

On the First of January will be published, in One handsome Volume, 8vo, with 125 Illustrations on Wood,

A TREATISE ON DISLOCATIONS AND FRACTURES OF THE JOINTS.

By Sir ASTLEY COOPER, BART., F.R.S.

Edited by BRANSBY COOPER, F.R.S., Surgeon to Guy's Hospital.

Sr Astley Cooper left very considerable additions in MSS. for the express purpose of being introduced into this Edition. The whole of the Plates, including many additional subjects, have been redrawn and engraved. It has been the wish of the Publisher to mark his sense of the honour of having the work intrusted to his care, to produce a volume which, in its typographical execution, shall be pronounced worthy of its distinguished Author, while the price will not be one-half that of any previous edition, thus making the work available to every Member of the Profession.

ON the NATURE and TREATMENT of STOMACH and URINARY DISEASES; being an Inquiry into the Connection of Diabetes, Calculus, and other Affections of the Kidney and Bladder, with Indigestion. By **WILLIAM PROUT, M.D., F.R.S.** Third Edition, with Six Engravings, 8vo. cloth, 20s.

"Those who have been benefitted by the labours and researches of Dr. Prout, will be delighted to see the announcement of the third edition, so much enlarged as to be almost a new work. . . . This table of contents will show the great extent of our author's inquiries, and we need hardly assure our readers that the subjects are treated with consummate ability."—*Dublin Journal of Medical Science*.

"Many of the doctrines contained in this work will certainly be embodied in the practice of English medical men during the next half-century. . . . We would gladly extend our analysis, did our limits permit, but that we believe we have enabled the reader to comprehend the philosophical plan on which the work is constructed, and the length to which we have already gone will show our sense of its value."—*Medical Gazette*.

PRACTICAL or OPERATIVE SURGERY, illustrated with 150 Engravings on Wood. By **ROBERT LISTON, Esq.**, Surgeon to the North London Hospital. This Work contains ample information on Injuries and Diseases of Joints and Bones—On Tumours—On Affections of the Gullet and Windpipe—On Diseases of the Genito-Urinary Organs and Rectum, Stone, Stricture, Fistula, &c.—On Hernia, Congenital Deformities and Deficiencies, &c. Third Edition, 8vo., cloth, price 22s.

A MANUAL OF PRACTICAL MIDWIFERY; containing a Description of Natural and Difficult Labours, with their Management. Intended chiefly as a Book of Reference for Student, and Medical Practitioners. By **JAMES REID, M.D.**, Lecturer on Midwifery, at the Webb-street Medical School. With Engravings on Wood, 24mo., cloth, 5s. 6d.

"The relative diameters of the pelvis and the fetal head, and the different presentations of the child, are all usefully represented by wood engravings on the letter-press, and the book is thus particularly well calculated to effect the objects of such a work."—*Lancet*.

A PRACTICAL WORK on the **DISEASES** of the **EYE**, and their **TREATMENT**, **MEDICALLY**, **TOPICALLY**, and by **OPERATION**. By **FREDERICK TYRRELL**, Senior Surgeon to the Royal London Ophthalmic Hospital, Surgeon to St. Thomas's Hospital, &c.; with Coloured Plates; 2 vols. 8vo. cloth, £1 16s.

"This work is written in a perspicuous style, and abounds in practical information; we add our earnest recommendation to our readers, to procure and read through the two volumes, assuring them that they will be richly repaid for their trouble. A series of plates, illustrative of the various diseases, are given."—*Dublin Journal of Medical Science*.

"We consider it a very valuable addition to the existing books on diseases of the eye, and we believe that it will prove eminently useful."—*Medico-Chirurgical Review*, October, 1840.

London: **JOHN CHURCHILL**, Princes-street, Soho.

MEDICAL WORKS

PUBLISHED BY

JOHN CHURCHILL, PRINCES STREET, SOHO.

MR. ATKINSON,

Late Senior Surgeon to the York County Hospital, and Vice-President of the Yorkshire Philosophical Society.

MEDICAL BIBLIOGRAPHY. Vol. I. Royal 8vo. 16s.

"We have never encountered so singular and remarkable a book. It unites the German research of a Plouquet with the ravings of Rabelais,—the humour of Sterne with the satire of Democritus,—the learning of Burton with the wit of Pindar."—*Dr. Johnson's Review*.

DR. HOPE, F.R.S.,

Late Physician to St. George's Hospital.

A TREATISE ON THE DISEASES OF THE HEART AND GREAT VESSELS, and on the Affections which may be mistaken for them. Third Edition, with Plates, 8vo, cloth, 18s.

"The addition of one-third of new matter to the present volume, and the care with which the whole has been revised and corrected, will, I trust, sufficiently prove my respect for the favourable opinion of my professional brethren, as evinced, not in this country only, but also on the European and American continents, by the sale of no less than six or seven editions and translations in as many years."—*Extract from Preface*.

"When his great work on 'Diseases of the Heart' was first published, the whole profession united in commendation of its excellence; and in the enlarged and improved form in which the author was fortunately enabled to reproduce it in a third edition, it is now universally acknowledged to be the best book on the subject in any language."—*British and Foreign Medical Review*.

MR. LAWRENCE, F.R.S.,

Surgeon to St. Bartholomew's Hospital.

A TREATISE ON RUPTURES. The Fifth Edition, considerably enlarged, 8vo, cloth, 16s.

"The peculiar advantage of the treatise of Mr. Lawrence is, that he explains his views on the anatomy of hernia, and the different varieties of the disease, in a manner which renders his book peculiarly useful to the student. It must be superfluous to express our opinion of its value to the surgical practitioner. As a treatise on hernia, presenting a complete view of the literature of the subject, it stands in the first rank."—*Edinburgh Medical and Surgical Journal*.

DR. MERRIMAN, F.L.S.

A SYNOPSIS OF THE VARIOUS KINDS OF DIFFICULT PARTURITION, with Practical Remarks on the Management of Labours. Fifth Edition, with Additions. Plates. 8vo, 12s.

"The merits of this work are already too well known, and too highly appreciated by the profession, to require that we should express, at any great length, the high opinion we entertain of what is universally regarded as one of the very best practical books of reference in our language."—*Dublin Medical Journal*.

MR. SHAW, M.R.C.S.,

Assistant-Apothecary to St. Bartholomew's Hospital.

THE MEDICAL REMEMBRANCER; or, PRACTICAL POCKET GUIDE: concisely pointing out the Treatment to be adopted in the First Moments of Danger from Poisoning, Drowning, Apoplexy, Burns, and other Accidents. To which are added, various useful Tables and Memoranda. Price 2s. 6d.

* * * This Pocket Volume will be found a safe Practical Guide in all cases of sudden emergency, presenting at a glance the most appropriate remedy.

DR. MICHAEL UNDERWOOD.

A TREATISE ON THE DISEASES OF CHILDREN. With Directions for the Management of Infants from the Birth. Ninth Edition. Revised by SAMUEL MERRIMAN, M.D., F.L.S., and MARSHALL HALL, M.D., F.R.S. 8vo, boards, 15s.

WILDENOW and KRANTZ, Pharmaceutical Chemists, in returning thanks for the great approval of their Preparations, as manifested by a constantly increasing demand, beg to call the attention of such Medical Gentlemen as may not yet have given them a trial, to the advantages they afford in the use of the valuable medicines they contain.

I.—**BALSAM OF COPAIBA**, in Gelatine Capsules, each containing ten grains.

II.—*A highly concentrated FLUID EXTRACT OF CUBEBS*, each Capsule containing the active principle of eight grains of the powder.

III.—**DRAGEES BALSAMIQUE**. Ten grains of each of the above medicines are put up in this form, encrusted with sugar.

In these preparations the purest ingredients are used, and care is taken to preserve uniformity of strength; and while the nauseous properties are completely disguised, the medical qualities are preserved unaffected; and in the case with which they may be taken, the certainty of their operation, and their freedom from unpleasant effects, they will be found superior to any other mode of administration.

To be had wholesale at the office, 41, Bucklersbury, Cheapside; and of all wholesale druggists; and retail of all respectable chemists.

*** Patent Opaque and Transparent Gelatine supplied wholesale.*

CITRATE of IRON.—The most

valuable and beautiful Preparation of Iron for medicinal use is the Citrate; it is superior to every other salt of that metal from possessing the following qualities:—1st, it is agreeable to the taste; 2nd, it never disagrees with the stomach, 3rd, is perfectly and immediately soluble in water, making a clear ruby-red solution; 4th, it is equally, if not more efficacious in every case where Iron is prescribed than any other preparation; 5th, it is compatible with volatile and fixed alkalies and their carbonates, hydriodate of potash, and most other substances which decompose other salts of Iron. From these properties it is presumed that it must, as soon as it is known, entirely supersede the unscientific forms in which this metal is usually given, as Steel Wine, the old Carbonate of Iron, Griffiths's Mixture, and the general salts which are so prone to decomposition—dose, from five to ten grains, three times a day.

Prepared only by **Bullock**, Operative Chemist, 22, Conduit-street, Hanover-square, several years occupied in the Laboratories of the most distinguished Chemists of France and Germany.

Mr. Bullock has on sale Liquor Hydriodatis Arsenici et Hydrargyri (see Medical Gazette, Aug. 6, p. 765), Unguentum Anthracocali, Lapis Divinus, with all the new English, French, and German Chemical and Pharmaceutical Compounds.
