Patent Corn Flour.—Brown and

POISON'S PATENT CORN FLOUR, for most delicious preparations, Custards, Blancmange, Puddings, Cakes, and for all the purposes of the best Arrowroot, and the most wholesome diet for Infants and Invalids.

Sold by Grocers, Chemists, etc., in 1 lb. Packets, with Recipes, at 8d.

74, Wimpole Street, Cavendish Square, May 11th, 1858.

I have carefully examined, both chemically and microscopically, samples of the Patent Corn Flour of Messrs. Brown and Polson, of Paisley. One of these was submitted to me by the Agents, while others were procured by myself for my own satisfaction, from retail vendors of the article: I found it to consist in all cases exclusively of the granules or flour of Indian Corn. This preparation is a great favourite with me, and I confidently recommend it for all the purposes for which arrowroot is applicable; I have invariably found it to give great satisfaction, and generally to be much preferred to arrowroot. It possesses a particularly pleasant flavour, far more agreeable than that of arrowroot, is light, wholesome, and of easy digestibility. The Patent Corn Flour of Messrs. Brown and Polson is prepared most carefully, and is superior to anything brought under my notice for similar purposes.

The Laboratory, London Hospital, May 14th, 1858.

The Patent Corn Flour of Messrs. Brown and Polson, of Paisley, having come under my notice, I have examined its chemical and dietetical properties, and I find it to be pure farina of Indian corn. It is remarkably free from all impurities, and a very wholesome and palatable article of diet.

HENRY LETHBRIDGE, M.B.,

Professor of Chemistry and Toxicology in the Medical College of the London Hospital, and Officer of Health for the City of London.

Royal College of Chemistry, Liverpool, Oct. 28th, 1857.

I have made a careful analysis of Brown and Polson's Indian Corn Flour, which I purchased at a respectable grocer's in this town. Without the slightest hesitation, I pronounce it to be perfectly pure and wholesome, and quite equal, if not superior to arrowroot. It has been made into puddings, etc., under my inspection; and, although analysis proved it to be a most beautiful preparation, still the culinary results far exceeded my expectations. On incineration, it only yielded about a quarter per cent. of inorganic salts.
