## An Effective Vitamin Preparation

METAGEN & COD-LIVER OIL EMULSION contains both the fat-soluble vitamins, A. and D., of the finest Norwegian cod-liver oil, and also Metagen, which is a concentrated extract of water-soluble and fat-soluble vitamins from vegetable sources. Both constituents of the emulsion being *physiologically tested*, a definite, high vitamin content is assured, whilst the fresh eggs with which the oil is emulsified add to its nutritive value.

The administration of this emulsion is indicated in disorders of nutrition, varying from pallor to rickets and marasmus. It frequently produces astonishing improvement in children outgrowing their strength. Its reconstructive tonic properties are of great benefit during convalescence from exhausting diseases, and also in pregnancy and lactation.

 Supplied in bottles of 8 and 16 ounces   
A specimen will be sent to physicians on request
