## Vitamins

**W**ATER-SOLUBLE and fat-soluble vitamins are presented in therapeutically active form in Metagen and Cod-Liver Oil Emulsion (P., D. & Co.). The Cod-Liver Oil used in this Emulsion is specially selected on account of its high vitamin content which is verified by physiological tests, and it is reinforced by the addition of the water-soluble vitamins of Metagen.

A deficiency of vitamins has been shown to predispose to many infectious

diseases occurring in adult-life, as well as to rickets, dental caries, marasmus and other disorders of childhood.

Not only the fat-soluble, but also the water-soluble vitamins must be supplied in adequate amounts in order to maintain bodily processes in healthy activity and to promote general health and well-being. Metagen and Cod-Liver Oil Emulsion contains these vitamins in a palatable form ready for immediate assimilation.

## Metagen and Cod-Liver Oil EMULSION

Supplied in bottles of 8 and 16 fl. ozs. A sample will be sent on request.
