C I B A

The advantages of

Esidrex

(hydrochlorothiazide, a product of CIBA research)

For oedema and hypertension

Highest potency—low dosage.

Fully active orally—often effective where mercurials have failed.

Less risk of potassium depletion.

Almost a pure sali-diuretic.

No significant effect on urinary pH.

Low cost of treatment—averages 4d. to 1/- daily.

The dosage range is usually 25 to 100 mg. daily, taken in two doses, after breakfast and after lunch.

Tablets of 25 mg. and 50 mg.* hydrochlorothiazide in 25's, 100's and 500's.

*Available shortly.

Esidrex is a registered trade mark. Reg. user

CIBA Laboratories Limited, Horsham, Sussex.
