Vitamin Therapy *a record of progress*

1924

OSTELIN LIQUID. The Glaxo Laboratories introduced "Ostelin"—the pioneer British concentrate of vitamin D. To-day all Ostelin preparations, liquid, tablets, emulsion, etc., are made from Calciferol G.L.—pure crystalline vitamin D.

1928

ADEXOLIN CAPSULES. The Glaxo Laboratories introduced Adexolin Capsules. Each three minim capsule contains vitamins A and D equivalent to that present in 10 grams of high-grade cod-liver oil. The vitamins are present in the proportions natural to cod-liver oil.

1932

ADEXOLIN LIQUID. The Glaxo Laboratories introduced a practically tasteless concentrate of vitamins A and D. Adexolin Liquid has twenty times the vitamin potency of high-grade cod-liver oil. This concentration was chosen to permit of the greatest flexibility of dosage. It is adapted ideally to administering the smallest prophylactic or largest therapeutic dose of these vitamins.
