Parathyroid in the Treatment of Sprue

Parathyroid Gland Tablets (P., D. & Co.)

Each containing either 1/20 grain
(3.2 mgm.) or 1/10 grain (6.5 mgm.)
of desiccated substance.

In bottles of 25 or 100 tablets.

Parathyroid and Calcium Tablets (P., D. & Co.)

Each containing 1/40 grain (1.6 mgm.)
of desiccated parathyroid gland and
5 grains (325 mgm.) of calcium
lactate.

In bottles of 25 or 100 tablets.

Calcium Lactate Tablets (P., D. & Co.)

Each containing 5 grains (325 mgm.)
or 10 grains (650 mgm.).

In bottles of 100 or 1000 tablets.

FURTHER reports of the success attending the administration of parathyroid and calcium in the treatment of Sprue are given in the *British Medical Journal*, August 23rd, 1924. In such cases it is obviously essential that only genuine parathyroid preparations should be used. The precautions taken by Parke, Davis & Co. in the manufacture of Parathyroid Tablets enable them to guarantee that at least 90 per cent. of the desiccated substance employed is parathyroid tissue.

Parathyroid medication is also indicated in:—

CHRONIC ULCERATION (varicose, gastric, duodenal).
DISEASES OF THE NERVOUS SYSTEM (chorea, epilepsy, tetany).
VASOMOTOR NEUROSES (Raynaud's disease, angioneurotic
cedema).
DISTURBED ENDOCRINE FUNCTION (osteomalacia, hyper-
thyroidism).

Our booklet — "Parathyroid Therapy" — will be sent
post free to any medical practitioner on request.
