extension by the use of Mr. Tuson's couch and its attendant exercises, has been very successfully applied to many of his private patients; and in affording our testimony to the professional merits of this gentleman, we confer a benefit on the public."—*Church Magazine*.

"We are bound to acknowledge that Mr. Tuson has combated two great errors,—the obstinate adherence to tight lacing, and the absurd notion of the applicability of any one plan of treatment for all cases indiscriminately; and also that he makes frequent reference to the physiological causes of the malady."—*Athenæum*.

"Mr. Tuson has, with great talent, exposed the follies of parents, pointed out in a most scientific manner the causes of the derangement of structure, and has, in clear language, told us his plan of cure. It is simple, and admirably adapted to the cases of which he speaks."—*Statesman*.

PRINCIPLES of GENERAL and COMPARATIVE PHYSIOLOGY, intended as an Introduction to the Study of Human Physiology, and as a Guide to the Philosophical Pursuit of Natural History. By W. B. CARPENTER, M.D., Lecturer on Physiology to the Bristol Medical School.

"The high character of the first edition of this work was universally acknowledged by all the professional critics of this country; it was warmly eulogised by other physiological writers, and was quoted as a safe and very useful guide for students by physiological lecturers of established judgment. The present edition offers still stronger claims to favourable notice than its predecessor, for it brings us quite up to the physiological knowledge of the day, by many important additions. Without, indeed, any exaggerated compliment to Dr. Carpenter, we must say that we know of no author of modern date who excels him in clearness of description, and a general happiness of style."—*Medical Gazette*, Oct. 22, 1841.

DR. JACOB COBI on the CONSTRUCTION and MANAGEMENT of HOSPITALS for the Insane; translated from the German. With Introductory Observations by SAMUEL TUKE. 1 Plates, price 9s.

Just received, with very great pleasure, a translation of Dr. Maximilian Jacobi's work, and we commend it strongly to our readers. The whole work is composed with a rare practical knowledge of the subject, which has seldom marked the recent publications of the same class. The observations of Dr. Tuke are such as may suggest improvements in every institution for lunatics."—*Medical Gazette*, August, 1841.

THE MEDICAL RECORD and **MONTHLY ADVERTISER.** To be published on Saturday, Jan. 1, and continued Monthly, price 8d. Edited by an Association of Medical Reformers.

A Condensed Account of all important Information contained in the various Medical Journals—Quarterly, Monthly, and Weekly—British and Foreign.

Published by B. STEILL, 20, Paternoster-row.

* * Ready for Country Distribution, with the Magazines, on Dec. 29, and to be had, by order, of all Booksellers and Newsmen.

ASPHYXIA BY DROWNING, &c.

J. READ begs to inform his Medical Friends that, after a Series of expensive Experiments, he has completed a Machine for creating Artificial Respiration after Prolonged Submersion, and in all cases of Suspended Animation. This Machine consists of a double-barrelled Air or Stomach Pump, each barrel containing 40 cubic inches. By this instrument all stagnant air and other fluid can be instantly extracted from the mouth, trachea and bronchial tubes, &c., and 40 cubic inches of pure warm air passed into the lungs. This alternate action of withdrawing the air, and supplying its place by fresh warm air, takes place with each stroke of the piston, and can be kept up for any length of time, in exact imitation of natural breathing. This process does not occasion the slightest inconvenience, for uncomfortable sensation, to a living subject, as J. Read has proved at many hospitals in various parts of the kingdom, to the astonishment and satisfaction of many eminent members of the profession, by more than 50 operations on himself, which he is ready to repeat at any time.

Warm stimulants may be passed into the stomach and bowels by the same instrument.

J. READ has (at the suggestion of Mr. Snow) made a small Model of the above Instrument for the Resuscitation of Still-born Children.

May be seen at the Patentees, 35, Regent Circus, Piccadilly.

SIR JAMES MURRAY'S FLUID **MAGNESIA.—TO THE MEDICAL PRACTITIONERS OF GREAT BRITAIN AND IRELAND:**

Dublin, August, 1840.

GENTLEMEN:—Having now completed extensive arrangements by the addition of Two Steam Engines of immense condensing power, and a most perfect Distillery for obtaining abundance of Pure Water, I beg leave to inform you that highly-concentrated Stock Bottles, containing upwards of 5lbs. of my Original Fluid Magnesia, are now supplied pure, and without risk of adulteration, for 5s. 6d. each (Glass Bottle included.)

These "DISPENSING BOTTLES" are furnished to General Practitioners and Apothecaries for economy in compounding, and for Hospitals, by the sole consignee, Mr. William Baily, of North-street, Wolverhampton; Messrs. Hannay and Dietrichsen, 63, Oxford-street, London; and by all Wholesale Drug-gists and Medicine Agents throughout the British Empire. Every Bottle will have my Signature on a Label over the Cork, without which it cannot be genuine. I remain, Gentlemen, your very obedient servant,

JAMES MURRAY, Physician to the
Lord Lieutenant.

FOR **Medical & Surgical Examination.**

I.

A MANUAL FOR THE COLLEGE OF SURGEONS; intended for the Use of Candidates for Examination, and Practitioners. By JOHN STEGALL, M.D., and M. W. HILLES, Surgeon. One thick vol, 12mo, cloth, 12s. 6d.

II.

A MANUAL FOR THE USE OF STUDENTS PREPARING FOR EXAMINATION AT APOTHECARIES' HALL. Ninth Edition, 12mo, cloth, 8s. 6d.

III.

GREGORY'S CONSPECTUS MEDICINÆ THEORETICÆ. The First Part, containing the Original Text, with an Ordo Verborum and Literal Translation. 12mo, cloth, 10s.

IV.

THE FIRST FOUR BOOKS OF CELSUS. Containing the Text, Ordo Verborum, and Translation. 12mo, cloth, 8s.

* * The above two Works comprise the entire Latin Classics required for Examination at Apothecaries' Hall.

V.

A new, correct, and complete Edition of CELSUS DE RE MEDICA, E RECENSIONE LEONARDI TARGÆ. 12mo, cloth, 7s.

VI.

THE DECOMPOSITIONS OF THE NEW LONDON PHARMACOPOEIA; with Observations on the most active Preparations. 12mo, boards, 3s.

VII.

THE ELEMENTS OF BOTANY. Designed for the Use of Medical Students. With Nine Coloured Plates. 24mo, cloth, 6s.

TIC DOULOUREUX, or NEURALGIA FACIALIS, and other NERVOUS AFFECTIONS; their Seat, Nature, and Cause: with Cases illustrating Successful Methods of Treatment. By R. H. ALLNATT, M.D., A.M.; 8vo, cloth, price 5s 6d.

London: John Churchill, Princes-street, Soho.

CITRATE of IRON.—The most valuable and beautiful Preparation of Iron for medicinal use is the Citrate; it is superior to every other salt of that metal from possessing the following qualities:—1st, it is agreeable to the taste; 2nd, it never disagrees with the stomach; 3rd, is perfectly and immediately soluble in water, making a clear ruby-red solution; 4th, it is equally, if not more efficacious in every case where Iron is prescribed than any other preparation; 5th, it is compatible with volatile and fixed alkalies and their carbonates, hydriodate of potash, and most other substances which decompose other salts of Iron. From these properties it is presumed that it must, as soon as it is known, entirely supersede the unscientific forms in which this metal is usually given, as Steel Wine, the old Carbonate of Iron, Griffiths's Mixture, and the general salts which are so prone to decomposition—dose, from five to ten grains, three times a day.

Prepared only by Bullock, Operative Chemist, 22, Conduit-street, late of Laboratories of Liebig and Dumas, and of the School of Pharmacy of Paris.

DR. RAMADGE ON CONSUMPTION.

In 1 vol. 8vo, price 8s., the Third Edition, Illustrated by Coloured Plates,

CONSUMPTION CURABLE, and the manner in which Nature, as well as Remedial Art, operates in effecting a healing Process in Cases of Consumption, explained and illustrated by numerous remarkable and interesting Cases. By F. H. RAMADGE, M.D., Fellow of the Royal College of Physicians, and Senior Physician to the Infirmary for Asthma, Consumption, and other Diseases of the Chest, &c.

Also, by the same Author, 1 vol. 8vo, with Plates, price 8s.,

A PRACTICAL TREATISE ON ASTHMA.

London: Longman and Co.

Just published, Second Edition, price One Shilling,

A LIST OF 2,000 MICROSCOPIC OBJECTS, with Remarks, &c. &c.

By ANDREW PRITCHARD.—Also, price 30s.,

A History of INFUSORIA. Living and Fossil; with 500 coloured Engravings of Animalcules.

Also, price 7s. 6d.

A List of all the PATENTS for Invention in the Arts, Manufactures, Agriculture, &c. &c.

Whittaker and Co., Ave Maria-lane; Pritchard, 162, Fleet-street.

THE LIBRARY OF MEDICINE.

Now ready, post 8vo, comprising upwards of 650 pages and 190 Illustrations, price 18s. cloth lettered,

VOL. I. of CRUVEILHIER'S ANATOMY. Translated by DR. MADDEN, and revised by Professor SHARPEY, of University College.

VOL. II., completing the work, will follow shortly.

Just published,

PRACTICAL MEDICINE. By Various Contributors. 5 vols., post 8vo, cloth, price 10s. 6d. per volume.

MIDWIFERY. By Dr. RIGBY. Post 8vo, 10s. 6d. cloth.

Whittaker and Co., Ave-Maria-lane.

LAWRENCE ON THE EYE.

Just published, in 1 thick vol. 8vo, second edition, revised, corrected, and enlarged, price 24s. cloth,

A TREATISE on the DISEASES of the EYE. By W. LAWRENCE, F.R.S., Surgeon-Extraordinary to the Queen; Surgeon to St. Bartholomew's Hospital, and Lecturer on Surgery at that Hospital; Surgeon to Bethlehem and Bridewell Hospitals; and late Surgeon to the London Ophthalmic Infirmary.

Whittaker and Co., Ave-Maria-lane.

TO THE MEDICAL PROFESSION.

BUTLER'S CHARTA VESICATORIA.—CANTHARADINE is the sole vesicating principle of this preparation, and is in such a form as to ensure the certainty of its action, and to avoid liability to injury from time under ordinary circumstances. It has not been known to produce strangury, and is much quicker in its action than the Emplastrum Cantharidis, though attended with less pain. It is free from any objectionable smell, and from its elegance and portability, with its facility of adaptation to any required form, presents considerable advantages over the ordinary blister plasters.

Sheets, 15 inches by 10, price 1s., sent by post.

Thomas Butler, 4, Cheapside, St. Paul's, London.

TO BE SOLD, by Private Contract,

an excellent FREEHOLD DWELLING HOUSE, situated at the South-east corner of East Parade, the property of Mr. HARE, Surgeon, (who is retiring from General Practice, which is to be disposed of), consisting of Dining Room, Breakfast Parlour, and Study, on the ground floor, with Drawing Room, Tea Room, nine Lodging Rooms, and Water Closet, above, and a stone staircase. Adjoining the Study on the ground floor, is the Surgery and Compounding Room, which have a separate entrance from the court, in which is a Pump, a Three-Stalled Stable, Saddle Room and Boot Room, together with an excellent Coach House.

The premises are replete with every convenience, well supplied with hard and soft water, and Gas in various parts of the house.

In the basement story are two good Kitchens, Wine and Beer Cellars, &c., Cooking Apparatus, with various other conveniences.

The situation is a most eligible one for any gentleman in or commencing the Profession, and any portion of the furniture may be taken at a valuation.

The premises are opposite the General Infirmary and Medical Schools, and have a frontage into East Parade and Infirmary-Street of near 70 feet, and of upwards of 50 feet into Russell-Street.

The Practice at the Retreat, beautifully situated about a mile from the town, which has been successfully carried on nearly twelve years, is about to be disposed of.

This offers an opportunity rarely occurring, to a gentleman without or with a small family, wishing to devote himself to the Study of Mental Disease. There is also within distance a populous Village, where there is scope for the cultivation of General Practice. Principals only will be treated with.

Apply to Mr. HARE, 32, East Parade, Leeds.

WILDENOW and KRANTZ, Pharmaceutical Chemists, in returning thanks

for the great approval of their Preparations, as manifested by a constantly increasing demand, beg to call the attention of such Medical Gentlemen as may not yet have given them a trial, to the advantages they afford in the use of the valuable medicines they contain.

I.—BALSAM of COPAIBA, in Gelatine Capsules, each containing ten grains.

II.—A highly concentrated FLUID EXTRACT OF CUBEBS, each Capsule containing the active principle of eighty grains of the powder.

III.—DRAGEES BALSAMIQUE. Ten grains of each of the above medicines are put up in this form, encrusted with sugar.

In these preparations the purest ingredients are used, and care is taken to preserve uniformity of strength; and while the nauseous properties are completely disguised, the medical qualities are preserved unaffected; and in the ease with which they may be taken, the certainty of their operation, and their freedom from unpleasant effects, they will be found superior to any other mode of administration.

To be had wholesale at the office, 41, Bucklersbury, Cheapside; and of all wholesale druggists; and retail of all respectable chemists.

**** Patent Opaque and Transparent Gelatine supplied wholesale.*
