PULVIS JACOBI VER, NEWBERY'S.

GENTLEMEN,—We beg to call your attention to the following paragraph by "J. Cheyne, M.D., Physician to the Hardwicke Fever Hospital, Dublin, in his paper on the virtues of James' Powder in the Apoplectic Diathesis:"—

"She began a course of James' Powder in the latter end of September: the first night she took only two grains, and every succeeding night an additional half grain, till the dose amounted to twenty grains. She took twenty grains every night for five weeks, when she found herself so well that she discontinued the medicine."—"Dublin Hospital Reports," vol. 1. p. 319.

To secure the dispensing of the *original* preparation, which, for 114 years, has been sold by the Newbery family in St. Paul's Churchyard, it is necessary to prescribe it as "Pulvis Jacobi Ver, Newbery's," otherwise another article (wanting in the best properties, and recommended to be given in a different code of dose, though called by the same name), will be substituted for the original medicine. This, of course, cannot but have an effect other than that expected, and will thereby lead the practitioner totally to discard it from his daily Pharmacopœia, as a preparation whereon no dependance can be placed. We hope the above extract will prove that when the genuine medicine is used, faith may be reposed in it.—Yours faithfully,

F. NEWBERY & SONS.

Lichen Islandicus, or Iceland Moss COCOA.

Manufactured by DUNN & HEWETT, London. Strongly recommended by the Faculty in all cases of Debility, Indigestion, Consumption, and all Pulmonary and Chest Diseases.

The two articles here combined are well known for their nutritive qualities. The Moss contains a large portion of nitrogen, or flesh-producing substance: and being prepared by a very careful and peculiar process, frees it from all the grittiness and disagreeable flavour which are always so unpleasant, is rendered perfectly pure, with nothing but the beneficial parts left.

The Cocoa, containing more nutriment than most articles of food, being combined with the Moss, forms in this mixture an article of the greatest importance to the Invalid, and at the same time beneficial to the healthy and robust, restoring health where it is declining, and retaining it where already enjoyed.

Testimonial from A. H. HASSALL, Esq., M.D.
 "I have carefully examined, both microscopically and chemically, the preparation of Iceland Moss and Cocoa made by Messrs. Dunn and Hewett: I find it to be carefully manufactured with ingredients of the first quality.

"The combination of Iceland Moss and Cocoa forms a valuable article of diet, suited equally for the robust and for invalids, especially those whose digestion is impaired. It is very nutritious, of easy digestibility, and it possesses moreover, tonic properties." (Signed) A. H. HASSALL, M.D.
