BRAITHWAITE**, Surgeon to the Leeds General Eye and Ear Infirmary, and Lecturer on Midwifery, and the Diseases of Women and Children, in the Leeds School of Medicine.

Also in the Press, a Third Edition of No. I., and a Second Edition of Nos. II. and III., price 4s. 6d. each.

London: Simpkin, Marshall, and Co. Leeds: G. Cullingworth.

Just Published, 8vo. boards, price 10s.,

CATALOGUE of the PREPARATIONS ILLUSTRATIVE of NORMAL, ABNORMAL, and MORBID STRUCTURE, HUMAN and COMPARATIVE; constituting the ANATOMICAL MUSEUM of **GEORGE LANGSTAFF**, Member of the Royal College of Surgeons, &c. &c.

London: JOHN CHURCHILL, Princes-street, Soho.

THE ANATOMIST'S VADE-MECUM; a System of Human Anatomy. By **W. J. ERASMUS WILSON**, Lecturer on Anatomy and Physiology at the Middlesex Hospital Medical School. With 150 Illustrations, price 12s. 6d.,

No expense has been spared in wood-cut illustrations to render this work the most beautiful and perfect volume that has ever been placed in the hands of the student. It has already received a very extensive sale, while its republication in America and Germany proves that its merits are widely appreciated.

"This is probably the prettiest medical book ever published, and we believe its intrinsic merits are in keeping with its exterior advantages, having examined it sufficiently to satisfy us that it may be recommended to the student as no less distinguished by its accuracy and clearness of description than by its typographical elegance. The wood-cuts are exquisite."—*British and Foreign Medical Review*.

"Without exception the most beautiful specimen of book making we have ever seen; it is got up in the very best style. Mr. Wilson has executed his share of the work in a very creditable manner; as a proof of this, we need only refer the reader to the admirable description of the nervous and lymphatic systems, &c."—*Dublin Medical Journal*.

THE CAUSE and TREATMENT of CURVATURE of the SPINE, and DISEASES of the VERTEBRAL COLUMN, with Cases. By **E. W. TUSON**, F.R.S., F.L.S., Surgeon to the Middlesex Hospital. 8vo. cloth, with 26 plates, price 10s. 6d.

"Mr. Tuson's treatment is sound and judicious, and there is much solid and useful information to be obtained from a perusal of his pages. We recommend the volume as deserving of the attention of our readers."—*Lancet*.

"The present work being a 'Practical Treatise on the Affections of the Spine' may be recommended to the attentive perusal of those entrusted with the care of young persons. We have reason to know that extension by the use of Mr. Tuson's couch and its attendant exercises, has been very successfully applied to many of his private patients; and in affording our testimony to the professional merits of this gentleman, we confer a benefit on the public."—*Church Magazine*.

"We are bound to acknowledge that Mr. Tuson has combated two great errors,—the obstinate adherence to tight lacing, and the absurd notion of the applicability of any one plan of treatment for all cases indiscriminately; and also that he makes frequent reference to the physiological causes of the malady."—*Athenaeum*.

"Mr. Tuson has, with great talent, exposed the follies of parents, pointed out in a most scientific manner the causes of the derangement of structure, and has, in clear language, told us his plan of cure. It is simple, and admirably adapted to the cases of which he speaks."—*Statesman*.

London: JOHN CHURCHILL, Princes-street, Soho.

PROVINCIAL MEDICAL AND SURGICAL ADVERTISER.

The February Number of
THE LONDON and EDINBURGH
MONTHLY JOURNAL of MEDICAL
SCIENCE, price 3s, Double Number, contains 152

RYAL COLLEGE OF PHYSI-
CIANS, LONDON.—Candidates for the Town or Country License may receive, from a Member of the College, assistance, which will materially contribute to their success.

Apply to M. D., 22, Cateaton-street, City.

THE RETREAT, NEAR LEEDS.

THE PRACTICE at this Establish-
ment, beautifully situated about a mile from the town, and which has been successfully carried on nearly twelve years, is TO BE DISPOSED OF, on account of Mr. Hare being about to change his residence.

The Furniture, &c., to be taken at a valuation.

The above offers an opportunity rarely occurring to a gentleman without or with a small family, wishing to devote himself to the study of Mental Disease. There is, within distance, a populous village, where there is scope for the cultivation of General Practice.

Principals only will be treated with. Apply to Mr. HARE, 32, East Parade, Leeds.

TO APOTHECARIES, DRUGGISTS, &c.

MOTHE'S CAPSULES OF COPAIBA.

"We, the undersigned, hereby appoint Mr. Thomas Butler, 4, Cheapside, London, our Sole Agent (in the place of Mr. Warrick) for the United Kingdom of Great Britain and Ireland, for the Sale of 'Mothe's' Gelatinous Capsules of Balsam of Copaiaba,' of which we are Sole Proprietors and Inventors.

"MOTHE, LAMOURoux, and Co.

"Paris, Dec. 17, 1841."

T. B. begs to intimate that, with a view to prevent the substitution of imitations of the Genuine Capsules of Copaiaba, he will supply the latter at a considerable reduction from the price which has hitherto been charged for them in this country.

THE NATURAL HISTORY OF GREAT BRITAIN.

This series of works is illustrated by more than 1,700 Engravings; every species has been drawn and engraved under the immediate inspection of the authors; the best artists have been employed, and no care or expense spared. A few copies of each have been printed on large paper.

A GENERAL OUTLINE of the ANIMAL KINGDOM, and MANUAL of COMPARATIVE ANATOMY. By T. RYMER JONES, F.Z.S., Professor of Comparative Anatomy in King's College, London; Fullerian Professor of Physiology in the Royal Institution of Great Britain. One thick volume 8vo, containing nearly 350 illustrations. 38s.

"The best work of the kind in any language."—*Edinburgh Monthly Journal of Medical Science.*

"A standard work of extraordinary worth."—*St. James's Chronicle.*

Mr. BELL'S HISTORY of BRITISH QUADRUPEDS. 28s.

Mr. YARRELL'S HISTORY of BRITISH BIRDS. Vol. I., 28s. Vol. II., 35s.; and Parts 26, 27, and 28, 2s. 6d. each.

Mr. BELL'S HISTORY of BRITISH REPTILES. 8s. 6d.

Mr. YARRELL'S HISTORY of BRITISH FISHES. Second Edition, enlarged, 2 vols., £3.

Mr. SELBY'S HISTORY of BRITISH FOREST TREES. Seven Parts, at 2s. 6d. each. Will be completed in Ten.

John Van Voorst, 1, Paternoster-row.

PRESERVED VEGETABLE JUICES.

Mr. BENTLEY, Operative Chemist to His Royal Highness the Duke of Cambridge, begs to invite the attention of the Medical Profession to the expressed Juices of Aconite, Belladonna, Conium, Colchicum, Digitalis, Hyoscyamus, Taraxacum, &c. &c., preserved according to his method, and which may be procured in any quantity at his establishment, 41, Moorgate-street, Bank; or at any of the Wholesale Houses.

SALMON, ODY, and CO., most respectfully inform the Public that their PATENT SELF-ADJUSTING TRUSSES have been in use 30 years, and continue to be recommended by the most eminent SURGEONS in town and country; they will answer for right or left side, also admit of increase and decrease in size and force, requiring no under strap or any galling bandage.—N.B. Persons in the country are requested to send the circumference of the body one inch below the hips. Sold by one or more druggist in every city and provincial town in the United Kingdom.—MANUFACTORY, 292, STRAND, LONDON.

TO THE MEDICAL PROFESSION.

BUTLER'S CHARTA VESICATO-
RIA.—CANTHARADINE is the sole vesicating principle of this preparation, and is in such a form as to ensure the certainty of its action, and to avoid liability to injury from time under ordinary circumstances. It is less liable to produce strangury, and is quicker in its action than the Emplastrum Cantharidis, though attended with less pain. It is free from any objectionable smell, and from its elegance and portability, with its facility of adaptation to any required form, presents considerable advantages over the ordinary blister plasters.

In Sheets, 15 inches by 10, price 1s., sent by post.

Thomas Butler, Chemist, 4, Cheapside, St. Paul's, London.

Just Published, 32mo, cloth, price 2s. 6d.,

THE PRESCRIBER'S PHARMACOPÆIA ;

CONTAINING

ALL THE MEDICINES IN THE LONDON PHARMACOPÆIA,

ARRANGED IN CLASSES, ACCORDING TO THEIR ACTION,

WITH THEIR

COMPOSITION AND DOSES.

BY A PRACTISING PHYSICIAN.

“ Never was half-a-crown better spent than in the purchase of this little ‘ *Thesaurus Medicaminum*. ’ This little work, with our visiting-book and stethoscope, are our daily companions in the carriage.”—*Dr. Johnson’s Review*, January, 1842.

“ A great deal of useful information is here brought together in a very small compass, and the little work is well suited to become the pocket companion of the young practitioner, as well as an useful reference, upon many occasions, to those whose occupation will not permit them to progress with the long strides of modern improvement. To those who feel somewhat at a loss occasionally in perusing a prescription, we recommend the little unpretending assistant before us very strongly, and we feel assured that by adopting our recommendation they will consider their half-crown very judiciously and usefully laid out.”—*Lancet*, October, 1841.

“ The utility of this book is in the inverse ratio of its size—sufficient commendation for a tome which will easily fit in a waistcoat-pocket of most moderate dimensions. Armed herewith, the practitioner, most completely deficient in powers of memory, may approach the bedside with no misgivings as to his power of hitting upon the fittest medicine of any given class for his prescription; here, in truth, the various agents referable to each are carefully collected and judiciously arranged for immediate reference. The composition of each officinal preparation is given, the usual modes of administration, and the dose stated, and a list of incompatibles added.

“ What better employment for the short-memoried (to speak Germanicè) physician, as he rolls along to his place of rendezvous, than to brighten his acquaintance with drugs, simple and compound, by reading such well-condensed enunciations of all important particulars connected with each, as that we extract relating to opium ? * * * * *

“ The design of this little work is admirable, and the execution is not inferior to the conception. No practitioner, especially of the youthful class, should be without it.”—*Provincial Medical and Surgical Journal*, October, 1841.

“ The title-page of this little book indicates its general character; and the author’s advertisement explains so well his reasons for compiling it and his grounds for thinking it likely to be useful, that we transcribe the greater portion of it :—

“ As this little work had its origin in a want daily experienced by the compiler in his practice, he believes that it will be useful to a numerous class of practitioners who possess a memory of the same general character as his own. He has always had great difficulty in calling to mind, at will, a number of heterogeneous particulars which had not been originally contemplated in a systematic order, although he might be well acquainted with them individually. This difficulty he has often painfully experienced when attempting to pass in review the various drugs and officinal formulæ suited to fulfil any special indication that presented itself in the treatment of a disease: and he has frequently witnessed, in the practice of others, a barrenness of prescription and a consequent confined range of resources, originating in the same cause, which could not fail to be injurious to the patient and the reputation of the physician. It is expected that the habit of viewing the articles of the *Materia Medica* in some such order as that adopted in the present compilation, will tend, in some degree at least, to remedy these evils.”—*British and Foreign Medical Review*.

Price 2s. 6d.,

THE MEDICAL REMEMBRANCER ;

OR,

PRACTICAL POCKET GUIDE ;

Concise pointing out the Treatment to be adopted in the First Moments of Danger from Poisoning, Drowning, Apoplexy, Burns, and other Accidents.
