

Just Published, in one handsome thick Octavo Volume, cloth, price 22s,
ILLUSTRATED WITH EIGHTY-FOUR PLATES ON STEEL,

AND

TWENTY ENGRAVINGS ON WOOD,

THE

PRINCIPLES AND PRACTICE OF OBSTETRIC MEDICINE AND SURGERY,

IN REFERENCE TO THE PROCESS OF PARTURITION.

By F. H. RAMSBOTHAM, M.D.,

Physician to the Royal Maternity Charity, and Lecturer on Midwifery at the London Hospital, &c.

"The work of Dr. Ramsbotham may be described as a complete system of the principles and practice of midwifery; and the author has been at very great pains, indeed, to present a just and useful view of the present state of obstetrical knowledge. * * * In short, we regard this work, between accurate descriptions, and judicious directions and instructions, and useful illustrations, as by far the most able work on the principles and practice of midwifery, that has appeared for a long time. Dr. Ramsbotham has contrived to infuse a larger proportion of common sense, and plain unpretending practical knowledge into his work, than is commonly found in works on this subject; and as such, we have great pleasure in recommending it most strongly to the attention of obstetrical practitioners."—*Edinburgh Medical and Surgical Journal*.

"We can speak very favourably both of the letter-press and of the plates, and as a large sale can only remunerate the publisher, we wish him that large sale which he deserves."—*Dr. Johnson's Review*.

"We strongly recommend the work of Dr. Ramsbotham to all our obstetrical readers, especially to those who are entering upon practice. It is not only one of the cheapest, but one of the most beautiful works in midwifery."—*British and Foreign Medical Review*.

"It is the book on midwifery for students: clear, but not too minute in its details, and sound in its practical instructions. It is so completely illustrated by plates (admirably chosen and executed) that the student must be stupid indeed who does not understand the details of this branch of the science, so far at least as description can make them intelligible."—*Dublin Journal of Medical Science*.

"This is one of the most beautiful works which have lately issued from the medical press; and is alike creditable to the talents of the author and the enterprise of the publisher. It is a good and thoroughly practical treatise; the different subjects are laid down in a clear and perspicuous form, and whatever is of importance is illustrated by first-rate engravings. A remarkable feature of this work, which ought to be mentioned, is its extraordinary cheapness. As a work conveying good, sound, practical precepts, and clearly demonstrating the doctrines of obstetrical science, we can confidently recommend it either to the student or practitioner."—*Edinburgh Journal of Medical Science*.

"This work forms a very handsome volume. Dr. Ramsbotham has treated the subject in a manner worthy of the reputation he possesses, and has succeeded in forming a book of reference for practitioners, and a solid and easy guide for students. Looking at the contents of the volume, and its remarkably low price, we have no hesitation in saying that it has no parallel in the history of publishing."—*Provincial Medical and Surgical Journal*.

"There is so much in the practice of midwifery which cannot be understood without pictorial illustrations, that they become almost essential to the student; but hitherto the expense has proved an impediment to their being employed so much as desirable. The work has only to be known to make the demand for it very extensive."—*Medical Gazette*.

"We strongly recommend this work; it is a useful contribution to medical literature, and decidedly the cheapest work which has ever issued from the medical press of this country."—*Lancet*.

"We feel much pleasure in recommending to the notice of the profession one of the cheapest and most elegant productions of the medical press of the present day. The text is written in a clear, concise, and simple style. We offer our most sincere wishes that the undertaking may enjoy all the success which it so well merits."—*Dublin Medical Press*.

London: JOHN CHURCHILL, Princes-street, Soho.

FOR
Medical & Surgical Examination.

I.

A MANUAL FOR THE COLLEGE OF SURGEONS; intended for the Use of Candidates for Examination, and Practitioners. By JOHN STEGALL, M.D., and M. W. HILLES, Surgeon. One thick vol. 12mo, cloth, 12s. 6d.

II.

A MANUAL FOR THE USE OF STUDENTS PREPARING FOR EXAMINATION AT APOTHECARIES' HALL. Ninth Edition. 12mo, cloth, 8s. 6d.

III.

GREGORY'S CONSPECTUS MEDICINÆ THEORETICÆ. The First Part, containing the Original Text, with an Ordo Verborum and Literal Translation. 12mo, cloth, 10s.

IV.

THE FIRST FOUR BOOKS OF CELSUS. Containing the Text, Ordo Verborum, and Translation. 12mo, cloth, 8s.

* * The above two Works comprise the entre-Latin Classics required for Examination at Apothecaries' Hall.

V.

A new, correct, and complete Edition of CELSUS DE RE MEDICA, E RECENSIONE LEONARDI TARGÆ. 12mo, cloth, 7s.

VI.

THE DECOMPOSITIONS OF THE NEW LONDON PHARMACOPŒIA; with Observations of the most active Preparations. 12mo, boards, 3s.

VII.

THE ELEMENTS OF BOTANY. Designed for the Use of Medical Students. With Nine Coloured Plates. 24mo, cloth, 6s.

Just Published, illustrated with Two Hundred and Thirty Wood-cuts, 8vo, cloth, 12s,

ELEMENTS OF NATURAL PHILOSOPHY; being an Experimental Introduction to the Study of the Physical Sciences. By GOLDING BIRD, M.D., F.L.S., F.G.S., Lecturer on Natural Philosophy at Guy's Hospital.

"By the appearance of Dr. Bird's work, the student has now all that he can desire in one neat, concise, and well-digested volume. The elements of natural philosophy are explained in very simple language, and illustrated by numerous woodcuts."—*Medical Gazette*.

"This work teaches us the elements of the entire circle of natural philosophy in the clearest and most perspicuous manner. Light, magnetism, dynamics, meteorology, electricity, &c., are set before us in such simple forms, and so forcible a way, that we cannot help understanding their laws, their operation, and the remarkable phenomena by which they are accompanied or signified. As a volume of useful and beautiful instruction for the young, and as a work of general value to both sexes, we cordially recommend it."—*Literary Gazette*.

"This work marks an advance which has long been wanting in our system of instruction. Dr. Bird has succeeded in producing an elementary work of great merit."—*Athenæum*.

London: John Churchill, Princes-street, Soho.

DR. ROWE ON NERVOUS DISEASES.

Just Published, Fourth Edition, revised and enlarged, 8vo, price 5s 6d,

PRACTICAL OBSERVATIONS on NERVOUS DISEASES originating from MORBID DERANGEMENT of the LIVER, STOMACH, &c., occasioning low spirits and indigestion; also on DISORDERS PRODUCED by TROPICAL CLIMATES upon EUROPEAN CONSTITUTIONS; with Cases illustrating the most successful Mode of Treatment. By GEORGE ROBERT ROWE, M.D., F.S.A., Member of the Royal College of Physicians, London, and of the Royal College of Surgeons.

"Anxious to present the public with the results of thirty years practical observations and experience."—*See Author's Preface*.

London: John Churchill, Princes-street, Soho.

SALMON, ODY, and CO., most respectfully inform the Public that their PATENT SELF-ADJUSTING TRUSSES have been in use 30 years, and continue to be recommended by the most eminent SURGEONS in town and country; they will answer for right or left side, also admit of increase and decrease in size and force, requiring no under strap or any galling bandage.—N.B. Persons in the country are requested to send the circumference of the body one inch below the hips. Sold by one or more druggist in every city and provincial town in the United Kingdom.—MANUFACTORY, 292, STRAND, LONDON.

PRESERVED VEGETABLE

JUICES.—Mr. BENTLEY, Operative Chemist to His Royal Highness the Duke of Cambridge, begs to invite the attention of the Medical Profession to the expressed Juices of Aconite, Belladonna, Conium, Colchicum, Digitalis, Hyoscyamus, Taraxacum, &c. &c., preserved according to his method, and which may be procured in any quantity at his establishment, 41, Moorgate-street, Bank; or at any of the Wholesale Houses.

THE GELATINOUS CAPSULES

of BALSAM of COPAIBA, and of EXTRACT of CUBEBS, as prepared by WILDENOW and KRANTZ (by whom they were first made in England), will be found superior to any other, and are carefully prepared from the purest ingredients, and sold at the lowest possible price.

Office, 2, Bucklersbury, Cheapside; and to be had of all Wholesale Druggists.

DOMESTIC COMFORTS.

THE STOMACH, ENEMA, and

BREAST PUMPS, invented by J. READ, have for the last twenty-one years been patronised by the nobility, and acknowledged by the highest medical authorities as superior to all others; they are so improved that females and invalids may now use them without the assistance or presence of a second person. The flow of water is so regular that any quantity may be safely passed in a constant stream, without the possibility of admitting air. The valves are never liable to be out of repair.

Manufactured and Sold by the Patentee, 35, Regent-circus, Piccadilly; sold also by his appointed Agents in town and country.

N.B. None are genuine except stamped with the words "Read's Patent."

WORKS ON PHARMACY,

PUBLISHED BY

JOHN CHURCHILL, PRINCES-STREET, SOHO.

A COMPENDIUM of MATERIA

MEDICA and PHARMACY, adapted to the London Pharmacopœia; embodying all the new French, American, and Indian Medicines, and comprising a Summary of Practical Toxicology. By J. HUNTER LANE, M.D., F.L.S. 18mo, cloth, price 5s.

"Dr. Lane's volume is on the same general plan as Dr. Thompson's long known Conspectus; but it is much fuller in its details, more especially in the chemical department. It seems carefully compiled, is well suited for its purpose, and cannot fail to be useful."—*British and Foreign Medical Review*.

"This work contains a concise but comprehensive account of all the simple and compound medicines in use; it contains a greater amount of chemical information than we often meet with in a small work on pharmacy. The work is worthy of recommendation."—*Lancet*.

The UNIVERSAL PHARMACOPŒIA; or, a Practical Formulary of Hospitals, both British and Foreign. By MICHAEL RYAN, M.D. Third Edition, price 5s 6d, cloth.

"This work is a conspectus of the best prescriptions of the most celebrated physicians and surgeons throughout the civilised world. It includes every medicine described in the Pharmacopœias, with the doses and uses, the rules for prescribing, the actions of medicines on the economy, the various modes of administering them, and the principles on which they are compounded."

The CYCLOPÆDIA of PRACTICAL RECEIPTS in all the USEFUL and DOMESTIC ARTS; being a complete Book of Reference for the Manufacturer, Tradesman, and Amateur. By a PRACTICAL CHEMIST. Post 8vo, cloth, price 7s 6d.

"This work embraces all the latest improvements in science and art. No receipt has been admitted that is not of actual utility, and the writer has been particular to illustrate the plan of producing exact imitations of most imported articles, such as brandies, perfumery, wines, liqueurs, &c., derived from the processes of various laboratories, both abroad and at home, which the author has personally inspected on an extensive scale, thus placing within the reach of every one the means of meeting the increased competition in trade. The work consists of more than 3,000 practical receipts."

MAGNACOPIA; a Library of Useful and Profitable Information for the Chemist and Druggist, Apothecary, Surgeon-Dentist, Oilman, &c.; containing several hundred New Forms, with Comments, and a variety of other information. By WILLIAM BATEMAN, Practical Chemist. Third Edition, price 6s.

"The advantage of being as wise as one's neighbour in matters of business tends materially to the augmentation of our finances. Most of the forms given in this book are so partially known (and many of them not at all), that to those engaged in selling, by wholesale or retail, the saving, in many instances, will be very great indeed. In fine, the practitioner, the trader, and the consumer, meet their right hand friend at every page."

This day is Published, 12mo, price 5s,

THE DISEASES of CHILDREN, their Symptoms and Treatment: a Treatise for the Use of the Student and Junior Practitioner. By GEORGE AUGUSTUS REES, Surgeon to the General Dispensary for Children, late Demonstrator of Anatomy at the Aldersgate School of Medicine, &c.

"Mr. Rees's volume is, we think, well adapted for the purpose for which it is intended. It is evidently the work of a man of observation and experience, who knows what has been done by others, and has tested their experience by his own."—*British and Foreign Medical Review*.

"Educated fathers would, however, do well to give it a place upon their bookshelves; Mr. Rees richly deserves the thanks of all parents."—*The Patriot*.

S. Highley, 32, Fleet-street, London.

THE RETREAT, NEAR LEEDS.

THE PRACTICE at this Establishment, beautifully situated about a mile from the town, and which has been successfully carried on nearly twelve years, is **TO BE DISPOSED OF**, on account of Mr. Hare being about to change his residence.

The Furniture, &c., to be taken at a valuation.

The above offers an opportunity rarely occurring to a gentleman without or with a small family, wishing to devote himself to the study of Mental Disease. There is, within distance, a populous village, where there is scope for the cultivation of General Practice.

Principals only will be treated with. Apply to Mr. HARE, 32, East Parade, Leeds.

R UPTURES.—THE PATENT SELF-ADJUSTING GERMAN TRUSS, acting effectually without any complications, is recommended by the Faculty for the CURE and RELIEF of HERNIA. The most eminent members of the profession are of opinion that the necessary quality of a good Truss is an efficient resisting power, without unnecessary pressure on the part affected, which desirable object is alone obtained in a Truss unencumbered with straps, spiral springs, or pad behind.

J. Egg and Co., the inventors, engage to secure any reducible Rupture if left to their management.—Manufactory, No. 1, Piccadilly.

CITRATE OF IRON,

Prepared only by Bullock, Operative Chemist, 22, Conduit-street, Hanover-square, several years occupied in the Laboratories of the most distinguished Chemists of France and Germany.

The most valuable and beautiful Preparation of Iron for medicinal use is the Citrate; it is superior to every other salt of that metal from possessing the following qualities:—1st, it is agreeable to the taste; 2nd, it never disagrees with the stomach, 3rd, is perfectly and immediately soluble in water, making a clear ruby-red solution; 4th, it is equally, if not more efficacious in every case where Iron is prescribed than any other preparation; 5th, it is compatible with volatile and fixed alkalies and their carbonates, hydriodate of potash, and most other substances which decompose other salts of Iron. From these properties it is presumed that it must, as soon as it is known, entirely supersede the unscientific forms in which this metal is usually given, as Steel Wine, the old Carbonate of Iron, Griffiths's Mixture, and the general salts which are so prone to decomposition—dose, from five to ten grains, three times a day.
