## Memorial of the late Dr. Roupell.—

It is proposed that a PORTRAIT of the much-lamented Dr. ROUPPELL, now in the possession of Mr. PICKERSGILL, R.A. should be purchased and placed in the Hall of the Medical College of St. Bartholomew's Hospital, as a testimonial of respect for Dr. ROUPPELL's memory. Dr. BURROWS, Mr. STANLEY, Dr. BALY and Mr. PAGET have formed themselves into a Committee for carrying this object into effect, and will receive Subscriptions in furtherance of it. The Subscription is limited to One Guinea.

St. Bartholomew's Hospital. October 1854.

## Royal College of Surgeons of England.

—Notice is hereby given, that the next PROFESSIONAL EXAMINATION for the FELLOWSHIP of the College will take place on TUESDAY and THURSDAY, the 28th and 30th instant.

Further information relating to this Examination may be obtained on application at the College. EDMUND BELFOUR, Secretary. November 8th, 1854.

## Warming and Ventilating, by Hot

AIR, CHURCHES, HOSPITALS, TOWN HALLS, and other PUBLIC BUILDINGS.—J. BOILESSVE, C.E., 55, King William Street, City of London, respectfully solicits the attention of the Nobility, Gentry, Clergy, etc., to the following Testimonial, and begs to say he will attend personally any appointment:—

Highfield, Berkhamstead, Herts, January 24th, 1854.

SIR,—I read some time ago in your valuable paper, an article advocating the need in this climate of warming dwellings with some simple apparatus, giving ventilation, combined with the healthiest temperature, at a great saving of fuel. I am very glad to give you the result of my experience of a new kind of stove, named "Calorifere" erected some months ago at this residence by Mr. J. Boilessve, London; it answers its purpose perfectly; the house and every room to which the ventilation is adapted, is kept at an agreeable temperature, with an utter absence of the oppressive atmosphere usually experienced by all other methods of warming dwellings; that I have seen several persons, some of them highly scientific, who have examined the apparatus and have expressed themselves satisfied, and consider it a most perfect application of warm air and ventilation combined. The cost of warming the house and conservatory attached, has been Eightpence per Twenty four Hours, during the late cold weather, and the trouble of attendance is very little. The economy of fuel will cause this stove to be generally adopted, I have no doubt, more especially as the charge for coals is constantly on the increase. The stove in operation should be seen to be appreciated, and I can add, from my experience of its effects during this winter, that it is invaluable for any invalid in so variable a climate as ours, and no one can be aware of the comfort until it is tried.

I am, Sir, yours obediently, a Subscriber,

The Editor of the Times.

E. W. FERNIE.

## Bland and Long, Philosophical and

CHEMICAL INSTRUMENT MAKERS, AND OPERATIVE CHEMISTS, 153, Fleet-street, London, invite the attention of the Medical Profession to their improved MEDICO-GALVANIC MACHINES, which produce a continuous current of Electricity of any required intensity in ONE UNIFORM Direction; 2, 3, 4, 5, and 8 guineas. Conductors for applying the current to the spine, feet, ears, teeth, eyes, and other parts of the body. ANATOMICAL ACHROMATIC MICROSCOPES, with Jointed Stands, in cases, complete, £5 5s., and upwards.

Slides of Urinary Deposits, Injections, Muscular Fibre, etc. CHEMICAL CHESTS arranged for the analysis of urine, and for Toxicological purposes. URINOMETERS in metal (gilt), 14s. each; ditto in glass, 4s. 6d., 8s. 6d., 11s. and 30s. each.

TO THE MEDICAL PROFESSION.

## Fr. G. Ernst, Anatomical Machinist

and MANUFACTURER of SURGICAL INSTRUMENTS, 43, Lamb's Conduit Street, Foundling Hospital, begs to inform the Faculty that he makes every kind of APPARATUS for the CURE and RELIEF of BODILY DEFORMITIES, and all Diseases requiring Mechanical Assistance; Trusses of every description upon the newest principles, Elastic Bandages, Stockings, Knee-caps, and Riding-belts; Artificial Legs, Arms, and Hands, Crutches, etc. Every Article warranted of the best materials and at moderate prices. Surgical Instruments supplied to order, repaired, etc. Madam ERNST (late Miss Hunt), who has been for many years engaged in the business, waits upon Ladies, and begs to recommend her improved Utero-Abdominal Bandages, adapted to every kind of weakness or relaxation; Accouchement-Belts, etc.

## Varicose Veins and Supporting Belts.

—SURGICAL ELASTIC STOCKINGS and KNEE-CAPS, pervious, light in texture, and inexpensive, yielding are an efficient and unvarying support, without the trouble of lacing. Likewise, a strong low-priced article for Hospitals and the Working-classes, ELASTIC NET CORSETS of the same beautiful fabric. ABDOMINAL SUPPORTING BELTS for both Sexes; those for Ladies' use, before and after accouchement, are admirably adapted for giving adequate support with extreme lightness—a point little attended to in the comparatively clumsy contrivances and fabrics hitherto employed.

Instructions for measurement and prices on application and the articles sent by post from the Manufacturers, POPE and PLANTE, 4, Waterloo-place, Pall Mall, London.

The Profession, Trade, and Hospitals supplied.

## Hare-Lip.—Extraordinary Application and CURE.

Communication from Mr. BROADBENT, Surgeon, Ferry Hill, Durham. MR. BENJAMIN NICKELS,

SIR,—I wish to state concerning your Plaster to the following effect. About ten days after an operation for Hare-lip, the boy fell against a stone step and ruptured the lip. The day previously I had received your Elastic Plaster, and on being summoned to the boy, (without much hope of success,) I applied three strips of the Plaster, extending from ear to ear, bringing the ruptured edges into apposition. Seven days after, the Plaster retained the cheeks in the position I had left them on the day of application. Fresh strips were then applied, and the edges ultimately united. In my opinion, no other Plaster could have answered the intention, and I think it specially adapted to wounds on the face.

I remain yours obediently,  
(Signed) G. W. BROADBENT.

NICKELS'S PATENT ELASTIC ADHESIVE PLASTER, & ELASTIC ADHESIVE BANDAGES, which are made on quite a new principle, rendering them a cheap, efficient, unvarying support as a spiral covering, or stocking (without the trouble of lacing), for Varicose Veins, Sprains, Weak Joints, and all Rheumatic Affections. These Bandages may also be cut and applied as ordinary strapping.

The Patentee has had the honour of receiving the highest testimonials in approbation of his ELASTIC PLASTERS from the following most eminent Members of the Profession, and many other Gentlemen, by whom they are patronized and used in their hospital and private practice:—J. C. W. LEVER, M.D., Physician-Accoucheur to Guy's Hospital. Mr. FERROUSON, Surgeon to His Royal Highness Prince Albert, Professor of Surgery in King's College, London, Surgeon to King's College Hospital. Mr. HILTON, Surgeon to Guy's Hospital, Surgeon to the City of London Hospital for Diseases of the Chest.

THE PATENT ELASTIC COURT PLASTERS are found most superior both in appearance and quality.

Sold by all the principal Chemists in the United Kingdom, and by MR. BENJAMIN NICKELS, Surgical Plaster Manufacturer, 9, CANNESWELL GREEN, London.
