

minster, occurred in circumstances, which the medical attendant relates as follows:—"The whole family, consisting of eight persons, eat, drink, and sleep, in one very small room; four of them are ill with small-pox; none apparently have been vaccinated; and it is stated that the same disease carried off four children in the family on a former occasion." The deaths from scarlatina, which for some previous weeks have been about 30, rose last week to 51. Thirteen children died from want of breast-milk, and from inanition. One person died of intemperance. A mendicant, aged 30 years, died in the Chelsea Workhouse of scurvy.

Last week the births of 814 boys and 739 girls, in all 1553 children, were registered in London. In the ten corresponding weeks of the years 1846—55 the average number was 1416.

At the Royal Observatory, Greenwich, the mean height of the barometer in the week was 29.852 in. The highest reading was 30.05 in., on Thursday; and on both that and the following day, the mean reading was above 30 in. The mean temperature of the week was 58.7 deg., which is 1.3 deg. above the average of the same week in 38 years (as determined by Mr. Glaisher). The highest was 72.5 deg., on Wednesday; the lowest 44.8 deg., on Tuesday. The mean dew-point temperature was 51.7 deg.; and the difference between this and the mean temperature of the air was 7 deg. The mean temperature of the water of the Thames was 62.0 deg. The wind blew on the last three days from the north-east and north. The amount of rain-fall was 0.41 in.

ACCIDENTAL POISONING BY OPIUM. On Thursday evening, Sept. 11, one of those cases which are unfortunately not rarely met with—the administration of a poison instead of a prescribed medicine, through mistake or negligence—occurred in Weymouth, Dorset. The person whose life has been sacrificed is named Augustus Broughton, and is son of Colonel Broughton, residing at Powell-villa, Chickerell, near Weymouth. It appears that about the middle of the day in question the deceased complained of a slight headache; his mother, therefore, sent a servant named Eliza Dowell to the shop of Mr. Barling, chemist of this town, with a note requesting "an aperient draught for a child 11 years old". The servant gave the note to one of the assistants, which of whom she knew not. The assistants, or rather apprentices, are named Lundie and M'Connochy, besides whom there is a lad named Barrett, about 13 years of age. This lad, it appears, was subsequently directed to get the aperient—"black draught". By some mistake or negligence, this lad put a proportion of "black drop"—a preparation of opium. This "black drop" was kept in a cupboard, and the black draught on a shelf near the counter. Unfortunately the "black drop" was put into a bottle and conveyed to the boy, and, it would appear, administered to him, shortly after which he became comatose, and could not be awoke. Mr. J. Lithgow, a surgeon, was sent for, but could not render any assistance, and shortly after his arrival the unfortunate child expired. An inquest was held on the body. The surgeons, Messrs. Lithgow and Tompson, stated that their examination of the contents of the body led them to conclude positively that the death of the deceased was caused by the administration of a preparation of opium. The chemist and druggist, Mr. Barling, and his assistant, John M'Connochy, made statements on oath, from which it would appear that the former was absent at the particular time, and that the latter knew nothing of the execution of the order in question. The only other persons who could have executed it were John Lundie and James Barrett. The former is about 20 years of age, and has been apprenticed to Mr. Barling about four years; and the latter is 13 years of age, and has been in the service of Mr. Barling just over four months. The jury, after a long consultation, returned the following verdict:—"We find that the deceased, Augustus Broughton, came to his death from the effects of a preparation of opium being administered to him instead of black draught, the mistake having occurred through the want of care on the part of John Lundie and James Barrett, two servants in the employ of Mr. Barling, chemist and druggist; and the jury also wish to express their disapprobation of allowing young persons in the employ of druggists to dispense medicine until they are properly qualified by experience to do so."

GENERAL HOSPITAL, BIRMINGHAM: GRANDE FETE AT ASTON PARK. A second *fête champêtre* was given on Monday last in the beautiful park surrounding Aston-hall. The success which attended the first, given a few weeks ago, by which some £1,700

was realized in aid of the funds of the Queen's Hospital, Birmingham, emboldened the friends of the old General Hospital to repeat the experiment on behalf of their institution, and the result was equally satisfactory. The arrangements were entrusted to the same committee, and no efforts were spared by them to render the second *fête* as attractive as the first. Galleries of immense dimensions were erected, archery grounds constructed, orchestras pleasingly decorated, elegant dancing-rooms provided, the London Orchestral Union, with Picco, the Sardinian minstrel engaged, the splendid band of the Royal Artillery, fifty in number, brought from Woolwich, with the band of the 10th Hussars, and five others in various parts of the grounds, thirty thousand variegated lamps of surpassing brilliancy in the sycamore avenues, and, to close all, a grand display of fireworks, supplied from the Ordnance stores at Woolwich. The weather was fine and everything went off admirably. There was no hitch in any part of the day's programme, and the magnificent display of fireworks, surpassing anything ever seen before in the neighbourhood of Birmingham, formed a fitting *finale* to the varied pleasures of the day. It is calculated that not fewer eighty thousand people were admitted into the park during the day, and the net receipts of the General Hospital, it is thought by those best acquainted with the expenses, will be upwards of £2,000. Some give even a higher sum.

MEDICAL JOURNALS IN RUSSIA. There are four medical periodicals in Russia: the *Medicinishe Zeitung Russlands* (Russian Medical Times), edited in German by Drs. Heine, Krebel, and Thielmann; the *Gesundheitsfreund* (Friend of Health), edited in Russian by Dr. Eugene Pelikan, and containing original communications and selections from foreign works; the *Zeitschrift für Militair Medicin* (Journal of Military Medicine), edited in Russian under the direction of Dr. Eugene Pelikan and Dr. Tschistowitch, professor-adjoint of the Medico-Chirurgical College in St. Petersburg; and, lastly, the *Moskow Medical Journal*, edited by Professor Polownin. The *Journal of Military Medicine* appears four times yearly, in octavo, in an edition of four thousand copies; it is extensively circulated to all military surgeons in Russia, at the very moderate price of three silver roubles (about 13s. 6d.). It contains original contributions, mostly supplied by the professors in the Russian universities and in the medico-chirurgical school at St. Petersburg, and also by military surgeons, as well as translations of monographs of excellence by German, French, and English surgeons. The original articles are by Pirogoff, Pelikan, Zablotzky, Kieter, Tschistowitsch, and Platanoff, in St. Petersburg; by Hubenet and Mazonn in Kiev, etc. Among the selections from foreign authors, are Nelaton's *Elements of Surgical Pathology*, Forget on *Diseases of the Heart*, Valentin's *Physiology*, Becquerel on *Hygiène*, Zehetmayer on *Auscultation and Percussion*, Clarus and Williams on *Diseases of the Heart*, Oscar Heyfelder on *False Passages*, J. F. Heyfelder on *Resections and Amputations*, etc.; as well as translations from the smaller works of Kölliker, Rochow, Luschka, Vierordt, Frerichs, Henle, etc. (*Deutsche Klinik*, August 2nd, 1856.)

THE CASE OF MR. SNAPE. At the Central Criminal Court, on Tuesday last, the Grand Jury ignored the bill of indictment for manslaughter against Mr. Snape, of the Wandsworth Asylum.

TO CORRESPONDENTS.

Members should remember that corrections for the current week's JOURNAL should not arrive later than Wednesday.

Communications have been received from:—MR. W. GILLARD; DR. P. H. WILLIAMS; MR. J. P. GARLICK; MR. G. E. NICHOLAS; MR. J. Z. LAURENCE; DR. KOUTH; DR. KIDD; MR. W. B. KESTEVEN; DR. COCKLE; DR. W. P. BROOKES; DR. A. G. MALCOLM; DR. D. H. TUCKE; MR. E. GARRAWAY; MR. O. L'EMBERTON; MR. THOMAS MORRIS; and MR. JOSEPH CLEGG.

ADVERTISEMENTS.

PROFESSOR SYME'S SURGERY.
Now ready, Fourth Edition, revised, 8vo.

The Principles of Surgery. By
JAMES SYME, F.R.S.E., Professor of Clinical Surgery in the
University of Edinburgh.
JOHN MURRAY, Albemarle Street.

Now ready, Fourth Edition, revised, Post 8vo, 10s. 6d.

On the Sanative Influence of Climate.
With an Account of the best Places of Resort for Invalids. By SIR
JAMES CLARK, Bart., M.D.

JOHN MURRAY, Albemarle Street; and
JOHN CHURCHILL, Princes Street, Soho.

NEW EDITION OF DR. MAUNSELL'S DUBLIN PRACTICE OF MIDWIFERY.

Just published, in fcap. 8vo, price 5s. cloth,

The Dublin Practice of Midwifery.

By HENRY MAUNSELL, M.D., formerly Professor of Midwifery in the Royal College of Surgeons in Ireland. New Edition, revised.

London: LONGMAN, BROWN, GREEN, LONGMANS, and ROBERTS.

MOST IMPORTANT AND COMPLETE WORK ON OPERATIVE SURGERY.

Bernard and Huett's Illustrated

Manual of Operative Surgery and Surgical Anatomy. Edited with Notes and Additions, and adapted to the use of Medical Students. In one handsome volume, 8vo., with 119 plates. Half-bound in Morocco, gilt top, coloured plates, £3 4s.; plain, £2 4s.

Quekett's Treatise on the Microscope,

8vo. Third Edition. With 300 illustrations and 11 plates. Price 21s.

Quekett's Lectures on Histology.

2 vols., 8vo. With 423 woodcuts. Price £1 8s. 6d.

Quarterly Journal of the Chemical

Society of London. Nos. 1 to 34 are out, 1849-55. Price of each, 3s.

Masse, Petite Atlas complet d'Anatomie descriptive du Corps humain.

4me edit., avec 113 planches col., 8vo. Price £1 16s.

Lebert, Traité d'Anatomie Pathologique.

In fol., avec planches colorées. Nos. 1 to 13 out, price of each, 15s.

Fau, Anatomy of the External Forms of Man, for Artists, Sculptors, etc.

Edited by Dr. R. KNOX, with additions to text and atlas. 4to. 28 plates, coloured, £2 2s. Plain £1 1s.

Catalogue of New English, American, and Foreign Medical Scientific Books, gratis, or per post 2d.

London: H. BAILLIÈRE, Publisher, 219, Regent Street; and 290, Broadway, New York.

Bones, Skeletons, etc., at low prices.

—The Selection of Separated Heads, Vertebrae, Hands and Feet on cat gut, having been made by a Professor of Anatomy, W. MATTHEWS can confidently recommend them, both for being perfect and well-marked Bones.

HOSPITAL ACHROMATIC MICROSCOPES.—The Profession are invited to inspect and test them; the excellence of the object glasses, good work of the instruments, and cheapness, are universally admitted: price £3 3s. and £5 5s.

W. MATTHEWS, Surgical Instrument Maker to King's College Hospital, 8, Portugal Street, Lincoln's Inn Fields, London.

118, FENCHURCH STREET, CITY.
Close to Blackwall Station, and opposite Mark Lane.

Do you not really bruise your Oats

YET?—You no doubt keep Horses, either in your Professional Calling, or business, or at home, in the country, or for pleasure. ARE YOU AWARE what each Horse costs you per Annum? If you allow me, I will tell you, viz.: from £10 to £50 a year in Corn, Hay, Straw, Beans, and Bran; and before next Christmas Provender must rise in price to the tune of 5s. to 10s. a qr for Oats and Hay may probably fetch from £7 to £9 per load. CAN YOU AFFORD SUCH EXPENSE? These are ruinous prices for any professional man, obliged, for the purpose of his business, to keep a Horse or two. NOW I pledge my word to save you nearly all the Hay you consume (I should say waste), and also one-third or one-half of the Oats you now give; in fact, to enable you to keep two Horses at the expense you are now at to keep one. This is very plain English, surely, and intelligible to any capacity, if understood.

Several Firms in London, whose names may be given as references, save from £100 to £1500 a year by the adoption of this plan, and their Horses have got in much better condition within a month by 30 per cent.

I remain, Sir, respectfully, your very obedient Servant.

MARY WEDLAKE.

A Book on Feeding, 4th Edit., 1s.; also Book on Bread-Making at Home, cheap and pure, 1s., post free, returned to purchasers.

Oat-Crushers and Chaff-Cutters from 55s. to £10.

Royal College of Surgeons in Ireland.

SCHOOL OF SURGERY—Session 1856-7. The Dissecting Rooms will be opened on the 1st of October, and the Lectures will commence on the 27th.

Anatomy and Physiology—DR. JACOB.
Descriptive Anatomy—DR. POWER and DR. BEVAN.
Surgery—MR. PORTER and MR. HARGRAVE.
Practice of Medicine—DR. BENSON.
Chemistry—DR. BARKER.
Materia Medica—DR. WILLIAMS.
Midwifery—DR. BEATTY.
Medical Jurisprudence—DR. GEOGHEGAN.
Practical Chemistry—DR. BARKER.
Comparative Anatomy—DR. JACOB.
Botany—DR. MITCHELL.
Military Surgery—MR. TUFFNELL.
Logical Science—JOHN MURRAY, A.M., LL.D.

The Fee for each of the above Courses is Two Guineas, except Comparative Anatomy, which is free, and Military Surgery, which is Three Guineas.

Dissections under the direction of the Professors of Anatomy, assisted by the Demonstrators, Messrs. Hargrave, Morgan, and Mapother.

THE SUMMER SESSION

Will commence in April and terminate in July.

For further information, application to be made to any of the Professors, or to the Registrar.

By order, JOHN BRENNEN, Registrar.

City of Dublin Hospital.—The

Course of Practical, Medical, and Surgical Instruction in this Hospital will commence on the 1st of October.

The Clinical Lectures will be delivered on three days in each week during the Session, by Dr. Jacob, Dr. Benson, Mr. Hargrave, Mr. Williams, Dr. Geoghegan, and Mr. Tuffnell; and on Diseases Peculiar to Women and Children, by Dr. Beatty. Dr. Jacob's Clinical Lectures on Diseases of the Eye, illustrated by the Cases in the Hospital, are open to the Pupils in attendance.

Sir Henry Marsh, Sir Philip Crampton, Mr. Cusack, Dr. Apjohn, and Mr. Porter, give their assistance in cases requiring consultation.

The certificates of attendance are received as qualification by all the Colleges, Halls, and Boards.

DISEASES OF THE EYE.

DR. JACOB WILL DELIVER A FULL COURSE OF LECTURES on the Anatomy, Physiology, and Optical Mechanism of the Eye, during the ensuing Session, in the College of Surgeons; and also a Separate Course on its Pathology and Diseases, with the Operations required in their treatment, in the City of Dublin Hospital.

Diabetes.—Bran Biscuits made from

the receipt of a London Physician, which he has recommended in many cases of Diabetes, as a substitute for Wheaten Bread, with great success. Manufactured only by T. SMITH, Biscuit Baker, Gower Street North, Euston Square.

. Orders by Post promptly attended to.

W. F. Durroch, Surgical Instrument

Maker to the Royal Navy and Greenwich Hospital.

W.F.D. begs to inform the Profession that he continues to MANUFACTURE SURGICAL INSTRUMENTS of every description, and that he has attained the highest reputation by the approval and patronage of the most eminent practitioners and lecturers for the improvements made in various articles. Gentlemen favouring him with their orders may rely on having their instruments finished in the best and most modern style. Established 1748. No. 2, New Street, St. Thomas' Street (near the Hospital), in Southwark.

Superior Dissecting Instruments, and equally moderate in price, well worth the inspection of the student.

BY HER MAJESTY'S ROYAL LETTERS PATENT.

Major's Remedies for the Horse, the

best and most effectual ever discovered, superseding the "burning iron" and the torture of the "cautery".

MAJOR'S BRITISH REMEDY, for the Cure of Ringbone, Spavins, Splints, etc. Price £1 15s.

MAJOR'S RESTORATIVE and INFLUENZA DRINKS. Now in extensive use for recovering young and debilitated Horses. Price per Bottle, containing Six Drinks, 10s. 6d.; with Twelve ditto, 17s. 6d.

MAJOR'S SYNOVITIC LOTION (the Remedy, No. 2), for Grogginess, Weak Joints, Sprains of the back Sinews, Ruptures of the Sheaths of Tendons, Suspensory Ligaments, Shoulder Lameness, and Inflammation; also for the Cure and Prevention of Breaking Down, etc.—In Bottles, large size, £1 1; small, 10s. 6d. each. The above invaluable remedies can now be forwarded to any part of the United Kingdom. Prepayment by Cheque or Post-order, payable to Joseph Major, Charing Cross.

Address.—J. MAJOR, HORSE INFIRMARY, BRITISH YARD, COCK-SPUR STREET.
