## THE IMPROVED SUSPENSORY BANDAGE.

MR. BOURJEAUD, in submitting the accompanying Diagrams, presents his best thanks to the Members of the Medical Profession for their unceasing support of his invention of the Spiral Elastic Compression Principle in Surgical Appliances, and for the continuance of recommendations in all parts of the kingdom. At the same time, he feels it incumbent upon him to remind his friends, that this Invention was registered by him in February 1848, and, immediately after, advertised in the Medical Journals; thus affording an undeniable contradiction to the assertions of the appropriators of his principle, who have never appeared till within the last three and a half years, and yet style themselves Patentees, Registrars, etc., of the Spiral Principle. Mr. B. having served as Surgeon in the French Navy has had great experience in bandaging; he has likewise been established eleven years in London, confining his attention entirely to cases indicating the necessity of compression; and begs leave to state that it is his firm impression that Patients should have the assistance of their Medical Attendants whenever the Spiral Elastic Bandages are applied, or otherwise should be attended by himself, as it must be admitted to be exceedingly hazardous for the suffering to entrust their limbs or cases of Hernia to persons totally ignorant of anatomical or physiological laws.

Mr. B. begs to state that he has very much enlarged his Manufactory, and is prepared to supply these valuable appliances, wholesale and for exportation, 39 per cent. lower than the imitations.
