SURCONJUNCTIVAL OPERATION FOR SQUINT. It would be gratifying if Mr. Solomon would explain the source of the difficulties he refers to, and the means by which they may be overcome.—PHILOPHTHALMOS.

THE IMPROVED SUSPENSORY BANDAGE.

This is the most efficacious and elegant apparatus hitherto devised; the different elastic parts composing it are so yielding, that the patient can, without discomfort, indulge in any movements, or place himself in any position. MR. BOURJEAUD is the Sole Inventor of this Suspensory Bandage, and warns the profession against spurious imitations, announced without regard to commercial fairness.
