No. 3353.

SATURDAY, APRIL 4, 1925.

Price 1/3

Owing to the Easter Holidays, all communications and advertisements intended for insertion in our issue dated APRIL 11th, should be received not later than MONDAY morning, April 6th.

THE IDEAL SALINE

OF all classes of drugs, saline laxatives are still prescribed with the greatest frequency. In spite of the many additions to the *armamentarium therapeutikum*, these continue to hold their place; for experience has shown that for their special purpose no other preparation can efficiently replace them. The mere removal of intestinal accumulation is by no means their only effect.

Certain valid objections to ordinary mineral salts have been raised; the most notable being on account

of their unpleasant taste and their irritating effect on the intestinal mucosa.

ENO's "Fruit Salt" is free from these objections. It is agreeable to the palate, uniform in its composition (physical as well as chemical), and quite free from the harsh sulphates of sodium and magnesium. It is gently laxative, causing none of that violent and painful peristalsis, with excessive secretion of mucus, which is so distressing to the patient and obstructive to his recovery.

THE Proprietors of ENO's "Fruit Salt" will deem it a privilege to send to any member of the Medical Profession, for his personal use, a bottle (Handy or Household size, as desired) of their preparation, with a copy of

"THE PRACTITIONER'S POCKET BOOK"

This little volume embodies in a concise form many practical axioms of interest and use to the practitioner, numerous legal points of great importance to every doctor, and the essentials of the chief procedures involved in general practice pathology. Bound in morocco limp.
