**ADNAM'S Improved Patent Groats and Barley.**  
THE ONLY EXISTING PATENT,

And strongly Recommended by the Medical Profession.

## To Invalids, Mothers, and Families.

The important object so desirable to be obtained, has at length been secured to the Public, by J. & J. C. ADNAM, PATENTEES, who, after much time and attention, have succeeded, by their *Improved Process*, in producing preparations of the purest and finest quality ever manufactured from the Oat and BARLEY.

The Barley being prepared by a similar process is as pure as can be manufactured, and will be found to produce a light and nourishing Food for Infants and the Aged.

A report having been circulated that preparations of so white a character could not be produced from Groats and Barley alone, the Patentees have had recourse to the highest authority for an analysis to establish the fact, a copy of which is subjoined:—

Chemical Laboratory, Guy's Hospital, February 19, 1855.

I have submitted to a microscopical and chemical examination the samples of Barley-meal and Groats which you have forwarded to me, and I beg to inform you that I find in them only those principles which are found in good Barley: there is no mineral or other impurity present, and from the result of my investigation, I believe them to be genuine and to possess those nutritive properties assigned by the late Dr. Pereira to this description of food.

Messrs. J. and J. C. Adnam and Co.
