

Just Published, in one handsome thick Octavo Volume, cloth, price 22s,  
ILLUSTRATED WITH EIGHTY-FOUR PLATES ON STEEL,  
AND  
TWENTY ENGRAVINGS ON WOOD,  
THE  
PRINCIPLES AND PRACTICE OF OBSTETRIC  
MEDICINE AND SURGERY,  
IN REFERENCE TO THE PROCESS OF PARTURITION.

By **F. H. RAMSBOTHAM, M.D.,**

Physician to the Royal Maternity Charity, and Lecturer on Midwifery at the London Hospital, &c.

---

"The work of Dr. Ramsbotham may be described as a complete system of the principles and practice of midwifery; and the author has been at very great pains, indeed, to present a just and useful view of the present state of obstetrical knowledge. \* \* \* In short, we regard this work, between accurate descriptions, and judicious directions and instructions, and useful illustrations, as by far the most able work on the principles and practice of midwifery, that has appeared for a long time. Dr. Ramsbotham has contrived to infuse a larger proportion of common sense, and plain unpretending practical knowledge into his work, than is commonly found in works on this subject; and as such, we have great pleasure in recommending it most strongly to the attention of obstetrical practitioners."—*Edinburgh Medical and Surgical Journal*.

"We can speak very favourably both of the letter-press and of the plates, and as a large sale can only remunerate the publisher, we wish him that large sale which he deserves."—*Dr. Johnson's Review*.

"We strongly recommend the work of Dr. Ramsbotham to all our obstetrical readers, especially to those who are entering upon practice. It is not only one of the cheapest, but one of the most beautiful works in midwifery."—*British and Foreign Medical Review*.

"It is *the* book on midwifery for students; clear, but not too minute in its details, and sound in its practical instructions. It is so completely illustrated by plates (admirably chosen and executed) that the student must be stupid indeed who does not understand the details of this branch of the science, so far at least as description can make them intelligible."—*Dublin Journal of Medical Science*.

"This is one of the most beautiful works which have lately issued from the medical press; and is alike creditable to the talents of the author and the enterprise of the publisher. It is a good and thoroughly practical treatise; the different subjects are laid down in a clear and perspicuous form, and whatever is of importance is illustrated by first-rate engravings. A remarkable feature of this work, which ought to be mentioned, is its extraordinary cheapness. As a work conveying good, sound, practical precepts, and clearly demonstrating the doctrines of obstetrical science, we can confidently recommend it either to the student or practitioner."—*Edinburgh Journal of Medical Science*.

"This work forms a very handsome volume. Dr. Ramsbotham has treated the subject in a manner worthy of the reputation he possesses, and has succeeded in forming a book of reference for practitioners, and a solid and easy guide for students. Looking at the contents of the volume, and its remarkably low price, we have no hesitation in saying that it has no parallel in the history of publishing."—*Provincial Medical and Surgical Journal*.

"There is so much in the practice of midwifery which cannot be understood without pictorial illustrations, that they become almost essential to the student; but hitherto the expense has proved an impediment to their being employed so much as desirable. The work has only to be known to make the demand for it very extensive."—*Medical Gazette*.

"We strongly recommend this work; it is a useful contribution to medical literature, and decidedly the cheapest work which has ever issued from the medical press of this country."—*Lancet*.

"We feel much pleasure in recommending to the notice of the profession one of the cheapest and most elegant productions of the medical press of the present day. The text is written in a clear, concise, and simple style. We offer our most sincere wishes that the undertaking may enjoy all the success which it so well merits."—*Dublin Medical Press*.

London: JOHN CHURCHILL, Princes-street, Soho.

In the Press,

**COMMENTARIES** on **PATHOLOGY**, and on Useful as well as on Dangerous Innovations in Practical Medicine. By Sir ALEXANDER CRIGHTON, F.R.S., K. St. V. and St. Anne, Physician to the Emperor of Russia, and to H. R. H. the Duke of Cambridge.

Just Published, Third Edition, 2 Vols. 4to, cloth, price £2 5s,

**OBSTETRIC TABLES**; comprising Graphic Illustrations, beautifully coloured, with Descriptions and Practical Remarks, exhibiting on Dissected Plates many important subjects in the Practice of Midwifery. By GEORGE SPRATT, Surgeon-Accoucheur.

Just Published, 8vo, cloth, with Plates, price 10s 6d,

**THE PATHOLOGY and DIAGNOSIS** of **DISEASES of the CHEST**; illustrated chiefly by a Rational Exposition of their Physical Signs. By Dr. WILLIAMS, F.R.S., Professor of the Practice of Medicine, University College, London. Fourth Edition, with much important new matter.

"The fact that a fourth edition is called for is a very good argument in favour of any book. But this was not necessary in the case of Dr. Williams; it was well known to the profession as one of the best manuals of diseases of the chest we possess."—*Dublin Medical Journal*.

"Of all the works on this subject, we are inclined much to prefer that of Dr. Williams."—*Medical Gazette*.

"Evidently written by a man thoroughly acquainted with his subject."—*Lancet*.

"We strongly recommend this work to the attention of auscultators."—*Medico-Chir. Review*.

"By far the most important addition to our literature on this subject," &c.—*See Dr. Forbes's Preface to Trans. of Laennec*.

"Laennec, Andral, and Williams, the best writers on auscultation."—*Dr. Copland's Dict.*

Just Published, illustrated with Two Hundred and Thirty Wood-cuts, 8vo, cloth, 12s,

**ELEMENTS** of **NATURAL PHILOSOPHY**; being an Experimental Introduction to the Study of the Physical Sciences. By GOLDING BIRD, M.D., F.L.S., F.G.S., Lecturer on Natural Philosophy at Guy's Hospital.

"By the appearance of Dr. Bird's work, the student has now all that he can desire in one neat, concise, and well-digested volume. The elements of natural philosophy are explained in very simple language, and illustrated by numerous woodcuts."—*Medical Gazette*.

"This work teaches us the elements of the entire circle of natural philosophy in the clearest and most perspicuous manner. Light, magnetism, dynamics, meteorology, electricity, &c., are set before us in such simple forms, and so forcible a way, that we cannot help understanding their laws, their operation, and the remarkable phenomena by which they are accompanied or signified. As a volume of useful and beautiful instruction for the young, and as a work of general value to both sexes, we cordially recommend it."—*Literary Gazette*.

"This work marks an advance which has long been wanting in our system of instruction. Dr. Bird has succeeded in producing an elementary work of great merit."—*Athenæum*.

Just Published, 8vo, cloth, with 26 Plates, price 10s 6d,

**THE CAUSE and TREATMENT of CURVATURE of the SPINE, and DISEASES of the VERTEBRAL COLUMN, with Cases.** By E. W. TUSON, F.R.S., F.L.S., Surgeon to the Middlesex Hospital.

"Mr. Tuson's treatment is sound and judicious, and there is much solid and useful information to be obtained from a perusal of his pages. We recommend the volume as deserving of the attention of our readers."—*Lancet*.

"The present work being a 'Practical Treatise on the Affections of the Spine,' may be recommended to the attentive perusal of those entrusted with the care of young persons. We have reason to know that extension by the use of Mr. Tuson's couch and its attendant exercises, has been very successfully applied to many of his private patients; and in affording our testimony to the professional merits of this gentleman, we confer a benefit on the public."—*Church Magazine*.

"We are bound to acknowledge that Mr. Tuson has combatted two great errors,—the obstinate adherence to tight lacing, and the absurd notion of the applicability of any one plan of treatment for all cases indiscriminately; and also that he makes frequent reference to the physiological causes of the malady."—*Athenæum*.

"Mr. Tuson has, with great talent, exposed the follies of parents, pointed out in a most scientific manner the causes of the derangement of structure, and has, in clear language, told us his plan of cure. It is simple, and admirably adapted to the cases of which he speaks."—*Statesman*.

#### FOR

### Medical & Surgical Examination.

#### I.

A MANUAL FOR THE COLLEGE OF SURGEONS; intended for the Use of Candidates for Examination, and Practitioners. By JOHN STEGALL, M.D., and M. W. HILLES, Surgeon. One thick vol. 12mo, cloth, 12s. 6d.

#### II.

A MANUAL FOR THE USE OF STUDENTS PREPARING FOR EXAMINATION AT APOTHECARIES' HALL. Ninth Edition. 12mo, cloth, 8s. 6d.

THE ELEMENTS OF BOTANY. Designed for the Use of Medical Students. With Nine Coloured Plates. 24mo, cloth, 6s.

London: John Churchill, Princes-street, Soho.

# THE BRITISH AND FOREIGN MEDICAL REVIEW.

Edited by JOHN FORBES, M.D., F.R.S., F.G.S.  
Published Quarterly, price Six Shillings.

PRINCIPAL CONTENTS OF No. 26.—APRIL, 1842.

## Part I.—Analytical and Critical Reviews.

1. Teome, Monfalcon, Remacle, Gaillard, on the Foundling Hospitals of France.
2. Arntzenius, Arnott, Wade, Cooper, Franc, on the Nature and Treatment of Strictures in the Urethra.
3. Canstatt on Special Pathology and Therapeutics.
4. Johnson, Annesley, Martin, on the Diseases of India.
5. Sedillot, Hope, Walshe, on Empyema.
6. Nunneley and Donellan on the Nature, Causes, and Treatment of Erysipelas.
7. M. Grisolle on Pneumonia.
8. Madness, or the Maniac's Hall.
9. Vrolik on Unreduced Dislocations of the Femur.
10. Forry on the Influence of Climate on Pulmonary and Rheumatic Diseases.
11. Becquerel on the Pathology of Bright's Disease.
12. Macleod on Rheumatism in its various forms.
13. Hjort on Radesyge, or Norwegian Leprosy.
14. Carpenter's Principles of Human Physiology.
15. Paris and Glasgow Reports on the Comparative Nourishment of different kinds of Food.
16. Parkin on Epidemic Disease.
17. Transactions of the Amsterdam Society for Promoting Medicine and Surgery.
18. Curtis and Yearsley on Ears and Aurists.

## Part II.—Bibliographical Notices.

1. Report on Medical Charities in Ireland.
2. Dahlerup's Dissertation on Perforation of the Stomach.
3. Pilcher on Diseases of the Ear.
4. Newbigging's Translation of Barth and Roger.
5. Crommelinck's Anatomy.
6. Hodgkin on the Means of Preserving Health.
7. Hocken on the Influence of Constitution in Producing Disease.
8. Hocken on Hysteria.
9. Streeten's Retrospective Address.
10. Bellingham on Materia Medica and Pharmacy.
11. Prichard's Natural History of Man.
12. Vines on the Analogy between Ophthalmic and other Diseases.
13. Christison's Dispensatory.

## Part III.—Selections from the British, American, Colonial, and Foreign Journals.

Anatomy and Physiology, 11 Articles; Pathology, Practical Medicine, and Therapeutics, 30 Articles; Surgery, 22 Articles; Midwifery, 19 Articles; Medical Jurisprudence and Toxicology, 4 Articles; Animal Chemistry, 3 Articles; Medical Statistics, 4 Articles.

## Part IV.—Medical Intelligence.

1. New Bills of Mortality Table for London.
2. The Doctors v. the Assurance Societies.
3. Syrian Medical Association.
4. Medical Reform, &c. &c.

London: John Churchill, Princes-street, Soho.

Just Published, 8vo, sewed, price 3s 6d,

**A**N INQUIRY into the NATURE and PATHOLOGY of GRANULAR DISEASE of the KIDNEY, and its Mode of Action in Producing Albuminous Urine. By GEORGE ROBINSON, Surgeon.

"The style in which this work is written, and the matter contained in it, are highly creditable to the author."—*Provincial Medical and Surgical Journal*.

London: John Churchill, Princes-street, Soho.

Now ready, in foolscap 8vo, cloth extra, price 12s 6d,  
**THE THEORY AND PRACTICE of  
MIDWIFERY.**

By FLEETWOOD CHURCHILL, M.D.

This treatise includes the most recent observations on the anatomy and physiology of the organs of generation, menstruation, conception, ovology, utero-gestation, signs of pregnancy, duration of gestation, sterility, super-foetation, extra-uterine foetation, foetal pathology, abortion, and on parturition, with its abnormal variations. Illustrated by extensive Statistics, and by upwards of one hundred highly-finished Wood Engravings by Bagg.

London: Henry Renshaw, 356, Strand; and Fannin and Co., Dublin.

This day is Published, in 8vo, Third Edition, with Alterations and Additions, price 12s, cloth lettered,  
**L**ECTURES on the DISEASES of the URINARY ORGANS. By Sir BENJAMIN BRODIE, Bart., F.R.S.

The work has throughout been entirely revised, some of the Author's views have been modified, and a considerable proportion of new matter, among which is a Lecture on the Operation of Lithotrity, has been added:

London: Longman, Brown, Green, and Longmans.

## OXIDE OF SILVER.

G. LEWIS, OPERATIVE DISPENSING CHEMIST, 33, Leicester-square, begs to inform the Profession that he alone prepares the above valuable Medicine according to Mr. Lane's Formulae. In consequence of the increasing demand, and to render it more generally available, G. L. has made a considerable reduction in price. A supply, with full particulars and directions for its employment, may be obtained by post direct from G. Lewis, or through the medium of any Wholesale Druggist.

The genuine Preparation has the written Signature of "Geo. Lewis" on the Label.

**S**ALMON, ODY, and CO., most respectfully inform the Public that their PATENT SELF-ADJUSTING TRUSSES have been in use 30 years, and continue to be recommended by the most eminent SURGEONS in town and country; they will answer for right or left side, also admit of increase and decrease in size and force, requiring no under strap or any galling bandage.—N.B. Persons in the country are requested to send the circumference of the body one inch below the hips. Sold by one or more druggist in every city and provincial town in the United Kingdom.—MANUFACTORY, 292, STRAND, LONDON.

**R**UPTURES.—THE PATENT SELF-ADJUSTING GERMAN TRUSS, acting effectually without any complications, is recommended by the Faculty for the CURE and RELIEF of HERNIA. The most eminent members of the profession are of opinion that the necessary quality of a good Truss is an efficient resisting power, without unnecessary pressure on the part affected, which desirable object is alone obtained in a Truss unencumbered with straps, spiral springs, or pad behind.

J. Egg and Co., the inventors, engage to secure any reducible Rupture if left to their management.—Manufactory, No. 1, Piccadilly.

**T**HE GELATINOUS CAPSULES of BALSAM of COPAIBA, and of EXTRACT of CUBEBS, as prepared by WILDENOW and KRANTZ (by whom they were first made in England), will be found superior to any other, and are carefully prepared from the purest ingredients, and sold at the lowest possible price.

Office, 2, Bucklersbury, Cheapside; and to be had of all Wholesale Druggists.
