ANONYMOUS CORRESPONDENTS should always enclose their names to the Editor; not for publication, but in token of good faith. No attention can be paid to communications not thus authenticated.

To CONTRIBUTORS. The Editor would feel glad if Members of the Association and others, would cooperate with him in establishing as a rule, that in future no paper for publication shall exceed two pages of the Journal in length. If the writers of long communications knew as well as the Editor does, that lengthy papers always deter the reader from commencing them, still more than of wit.

ARTIFICIAL LIMBS.—BY ROYAL LETTERS PATENT.

John Newling, 65, Park Street,

Grosvenor Square, W., solicits the notice of the Profession to his improved Artificial Limbs; being secured by Royal Letters Patent, cannot be had of any other makers.

The material is a preparation entirely new. The joints are so constructed as to cause little friction. The large springs ordinarily used as tendons are superseded by a simple contrivance, giving more natural action, and thereby avoiding all liability to derangement.

For below knee amputations, this invention claims great superiority, as short stumps set at right angles can be fitted to perfect advantage, in fact forms the best bearing for an Artificial Leg.

Bucket and other Legs, Arms, Crutches, Elastic Stockings of superior manufacture, Belts, Trusses on improved principles, etc. etc.
