## ADNAM'S Improved Patent Groats and Barley.

THE ONLY EXISTING PATENT,

And strongly Recommended by the Medical Profession.

## To Invalids, Mothers, and Families.

The important object so desirable to be obtained, has at length been secured to the Public, by J. & J. C. ADNAM, PATENTEES, who, after much time and attention, have succeeded, by their Improved Process, in producing preparations of the purest and finest quality ever manufactured from the Oat and BARLEY.

The Barley being prepared by a similar process is as pure as can be manufactured, and will be found to produce a light and nourishing Food for Infants and the Aged.

A report having been circulated that preparations of so white a character could not be produced from Groats and Barley alone, the Patentees have had recourse to the highest authority for an analysis to establish the fact, a copy of which is subjoined:—

Chemical Laboratory, Guy's Hospital, February 19, 1855.

I have submitted to a microscopical and chemical examination the samples of Barley-meal and Groats which you have forwarded to me, and I beg to inform you that I find in them only those principles which are found in good Barley: there is no mineral or other impurity present, and from the result of my investigation, I believe them to be genuine and to possess those nutritive properties assigned by the late Dr. Pereira to this description of food.

Messrs. J. and J. C. Adnam and Co. (Signed) A. S. TAYLOR.
