MALCOLM MORRIS ON SKIN DISEASES. Now ready, with Illustrations, crown 8vo, 7s. 6d.

Skin Diseases: including their Definitions, Symptoms, Diagnosis, Prognosis, Morbid Anatomy, and Treatment; a Manual for Students and Practitioners.

By MALCOLM MORRIS, F.R.C.S. Edin., Joint Lecturer on Dermatology, St. Mary's Hospital Medical School; and formerly Clinical Assistant, Hospital for Diseases of the Skin, Blackfriars.

"The book is clearly and concisely written, and the subject handled in a way calculated to be readily intelligible to students."—*THE LANCET*.

"It is an extremely skilful and intelligent condensation of the essentials of dermatology; and it shows throughout the marks of careful observation, as well as well-grounded scientific study. The arrangement is systematic, the style clear, and the matter accurate. The manual possesses therefore all the essentials of sound instruction, and is likely to lead to satisfactory practice on the part of those who rely on it for their guidance."—*BRITISH MEDICAL JOURNAL*.

London: SMITH, ELDER, & Co., 15, Waterloo Place.

On the Immediate Treatment of STRICTURE of the URETHRA.

By BARNARD HOLT, F.R.C.S.,

Consulting Surgeon to the Westminster Hospital.

"Mr. Holt's method of treatment of stricture of the urethra by 'immediate dilatation' is so fully recognised and practised by surgeons of the day, that his work, in which the results of his own practice are recorded, can need no recommendation."—*Lancet*.

"This work will both spread Mr. Holt's already well-earned reputation, and—what he will value far more—will help to lessen human suffering and prolong human life."—*Edin. Med. Journal*.

London: J. & A. CHURCHILL, New Burlington Street.

"Plain, shrewd, common-sense."—*British Medical Journal*.

"This book is worthy to have reached a second edition in a very short time, as it has done. It will be found to be very practical and helpful to the student and to the general practitioner."—*The Lancet*.

"The medical practitioner will not often take up a book on a special subject the perusal of which will afford him more pleasure and satisfaction."—*Medical Press and Circular*.

"Of all the smaller text books we have recently seen this seems to us to contain the most..... The plan is novel and the book is good."—*Medical Times and Gazette*.
