

MEDICAL WORKS

PUBLISHED BY
JOHN CHURCHILL, PRINCES STREET, SOHO.

MR. ATKINSON,
Late Senior Surgeon to the York County Hospital, and Vice-President of the Yorkshire
Philosophical Society.

MEDICAL BIBLIOGRAPHY. Vol. I. Royal 8vo. 16s.

"We have never encountered so singular and remarkable a book. It unites the German research of a Plouquet with the ravings of Rabelais,—the humour of Sterne with the satire of Democritus,—the learning of Burton with the wit of Pindar."—*Dr. Johnson's Review*.

DR. HOPE, F.R.S.,
Late Physician to St. George's Hospital.

A TREATISE ON THE DISEASES OF THE HEART AND GREAT VESSELS, and on the Affections which may be mistaken for them. Third Edition, with Plates, 8vo, cloth, 18s.

"The addition of one-third of new matter to the present volume, and the care with which the whole has been revised and corrected, will, I trust, sufficiently prove my respect for the favourable opinion of my professional brethren, as evinced, not in this country only, but also on the European and American continents, by the sale of no less than six or seven editions and translations in as many years."—*Extract from Preface*.

"When his great work on 'Diseases of the Heart' was first published, the whole profession united in commendation of its excellence; and in the enlarged and improved form in which the author was fortunately enabled to reproduce it in a third edition, it is now universally acknowledged to be the best book on the subject in any language."—*British and Foreign Medical Review*.

DR. JOHNSTONE,
Physician to the General Hospital, and Lecturer on Materia Medica and Therapeutics at the
Royal School of Medicine, Birmingham.

A DISCOURSE ON THE PHENOMENA OF SENSATION, AS CONNECTED WITH THE MENTAL, PHYSICAL, AND INSTINCTIVE FACULTIES OF MAN. 8vo, cloth, 8s.

"This volume contains a good *resumé* of the labours of different physiologists; it exhibits careful and extensive reading, and a just and candid appreciation of the labours of other men. The student of the nervous system will derive benefit from the perusal of this work, which is very creditable to its author."—*Dublin Journal of Medical Science*.

MR. LAWRENCE, F.R.S.,
Surgeon to St. Bartholomew's Hospital.

A TREATISE ON RUPTURES. The Fifth Edition, considerably enlarged, 8vo, cloth, 16s.

"The peculiar advantage of the treatise of Mr. Lawrence is, that he explains his views on the anatomy of hernia, and the different varieties of the disease, in a manner which renders his book peculiarly useful to the student. It must be superfluous to express our opinion of its value to the surgical practitioner. As a treatise on hernia, presenting a complete view of the literature of the subject, it stands in the first rank."—*Edinburgh Medical and Surgical Journal*.

DR. MERRIMAN, F.L.S.

A SYNOPSIS OF THE VARIOUS KINDS OF DIFFICULT PARTURITION, with Practical Remarks on the Management of Labours. Fifth Edition, with Additions. Plates. 8vo, 12s.

"The merits of this work are already too well known, and too highly appreciated by the profession, to require that we should express, at any great length, the high opinion we entertain of what is universally regarded as one of the very best practical books of reference in our language."—*Dublin Medical Journal*.

MR. SHAW, M.R.C.S.,
Assistant-Apothecary to St. Bartholomew's Hospital.

THE MEDICAL REMEMBRANCER; or, PRACTICAL POCKET GUIDE: concisely pointing out the Treatment to be adopted in the First Moments of Danger from Poisoning, Drowning, Apoplexy, Burns, and other Accidents. To which are added, various useful Tables and Memoranda. Price 2s. 6d.

*** This Pocket Volume will be found a safe Practical Guide in all cases of sudden emergency, presenting at a glance the most appropriate remedy.

This day is published, in One handsome Volume, 8vo, cloth, with 125 Illustrations on Wood, price 20s.,

A TREATISE ON DISLOCATIONS AND FRACTURES OF THE JOINTS.

By Sir ASTLEY COOPER, BART., F.R.S.

Edited by BRANSBY COOPER, F.R.S., Surgeon to Guy's Hospital.

Sir Astley Cooper left very considerable additions in MS. for the express purpose of being introduced into this Edition. The whole of the Plates, including many additional subjects, have been redrawn and engraved. It has been the wish of the Publisher to mark his sense of the honour of having the work intrusted to his care, to produce a volume which, in its typographical execution, shall be pronounced worthy of its distinguished Author.

THE PRESCRIBER'S PHARMACOPŒIA ;

Containing all the Medicines in the London Pharmacopœia, arranged in CLASSES, according to their Action, with their Composition and Doses. By a PRACTISING PHYSICIAN. 32mo, cloth, price 2s. 6d.

A LETTER to Sir B. C. BRODIE, Bart., on the APPLICATION of the COLLEGIATE SYSTEM to the MEDICAL SCHOOLS of the METROPOLIS. By the Rev. J. H. NORTH, M.A., Chaplain to St. George's Hospital. Price 1s.

ON THE CONSTRUCTION AND MANAGEMENT OF HOSPITALS FOR THE INSANE. Translated from the German of Dr. Jacobi. With Introductory Observations by SAMUEL TUKE. 8vo, cloth, with Plates, price 9s.

"We have just received, with very great pleasure, a translation of Dr. Maximilian Jacobi's work, and we desire to recommend it strongly to our readers. The whole work is composed with a rare practical knowledge of the subject, which has seldom marked the recent publications of the same class. The observations both of the author and of Mr. Tuke are such as may suggest improvements in every institution for lunatics in the country."—*Medical Gazette*, August, 1841.

A TREATISE ON THE DISEASES OF INFANTS, founded on recent Clinical Observations and Investigations in Pathological Anatomy. By C. M. BILLARD, M.D., &c., Translated from the Third French Edition, with Notes, by JAMES STEWARD, M.D., Consulting Physician of the Northern Dispensary of the City of New York. 8vo, cloth, price 14s.

"We are rejoiced to see this work in an English dress, especially as the translation has been undertaken by a gentleman who has added much valuable matter, in an appendix of nearly a hundred pages."—*Medical Gazette*.

DR. MICHAEL UNDERWOOD.

A TREATISE ON THE DISEASES OF CHILDREN. With Directions for the Management of Infants from the Birth. Ninth Edition. Revised by SAMUEL MERRIMAN, M.D., F.L.S., and MARSHALL HALL, M.D., F.R.S. 8vo, boards, 15s.

London: JOHN CHURCHILL, Princes-street, Soho.

In the Press, and will be shortly Published,
A CLINICAL TREATISE ON THE DISEASES INCIDENTAL TO CHILDHOOD.—Part I. CEREBRAL DISEASES.

By P. HENNIS GREEN, M.B., &c.

London: John Churchill, Princes-street, Soho.

MEDICAL PRACTICE.—TO BE DISPOSED OF, in a genteel town in the south of England, the Practice of a General Practitioner, which has been conducted in the most respectable manner; and connected with it a good Freehold House, replete with every convenience—viz., Surgery and Consulting Rooms, Coach House, Stable, &c., and a good Garden.

Refer to ALFRED RANDALE, Esq., Surgeon, Finsbury-square; and Messrs. GALE, BAKER, and Co., Bouverie-street, Fleet-street, London.

MARQUIS OF ANGLESEY'S IMPROVED ARTIFICIAL LEG, Manufactured only by WILLIAM GRAY, Artificial Leg and Arm Maker, and

ANATOMICAL MACHINIST,

10, Charles-street, Grosvenor-square. Of whom may be had the most Modern and Approved Instruments for the Correction of Weakness or Deformity of the Human Frame; including Trusses, Crutches, Inclined Planes, and Hand Swings, for Curved Spine; Elastic Lacing Stockings and Knee-caps, Bandages, Belts, and Braces, of every description.

Directions for measuring, &c., will be forwarded to persons directing as above (if by letter); or Mr. GRAY can be consulted any day, Sunday excepted, between 11 and 4 o'clock.

ROYAL COLLEGE OF PHYSICIANS.—The LECTURES for the present year will be delivered in the Theatre of the College, on Wednesdays and Fridays, at Eight o'Clock in the Evening, in the following order:—

GULSTONIAN LECTURES.—Dr. MARSHALL HALL, February 2, 4, 9.

CROONIAN LECTURES.—Dr. TODD, February 11, 16, 18.

LECTURES ON MATERIA MEDICA.—Dr. ROUPELL, February 23, 25; March 2, 4, 9, 11.

LUMLEIAN LECTURES.—Dr. MAYO, March 16, 18, 23.

By Order of the President,
J. B. SEDGWICK.

BRAITHWAITE'S RETROSPECT, No. IV.

Just published, price 5s. 6d., greatly enlarged and bound in cloth, gilt lettered, No. IV. of

THE RETROSPECT of MEDICINE

AND SURGERY, embracing all the most Interesting and Practical Facts of all the British, and most of the Foreign Medical Journals for the last Six Months. Edited by W. BRAITHWAITE, Surgeon to the Leeds General Eye and Ear Infirmary, and Lecturer on Midwifery, and the Diseases of Women and Children, in the Leeds School of Medicine.

Also in the Press, a Third Edition of No. I., and a Second Edition of Nos. II. and III., price 4s. 6d. each. London: Simpkin, Marshall, and Co. Leeds: G. Cullingworth.

THE RETREAT, NEAR LEEDS.

THE PRACTICE at this Establishment, beautifully situated about a mile from the town, and which has been successfully carried on nearly twelve years, is **TO BE DISPOSED OF**, on account of Mr. Hare being about to change his residence.

The Furniture, &c., to be taken at a valuation.

The above offers an opportunity rarely occurring to a gentleman without or with a small family, wishing to devote himself to the study of Mental Disease. There is, within distance, a populous village, where there is scope for the cultivation of General Practice.

Principals only will be treated with. Apply to Mr. HARE, 32, East Parade, Leeds.

CITRATE of IRON.—The most valuable and beautiful Preparation of Iron for medicinal use is the Citrate; it is superior to every other salt of that metal from possessing the following qualities:—1st, it is agreeable to the taste; 2nd, it never disagrees with the stomach, 3rd, is perfectly and immediately soluble in water, making a clear ruby-red solution; 4th, it is equally, if not more efficacious in every case where Iron is prescribed than any other preparation; 5th, it is compatible with volatile and fixed alkalies and their carbonates, hydriodate of potash, and most other substances which decompose other salts of Iron. From these properties it is presumed that it must, as soon as it is known, entirely supersede the unscientific forms in which this metal is usually given, as Steel Wine, the old Carbonate of Iron, Griffiths's Mixture, and the general salts which are so prone to decomposition—dose, from five to ten grains, three times a day.

Prepared only by Bullock, Operative Chemist, 22, Conduit-street, Hanover-square, several years occupied in the Laboratories of the most distinguished Chemists of France and Germany.

Mr. Bullock has on sale Liquor Hydriodatis Arsenici et Hydrargyri (see Medical Gazette, Aug. 6, p. 765), Unguentum Anthracocali, Lapis Divinus, with all the new English, French, and German Chemical and Pharmaceutical Compounds.

Just Published, 8vo, Price 7s. 6d.,

THE NATURAL ORDER OF DISEASES; being an Easy Exposition of the True Principles of Medical practice, for the use of Students. By ROBERT STEVENS.

"A very useful work, and one which the student and young practitioner will doubtless greet with the approbation which the undertaking deserves."—*Lancet*.

J. Highley, 32, Fleet-street, London.

Just published, Second Edition, price One Shilling,

A LIST OF 2,000 MICROSCOPIC OBJECTS, with Remarks, &c. &c.

By ANDREW PRITCHARD.—Also, price 30s., A History of INFUSORIA, Living and Fossil; with 500 coloured Engravings of Animalcules.

Also, price 7s. 6d.

A List of all the PATENTS for Invention in the Arts, Manufactures, Agriculture, &c. &c.

Whittaker and Co., Ave Maria-lane; Pritchard, 162, Fleet-street.

RUPTURE.

COLE'S PATENT TRUSSES are universally admitted to be the most complete and effective instruments now in use for the relief and cure of HERNIA. The following opinions are selected, from a list too numerous for insertion in a single advertisement:—

"This is the only real improvement in the construction of a truss that ever came under my inspection."—George Birkbeck, M.D.

The late George Telford, Esq., of Widmore, who lived to a very advanced age, told Mr. Coles that he owed more gratitude to him and Dr. Birkbeck, than to any two men on the face of the earth.

"The pressure upon the ring is not merely equalised, but adjusts itself, without inconvenience to the wearer, to the different attitudes in which the body may be placed."—William Thomas Brande, Royal Institution.

"They make a more uniform pressure on the ring than the ball-and-socket pad can effect."—Sir A. Cooper, Bart., F.R.S., in his treatise on Hernia.

"The varied positions of the body in stooping and coughing do not alter the position of the pads, nor displace them."—Thomas Callaway, Guy's.

"It is my firm conviction that his trusses will be found more efficacious than any at present employed."—Henry Earle, F.R.S.

"I may add, that this truly scientific discovery justly entitles the inventor of such an instrument to universal confidence."—John Borthwick Gilchrist.

"They are the best trusses that have ever yet been got up."—Aston Key, Guy's.

"I consider these trusses calculated, beyond every other truss I have seen, to cure this disease in its earliest and simplest form."—Gideon Mantell, F.R.S., Crescent, Clapham.

There are two generals who have asserted that they have sent Mr. Coles upwards of three hundred patients, who now wear trusses. Why was not William the Fourth one of the number? Ask Mr. Robert Keate.

Manufactured only by Mr. COLES, Patentee of the Medicated Bands, for the cure of Rheumatism, 3, CHARING CROSS.

See advertisements in "Boyle's Court Guide," "Royal Blue Book," "Robson's Directory," and "Pope's Yearly Journal of Trade," "Railway Times," Dec. 25 and Jan. 8, for a poetical description of Cole's Railway Carriages; wherein Mr. Coles demonstrates by working models, that four ounces will draw a greater burden with anti-friction wheels than forty-four will do without them, that their axles will run level with the horizon and point to the centre of a curve.
