

In Foolscap 8vo, price 10s 6d, cloth, lettered,

The SURGEON'S VADE MECUM. By ROBERT DRUITT. Second Edition. Illustrated with 50 Wood Engravings.

"If we know anything of the wants and tastes of students, this Vade Mecum will take. It gives them what they need, concise descriptions and accurate directions. Such a book was a desideratum; and, if we are not mistaken, Mr. Drutt has made a hit."—*Johnson's Journal*.

"The author shows himself well acquainted with the most approved views both of pathology and practice, and the general arrangement of the subjects; and the style in which the information is conveyed is particularly good. * * * * The work is very creditable to the author, and we recommend it to the advanced pupil and to the young surgeon as a useful index to the great book of surgical knowledge."—*Forbes's Review*.

"It is an excellent epitome of surgery, and may be consulted with advantage by all ranks of the profession."—*Provincial Medical Journal*.

"This work merits our warmest commendations, and we strongly recommend it to surgeons as an admirable digest of the principles and practice of modern surgery."—*Medical Gazette*.

"The Surgeon's Vade Mecum is an exceedingly valuable companion to the student or to the practitioner it contains a store of valuable information upon an important branch of medicine."—*Lancet*.

"An admirable guide to the student in surgery; the author has introduced a large proportion of sound scientific information on surgical pathology."—*Edinburgh Medical Journal*.

London: HENRY RENSHAW, 356, Strand; and JOHN CHURCHILL, Princes-street, Soho.

NEW WORK ON MIDWIFERY,

Illustrated by upwards of 100 fine Wood Engravings. In Foolscap 8vo, cloth extra, price 12s 6d,

The THEORY and PRACTICE of MIDWIFERY. By FLEETWOOD CHURCHILL, M.D.

This Treatise includes the most recent observations on the Anatomy and Physiology of the Organs of Generation, Menstruation, Conception, Ovology, Utero-gestation, Signs of Pregnancy, Duration of Pregnancy, Gestation, Sterility, Super Fœtation, Extra Uterine Fœtation, Fœtal Pathology, Abortion, and on Parturition, with its Abnormal Variations; illustrated by extensive Statistics, and by upwards of One Hundred highly-finished Wood Engravings by BAGG.

London: HENRY RENSHAW, 356, Strand. Dublin: FANNIN and CO., Grafton-street.

Foolscap 8vo, cloth, lettered, price 10s,

Dr. HOOPER'S PHYSICIAN'S VADE MECUM. New Edition, entirely re-written, enlarged, and greatly improved. By W. A. GUY, M.B., Physician to King's College Hospital.

London: Henry Renshaw, Whittaker and Co., S. Highley, Simpkin and Co., Sherwood and Co., John Churchill, T. Hill, Tilt and Bogue, and Houlston and Co. Edinburgh: A. and C. Black.

SPILLAN'S TRANSLATION OF ANDRAL.

In 1 Vol. 8vo, price 25s, cloth,

The CLINIQUE MEDICALE; OR, REPORTS OF MEDICAL CASES. By G. ANDRAL. Translated, with copious Notes, by D. SPILLAN, M.D.

"We earnestly recommend all our young friends who wish to know what is most excellent in the modern pathology of France to lose no time in adding this translation to their stock of medical authorities."—*Forbes's Review*, No. 1.

"The present translation of Andral's valuable volumes is likely to prove useful to practitioners in this country. We recommend Dr. Spillan's translation to the attention of our readers."—*Johnson's Journal*, No. 49.

London: HENRY RENSHAW, 356, Strand.

ACTON ON VENEREAL DISEASES.

Illustrated by a Quarto Atlas of Coloured Plates, 8vo, cloth, price £1 11s 6d,

A COMPLETE PRACTICAL TREATISE on VENEREAL DISEASES, and their Immediate and Remote Consequences; including Observations on certain Affections of the Uterus, attended with Discharges. By WILLIAM ACTON, late Externe of the Female Venereal Hospital, Paris.

* * * The Letter-press, illustrated with Woodcuts by BAGG, forms a closely-printed Volume of 450 pages. No expense has been spared in the execution of the Coloured Plates. The Original Drawings were made expressly for this work, with the sanction of M. RICORD, by first-rate Artists, from the most remarkable cases observed in that professor's Clinique during the years 1836—1840.

"We recommend this work to the attention of our readers as deserving of perusal."—*Lancet*.

"The work abounds with practical views, which are novel to the English reader; and the various subjects are treated in a very methodical and complete manner."—*Provincial Medical Journal*.

"It presents a better idea of the pathology of this class of diseases than any other we have met with."—*Medical Gazette*.

"The author deserves credit for the manner in which he has executed his task."—*Johnson's Journal*.

London: HENRY RENSHAW, 356, Strand.

CITRATE OF IRON.

THIS most valuable and beautiful Preparation of Iron for medicinal use, is superior to every other Salt of that Metal, from its possessing the following qualities :—

First. It is agreeable to the taste.

Second. It never disagrees with the stomach.

Third. It is perfectly and immediately soluble in water, making a clear, ruby-red solution.

Fourth. It is equally, if not more, efficacious in every case where Iron is prescribed than any other preparation.

Fifth. It is compatible with volatile and fixed alkalies, and their carbonates, hydriodate of potash, and most other substances which decompose other salts of Iron.

From these properties it is presumed that it must, as soon as it is known, entirely supersede the unscientific forms in which this metal is usually given; as Steel-wine, the old Carbonate of Iron, Griffiths' Mixture, and the general salts, which are so prone to decomposition.

Dose, from Five to Ten Grains, three times a-day.

It is sold only in bottles, sealed and labelled **BULLOCK**, 22, Conduit-street, Hanover-square.

The "Pharmaceutical Journal" having admitted into its last number a paper upon this preparation tending to mislead the Profession, Mr. **BULLOCK** feels himself called upon to make the following statement :—

Every one at all conversant with the state of pharmacy in France and Germany will admit, that it is there in a state of progressive improvement, which is very imperfectly followed up in this country. Numberless most important and valuable preparations are there produced for the use of physicians and surgeons, to which the bulk of the Profession in this country are at present strangers. This conviction induced Mr. B. to spend several years in those countries, for the purpose of bringing home such contributions to the *Materia Medica* as had there been discovered and tested in practice, and of using his own endeavours to give an impulse to the subject which should lead to original investigations at home. The most obvious improvement, and one which must often have struck many medical men, was found in the Preparations of Iron in common use in France; and of these the Citrate, from its many valuable properties, appeared the most promising with which to commence his career as a chemist in London. The **CITRATE OF IRON** was first made by M. **BERAL**, in Paris, who published a form for its preparation, but omitting to state some important conditions, it occasioned Mr. **BULLOCK** considerable trouble and expense to prepare a salt equal to that of M. **BERAL**. Having succeeded in this first object, Mr. **BULLOCK**, notwithstanding its high reputation on the Continent, next submitted it to his medical friends in London for trial, and it was only after their report of its great efficacy in practice that he ventured to offer it to the Profession in England. The demand for it has suddenly become very extensive; and to make arrangements for its supply, Mr. B. has been obliged to suspend for a short time his intention of offering other medicinal agents, both of his own and those derived from continental research, which he will shortly be able to accomplish. In the mean time, as another part of his design is to present every new medicinal agent at a price suitable for general use, it was necessary to *manufacture* the **CITRATE OF IRON**; and having just accomplished this, he can make a considerable reduction in the price at which it was at first offered when only *made* in small quantities.

Just at this moment the above paper would hazard the reputation of the "**CITRATE**," on the ground of its name, which it says improperly and imperfectly describes the preparation. In answer to this, Mr. **BULLOCK** would observe, that the name **CITRATE OF IRON** was given it by M. **Beral**, and he does not think himself at liberty to change it on *any* grounds, there being *always* most forcible objections to the introduction of new terms. It is not, indeed, an absolutely pure citrate, the chemist will find in it a little ammonia. But, if the reader will turn to the London Pharmacopœia, article **FERRI POTASSIO TART.**, he will find that ammonia is ordered in its preparation, although it does not appear in the *name*, doubtless from its being far from obvious what precise part the ammonia acts in the result of the operation.

Now the case of the **CITRATE** is precisely analogous.

An Advertisement having been put forth of an Ammonio-Citrate—certainly as an *imitation* of Mr. **BULLOCK**'s Preparation—it is hardly necessary to caution the Profession that this, if truly described by its name, is an untried preparation in practice; and Mr. B. begs to suggest to the respectable firm whence that advertisement emanates, whether it would not be better to do something new for the Art than to mar the success of others by repeated imitations. Mr. B. has no intention to deprecate fair competition; he made no pretensions to this Salt as his own discovery, but stated it to be a *French* preparation. He only claims the merit of introducing it to the profession in **ENGLAND**.

22, Conduit-street, Hanover-square.

LAENNEC ON THE CHEST.

8vo, price 18s,

A TREATISE on the DISEASES of the CHEST, and on MEDIATE AUSCULTATION. By R. T. H. LAENNEC, M.D. Translated, with copious Notes, by JOHN FORBES, M.D., F.R.S. Fourth Edition, considerably enlarged and improved, with many additional Notes.

London: Henry Renshaw, 356, Strand; Longman and Co.; Whittaker and Co.; and Simpkin and Co.

Foolscap 8vo, cloth, price 7s,

SIR ASTLEY COOPER'S LECTURES on the PRINCIPLES and PRACTICE of Surgery. New Edition.

"The practical hints and cautions to be found in these discourses will be valued so long as surgery shall be cultivated as a science."—*Lancet*.

London: Henry Renshaw, 356, Strand.

Foolscap 8vo, cloth, lettered, price 10s 6d,

A MANUAL of GENERAL THERAPEUTICS, with Rules for Prescribing, and a copious Collection of Formulae. By D. Spillan, M.D., A.M.

"The manner in which Dr. Spillan has executed his arduous task, reflects high credit both on his industry and judgment. We can safely recommend his work as one calculated to be of great value, not only to the student, but to the practitioner."—*Dublin Medical Press*.

"This will prove a great favourite with the active practitioner, who has not time to wade through elaborate works on therapeutics. It is an excellent compilation, some portions of which we shall notice in our next number."—*Johnson's Gazette*.

"It is a valuable boon, both to the practitioner and student; and contains ample stores of valuable information. We strongly recommend for the perusal of our readers, the admirable chapter on the modus operandi of medicines contained in Dr. Spillan's work."—*Dublin Medical Gazette*.

London: Henry Renshaw, 356, Strand.

CURE of STAMMERING without SURGICAL OPERATION.—Mr. HUNT begs leave to announce that his practice in the Cure of Stammering has recently been, if possible, more successful than ever, in consequence of his Pupils paying more resolute attention to his instructions from their distress at having ineffectually submitted to the "painful and unwarrantable incisions," or their dread of having to undergo the "horrible mutilations" which are now, after being abandoned by their German Inventors, so cruelly persevered in as a remedy for the complaint by parties in this country. A prospectus, containing testimonials, &c., sent to any part of the kingdom, free of expense.

224, Regent-street.

HÆMORRHAGE, internal and external, often baffles the Skill of Medical Men. Sir B. C. Brodie, Dr. Chambers, Dr. J. Johnson, Professor Mayo, Mr. Guthrie, and other high authorities, have for years strongly recommended, and exhibited, with the greatest success, the CHEVALIER RUSPINI'S STYPTIC. Speaking of Hæmoptysis, Dr. Chambers says, "Give ʒj. of Ruspini's Styptic every three hours;" Sir B. C. Brodie also, "Apply Ruspini's Styptic;" Mr. Guthrie, "If the Bleeding be obstinate, you may suppress it by Ruspini's Styptic;" Dr. Johnson, "This Styptic possesses extraordinary powers in arresting Hæmorrhage;" Professor Mayo, "Of all the Styptics with which I am acquainted, Ruspini's is the most efficacious;" together with numerous other eminent recommendations.

It is Prepared and Sold, Wholesale and Retail, at the Dépôt, J. Collins, 54, Piccadilly; to be had also at the Wholesale Houses, and Retail at all the Drug-gists in the Kingdom.

HEREFORD GENERAL INFIRMARY.

HOUSE SURGEON and APOTHECARY.

CARY.—A Vacancy having occurred in the office of House Surgeon and Apothecary to this Institution, by the resignation of Mr. Tully, a General Board of Governors will be held on Thursday, the 2nd of June, at Twelve o'Clock, to receive Applications to fill the said situation, when the day of Election will be fixed, and Testimonials received.

Candidates must be Members of one of the recognised Colleges of Surgeons, and Licentiates of the Apothecaries' Company, London.

The salary which the Weekly Board intend recommending to the General Board of Governors is £80 per annum, with Board, Lodging, Washing, Coals, and Candles; and with a prospect of increase of salary after five years' service, for which period he will be required to retain the appointment, or forfeit half a year's salary.

Every information, respecting the duties and requisite qualifications, will be furnished on application to the Secretary.

Testimonials and qualifications to be sent, post free, to the Chairman of the Weekly Board, on or before Wednesday, the 25th of May.

By order of the Board,

JAMES PENDEGRASS, Chairman.

Hereford Infirmary, April 28, 1842.

MR. YEARSLEY AND MR. LISTON.

THE attention of the Profession is called to a correspondence with the Council of the College of Surgeons, in reference to the extraordinary testimonial given by Mr. Liston to an unprofessional person, in favour of a *pretended secret*, and, therefore, empirical process for the relief of Stammering, which nobody knows better than Mr. Liston, is of *only temporary service*; and in disfavour of operations which Mr. Yearsley is frequently called upon to perform in certain cases of Stammer connected with physical obstruction; operations, also, which nobody knows better than Mr. Liston, are harmless, and even almost painless, when skilfully performed.

A copy of the Correspondence, with Mr. Yearsley's Remarks appended, may be had, gratuitously, at the different Medical Libraries, or at Mr. Yearsley's residence, 15, Saville-row.

EASE AND COMFORT FOR TENDER FEET.

HALL and CO., Wellington-street,

Strand, London, Sole Patentees of the PANNUS CORIUM, or LEATHER CLOTH BOOTS and SHOES for Ladies and Gentlemen. These articles have borne the test and received the approbation of all who have worn them. Such as are troubled with corns, bunions, gout, chilblains, or tenderness of feet from any other cause, will find them the softest and most comfortable ever invented; they never draw the feet or get hard, qualities which strongly recommend them to Merchants and Shippers for warm climates, where they are found easier and more durable than any other kind of shoes; they resemble the finest leather, and are cleaned with common blacking. Also, the much-improved Patent India-Rubber Goloshes are light, durable, and perfectly waterproof; they protect the feet from damp and cold.

HALL and Co.'s Portable Waterproof Dresses claim the attention of all who are exposed to the wet. Ladies' Cardinal Cloaks with Hoods from 18s. Gentlemen's Dresses, comprising Cape, Overalls, and Hood, 21s.; the whole can be carried with convenience in the pocket.

N.B.—The Shoes or Goloshes can be fitted by sending a shoe, and the Waterproof Dresses by the height of the Figure.—BOOT and SHOE MAKERS can be supplied with any quantity of the Pannus Corium, or Leather Cloth, from one yard and upwards.
