Lancet.—"By great care, and by the use of an
amazing amount of material, he has accomplished
what many readers have been waiting for, giving
us a complete account of the diagnosis, prognosis,
and treatment of heart diseases by modern methods
in association with all the invaluable teaching be-
queathed to us by the older masters of clinical
observation."

Dublin Medical Journal.—"It is probably des-
tined to take the place in the library of the present
day physician that was occupied some twenty or
more years ago by Sir W. Broadbent's well-known
work."

Midland Medical Review.—"It is impossible to
enumerate the many excellencies of this book."
