

NEW APPARATUS AND BANDAGE—WEISS and SON beg to recommend Dr. HULL'S ABDOMINAL SUPPORTER for Prolapsus Uteri, which, after four years' experience, has been universally approved of, and found to supersede every form of pessary. It is applied externally, and affords immediate relief, enabling those previously confined to a recumbent position to walk about with ease and comfort, while in many instances a cure has been effected.

For the convenience of Ladies, WEISS and SON have a private establishment, at No. 9, King William-street, Strand, where the Supporters, and every other description of Surgical Apparatus and Bandages, Syringes, &c., may be obtained. It is conducted by Mrs. SELTZER, who has had long experience in their business, and who will attend Ladies at their own houses, where required.

Supporters and Pamphlets may be had at their house, 62, Strand, and of Mrs. Higham, 48, Jermyn-street.

DUVAL'S APPARATUS, as used at Guy's Hospital, is exceedingly portable and convenient for hospital use or private practice, for the local application of steam, for a steam or hot-air bath, and for a sulphur or medicated vapour bath: it has been extensively used in Paris, and a translation of the report of the Royal Medical Academy, with plates and descriptions, may be had upon application.

AGENTS for the sale of the above, and for Weiss's Instruments, on the same terms as in London:—Dublin: Fannin and Co. Cork: Edwards Casey. Edinburgh: William Pugh. Aberdeen: Charles Davidson. Manchester: L. Simpson. Birmingham: T. Flewitt.

STEEL PEN MAKER to the QUEEN.—Precept dated April 13, 1840.

JOSEPH GILLOTT, PATENT STEEL PEN MANUFACTURER, Victoria Works, Graham-street, Birmingham, and at 37, Gracechurch-street, London, has been for twenty years engaged in the manufacture of Steel Pens, and during that time has devoted his unceasing attention to the improving and perfecting this useful and necessary article; the result of his persevering efforts, and numerous experiments upon the properties of the metal used, has been the construction of a Pen upon a principle entirely new, combining all the advantages of the elasticity and fineness of the quill, with the durability of the metallic pen, and thus obviating the objections which have existed against the use of Steel Pens.

The Patentee is proud to acknowledge that a discerning public has paid the most gratifying tribute to his humble, though useful, labours, by a demand for his Pens far exceeding his highest expectations.

The number of Pens manufactured at the works of **JOSEPH GILLOTT,** from Oct. 1838, to Oct. 1839,

Was 44,654,702,
or 3,721,225 doz. and 2-12ths,
or 310,102 gross 1 doz. and 2-12ths;
And from Dec. 1840, to Dec. 1841,
Was 62,126,928,
or 5,177,244 dozens,
or 431,437 gross.

CAUTION.—J. G. regrets to say, certain disreputable Makers have tried to impose upon the Public a spurious article, bearing the misspelled name of the Patentee and sole manufacturer, thus, "GILLOTT," by omitting the L; and in some instances the final T is omitted, thus, "GILLLOT," so as to retain the sound; but the Public will please observe, all the genuine Pens are marked in full "JOSEPH GILLOTT;" and Venders are desired to note that his Cards of Pens are made up in Packets of one dozen each, and have a label outside with a fac-simile of his signature.

At the request of persons engaged in tuition, J. G. has introduced his Warranted School Pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in Schools.

Sold Retail by all Stationers, Booksellers, and other respectable dealers in Steel Pens. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham.

Connected with the School are Museums of Human and Comparative Anatomy (Healthy and Morbid), to which Students have free access, also a Chemical Laboratory, a Library, and Medical Society.

At the conclusion of the Session, Medals and Certificates of Honor will be awarded to the most distinguished Students.

Certificates of the above Lectures (which constitute a complete Course of Medical Education) qualify for examination at the Royal College of Physicians, London, at the Royal College of Surgeons, at Apothecaries' Hall, at the Army Medical Board, and at the London University. It will likewise be seen that the Royal College of Surgeons have passed a resolution, admitting an attendance on the Practice of the Manchester Royal Infirmary as equivalent to that on the London Hospitals; this School, therefore, now enjoys all the privileges of the Metropolitan Schools.

The hours of delivering the Lectures are so arranged as not to interfere with attendance and Clinical Instruction at the Royal Infirmary, &c.

For particulars as to terms, &c., application may be made at the School, or at the houses of the respective Lecturers.

Session 1842 and 1843.
