Syrup Cocillana Comp.

(Parke, Davis & Co.)

SYRUP Cocillana Compound, P., D. & Co., is particularly effective in the hard, dry cough, with scanty expectoration, that always characterises the early stages—and occasionally the subacute and chronic stages—of laryngeal and bronchial inflammation. It soothes inflamed mucous membrane, promotes dislodgment of indurated mucus, restores tone to the bronchi and relieves dyspnoea. It does not disturb the appetite or cause constipation.

Each fluid drachm contains:—

Tincture of Cocillana 5 mins.	Fluid Ext. of Squill 1/4 min.
Tincture of Euphorbia Pilulifera	15 mins.	Fluid Ext. of Senega 1/4 min.
Syrup of Wild Lettuce 15 mins.	Tartarated Antimony 1/184 gr.
Cascarin, P., D. & Co. 1 gr.	Menthol 1/100 gr.
Diamorphine Hydrochloride 1/24 gr.		

Syrup Cocillana Compound, P., D. & Co., contains 0.07% of diamorphine and is supplied, for dispensing purposes only, in bottles of 4, 8, 16 and 80 fl. ounces.
