

## REPORT ON UNWHOLESOME MEAT.

THE Metropolitan Association of Medical Officers of Health, at their monthly meeting in June, appointed a committee, consisting of Dr. Letheby, Dr. R. D. Thomson, Dr. Barnes, Mr. Liddle, Dr. Gibbon, and Dr. Druitt, with Dr. Chalice as Chairman, to inquire into the facts relating to the alleged sale of diseased and unwholesome meat in the metropolis, as well as the ill effects arising therefrom, and the best mode of prevention. The report was read at the general meeting of the Association, held at the Board of Health, on the 6th of August, and ordered to be printed for the use of the members of the Association, and for the guidance of the inspectors of nuisances in carrying out that section of the Nuisances Removal Act which relates to diseased or unwholesome food. The following extract relates to the means of detecting unwholesome meat:—

"In order to give a useful and practical turn to their labours, your committee, on one occasion, invited the inspectors of nuisances out of their several districts to meet Mr. Fisher and Mr. Pocklington at Dr. Dundas Thomson's rooms in St. Thomas's Hospital, in order that the appearances and characters of diseased meat might be explained to them from actual specimens, and that thus they might be prepared for the more efficient discharge of their duties. Your committee then endeavoured to draw up a short summary of the marks by which unwholesome meat may be known, in plain, unprofessional language, for the use of inspectors of nuisances, as follows:—'The chief marks which show that meat is unwholesome are, in the first place, its colour, which is generally either dingy or too bright. Secondly, there is the smell, which is peculiarly sour and sickening even when such meat is fresh, and very different from the smell of good meat when tainted through overkeeping. In the next place, there is a sign which is considered of more value than any other. It is a peculiar and decided wetness of the meat, which is also soft, flabby, and not set. Moreover, it should be noticed that there is often a large quantity of blood in the veins, which has curdled there, and not run out as it does when sound beasts are killed. Or, if there are no clots of blood, there will be very likely shreds and flakes of white matter in the larger veins, particularly in the liver. Then, there is a whole set of signs which show that an animal, before being killed, was greatly out of condition; such as a pale bloodless eye, a paleness of the "bark" of sheep, and unnatural whiteness of the flesh, which are often seen in sheep which have the rot. Want of fat, and especially of the suet about the kidneys, in place of which a watery flabby stuff is sometimes found, wasting of the fleshy part of the meat, and a watery jelly-like state of the tissue which lies between the muscles, insomuch that drops of water may run out when it is cut across, are other decided signs. It is to be remarked, that drovers are said sometimes to strike heavy blows on the eye to hide the pale look which arises from wasting disease. Again, there are some signs of special disease. Thus, when cattle died of pleuropneumonia, or lung disease, the insides of the ribs will usually be found to be furred up with a quantity of white curdy matter (pleuritic adhesions); and the same is found inside the flanks when beasts have died of inflammation of the bowels. In these cases, the natural smooth glistening surface of the membrane which lines the ribs and flanks is lost. One thing to be especially looked for is the little bladders among the flesh of pigs, which constitute the disease known as measles; and similar things in the liver of sheep which have the rot. Experienced butchers are said to know by the smell of meat whether the beast had certain medicines given to it before being killed. The above are the chief signs of unwholesome meat; of course they will vary with circumstances—for one animal may be killed at the very beginning of an acute disease, another after it has undergone considerable wasting, and a third may have been merely killed for appearance's sake, just before it would have died of itself.'"

**GREAT NORTHERN INFIRMARY.** An institution of the above name has been opened lately at King's Cross—a neighbourhood where especially it was needed. The number of new patients since the day of opening, June 30th, to the present date, are—out-patients, 1,427; in-patients, 9: the daily attendance averages 100. Attendance is given every day in the week at stated hours, besides which, urgent cases are seen at any hour, day or night. A maternity charity is attached to the institution, for the delivery of poor married women at their own homes.

**THE CHOLERA IN MADEIRA.** The following is an extract from a letter dated Saturday, Aug. 2, 1856; "The cholera prevails greatly, and seems likely to spread to all parts. We hear of it at Puerto do Pargo, and it is very bad at Machico. The Portuguese are great alarmists, and many of them, no doubt, have frightened themselves to death; but, on the other hand, it makes them more energetic in adopting sanitary measures. The Governor has shown the greatest good sense in everything he has done, and goes at all hours of the day and night to the hospital, and has increased the staff of nurses and thought of everything needful; but he cannot command a supply of drugs, and I am sorry to say these are beginning to fail. One chemist has shut up shop, and the crowd is so great about Mauricio's that people have to wait from three to five hours for their turn. Most of the *vilões* (country people), however, provided themselves with *pingoes* (drops), on the first alarm, so they are able to take or give a dose when seized. The disease has not yet penetrated to the Corral, and when I saw Vittorio, he told me that all his family smelt the *pingoes* every morning, and so kept off the *doença* (disease). It is only strong camphorated spirit that has been given by the *Administradores dos Conselhos*; but we depend principally on the Glasgow practice of laudanum, essence of peppermint, and brandy. I am sorry to say that when the attack is subdued the danger is not over, as many die in the stage of secondary fever. There is no scarcity of food in the island, except meat, as the *vilões* don't like to bring their cattle to town. But the supply has never failed, only been less abundant, and the soup kitchens in Funchal (S. Francisco) and Camacha are always provided. 5. p. m. The new cases are much fewer to-day, but the deaths are many. Yesterday there were 116 buried in Funchal Cemetery—more in proportion to the population than 1,900 a day in Naples, which was thought a great many. . . . Sunday, Aug. 3. . . . The worst seems past. . . . another mercy is that children seem much less liable to it than grown persons. . . . No English person has been attacked by cholera. . . . It is curious that the troops, who are said to have brought the disease, are the only portion of the population who are perfectly free from it. About seven cases occurred within two days of their landing, and since that there have been none."

## TO CORRESPONDENTS.

LETTERS and other COMMUNICATIONS for the JOURNAL should be directed to the private address of the Editor, 39, Curzon Street, May Fair.

Members should remember that corrections for the current week's JOURNAL should not arrive later than Wednesday.

To CONTRIBUTORS. The Editor would feel glad if Members of the Association and others, would cooperate with him in establishing as a rule, that in future no paper for publication shall exceed two pages of the Journal in length. If the writers of long communications knew as well as the Editor does, that lengthy papers always deter the reader from commencing them, this great evil would never arise. Brevity is the soul of medical writing—still more than of wit.

Communications have been received from:—Dr. T. MOFFAT; Mr. J. JONES (Derby); Mr. E. L. HUSSY; DR. KIDD; MR. PYE CHAVASSE; MR. SANDS COX; DR. D. MACKINDER; DR. G. S. JENKS; MR. J. MARTIN; MR. G. M. HUMPHREY; MR. W. B. KESTEVEN; MR. ERASMIUS WILSON; DR. DAVEY; DR. C. H. JONES; DR. ROUTH; MR. J. Z. LAURENCE; MR. T. HOLMES; MR. G. FOUND; DR. JOHN R. NICHOLSON; MR. T. SIMPSON; MR. JOSEPH HINTON; and MR. J. SEATON SMYTH.

## ADVERTISEMENTS.

**Bristol Medical School.—The Winter SESSION, 1856-7, will commence on WEDNESDAY, OCTOBER 1st.** The following Courses of Lectures will be delivered:—

*Surgery*—MR. CLARK and MR. PRICHARD.

*Theory and Practice of Medicine*—DR. BRITTON.

*Chemistry*—MR. HERAPHTH.

*General Anatomy and Physiology*—DR. MARTYN.

*Descriptive and Surgical Anatomy*—MR. COE and MR. C. LEONARD.

*Superintendence of Dissections*—MR. C. LEONARD and MR. W. M. CLARKE.

At the conclusion of the Session, prizes will be delivered in accordance with the regulations of the School.

Certificates of Attendance upon the Lectures delivered at this School, qualify for Examination at the Royal College of Surgeons, the Apothecaries' Hall, the University of London, the Army, Navy, and India Boards.

Fee for unlimited attendance upon all the Courses of Lectures required by the examining bodies (except Practical Chemistry) Forty-five Guineas. Students from a distance can be provided with Board and Lodging under the recommendation of the Faculty of the School.

Information upon all particulars, may be obtained upon application to the Honorary Secretary.

JOSEPH GRIFFITHS SWAYNE, M.D., Hon. Sec. Medical School, Old Park, Bristol, August, 1856.

## DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL.

This pure transparent LIGHT-BROWN COD-LIVER OIL is invariably and carefully submitted to Chemical Analysis, and, to preclude any subsequent admixture or adulteration, is supplied ONLY in Bottles, capsuled and labelled with Dr. DE JONGH's Stamp and Signature, so that the Faculty may rely upon a genuine Medicine, and, so far as is possible, anticipate a uniform, regular, and certain result.

*Sole Consignees and Agents for the United Kingdom and the British Possessions,*  
**ANSAR, HARFORD, & CO., 77, STRAND,  
LONDON.**

HALF-PINTS (10 Ounces), 2s. 6d.

PINTS (20 Ounces), 4s. 9d. QUARTS (40 Ounces), 9s.  
I M P E R I A L M E A S U R E.

\* A LIBERAL DISCOUNT TO THE PROFESSION.

### Pure Cod-liver Oil and Quinine, and

Pure (Aromatised) COD-LIVER OIL AND QUININE, manufactured at Newfoundland by DUNCAN HOGARTH & CO.—The Quinine is combined with the Oil, and the aromatic properties diffused during process of manufacture, thus preserving the purity and sweetness of the Oil, while its natural fishy flavour is covered, and rendered palatable as an agreeable and nutritious tonic.

Messrs. HEARON, M'GUILLOCH, & SQUIRE, Bishopsgate Street, London, Agents to the Consignees. Sold also by W. Sutton and Co., Bow Churchyard; W. Edwards, St. Paul's Churchyard.—Sold in Dispensing Bottles, secured by patent metallic capsules, containing 1 lb. each, 4s.; 2 lb., 7s. 6d.; and 4 lb., 14s.; also in bottles, at 2s., 3s. 6d., and 6s. each.

BERIAH DREW AND COMPANY'S

### Pure Cod Liver Oil with Quinine.

Notice to the Medical Profession. In consequence of the repeatedly expressed opinion that the price of this valuable compound, and also the Cod Liver Oil with Iodide Iron, etc., ought now to be made to approximate more to the present market value of the separate ingredients, and that the hitherto high charge for the mere amalgamation ought to be economised, we have made arrangements for their manufacture on a more effective and less costly plan, which will enable us to alter our prices, until further notice, to the following REDUCED SCALE, viz.—

20 oz. Capsuled Dispensing Bottles, 4s.; 40 oz. ditto, 7s. 6d.; 80 oz. ditto, 11s.; 160 oz. ditto, 27s. each; also in Bottles at 2s. and 3s. each. The larger sizes delivered free to any part of England, including package, for 1s. 6d. above the price of each Bottle.

Finest NEWFOUNDLAND COD-LIVER OIL (same as used for the above preparations), 11s. per Gallon (delivered free for 1s. 6d. extra, including package). PRICE CURRENTS of Drugs and Chemicals on application.

BERIAH DREW and Co., Wholesale Chemists, 91, Blackman Street, Southwark, London.

**Dissecting and Post-MORTEM INSTRUMENTS, NEW and SECOND-HAND, of the very best quality, at PRATT'S, SURGICAL INSTRUMENT MAKERS, 420, OXFORD STREET, 20 Doors from TOTTENHAM COURT ROAD, Inventor of the New Bullet and Lithotomy Forceps with Vulcanized Sheaths. Also, of a New Truss for Hernia, all of which have been approved and ordered by Her Majesty's Army Medical Board.**

ELASTIC STOCKINGS, WOODEN LEGS, CRUTCHES, BANDAGES, TRUSSES, AS USUAL.

WHOLESALE AND RETAIL.

### Shower and all Domestic Baths.

AN EXTENSIVE AND COMPLETE STOCK.

THE BEST MANUFACTURE AND LOWEST PRICES.

DEANE, DRAY, and CO.'S PAMPHLET on BATHS and BATHING may be had GRATUITOUSLY on application and post free. It contains Engravings, with Prices, of Shower, Hip, Plunging, Sponging, and every description of Bath for family use. Shower Baths of Improved Construction. Patent Gas Baths, simple, efficient, and economical. Estimates given for fitting up Bath-rooms.

DEANE, DRAY, and CO. (opening to the Monument), London Bridge. Established A.D. 1700.

**Vichy Water.**—W. Best, having made arrangements with the Vichy Water Company of France, can now offer it at the reduced price of 1s. per dozen, in the new glass bottles, comprising the following sources, Célestines, Hôpital, Grand Grille, Haute-ville, Dames, and Lardy Célestines, also the Vichy salts and pastilles, at his old-established eau de Cologne, arquebuzade, and foreign mineral water depot, 22s, Henrietta Street, Cavendish Square. Agent for Dr. Struve's Brighton Mineral Waters.

### Williams and Son's Pure Glycerine

**SOAP.**—Messrs. JOHN WILLIAMS and SON'S Pure Glycerine Soap has been analysed by two of the most able Chemists of London, and is strongly recommended by several eminent men in the Medical Profession. It is suited to the most delicate skin (whether arising from disease or otherwise), and is the only kind fit for nursery use. May be had of all respectable Chemists, Perfumers, etc.

SOAP WORKS, CLERKENWELL, LONDON.

### RECOMMENDED BY THE FACULTY.

**Pure Manzanilla Sherry, 48s. per dozen.** Amantillado, from 54s. Jerez Viejo Aromatico, 84s. Bordeaux premier, 48s. JAMES MARKWELL, Sen., since May 1840 specially appointed Wine Merchant to Her Majesty and the Imperial Embassies. Offices, 35 to 40, Albemarle Street, and 4, Stafford Street, Piccadilly. N.B. Several dozen in Stock of the famous Old Wines accumulated by J. M. during his lengthened proprietorship of Ibbotson's, Long's, the London and the Grafton Hotels. Good and pure Wines are not cheap. Stock, 5,500 dozen.

118, FENCHURCH STREET, CITY.  
Close to Blackwall Station, and opposite Mark Lane.

### Do you not really bruise your Oats

YET?—You no doubt keep Horses, either in your Professional Calling, or business, or at home, in the country, or for pleasure. ARE YOU AWARE what each Horse costs you per Annum? If you allow me, I will tell you, viz.: from £10 to £50 a year in Corn, Hay, Straw, Beans, and Bran; and before next Christmas Provender must rise in price to the tune of 5s. to 10s. a qr. for Oats and Hay may probably fetch from £7 to £9 per load. CAN YOU AFFORD SUCH EXPENSE? These are ruinous prices for any professional man, obliged, for the purpose of his business, to keep a Horse or two. Now I pledge my word to save you nearly all the Hay you consume (I should say waste), and also one-third or one-half of the Oats you now give; in fact, to enable you to keep two Horses at the expense you are now at to keep one. This is very plain English, surely, and intelligible to any capacity, if understood.

Several Firms in London, whose names may be given as references, save from £100 to £1500 a year by the adoption of this plan, and their Horses have got in much better condition within a month by 30 per cent.

I remain, Sir, respectfully, your very obedient Servant,  
MARY WEDLAKE.

A Book on Feeding, 14th Edit., 1s.; also Book on Bread-Making at Home, cheap and pure, 1s., post free, returned to purchasers.

Oat-Crushers and Chaff-Cutters from 5s. to £10.

### BY HER MAJESTY'S ROYAL LETTERS PATENT.

**Major's Remedies for the Horse, the best and most effectual ever discovered, superseding the "burning iron" and the torture of the "cautery".**

MAJOR'S BRITISH REMEDY, for the Cure of Ringbone, Spavins, Splints, etc. Price £1. 15s.

MAJOR'S RESTORATIVE and INFLUENZA DRINKS. Now in extensive use for recovering young and debilitated Horses. Price per Bottle, containing Six Drunks, 10s. 6d.; with Twelve ditto, 17s. 6d.

MAJOR'S SYNOVITIC LOTION (the Remedy, No. 2), for Grogginess, Weak Joints, Sprains of the back Sinews, Ruptures of the Sheaths of Tendons, Suspensory Ligaments, Shoulder Lameness, and Inflammation; also for the Cure and Prevention of Breaking Down, etc.—In Bottles, large size, £1. 1s.; small, 10s. 6d. each. The above invaluable remedies can now be forwarded to any part of the United Kingdom. Prepayment by Cheque or Post-order, payable to Joseph Major, Charing Cross.

Address.—J. MAJOR, HORSE INFIRMARY, BRITISH YARD, COCKSPUR STREET.

**Bland and Long, Philosophical and CHEMICAL INSTRUMENT MAKERS, AND OPERATIVE CHEMISTS, 153, Fleet-street, London, invite the attention of the Medical Profession to their improved MEDICO-GALVANIC MACHINES, which produce a continuous current of Electricity of any required intensity in ONE UNIFORM Direction; 2, 3, 4, 5, and 8 guineas. Conductors for applying the current to the spine, feet, ears, teeth, eyes, and other parts of the body, ANATOMICAL ACHROMATIC MICROSCOPES, with Jointed Stands, in cases, complete, £5 5s., and upwards.**

Slides of Urinary Deposits, Injections, Muscular Fibre, etc. CHEMICAL CHESTS arranged for the analysis of urine, and for Toxicological purposes. URINOMETERS in metal (gilt), 1s. each; ditto in glass, 4s. 6d., 8s. 6d., 10s. and 30s. each.
