

Patronized by the most Eminent Surgeons.

[No. 20,  
COVENTRY STREET,

CORNER OF  
HAYMARKET, LONDON.

EDWIN H. EAGLAND,  
**SURGICAL MECHANICIAN,**  
AND  
**Elastic Surgical Bandage Maker,**

**SOLICITS** the attention of the Medical Profession to his **MECHANICAL AIDS**, adapted to all the various forms of **DISTORTION**, which may present themselves in the human frame. And he would beg to remark, that a great portion of his time, during the past seven years, has been (under the able direction of many of the most eminent Practitioners of the day) devoted to the construction of Apparatus for assisting in the **CORRECTION OF SPINAL CURVATURE**; which he ventures to assure the Profession in general, they will find well deserving of their notice. They are remarkably **Light**, perfectly **Elastic**, and are in every way calculated to admit of the *free and uninterrupted action of the Muscles and Vertebrae of the Spine*; at the same time yielding a *perfect Lateral support*.

Mr. E. begs to submit the following extract from Dr. Bradley's work on Spinal Cases.

Speaking of lateral curvature of the spine, he says, "The most effectual and permanent remedy consists in such means as are best calculated for suspending the superincumbent weight, and giving, at the same time, lateral support to the spine; Mr. Eagland's Spinal Apparatus, which is constructed on a good principle, answers this purpose very well. Indeed, I have often been agreeably surprised, after the patient has been harassed for some time with such a train of symptoms as is already described, to see how soon he has experienced relief from wearing these stays, and at his desire for continuing their use when apparently no longer necessary. In cases where the curvature is slight, great numbers of young persons, as I can witness, have been restored to their shapes and health by the use of this apparatus only, when worn instead of common stays. Notwithstanding the parts which render this support are composed of steel, yet they are so light, and exactly proportioned and fitted, so as to be worn under the clothes, without being seen, or even suspected by the nicest observer. Another advantage attending this mechanism is, that it admits of being let out or extended very considerably, either in length or width, during growth, or the retrocession of the spine to its natural shape."

E. W. Tuson, Esq. F.R.S., Surgeon to the Middlesex Hospital, in his work on the "**TREATMENT OF CURVATURE OF THE SPINE**," at page 90, speaking of the application of Mechanical Aid, says "The most useful Supporter I have seen, is one invented by Mr. EAGLAND of Coventry Street."

Testimonials of approbation, of the highest order, may likewise be found in the following eminent works.—Key's Surgery, (2nd edition)—Beale on Distortions—Salmon's Practical Observations on Diseases of the Rectum—Graham on the Diseases of Women—Cooper's First Lines in Surgery—Lafond on Hernia—The Medical and Physical Journal, &c. &c.

Exomphalos, Ventral, Femoral, Inguinal and Infantile Trusses, of the most approved construction. Elastic Lacing Stockings for Varicose, or Enlarged Veins, &c. Elastic Knee Caps. Abdominal sustaining and compressing Belts, for Corpulency. Spring Crutches, Suspensory Bandages, Urinals, and a variety of other aids.

Instruments for every kind of Deformity in the Legs and Feet, constructed upon the most simple principles.—Established 1830.

Second Edition, 32mo. price 3s. 6d.

**THE ANATOMICAL REMEMBRANCER**; or, complete Pocket Anatomist, containing a concise Description of the Bones, Ligaments, Muscles, and Viscera; the Distribution of the Nerves, Blood-vessels, and Absorbents; the Arrangement of the several Fasciæ; the Organs of Generation in the Male and Female; and the Organs of the Senses.

"The anatomy is correctly given, and the descriptions, though condensed to the very highest degree, still remain clear and intelligible."—*Lancet*.

**S. HIGLEY, 32, Fleet-street.**

**RUPTURES.—THE PATENT SELF-ADJUSTING GERMAN TRUSS**, acting effectually without any complications, is recommended by the Faculty for the **CURE and RELIEF of HERNIA**. The most eminent members of the profession are of opinion that the necessary quality of a good Truss is an efficient resisting power, without unnecessary pressure on the part affected, which desirable object is alone obtained in a Truss unencumbered with straps, spiral springs, or pad behind.

J. EGG and Co, the inventors, engage to secure any reducible Rupture, if left to their management. —Manufactory, No. 1, Piccadilly.

## FINANCES.

THE RECEIPT AND EXPENDITURE OF THE COLLEGE IN THE YEAR FROM MIDSUMMER DAY, 1840, TO MIDSUMMER DAY, 1841, WERE AS FOLLOWS, VIZ.—

The RECEIPTS amounted to £14,158 6s. 4d. from the following sources of Income, viz.

|  |              |
|--|--------------|
| Court of Examiners . . . . .   | £12,671 14 0 |
| Rent . . . . .   | 37 10 0      |
| Fees of Admission to Council and Court of Examiners . . . . .        | 105 0 0      |
| Fee on Certificate of Diploma . . . . .                              | 5 5 0        |
| Incidental; Sale of Lists, Catalogues, etc. . . . .                  | 39 13 0      |
|  | <hr/>        |
|  | £12,859 2 0  |
| Dividends on Investments in Government Securities . . . . .          | 1,299 4 4    |
|  | <hr/>        |
|  | £14,158 6 4  |
| Balance in the hands of the Bankers at Midsummer-day, 1840 . . . . . | 727 17 8     |
|  | <hr/>        |
|  | £14,886 4 0  |

The DISBURSEMENTS amounted to £14,503 4s. 3d. divided under the following heads, viz.

|   |             |
|---|-------------|
| 1st. College Department, including Council, Court of Examiners, Auditors, Diploma Stamps, List of Members, Collegiate Prize, Salaries, Wages, &c. . . . . | £6,357 12 7 |
| 2nd. Museum Department, including Catalogues, Specimens, Spirit, Bottles, Stationery, Salaries, Wages, &c. . . . .  | 2,823 5 11  |
| 3rd. Library Department, including the purchase and binding of Books, Salaries, &c. . . . .   | 778 0 0     |
| 4th. Miscellaneous Expenses, including Taxes, Rent, Insurance, Furniture, and Incidental Payments, &c. . . . .  | 434 6 3     |
| 5th. Studentships in Anatomy . . . . .  | 192 7 7     |
| 6th. Repairs and Alterations . . . . .  | 238 19 11   |
| 7th. Expenditure under Deeds of Trust, including Hunterian Oration, Lectures, and Jacksonian Prize. . . . .   | 99 17 0     |
|   | <hr/>       |
|   | £10,924 9 3 |
| Investment . . . . .  | 3,578 15 0  |
|   | <hr/>       |
|   | £14,503 4 3 |
| Balance in the hands of the Bankers at Midsummer-day 1841 . . . . .   | 382 19 9    |
|   | <hr/>       |
|   | £14,886 4 0 |

## SUMMARY.

|                                  |              |
|----------------------------------|--------------|
| Incidental income . . . . .      | £12,859 2 0  |
| Permanent ditto . . . . .        | 12,99 6 4    |
|                                  | <hr/>        |
|                                  | £14,158 6 4  |
| Incidental Expenditure . . . . . | £11,291 14 2 |
| Permanent ditto . . . . .        | 3,241 10 1   |

## WEAK LEGS, KNEES, AND ANKLES.

SPARKS and Co. beg to announce their newly-invented Elastic Stockings, Knee-caps, Ankle-socks, Wrist-bands, Belts, Rolling Bandages, &c., which they have now brought to the greatest perfection, for the cure and support of Varicose and Enlarged Veins; weak, swollen, rheumatic, and gouty affections of the Legs, Knees, Ankles, Wrists, &c., or in any part where, from weakness in the part, support may be necessary. They are strongly recommended by the most eminent of the Faculty for their elasticity, lightness, and cleanliness, being washable, and not producing that frequently injurious heat so much complained of in all other bandages.—S. & Co. also solicit particular attention to their improved Spring Crutches, Trusses, and every kind of instrument for the relief and cure of Weakness and Deformity in the Human Frame.—Printed particulars will be forwarded for taking measures, &c., by application (post paid) at No. 28, Conduit-street, London.

The above Bandages are entirely free from brass wires, or any other metallic substance, and are warranted to retain their original elasticity.

*Agents for the New Patent Trusses without Springs round the Body.*

## PROVINCIAL MEDICAL AND SURGICAL ADVERTISER.

### TO THE MEDICAL PROFESSION.

On the 1st of December will be published, price 1s. 6d., No. XII. of the

**L**ONDON AND EDINBURGH MONTHLY JOURNAL OF MEDICAL SCIENCE (with Two Plates), Edited by Dr. CORMACK. This Number completes the Volume for 1841, and contains a copious Index. On the 1st of January, 1842, No. I. of the Second Series will appear. The Profession are respectfully reminded that this is the cheapest and most comprehensive Medical Journal published in Great Britain. A few complete sets of the year 1841 may still be had from the Publishers.

This Journal is an excellent and economical medium for Advertisements.

London: H. BAILLIERE, 219, Regent-street. Edinburgh: MACLACHLAN, STEWART, and Co. Dublin: CURRY and Co. Paris: J. B. BAILLIERE, Rue de l'Ecole de Médecine. And Sold by all Booksellers in Town and Country.

## PROVINCIAL MEDICAL AND SURGICAL JOURNAL.

EDITED BY

DR. HENNIS GREEN, (*London*), AND DR. STREETEN, (*Worcester*).

The PROVINCIAL JOURNAL has been established under the patronage of the PROVINCIAL MEDICAL AND SURGICAL ASSOCIATION.

Its chief objects are—1st, To represent, in an adequate manner, Medical Science in the Provinces. 2nd, To serve as an organ of communication between the members of the different Medical Associations throughout the kingdom; for this latter purpose it is peculiarly adapted, as it can be forwarded *by post* to any part of the British dominions.

The current numbers of the PROVINCIAL JOURNAL contain

MR. JOHN HUNTER'S LECTURES ON PHYSIOLOGY AND SURGERY,  
(From the Manuscripts of his Pupils, Dr. THOMAS SHUTE, and Mr. HENRY RUMSEY;) and a series of cases  
from the early Note-Books of the late

SIR ASTLEY P. COOPER, BART.

Clinical Lectures by

MR. BRANSBY COOPER, MR. MORGAN, AND PROFESSOR VELPEAU.

N. B.—A New, Improved, and Enlarged Series commenced with the last Volume, on the 3rd of April, 1841.  
Published, every Friday Morning, by J. W. RUMSEY, No. 6, Wellington-street, Strand.

In the earlier Numbers will be found,

1. Reports from the Newcastle Infirmary, by SIR JOHN FIFE, MR. GREENHOW, MR. BAIRD, and MR. HEATH;—the Northern Hospital, Liverpool, by MR. BANNER;—South Hants Infirmary, by MR. WIBLIN;—St. Peter's Hospital, Bristol, by MR. GREEN;—Leeds General Infirmary, by MR. TEALE;—Worcester Infirmary, by Dr. HASTINGS;—Royal Berkshire Hospital, by MR. BULLEY;—and Marylebone Infirmary, by Dr. BOYD.

2. Papers by Dr. MACARTNEY, MR. TOOGOOD, Dr. FIFE, MR. LUCAS, MR. ADAMS, Dr. LYNCH, &c. &c.

3. Reports of Anniversary Meetings of the Eastern and Wells branches of the Provincial Association, the North of England, Cornwall, Gloucestershire, and Eastern Medical Association of Scotland.

4. Papers and Communications on Medical Reform, from Dr. MACARTNEY, Dr. FORBES, Dr. BLACK (Manchester), Dr. JEFFREYS (Liverpool), Dr. KIDD, Sir C. BELL, MR. J. H. GREEN, &c.

5. Reports on Medical Reform, from the Colleges of Physicians of London and Edinburgh; Colleges of Surgeons of Edinburgh and Dublin; Apothecaries' Companies of London and Dublin.

6. Copious Analyses of English and Foreign Journals: Reviews of New Works, &c.

To be had of all Booksellers and Newsvenders throughout the United Kingdom. Gentlemen desirous of receiving the Stamped Edition direct from the Office can be regularly supplied, upon their forwarding their Subscriptions, in advance, to the Publisher.

### TERMS OF SUBSCRIPTION:

|                     |         |
|---------------------|---------|
| For One Year.....   | £1 10 0 |
| For Six Months..... | 0 15 0  |

In addition to its ordinary circulation, the Journal is now forwarded weekly to the 1300 Members of the Provincial Association. From the well-known respectability and affluence of its subscribers, this Journal offers a most advantageous medium for advertisements. Office, 6, Wellington Street; Dublin, Fannin and Co., Grafton Street.
