

PROVINCIAL MEDICAL AND SURGICAL ADVERTISER.

Just Published, 8vo, cloth, price 20s,

WITH ONE HUNDRED AND TWENTY-FIVE ILLUSTRATIONS ON WOOD,

A TREATISE

ON

DISLOCATIONS & FRACTURES OF THE JOINTS.

By Sir ASTLEY COOPER, BART., F.R.S., &c.

A New Edition, much enlarged, Edited by BRANSBY B. COOPER, F.R.S., Surgeon to Guy's Hospital.

\* \* \* Sir Astley Cooper left very considerable additions in MS. for the express purpose of being introduced into this Edition. The whole of the Plates, including many additional subjects, have been redrawn and engraved. It has been the wish of the Publisher to mark his sense of the honour of having the work intrusted to his care, to produce a volume which, in its typographical execution, shall be pronounced worthy of its distinguished Author.

"Among the various works for which the profession were indebted to Sir Astley Cooper, none was more worthy of his fame, none more useful to, or more required, by his surgical brethren of every stage and rank, than that of which we have now before us a new, revised, and enlarged edition. It must be well known to all our surgical readers that Sir Astley's work on dislocations and fractures was the first in which was given a systematic, clear, and precise diagnosis of the dislocations of various joints. He was one of the first who insisted upon, and who proved by a mass of evidence which few but he could have accumulated, the great importance of constitutional means in enabling the surgeon to reduce dislocations. Before he, too, opened his rich store of practical information, many limbs with complicated dislocations had been condemned to the amputating knife, which he showed might have been trusted to simple treatment and the remedial powers of nature. These, and many more equally important and valuable principles, were established by Sir Astley in his work on dislocations and fractures. Its merits were quickly and duly appreciated by surgeons in this and foreign countries. It run through many and numerous editions, and still another was required to keep pace with the demand. It is now given to us by an editor who is well known to be fully capable of executing even so responsible a duty with every credit to himself, and advantage to the profession. The task, indeed, of bringing out a new edition of this important work was assigned to Mr. Bransby Cooper by Sir Astley, some time prior to his lamented decease. In his preface the editor expresses the gratification he has experienced from the sentiments conveyed, in the mass of correspondence, as well as from the additional cases which have been contributed from various sources since the last edition, as they all tend to form so many various yet concurrent testimonies of the soundness of the principles which it is the object of the work to inculcate. From the sources here referred to, from his own practice, and from much new matter afforded by Sir Astley himself, Mr. Bransby Cooper has added considerably to the present edition. \* \* \*

"We have no intention of entering into a detailed account of the contents of the work, or of a critical examination of its merits. Both are well known to the profession. It would be a libel upon a practitioner of surgery to suppose him unacquainted with Sir Astley Cooper's work on dislocations and fractures; and imperfectly indeed will the surgical student aim at attaining information upon the very important branch of surgery upon which it treats, if he does not consider it as a guide and a book of reference. \* \* \*

"If we were to consult our inclination, we might extend much further our notice and extracts from the new matter added by Mr. Cooper to his edition of the celebrated work of his equally celebrated relative. But we must stop, and we do so with the less regret, because we are sure that the book itself will be in the possession of every surgical practitioner, who is anxious for the best information upon the very important and difficult branch of surgery upon which it treats. Independently of those improvements in this new and enlarged edition, to which we have already referred, there are still others which too strongly claim our notice and approbation to be silently passed over. The octavo form in which the work is now presented to us, is much more convenient than the original quarto size. The engravings executed by Bagg, with his wonted clearness, elegance, and accuracy, are now, too, placed in immediate connection with the text they are intended to elucidate; an advantage which we think every reader will appreciate; for to turn to the end of a book for graphic illustrations, is at once very inconvenient, and distracting to the attention of the student. The thanks Mr. Cooper returns to his publisher, for the care which has been bestowed upon the general arrangement of the publication, and the minute details of its typographical execution, are justly merited. We must observe also, that the price of this edition is only half that of the former editions."—*Medical Gazette*.

DR. HOPE, F.R.S.,

Late Physician to St. George's Hospital.

A TREATISE ON THE DISEASES OF THE HEART AND  
GREAT VESSELS, and on the Affections which may be mistaken for them. Third Edition, with  
Plates, 8vo, cloth, 18s.

"The addition of one-third of new matter to the present volume, and the care with which the whole has been revised and corrected, will, I trust, sufficiently prove my respect for the favourable opinion of my professional brethren, as evinced, not in this country only, but also on the European and American continents, by the sale of no less than six or seven editions and translations in as many years."—*Extract from Preface*.

"When his great work on 'Diseases of the Heart' was first published, the whole profession united in commendation of its excellence; and in the enlarged and improved form in which the author was fortunately enabled to reproduce it in a third edition, it is now universally acknowledged to be the best book on the subject in any language."—*British and Foreign Medical Review*.

London: JOHN CHURCHILL, Princes-street, Soho.

**WORKS ON PHARMACY,**

PUBLISHED BY

JOHN CHURCHILL, PRINCES-STREET, SOHO.

**A COMPENDIUM of MATERIA MEDICA and PHARMACY**, adapted to the London Pharmacopœia; embodying all the new French, American, and Indian Medicines, and comprising a Summary of Practical Toxicology. By J. HUNTER LANE, M.D., F.L.S. 18mo, cloth, price 5s.

“Dr. Lane’s volume is on the same general plan as Dr. Thompson’s long known Conspectus; but it is much fuller in its details, more especially in the chemical department. It seems carefully compiled, is well suited for its purpose, and cannot fail to be useful.”—*British and Foreign Medical Review.*

“This work contains a concise but comprehensive account of all the simple and compound medicines in use; it contains a greater amount of chemical information than we often meet with in a small work on pharmacy. The work is worthy of recommendation.”—*Lancet.*

**The UNIVERSAL PHARMACO-PœIA**; or, a Practical Formulary of Hospitals, both British and Foreign. By MICHAEL RYAN, M.D. Third Edition, price 5s 6d, cloth.

“This work is a conspectus of the best prescriptions of the most celebrated physicians and surgeons throughout the civilised world. It includes every medicine described in the Pharmacopœias, with the doses and uses, the rules for prescribing, the actions of medicines on the economy, the various modes of administering them, and the principles on which they are compounded.”

**The CYCLOPÆDIA of PRACTICAL RECEIPTS** in all the USEFUL and DOMESTIC ARTS; being a complete Book of Reference for the Manufacturer, Tradesman, and Amateur. By a PRACTICAL CHEMIST. Post 8vo, cloth, price 7s 6d.

“This work embraces all the latest improvements in science and art. No receipt has been admitted that is not of actual utility, and the writer has been particular to illustrate the plan of producing exact imitations of most imported articles, such as brandies, perfumery, wines, liqueurs, &c., derived from the processes of various laboratories, both abroad and at home, which the author has personally inspected on an extensive scale, thus placing within the reach of every one the means of meeting the increased competition in trade. The work consists of more than 3,000 practical receipts.”

**MAGNACOPIA**; a Library of Useful and Profitable Information for the Chemist and Drug-gist, Apothecary, Surgeon-Dentist, Oilman, &c.; containing several hundred New Forms, with Comments, and a variety of other information. By WILLIAM BATEMAN, Practical Chemist. Third Edition, price 6s.

“The advantage of being as wise as one’s neighbour in matters of business tends materially to the augmentation of our finances. Most of the forms given in this book are so partially known (and many of them not at all), that to those engaged in selling, by wholesale or retail, the saving, in many instances, will be very great indeed. In fine, the practitioner, the trader, and the consumer, meet their right hand friend at every page.”

This day is Published, in One handsome Volume, with numerous Illustrations on Steel and Wood, 8vo, cloth, 20s.

**PRINCIPLES of HUMAN PHYSIOLOGY**, with their chief Applications to Pathology, Therapeutics, Hygiene, and Forensic Medicine. By WILLIAM B. CARPENTER, M.D., Lecturer on Physiology in the Bristol Medical School.

London: John Churchill, Princes-street, Soho.

**DR. ROWE ON NERVOUS DISEASES.**

Just Published, Fourth Edition, revised and enlarged, 8vo, price 5s 6d,

**PRACTICAL OBSERVATIONS** on NERVOUS DISEASES originating from MORBID DERANGEMENT of the LIVER, STOMACH, &c., occasioning low spirits and indigestion; also on DISORDERS PRODUCED by TROPICAL CLIMATES upon EUROPEAN CONSTITUTIONS; with Cases illustrating the most successful Mode of Treatment. By GEORGE ROBERT ROWE, M.D., F.S.A., Member of the Royal College of Physicians, London, and of the Royal College of Surgeons.

“Anxious to present the public with the results of thirty years practical observations and experience.”—*See Author’s Preface.*

London: John Churchill, Princes-street, Soho.

FOR

**Medical & Surgical Examination.**

I.

**A MANUAL FOR THE COLLEGE OF SURGEONS**; intended for the Use of Candidates for Examination, and Practitioners. By JOHN STEGALL, M.D., and M. W. HILLES, Surgeon. One thick vol. 12mo, cloth, 12s. 6d.

II.

**A MANUAL FOR THE USE OF STUDENTS PREPARING FOR EXAMINATION AT APOTHECARIES’ HALL.** Ninth Edition. 12mo, cloth, 8s. 6d.

III.

**GREGORY’S CONSPECTUS MEDICINÆ THEORETICÆ.** The First Part, containing the Original Text, with an Ordo Verborum and Literal Translation. 12mo, cloth, 10s.

IV.

**THE FIRST FOUR BOOKS OF CELSUS.** Containing the Text, Ordo Verborum, and Translation. 12mo, cloth, 8s.

VI.

**THE DECOMPOSITIONS OF THE NEW LONDON PHARMACOPÆIA**; with Observations on the most active Preparations. 12mo, boards, 3s.

VII.

**THE ELEMENTS OF BOTANY.** Designed for the Use of Medical Students. With Nine Coloured Plates. 24mo, cloth, 6s.

London: John Churchill, Princes-street, Soho,

**M**EDICAL.—A Member of the Royal College of Surgeons, and Licentiate of the Apothecaries' Hall, is in want of a situation as Visiting and Dispensing Assistant in Town or Country. Unexceptionable references as to character and professional attainments given.

Address to Omega, University College Lodge.

**P**RESERVED VEGETABLE JUICES.—Mr. BENTLEY, Operative Chemist to His Royal Highness the Duke of Cambridge, begs to invite the attention of the Medical Profession to the expressed Juices of Aconite, Belladonna, Conium, Colchicum, Digitalis, Hyoscyamus, Taraxacum, &c. &c., preserved according to his method, and which may be procured in any quantity at his establishment, 41, Moorgate-street, Bank; or at any of the Wholesale Houses.

**W**ILLIAM GRAY, 19, DAVIES-STREET, BERKELEY-SQUARE, LONDON (late of 10, Charles-street, Grosvenor-square), under the immediate Patronage of the most eminent Surgeons, Manufactures

The Marquis of Anglesey's Improved Artificial Leg; Improved Artificial Arms; Improved Instruments for Division of Tendons; Extending Knee Machines for Contractions; Arm do.; Crutches of all kinds; Invalid Sticks; Trusses of every description; Weak Leg Instruments; Exercising Swings, Reclining Planes, &c., for distorted Spines; Sliding Arm Slings, and Leg Rests; Metal, Wood, and other Splints; Invisible Spinal Machines; Boots for Weak Ankles, and Contracted Legs; Elastic Lacing Stockings for Enlarged Veins, &c.; Elastic Knee Caps for Weak and Rheumatic Affections; Hunting Belts and Suspenders; Elastic Ankle Socks, for Sprained or Weak Ankles; Wrist Bands; India Rubber, Elastic Cotton, and Roller Bandages, &c.

Directions for Measuring, &c., will be forwarded to any part of the country, by applying as above.

**T**HE GELATINOUS CAPSULES of BALSAM of COPAIBA, and of EXTRACT of CUBEBS, as prepared by WILDENOW and KRANTZ (by whom they were first made in England) will be found superior to any other, and are carefully prepared from the purest ingredients, and sold at the lowest possible price.

Office, 2, Bucklersbury, Cheapside; and to be had of all Wholesale Druggists.

#### TO THE MEDICAL PROFESSION.

**B**UTLER'S CHARTA VESICATO-RIA.—CANTHARADINE is the sole vesicating principle of this preparation, and is in such a form as to ensure the certainty of its action, and to avoid liability to injury from time under ordinary circumstances. It is less liable to produce strangury, and is quicker in its action than the Emplastrum Cantharidis, though attended with less pain. It is free from any objectionable smell, and from its elegance and portability, with its facility of adaptation to any required form, presents considerable advantages over the ordinary blister plasters.

In Sheets, 15 inches by 10, price 1s., sent by post.

Thomas Butler, Chemist, 4, Cheapside, St. Paul's, London.

Published this day, in 8vo, 12s, bound in cloth and lettered,

**A** PRACTICAL TREATISE on VENEREAL DISEASES; or, Critical and Experimental Researches on Inoculation, applied to the Study of these Affections; with a Therapeutical Summary and Special Formulary. By PH. RICORD, M.D., Surgeon of the Venerel Hospital of Paris, Clinical Professor of Special Pathology, &c. &c. Translated from the French, by HENRY PILKINGTON DRUMMOND, M.D.

London: Longman, Brown, and Co. Edinburgh: MacLachlan and Stewart. Ipswich: F. Pawsey.

**S**ALMON, ODY, and CO., most respectfully inform the Public that their PATENT SELF-ADJUSTING TRUSSES have been in use 30 years, and continue to be recommended by the most eminent SURGEONS in town and country; they will answer for right or left side, also admit of increase and decrease in size and force, requiring no under strap or any galling bandage.—N.B. Persons in the country are requested to send the circumference of the body one inch below the hips. Sold by one or more druggist in every city and provincial town in the United Kingdom.—MANUFACTORY, 292, STRAND, LONDON.

TO APOTHECARIES, DRUGGISTS, &c.  
**M**OTHES' CAPSULES OF COPAIBA.

“ We, the undersigned, hereby appoint Mr. Thomas Butler, 4, Cheapside, London, our Sole Agent (in the place of Mr. Warrick) for the United Kingdom of Great Britain and Ireland, for the Sale of ‘Mothes’ Gelatinous Capsules of Balsam of Copaiba,’ of which we are Sole Proprietors and Inventors.

“ MOTHES, LAMOURoux, and Co.  
“ Paris, Dec. 17, 1841.”

T. B. begs to intimate that, with a view to prevent the substitution of imitations of the Genuine Capsules of Copaiba, he will supply the latter at a considerable reduction from the price which has hitherto been charged for them in this country.

**N**EW APPARATUS AND BANDAGE—WEISS and SON beg to recommend DR. HULL'S ABDOMINAL SUPPORTER for Prolapsus Uteri, which, after four years' experience, has been found to supersede every form of pessary, and has been universally approved of. It is applied externally, and affords immediate relief, enabling those previously confined to a recumbent position to walk about with ease and comfort, while in many instances a cure has been effected.

Pamphlets may be had at their house, 62, Strand; or of Mr. Higham, 48, Jermyn Street.

\* \* For the convenience of Ladies, experienced females attend at both places.

DUVAL'S APPARATUS, as used at Guy's Hospital, is exceedingly portable and convenient for hospital use or private practice, for the local application of steam, for a steam or hot-air bath, and for a sulphur or medicated vapour bath: it has been extensively used in Paris, and a translation of the report of the Royal Medical Academy, with plates and descriptions, may be had upon application.

ELASTIC KNITTED SURGICAL BANDAGE, of a new and improved fabric, which will be found to give equal support, and to be less heating than the stocking bandage usually employed. The price also, being one third less, is of consequence, when a quantity is required.

AGENTS for the sale of the above, and for Weiss's Instruments, on the same terms as at their house:—Dublin: Fannin and Co. Cork: Edwards Casey. Edinburgh: William Pugh. Aberdeen: Charles Davidson. Manchester: L. Simpson. Birmingham: T. Flewitt.
