## AMPOULES PITUITARY (POSTERIOR LOBE) EXTRACT VITRULE BRAND

STANDARDISED ACCORDING TO THE INTERNATIONAL UNIT METHOD  
 EACH C.C.M. IS EQUAL TO 10 UNITS.

The need of a standardised product for use in the treatment of uterine inertia and post-partum haemorrhage has long been recognised by obstetricians, and the international unit standard safeguards against any variation in potency or activity.

The Carnrick product is assayed before and after sterilisation and after filling in ampoules. The solution is of constant and dependable activity, and it is supplied in  $\frac{1}{2}$  c.cm. and 1 c.cm. ampoules packed in boxes of 6 and 100.

*Further information on this subject and a sample of the product will be sent to members of the medical profession, on request.*
