

This day is published, in One handsome Volume, 8vo, cloth, with 125 Illustrations on Wood, price 20s.,

A TREATISE ON DISLOCATIONS AND FRACTURES OF THE JOINTS.

By Sir ASTLEY COOPER, BART., F.R.S.

Edited by BRANSBY COOPER, F.R.S., Surgeon to Guy's Hospital.

Sir Astley Cooper left very considerable additions in MS. for the express purpose of being introduced into this Edition. The whole of the Plates, including many additional subjects, have been redrawn and engraved. It has been the wish of the Publisher to mark his sense of the honour of having the work intrusted to his care, to produce a volume which, in its typographical execution, shall be pronounced worthy of its distinguished Author.

ON THE CONSTRUCTION AND MANAGEMENT OF HOSPITALS FOR THE INSANE. Translated from the German of Dr. Jacobi. With Introductory Observations by SAMUEL TUKE. 8vo. cloth, with Plates, price 9s.

"We have just received, with very great pleasure, a translation of Dr. Maximilian Jacobi's work, and we desire to recommend it strongly to our readers. The whole work is composed with a rare practical knowledge of the subject, which has seldom marked the recent publications of the same class. The observations both of the author and of Mr. Tuke are such as may suggest improvements in every institution for lunatics in the country."—*Medical Gazette*, August, 1841.

A TREATISE ON THE DISEASES OF INFANTS, founded on recent Clinical Observations and Investigations in Pathological Anatomy. By C. M. BILLARD, M.D., &c., Translated from the Third French Edition, with Notes, by JAMES STEWARD, M.D., Consulting Physician of the Northern Dispensary of the City of New York. 8vo, cloth, price 14s.

"We are rejoiced to see this work in an English dress, especially as the translation has been undertaken by a gentleman who has added much valuable matter, in an appendix of nearly a hundred pages."—*Medical Gazette*.

A LETTER to Sir B. C. BRODIE, Bart., on the APPLICATION of the COLLEGIATE SYSTEM to the MEDICAL SCHOOLS of the METROPOLIS. By the Rev. J. H. NORTH, M.A., Chaplain to St. George's Hospital. Price 1s.

ON the NATURE and TREATMENT of STOMACH and URINARY DISEASES; being an Inquiry into the Connection of Diabetes, Calculus, and other Affections of the Kidney and Bladder, with Indigestion. By WILLIAM PROUT, M.D., F.R.S. Third Edition, with Six Engravings, 8vo. cloth, 20s.

"Those who have been benefitted by the labours and researches of Dr. Prout, will be delighted to see the announcement of the third edition, so much enlarged as to be almost a new work. . . . This table as contents will show the great extent of our author's inquiries, and we need hardly assure our readers that the subjects are treated with consummate ability."—*Dublin Journal of Medical Science*.

"Many of the doctrines contained in this work will certainly be embodied in the practice of English medical men during the next half-century. . . . We would gladly extend our analysis, did our limits permit, but that we believe we have enabled the reader to comprehend the philosophical plan on which the work is constructed, and the length to which we have already gone will show our sense of its value."—*Medical Gazette*.

A MANUAL OF PRACTICAL MIDWIFERY; containing a Description of Natural and Difficult Labours, with their Management. Intended chiefly as a Book of Reference for Students and Medical Practitioners. By JAMES REID, M.D., Lecturer on Midwifery, at the Webb-street Medical School. With Engravings on Wood, 24mo., cloth, 5s. 6d.

"The relative diameters of the pelvis and the foetal head, and the different presentations of the child, are all usefully represented by wood engravings among the letter-press, and the book is thus particularly well calculated to effect the objects of such a work."—*Lancet*.

A PRACTICAL WORK on the DISEASES of the EYE, and their TREATMENT, MEDICALLY, TOPICALLY, and by OPERATION. By FREDERICK TYRRELL, Senior Surgeon to the Royal London Ophthalmic Hospital, Surgeon to St. Thomas's Hospital, &c.; with Coloured Plates; 2 vols. 8vo. cloth, £1 16s.

"This work is written in a perspicuous style, and abounds in practical information; we add our earnest recommendation to our readers, to procure and read through the two volumes, assuring them that they will be richly repaid for their trouble. A series of plates, illustrative of the various diseases, are given."—*Dublin Journal of Medical Science*.

"We consider it a very valuable addition to the existing books on diseases of the eye, and we believe that it will prove eminently useful."—*Medico-Chirurgical Review*, October, 1840.

London: JOHN CHURCHILL, Princes-street, Soho.

MEDICAL WORKS

PUBLISHED BY
JOHN CHURCHILL, PRINCES STREET, SOHO.

MR. ATKINSON,

Late Senior Surgeon to the York County Hospital, and Vice-President of the Yorkshire Philosophical Society.

MEDICAL BIBLIOGRAPHY. Vol. I. Royal 8vo. 16s.

"We have never encountered so singular and remarkable a book. It unites the German research of a Plouquet with the ravings of Rabelais,—the humour of Sterne with the satire of Democritus,—the learning of Burton with the wit of Pindar."—*Dr. Johnson's Review*.

DR. HOPE, F.R.S.,

Late Physician to St. George's Hospital.

A TREATISE ON THE DISEASES OF THE HEART AND GREAT VESSELS, and on the Affections which may be mistaken for them. Third Edition, with Plates, 8vo, cloth, 18s.

"The addition of one-third of new matter to the present volume, and the care with which the whole has been revised and corrected, will, I trust, sufficiently prove my respect for the favourable opinion of my professional brethren, as evinced, not in this country only, but also on the European and American continents, by the sale of no less than six or seven editions and translations in as many years."—*Extract from Preface*.

"When his great work on 'Diseases of the Heart' was first published, the whole profession united in commendation of its excellence; and in the enlarged and improved form in which the author was fortunately enabled to reproduce it in a third edition, it is now universally acknowledged to be the best book on the subject in any language."—*British and Foreign Medical Review*.

DR. JOHNSTONE,

Physician to the General Hospital, and Lecturer on Materia Medica and Therapeutics at the Royal School of Medicine, Birmingham.

A DISCOURSE ON THE PHENOMENA OF SENSATION, AS CONNECTED WITH THE MENTAL, PHYSICAL, AND INSTINCTIVE FACULTIES OF MAN. 8vo, cloth, 8s.

"This volume contains a good *resumé* of the labours of different physiologists; it exhibits careful and extensive reading, and a just and candid appreciation of the labours of other men. The student of the nervous system will derive benefit from the perusal of this work, which is very creditable to its author."—*Dublin Journal of Medical Science*.

MR. LAWRENCE, F.R.S.,

Surgeon to St. Bartholomew's Hospital.

A TREATISE ON RUPTURES. The Fifth Edition, considerably enlarged, 8vo, cloth, 16s.

"The peculiar advantage of the treatise of Mr. Lawrence is, that he explains his views on the anatomy of hernia, and the different varieties of the disease, in a manner which renders his book peculiarly useful to the student. It must be superfluous to express our opinion of its value to the surgical practitioner. As a treatise on hernia, presenting a complete view of the literature of the subject, it stands in the first rank."—*Edinburgh Medical and Surgical Journal*.

DR. MERRIMAN, F.L.S.

A SYNOPSIS OF THE VARIOUS KINDS OF DIFFICULT PARTURITION, with Practical Remarks on the Management of Labours. Fifth Edition, with Additions. Plates. 8vo, 12s.

"The merits of this work are already too well known, and too highly appreciated by the profession, to require that we should express, at any great length, the high opinion we entertain of what is universally regarded as one of the very best practical books of reference in our language."—*Dublin Medical Journal*.

MR. SHAW, M.R.C.S.,

Assistant-Apothecary to St. Bartholomew's Hospital.

THE MEDICAL REMEMBRANCER; or, PRACTICAL POCKET

GUIDE: concisely pointing out the Treatment to be adopted in the First Moments of Danger from Poisoning, Drowning, Apoplexy, Burns, and other Accidents. To which are added, various useful Tables and Memoranda. Price 2s. 6d.

THE RETROSPECT of MEDICINE AND SURGERY, embracing all the most Interesting and Practical Facts of all the British, and most of the Foreign Medical Journals for the last Six Months. Edited by **W. BRAITHWAITE**, Surgeon to the Leeds General Eye and Ear Infirmary, and Lecturer on Midwifery, and the Diseases of Women and Children, in the Leeds School of Medicine.

Also in the Press, a Third Edition of No. I., and a Second Edition of Nos. II. and III., price 4s. 6d. each.

London: Simpkin, Marshall, and Co. Leeds: G. Cullingworth.

CITRATE of IRON.—The most valuable and beautiful Preparation of Iron for medicinal use is the Citrate; it is superior to every other salt of that metal from possessing the following qualities:—1st, it is agreeable to the taste; 2nd, it never disagrees with the stomach, 3rd, is perfectly and immediately soluble in water, making a clear ruby-red solution; 4th, it is equally, if not more efficacious in every case where Iron is prescribed than any other preparation; 5th, it is compatible with volatile and fixed alkalies and their carbonates, hydriodate of potash, and most other substances which decompose other salts of Iron. From these properties it is presumed that it must, as soon as it is known, entirely supersede the unscientific forms in which this metal is usually given, as Steel Wine, the old Carbonate of Iron, Griffiths's Mixture, and the general salts which are so prone to decomposition—dose, from five to ten grains, three times a day.

Prepared only by Bullock, Operative Chemist, 22, Conduit-street, Hanover-square, several years occupied in the Laboratories of the most distinguished Chemists of France and Germany.

THE MEDICAL RECORD, No. 2,

Published February 1, price 8d.—Information upon the atrocious Poor Law Tender Systems, and the Anatomy Act, contained in no other Journal; all the Medical News, Researches, and Improvements of the past Month, collected from various sources.

Steil, 20, Paternoster-row.

TO APOTHECARIES, DRUGGISTS, &c.

MOthes' CAPSULES OF COPAIBA.

"We, the undersigned, hereby appoint Mr. Thomas Butler, 4, Cheapside, London, our Sole Agent (in the place of Mr. Warrick) for the United Kingdom of Great Britain and Ireland, for the Sale of 'Mothes' Gelatinous Capsules of Balsam of Copaiba,' of which we are Sole Proprietors and Inventors.

"MOthes, LAMOUROUX, and Co.

"Paris, Dec. 17, 1841."

T. B. begs to intimate that, with a view to prevent the substitution of imitations of the Genuine Capsules of Copaiba, he will supply the latter at a considerable reduction from the price which has hitherto been charged for them in this country.

TO THE MEDICAL PROFESSION.

BUTLER'S CHARTA VESICATORIA.

—CANTHARADINE is the sole vesicating principle of this preparation, and is in such a form as to ensure the certainty of its action, and to avoid liability to injury from time under ordinary circumstances. It is less liable to produce strangury, and is quicker in its action than the Emplastrum Cantharidis, though attended with less pain. It is free from any objectionable smell, and from its elegance and portability, with its facility of adaptation to any required form, presents considerable advantages over the ordinary blister plasters.

In Sheets, 15 inches by 10, price 1s., sent by post.

Thomas Butler, Chemist, 4, Cheapside, St. Paul's, London.

APPAREIL DUVAL, as used at Guy's Hospital.—This Apparatus for administering Hot Air, Steam, and Sulphur Baths, having been used with great success at the above hospital for the last six months, as well as at the several hospitals in Paris, M. Duval is induced to recommend it to the notice of the profession in England, for their use in private practice, as well as in public institutions, it being very convenient and portable, and at the same time moderate in price.

A variety may be seen at the Dépôt, 62, Strand, Weiss and Son having been appointed Sole Agents; from whom a pamphlet, containing a translation of the Report of the Royal Medical Academy at Paris, with Plates and Descriptions, may be obtained.

EFFECTUAL RELIEF and CURE of PROLAPSUS UTERI.—The utter inefficiency of Pessaries, in all their various forms and sizes, having for a long time been the cause of great complaint, as well as of frequent applications for some contrivance to assist or to supersede their use, **Dr. HULL'S UTERO-ABDOMINAL SUPPORTER** is respectfully submitted to the notice of the Profession by Weiss and Son, as an instrument which has received the approval of many eminent professional men, both in London and in the Country. This Supporter has stood the test of four years' experience, during which time it has had an extensive sale, and given unqualified satisfaction in every instance when properly fitted.

Dr. Hull's pamphlet, containing full particulars, may be obtained of Weiss and Son, 62, Strand, London.
