On Obscure Diseases of the Brain
and DISORDERS of the MIND: their Incipient Symptoms, Pathology, Diagnosis, Treatment and Prophylaxis.

By FORBES WINSLOW, M.D., D.C.L. Oxon., etc.

"Insanity is now no more incurable than half the physical diseases that afflict mankind. This change has been wrought by the humane labours and the genius of Pinel and his followers, of whom Dr. Forbes Winslow is perhaps the most illustrious. Dr. Winslow seeks to trace the steps by which cerebral disease advances, from its first dawn until the time comes when the lurid light of insanity shines out with a horrible and unmistakable glare, before which the torch of reason pales and is extinguished. This work is rich in the fruits of a great experience, reasoned with the subtle logic of an able dialectician, and pregnant with the honesty of a Christian philosopher."

Lichen Islandicus, or Iceland Moss
C O C O A.

Manufactured by DUNN & HEWETT, London.
Strongly recommended by the Faculty in all cases of Debility, Indigestion, Consumption, and all Pulmonary and Chest Diseases.

The two articles here combined are well known for their nutritive qualities. The Moss contains a large portion of nitrogen, or flesh-producing substance: and being prepared by a very careful and peculiar process, which frees it from all the grittiness and disagreeable flavour which are always so unpleasant, is rendered perfectly pure, with nothing but the beneficial parts left.

The Cocoa, containing more nutriment than most articles of food, being combined with the Moss, forms in this mixture an article of the greatest importance to the Invalid, and at the same time beneficial to the healthy and robust, restoring health where it is declining, and retaining it where already enjoyed.

Testimonial from A. H. HASSALL, Esq., M.D.

"I have carefully examined, both microscopically and chemically, the preparation of Iceland Moss and Cocoa made by Messrs. Dunn and Hewett: I find it to be carefully manufactured with ingredients of the first quality.

"The combination of Iceland Moss and Cocoa forms a valuable article of diet, suited equally for the robust and for invalids, especially those whose digestion is impaired. It is very nutritious, of easy digestibility, and it possesses, moreover, tonic properties." (Signed) A. H. HASSALL, M.D.
