

MEDICAL WORKS

PUBLISHED BY

JOHN CHURCHILL, PRINCES STREET, SOHO.

Just Published, illustrated with Two Hundred and Thirty Wood-cuts, 8vo, cloth, 12s.

ELEMENTS of NATURAL PHILOSOPHY; being an Experimental Introduction to the Study of the Physical Sciences. By GOLDING BIRD, M.D., F.L.S., F.G.S., Lecturer on Natural Philosophy at Guy's Hospital.

"By the appearance of Dr. Bird's work, the student has now all that he can desire in one neat, concise, and well-digested volume. The elements of natural philosophy are explained in very simple language, and illustrated by numerous woodcuts."—*Medical Gazette*.

"This work teaches us the elements of the entire circle of natural philosophy in the clearest and most perspicuous manner. Light, magnetism, dynamics, meteorology, electricity, &c., are set before us in such simple forms, and so forcible a way, that we cannot help understanding their laws, their operation, and the remarkable phenomena by which they are accompanied or signified. As a volume of useful and beautiful instruction for the young, and as a work of general value to both sexes, we cordially recommend it."—*Literary Gazette*.

"This work marks an advance which has long been wanting in our system of instruction. Dr. Bird has succeeded in producing an elementary work of great merit."—*Athenæum*.

Just Published, 8vo, cloth, with Plates, price 10s 6d.

The PATHOLOGY and DIAGNOSIS of DISEASES of the CHEST; illustrated chiefly by a Rational Exposition of their Physical Signs. By Dr. WILLIAMS, F.R.S., Professor of the Practice of Medicine, University College, London. Fourth Edition, with much important new matter.

"The fact that a fourth edition is called for is a very good argument in favour of any book. But this was not necessary in the case of Dr. Williams; it was well known to the profession as one of the best manuals of diseases of the chest we possess."—*Dublin Medical Journal*.

"Of all the works on this subject, we are inclined much to prefer that of Dr. Williams."—*Medical Gazette*.

"Evidently written by a man thoroughly acquainted with his subject."—*Lancet*.

"We strongly recommend this work to the attention of auscultators."—*Medico-Chir. Review*.

"By far the most important addition to our literature on this subject," &c.—*See Dr. Forbes's Preface to Trans. of Laennec*.

"Laennec, Andral, and Williams, the best writers on auscultation."—*Dr. Copland's Dict.*

PRACTICAL or OPERATIVE SURGERY, illustrated with 150 Engravings on Wood. By ROBERT LISTON, Esq., Surgeon to the North London Hospital. This Work contains ample information on Injuries and Diseases of Joints and Bones—On Tumours—On Affections of the Gullet and Windpipe—On Diseases of the Genito-Urinary Organs and Rectum, Stone, Stricture, Fistula, &c.—On Hernia, Congenital Deformities and Deficiencies, &c. Third Edition, 8vo., cloth, price 22s.

DR. JOHNSTONE,

Physician to the General Hospital, and Lecturer on Materia Medica and Therapeutics at the Royal School of Medicine, Birmingham.

A DISCOURSE ON THE PHENOMENA OF SENSATION, AS CONNECTED WITH THE MENTAL, PHYSICAL, AND INSTINCTIVE FACULTIES OF MAN. 8vo, cloth, 8s.

"This volume contains a good *resumé* of the labours of different physiologists; it exhibits careful and extensive reading, and a just and candid appreciation of the labours of other men. The student of the nervous system will derive benefit from the perusal of this work, which is very creditable to its author."—*Dublin Journal of Medical Science*.

DR. HOPE, F.R.S.,

Late Physician to St. George's Hospital.

A TREATISE ON THE DISEASES OF THE HEART AND GREAT VESSELS, and on the Affections which may be mistaken for them. Third Edition, with Plates, 8vo, cloth, 18s.

"The addition of one-third of new matter to the present volume, and the care with which the whole has been revised and corrected, will, I trust, sufficiently prove my respect for the favourable opinion of my professional brethren, as evinced, not in this country only, but also on the European and American continents, by the sale of no less than six or seven editions and translations in as many years."—*Extract from Preface*.

"When his great work on 'Diseases of the Heart' was first published, the whole profession united in commendation of its excellence; and in the enlarged and improved form in which the author was fortunately enabled to reproduce it in a third edition, it is now universally acknowledged to be the best book on the subject in any language."—*British and Foreign Medical Review*.

ROYAL COLLEGE OF PHYSICIANS, LONDON.—Candidates for the Town or Country License may receive, from a Member of the College, assistance, which will materially contribute to their success.

Apply to M. D., 22, Cateaton-street, City.

Just Published, in one handsome thick Octavo Volume, cloth, price 22s,
ILLUSTRATED WITH EIGHTY-FOUR PLATES ON STEEL,
AND
TWENTY ENGRAVINGS ON WOOD,
THE
**PRINCIPLES AND PRACTICE OF OBSTETRIC
MEDICINE AND SURGERY,**
IN REFERENCE TO THE PROCESS OF PARTURITION.

By F. H. RAMSBOTHAM, M.D.,

Physician to the Royal Maternity Charity, and Lecturer on Midwifery at the London Hospital, &c.

"The work of Dr. Ramsbotham may be described as a complete system of the principles and practice of midwifery; and the author has been at very great pains, indeed, to present a just and useful view of the present state of obstetrical knowledge. * * * In short, we regard this work, between accurate descriptions, and judicious directions and instructions, and useful illustrations, as by far the most able work on the principles and practice of midwifery, that has appeared for a long time. Dr. Ramsbotham has contrived to infuse a larger proportion of common sense, and plain unpretending practical knowledge into his work, than is commonly found in works on this subject; and as such, we have great pleasure in recommending it most strongly to the attention of obstetrical practitioners."—*Edinburgh Medical and Surgical Journal*.

"We can speak very favourably both of the letter-press and of the plates, and as a large sale can only remunerate the publisher, we wish him that large sale which he deserves."—*Dr. Johnson's Review*.

"We strongly recommend the work of Dr. Ramsbotham to all our obstetrical readers, especially to those who are entering upon practice. It is not only one of the cheapest, but one of the most beautiful works in midwifery."—*British and Foreign Medical Review*.

"It is the book on midwifery for students: clear, but not too minute in its details, and sound in its practical instructions. It is so completely illustrated by plates (admirably chosen and executed) that the student must be stupid indeed who does not understand the details of this branch of the science, so far at least as description can make them intelligible."—*Dublin Journal of Medical Science*.

"This is one of the most beautiful works which have lately issued from the medical press; and is alike creditable to the talents of the author and the enterprise of the publisher. It is a good and thoroughly practical treatise; the different subjects are laid down in a clear and perspicuous form, and whatever is of importance is illustrated by first-rate engravings. A remarkable feature of this work, which ought to be mentioned, is its extraordinary cheapness. As a work conveying good, sound, practical precepts, and clearly demonstrating the doctrines of obstetrical science, we can confidently recommend it either to the student or practitioner."—*Edinburgh Journal of Medical Science*.

"This work forms a very handsome volume. Dr. Ramsbotham has treated the subject in a manner worthy of the reputation he possesses, and has succeeded in forming a book of reference for practitioners, and a solid and easy guide for students. Looking at the contents of the volume, and its remarkably low price, we have no hesitation in saying that it has no parallel in the history of publishing."—*Provincial Medical and Surgical Journal*.

"There is so much in the practice of midwifery which cannot be understood without pictorial illustrations, that they become almost essential to the student; but hitherto the expense has proved an impediment to their being employed so much as desirable. The work has only to be known to make the demand for it very extensive."—*Medical Gazette*.

"We strongly recommend this work; it is a useful contribution to medical literature, and decidedly the cheapest work which has ever issued from the medical press of this country."—*Lancet*.

"We feel much pleasure in recommending to the notice of the profession one of the cheapest and most elegant productions of the medical press of the present day. The text is written in a clear, concise, and simple style. We offer our most sincere wishes that the undertaking may enjoy all the success which it well merits."—*Dublin Medical Press*.

London: JOHN CHURCHILL, Princes-street, Soho.

Just Published, price 1s 6d,
AN EXPOSITION of the PATHO-
 LOGY of HYSTERIA, elucidated by a
 reference to the Origin, Pathology, and Treatment of
 Hysterical Amaurosis. By EDWARD O. HOCKEN, M.D.
 S. Highley, 32, Fleet-street, London.

SECOND EDITION.

Now ready, in 1 Vol. 8vo, pp. 320, price 5s,
HYDROPATHY; or, THE COLD
 WATER CURE, as practised by VINCENT
 PRIESSNITZ, at Gräfenberg, Silesia, Austria; show-
 ing how this extraordinary man, by the sole aid of

Hewlett and Goddard, Wholesale Druggists, 68, Hatton-garden.

This day is Published, price 3s,
THE ADMINISTRATION of MEDI-
 CAL RELIEF to the POOR, under the Poor-
 Law Amendment Act, and other Legislative Provi-
 sions for the Public Health, considered in the Reports
 of the Poor-Law Committee of the Provincial Medi-
 cal and Surgical Association: to which are appended,
 certain Clauses suggested for insertion in the con-
 templated Bill for the further Amendment of the Poor-
 Laws.

London: Sherwood, Gilbert, and Piper, Pater-
 noster-row.

Just Published, 8vo, price 7s,
FOURNET on AUSCULTATION,
 and on the Diagnosis, Curability, and Treat-
 ment of the First Stage of Consumption. Part the
 First. Translated from the French, with Notes. By
 THOMAS BRADY, M.B., Professor of Medical Jurispru-
 dence to the College of Physicians, and to the Dublin
 Law Institute; Physician to Cork-street Hospital, &c.

"M. Fournet has given a new character of precision
 to many phenomena already imperfectly known, added
 some new ones, and taken a more complete and philo-
 sophical view of the system of respiratory signs than
 any previous author. He has pointed out the route,
 in his diligent investigations of the two murmurs, to,
 we doubt not, numerous important additions to semie-
 ology; and taught us how much remains unexplored
 in this, as was hitherto supposed, almost exhausted
 field. . . . He has assuredly himself learned the
 means of detecting consumption earlier than his
 predecessors. Some cases of the affection diagnosti-
 cated in the very incipient stage (and correctly, as
 the event proved), drew this admission from some of
 the members of the Academy of Medicine."—*British
 and Foreign Quarterly Review*.

London: John Churchill. Dublin: Fannin and C

TO APOTHECARIES, DRUGGISTS, &c.
MOTHES' CAPSULES OF
 COPAIBA.

"We, the undersigned, hereby appoint Mr. Thomas
 Butler, 4, Cheapside, London, our Sole Agent (in the
 place of Mr. Warrick) for the United Kingdom of
 Great Britain and Ireland, for the Sale of 'Mothes'
 Gelatinous Capsules of Balsam of Copaiba,' of which
 we are Sole Proprietors and Inventors.

"MOTHES, LAMOUROUX, and Co.

"Paris, Dec. 17, 1841."

T. B. begs to intimate that, with a view to prevent
 the substitution of imitations of the Genuine Capsules
 of Copaiba, he will supply the latter at a considerable
 reduction from the price which has hitherto been
 charged for them in this country.

TO THE MEDICAL PROFESSION.
BUTLER'S CHARTA VESICATO-

RIA.—CANTHARADINE is the sole vesicating
 principle of this preparation, and is in such a form as
 to ensure the certainty of its action, and to avoid
 liability to injury from time under ordinary circum-
 stances. It is less liable to produce strangury, and is
 quicker in its action than the Emplastrum Cantharidis,
 though attended with less pain. It is free from any
 objectionable smell, and from its elegance and porta-
 bility, with its facility of adaptation to any required
 form, presents considerable advantages over the ordi-
 nary blister plasters.

In Sheets, 15 inches by 10, price 1s., sent by post.

Thomas Butler, Chemist Cheapside, St. Paul's,
 London.
